

# Ultra Plus

## GUIA DE INICIO RAPIDO

### Contenido de caja

- Dispositivo
- Adaptador de corriente USB
- Cable USB
- Aurífonos
- Protector de pantalla
- Quick start guide

Los elementos que vienen con el dispositivo y sus imágenes pueden variar según la región.

### Obtener más información

Para visualizar el manual de usuario completo en su dispositivo, inicie la aplicación Ajustes y pulse Manual de usuarios.

- El manual de usuario podría no estar disponible. Según el navegador web o el proveedor de servicios
- Es posible que incurra en gastos adicionales por acceder a Internet.

9

10

### Diseño del Dispositivo

Para encender el dispositivo, mantenga presionado la tecla ENCENDIDO durante algunos segundos.

11

### Instalar tarjeta Nano-SIM, Micro-SIM y tarjeta microSD

Retire suavemente la tapa de la batería del teléfono, deslice y levante la puerta de la bandeja SIM y coloque la tarjeta SIM como se muestra en la imagen siguiente:

- Si la tarjeta no se encuentra correctamente firme en el SLOT, podría salirse o caerse del SLOT.
- Las tarjetas nano-SIM, micro-SIM y microSD se venden por separado.

12

### Cargar la batería

Antes de utilizar el dispositivo por primera vez, deberá cargar la batería.

- El cargador deberá permanecer cerca de la toma eléctrica, y deberá poder acceder a él fácilmente mientras el dispositivo se está cargando.

### Uso de la tecla de inicio

- Cuando enciende el dispositivo, la tecla inicio se muestra en la parte inferior de la pantalla como tecla programmable.

13

- Para transferir datos del anterior a un nuevo dispositivo: Inicie sesión en su cuenta de Gmail y sincronice todo su contenido.

La capacidad real disponible de la memoria interna es menor que la capacidad especificada, ya que el sistema operativo y las aplicaciones predeterminadas ocupan parte de la memoria. La capacidad disponible puede cambiar al actualizar el dispositivo.

Parte del contenido puede ser diferente del dispositivo según la región, el proveedor de servicios o la versión del software, y se encuentra a cambio sin previo aviso.

Google, Android, Gmail y otras marcas son marcas comerciales de Google Inc. Oreo es una marca comercial del grupo Mondelez International Inc.

### Información sobre seguridad

Lea toda la información sobre seguridad antes de utilizar el dispositivo a fin de garantizar el uso correcto y seguro.

- Advertencia

14

### Respeto las advertencias que figuran a continuación para evitar incidentes tales como un incendio o una explosión

- No exponga el dispositivo a impactos o daños físicos.
- Solo utilice baterías, cargadores, accesorios y suministros aprobados por el fabricante.
- Evite que el enchufe multifuso y las terminales de la batería entren en contacto con elementos conductores, como metales o líquidos.
- No encienda ni utilice el dispositivo mientras el compartimiento de la batería se encuentre expuesto.

### Respete las advertencias que figuran a continuación para evitar lastimar a otras personas o dañar el dispositivo

- Do not allow children or animals to chew or suck the device.
- Si el dispositivo tiene un flash o una luz de cámara, no lo utilice con personas o animales.
- El dispositivo se puede utilizar en lugares con temperatura ambiente entre 0 °C a 35 °C. Puede almacenar el dispositivo o exponerlo a 20 °C a 50 °C. Usar o almacenar el dispositivo fuera de los rangos de temperatura sugeridos puede ocasionar daños al dispositivo o reducir la vida útil de la batería.
- No utilice el dispositivo en un entorno caliente ni cerca del fuego.
- Cúmplase con todas las advertencias y reglamentos de seguridad al uso del dispositivo durante la operación de un vehículo.
- Para proteger los ojos, no mire la luz LED con reconocimiento de iris si está a menos de 20 cm del dispositivo.

15

- Al fin de evitar posibles daños auditivos al usar un auricular, no escuche sonidos con volumen alto durante mucho tiempo.

Para ver la información de seguridad completa, incluidas las instrucciones de eliminación de dispositivos y baterías, inicie la aplicación Ajustes y pulse Acerca de teléfono -> Información legal -> Información de seguridad.

Puede descargar e instalar la actualización del firmware para actualizar el software de su dispositivo con el servicio de firmware sobre el aire (OTA). Para comprobar la actualización del firmware, inicie la aplicación OTA Update Service y toque Actualización disponible.

16

### Información de certificación de la Tasa específica de absorción (SAR)

Su dispositivo cumple con las normas de la Comisión Federal de Comunicaciones de los Estados Unidos (FCC, por sus siglas en inglés) que limitan la exposición humana a la energía de radiofrecuencia (RF) emitida por equipos de radio y telecomunicaciones. Estas normas impiden la venta de dispositivos móviles que excedan un nivel máximo de exposición (conocida como la tasa de absorción específica o SAR) de 1.6 Watts por kilogramo. La información de SAR sobre este y otros dispositivos, visite el sitio web de la FCC [transition.fcc.gov/otet/safety/sar.html](http://transition.fcc.gov/otet/safety/sar.html).

En el uso normal, el SAR real es probable que sea mucho menor, ya que el dispositivo ha sido diseñado para emitir solo la energía RF necesaria para transmitir una señal a la estación base más cercana. Al emitir automáticamente niveles más bajos cuando sea posible, el dispositivo reduce la exposición general a la energía de RF.

La FCC ha concedido una Autorización de Equipo para este modelo de dispositivo basada en el cumplimiento de todos los niveles de SAR reportados con las pautas de exposición a RF de la FCC. Este dispositivo tiene un número de identificación: 2AD3K49G2 (Model Number: Ultra Plus F40G2) y los niveles de SAR específicos para este dispositivo se puede encontrar en el siguiente sitio web de la FCC: [www.fcc.gov/otet/sar/](http://www.fcc.gov/otet/sar/).

## QUICK START GUIDE

### Package content

- Device
- USB power adaptor
- Data cable
- Headset
- Screen protector
- Quick start guide

Items supplied with the device and their images may vary by region.

### Accessing more information

To view the full user manual on your device, launch the Settings app and tap User Manual.

- The user manual may not be available depending on the web browser or service provider.
- You may incur additional data charges for accessing the internet.

1

### Device layout

To power on the device, press and hold the Power key for a few seconds.

2

### Installing a nano-SIM and a microSD card

Gently remove the battery door from the phone, slide and lift the SIM tray door and place the SIM card as shown in the picture below:

- If the card is not firmly positioned in the tray, the card may fall out.
- SIM cards and MicroSD card are sold separately.

3

### Charging the battery

It is recommended to charge the battery until full before using the device.

### Navigation buttons

- The navigation buttons located beneath the display are active when the device screen is on.

4

- You will be provided the option to restore your data from another device when logging in to your Google account in the setup wizard, please make sure you have selected the Sync option on the device you wish to transfer the data from.

The available capacity of the internal memory may vary from the specified capacity due to the size operating system and default apps.

Content may vary on your device depending on location, service provider, or software version, and is subject to change without prior notice.

Google, Android, Gmail, and other marks are trademarks of Google LLC. Oreo is a trademark of Mondelez International, Inc. group.

5

### Safety Information

Read all safety information before using the device to ensure safe and proper use.

#### Warning

Follow the warning information provided below to prevent incidents such as fire or explosion.

- Do not expose the device to physics: impact or damage.
- Use manufacture-approved batteries, chargers, accessories, and supplies.
- Prevent the multipurpose jack and battery terminals from contacting conductive elements, such as metal or liquids.
- Do not turn on or use the device when the battery compartment is exposed.

Follow the warnings below to prevent injury to people or damage for the device.

- Do not allow children or animals to chew or suck the device.
- If the device has a camera flash or light, do not use it close to the eyes of people or animals.
- The device can be used in locations with an ambient temperature of 0 °C to 35 °C. You can store the device or reduce the battery's lifespan.
- Do not use your device in a hot environment or near fire.
- Comply with all safety warnings and regulations regarding mobile device usage while operating a vehicle.
- To protect your eyes, do not stare at the vis recognition LED light when your eyes are less than 20 cm away from the device.

6

- To prevent possible hearing damage when using a headset, do not listen to sound high volume for long periods.

To view the full safety information including device and battery disposal instructions, launch the Settings app and tap About phone -> Legal information -> Safety information.

You can download and install the firmware update to upgrade your device's software with the firmware over the-air (OTA) service. To check for the firmware update, launch the OTA Update Service app and tap Available Update.

7

### Specific Absorption Rate (SAR) certification information

Your device conforms to U.S. Federal Communications Commission (FCC) standards that limit human exposure to radio frequency (RF) energy emitted by radio and telecommunications equipment. These standards prevent the sale of mobile devices that exceed a maximum exposure level (known as the Specific Absorption Rate, or SAR) of 1.6 W/kg. SAR information on this and other model devices can be accessed online on the FCC's website through [transition.fcc.gov/otet/safety/sar.html](http://transition.fcc.gov/otet/safety/sar.html).

In normal use, actual SAR is likely to be much lower, as the device has been designed to emit only the RF energy necessary to transmit a signal to the nearest base station. By automatically emitting lower levels when possible, your device reduces your overall exposure to RF energy.

The FCC has granted an Equipment Authorization for this model device based on the compliance of all reported SAR levels with the FCC RF exposure guidelines. This device has a FCC ID number: 2AD3K49G2 (Model Number: Ultra Plus F40G2) and the specific SAR levels for this device can be found at the following FCC website: [www.fcc.gov/otet/sar/](http://www.fcc.gov/otet/sar/).

8

### **FCC Statement**

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

#### **NOTE:**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

### **SAR Information Statement**

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radiofrequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. \* Tests for SAR are conducted with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output. Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. The highest SAR value for this model phone when tested for use at the ear is 0.564W/Kg and when worn on the body, as described in this user guide, is 0.489W/Kg (Body-worn measurements differ among phone models, depending upon available accessories and FCC requirements). The maximum scaled SAR in hotspot mode is 0.508W/Kg. While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure. The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of <http://www.fcc.gov/oet/fccid> after searching on FCC ID: [2ADX3F40G2](#) Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications Industry Association (CTIA) web-site at <http://www.wow-com.com>. \* In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

**Body-worn Operation**

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 10mm must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
