1 Carphone kit

| In box Parts | Description |
|------------------------------|---|
| Car phone unit |  |
| Speaker |  |
| Microphone |  |
| Power supply and fuse Cables |  |
| Cradle with screws |  |

| Optional Parts | Description |
|-------------------------------|---|
| RF antenna |  <p>This High Efficiency Omni directional Antenna is designed for inside glass mount installations operating in the 800MHz cellular, 900 MHz trucking, 1800 MHz DCS, 1900 MHz PCS and 2100 MHz UMTS bands using included 3M /5M adhesive and supplied with 3M /5M cable and SMA male connector.</p> |
| GPS antenna |  <p>GPS active antenna</p> |
| External Auxiliary (Optional) |  <p>Auxiliary is not supplied part of the car kit. It's an optional accessories and can be provided separately.</p> |

2 Installation Diagram

3 Carphone layout

4 Preplanned Accessory Positioning

Positioning of all accessories must be planned in advance before installation begins.

- Ensure that no wire braids go through locations where Phone accessories are to be installed.
- Ensure that any parts of the handsfree Phone will not interfere with the vehicle or its accessories' operation.

4.1 Plan Phone and Cradle Positions

Note!

The best way to determine the Phone's position to the customer's full satisfaction is to locate it when the customer is beside you and obtain his/her approval.

- Please ensure the Phone's location does not interfere with the vehicle or its accessories operation: it should not interfere with opening the glove compartment or ashtray, should not prevent access to the lighter, moving the gear stick, operating the hand break etc.

Warning!

Do not install the Phone in front of the vehicle's air bag. This restriction must be adhered to, as in the case of an emergency the air bag blows up and can fail to work properly.

- Ensure the surface on which this Phone is installed is sufficiently strong to carry the weight and pressure which would be exerted on it.
- When selecting the Phone's location, please ensure the control cable connected to it does not interfere with the vehicle or its accessories' operation.
- Ensure it is safe and convenient to operate the Phone and read the display **from the driver's seat.**
- Ensure the Phone would be protected from direct sunlight and humidity (air conditioner openings).
- Ensure the Phone would be protected from mechanical damage by the car's accessories.

4.2 Plan the Microphone's Position

- Install the handsfree Phone's microphone 30-40 cm away from where the driver speaks when he/she is in their normal driving position.
- It is recommended to install the microphone inbetween car roof and windscreen glass and away from external sources of noise.
- Install the microphone in a different direction than the speaker so as to avoid echo.

4.3 Plan the Speaker's Position

| | |
|---|---|
|  Note! | The speaker and microphone (installed inbetween car roof and windscreen glass above the driver) must face different directions. |
|---|---|

| | |
|---|---|
|  Note! | Do not hide the speaker inside the dash board. If you cover it, sound quality will be lowered. |
|---|---|

- Locate the speaker at the right side of the main console, at the front of the console, in a location where it would not bother the driver or passengers but would sound best.

5 Installing the Cradle and Phone

Carphone unit

Cradle

Adjustable bracket

5.1 Where to Position (Reminder)

Note!

The best way to determine the Phone's position to the customer's full satisfaction is to locate it when the customer is beside you and obtain his/her agreement.

- Please ensure the Phone's location does not interfere with the vehicle or its accessories operation: it should not interfere with opening the glove compartment or ashtray, should not prevent access to the lighter, moving the gear stick, operating the hand break etc.

Warning!

Do not install the Phone in front of the vehicle's air bag. This restriction must be adhered to, as in the case of an emergency the air bag blows up and can fail to work properly.

- Ensure the surface on which this Phone is installed is sufficiently strong to carry the weight and pressure which would be exerted on it.
- When selecting the Phone's location, please ensure the control cable connected to it does not interfere with the vehicle or its accessories' operation.
- Ensure it is safe and convenient to operate the Phone and read the display **from the driver's seat.**

- Ensure the Phone would be protected from direct sunlight and humidity (air conditioner openings).
- Ensure the Phone would be protected from mechanical damage by the car's accessories.

5.2 Installing the Cradle and Phone

1. Disassemble the cradle into its two parts.
2. Install one of the cradle parts in the determined location in the car with 4 tin screws.

Note!

If you are not able to locate the cradle properly, please use a adjustable bracket from the station inventory.

3. Install the second cradle part on the handsfree Phone, using the 4 philips screws provided with this kit.

Note!

Only use the original screws provided with this kit.

4. Connect the two cradle parts.
5. Direct the control cable coming out of the Phone behind the car panel.

The microphone is provided with a clip which makes it possible to install it inbetween the car roof and windscreen glass.

5.3.1 Where to Locate the Microphone (Reminder)

- Install the handsfree Phone's microphone 30-40 cm away from where the driver speaks when he/she is in their normal driving position.
- It is recommended to install the microphone inbetween car roof and windscreen glass and away from external sources of noise.
- Install the microphone in a different direction than the speaker so as to avoid echo, and ensure there is a distance of at least 1.5 meters between them.

5.3.2 Installing the Microphone

1. Using the clip, install the microphone inbetween the car roof and windscreen glass.
2. Direct the microphone cable along the roof, behind it, so as not to be seen.
3. Continue directing the microphone cable along the left beam on the driver side.
4. Direct the cable under the dash board to the connection point of the cable with the control cable connected to the Phone.

Note!

Ensure the microphone cable and antenna cable are kept away from each other.

Ensure the microphone cable is not in contact and does not interfere with the car pedals and steering wheel stick.

5. Connect the microphone cable plug to the correct port on the control cable.

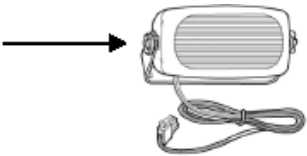

5.4.1 Where to Locate the Speaker (Reminder)

| | |
|--|---|
|  Note! | The speaker and microphone (installed inbetween the car roof and windscreen glass above the driver) must face different directions . If the speaker and microphone face each other, this will cause echo. |
|--|---|

| | |
|--|---|
|  Note! | Do not hide the speaker inside the dash board. If you cover it, sound quality will be lowered. |
|--|---|

- Locate the speaker at the right side of the main console, at the front of the console, in a location where it would not bother the driver or passengers but would sound best.

5.4.2 Installing the Speaker

1. Install the speaker at the right side of the main console, at the front of the console.
2. Disassemble the screws connecting the  speaker to the hanger.
3. Install the hanger using the 2 tin screws.
4. Direct the speaker cable behind the mat located at the bottom of the car.
5. Ensure the cable does not interfere with the vehicle or its accessories' operation.
6. Ensure the speaker cable is not exposed to damage by the passengers.

5.5 Installing the Electrical Connections

The electrical cable is provided separately from the control cable. Before installation begins, connect the four leads (which include the 2A fuses) using a red or blue crimp sleeve as appropriate.

| | |
|--|--|
|  Warning! | <p>Please note sharp edges or moving parts which may damage the wires.</p> <p>The value for the fuses provided with the kits must not be changed.</p> <p>The kit is appropriate only for a 12V vehicle.</p> <p>In case of converting any other kit model into this kit, please change the power cable.</p> |
|--|--|

The electrical cables should be directed as follows:

- So as not to disturb the driver or passengers.
- So as not to pass near the car's sharp or moving parts.

| | |
|--|--|
|  Note! | <p>The external voltage connection is located under the dash board or close to the fuse box (depending on the car model).</p> <p>In new vehicles a cellular phone connection can be found near the fuse box. See the car's user's manual under Info.</p> <p>Only use the kit's original fuses (250V / 2A).</p> |
|--|--|

The following chart covers the manner by which the voltage cable should be connected to the car's electrical system.

| Wire Color | Function | Must be connected to | Ensure |
|-----------------------------|---|--|---|
| Red Includes fuse case | To provide the handsfree Phone with fixed voltage | 12V fixed voltage An additional fuse case is provided which must be connected to a fixed voltage source (+) | Ensure a 250V / 2A fuse is used |
| Black | To provide a fixed minus (-) | Car body (minus) | Ensure the connection point is on the car body only. Use a cable shoe, tin screw and springy disc. |
| Green Includes fuse case | To turn on the cellular phone after switching the ignition on and turn it off after car ignition is switched off. | 12V-24V Ignition voltage | Determine the correct point with a voltmeter Ensure a 250V / 2A fuse is used. |

5.7 Installing RF Antenna

5.7.1 Where to Locate the Antenna

- The preferred location for the antenna is on the right side of the windshield.
- If other communication system is installed in the car, please locate the antenna as far as possible from the other phone antenna. Recommended distance is 30cm.

| | |
|---|---|
|  Note! | Some car vendors (such as Renault) feature a radiation filter on the windshield. Therefore it is necessary to install the antenna on a side or back window. |
|---|---|

| | |
|---|---|
|  Note! | In vehicles with air bags on the beam where the antenna cable passes, the antenna cable should be directed behind or beside the airbag. |
|---|---|

5.7.2 Installing the Antenna

1. Thoroughly clean the location intended for installation using a cloth and detergent. Allow the spot to dry before you continue.
2. Carefully remove the protective film from the 3M adhesive
3. Locate the antenna on the cleaned location.
4. Carefully press the antenna toward the window. Ensure all corners of the antenna are attached to the window. Chose the mounting position on the vehicle windshield according to bellow drawing.

| | |
|---|---|
|  Note! | Please keep min. 20 mm distance from metal surface. |
|---|---|

5.7.4 Installing the Coaxial Cable

1. Direct the antenna's coaxial cable along the car beam. Ensure the antenna cable does not get damaged.
2. When completing the cables installation and reaching close to the device coaxial cables SMA female connector attach both connectors together.
3. Roll the remaining cable.
4. Examine the antenna and cables properly installed.

5.8 Installing GPS Antenna

5.8.1 Where to Locate the Antenna

- The preferred location for the antenna is on the bottom right side of the dashboard

| | |
|--------------|---|
| Note! | In vehicles with air bags on the beam where the antenna cable passes, the antenna cable should be directed behind or beside the airbag. |
|--------------|---|

5.8.2 Installing the Antenna

1. Thoroughly clean the location intended for installation using a cloth and detergent. Allow the spot to dry before you continue.
2. Carefully remove the protective film from the 3M adhesive
3. Locate the antenna on the cleaned location.
4. Carefully press the antenna toward the dashborad. Ensure all corners of the antenna are attached to the dashboard.

5.8.3 Possible positions

5.8.4 Installing the Coaxial Cable

5. Direct the antenna's coaxial cable along the car beam. Ensure the antenna cable does not get damaged.
6. When completing the cables installation and reaching close to the device coaxial cables SMA female connector attach both connectors together.
7. Roll the remaining cable.
8. Examine the antenna and cables properly installed.

See SIM card installation position:

Note!

Insert the SIM card when the phone is off.

6 Trouble Shooting

| Symptom | What to Check | What to Do |
|--|---|--|
| No reception | Check whether connector is correctly connected to the cable – use an efficiency meter | Replace connector |
| | Check if internal and external antenna base is correctly attached | Attach antenna base |
| | Check proper working order of antenna cable | Replace antenna cable |
| Other party cannot be properly heard | Check speaker's proper working order | Replace speaker |
| | A Phone problem may exist | Replace Phone |
| | Check speaker location | Change location |
| User is not heard by the other party | Check microphone and contacts | Tighten microphone connector to the Phone |
| | Check routing of microphone cable | Change routing of microphone cable |
| | Check microphone's proper working order | Replace microphone |
| | A Phone problem may exist | Replace Phone |
| Noise is heard | Ask whether noise always occurs in specific geographical areas | Explain that reception trouble sometimes occurs in transition between coverage areas |
| | Ask whether noise occurs when window is open | Explain that the Phone is an amplifying system that receives all environmental noise, and therefore it is preferable to speak with a closed window |
| | Check whether microphone and antenna are installed on the same side | If they are, install microphone as per the instructions |
| | Check whether eye contact exists between speaker and microphone | If it does, change location accordingly |
| | Check for improper voltage connection – check whether voltages are connected as per instructions | Change voltage source in accordance with instructions |
| Phone switches on and off by itself | Check minus (-) connection | Black wire: connect minus to car body |
| | Check voltage contacts | Tighten loose contacts |
| Phone switches on and off by itself | Check fuse. Check connection to voltage source (green cable) | Replace fuse. Tighten connection to voltage source. Ensure a 250V / 2A fuse is used |
| Phone does not switch off after switching off car | Check connection to power source (green cable) | Tighten connection to power source |
| Phone does not switch off after switching off car | Check connection to power source. Check fuse (red cable) | Replace fuse. Tighten connection to power source |

Finding IMEI code

1. Type code *#06#
2. Find locking code *5625#

Telit RS User Guide

989889789789 Rev.2 - YYYY-MM-DD

1. General Info

1.1. Safety Information

IMPORTANT: Read the following precautions carefully to avoid dangerous situations and to ensure ideal performance of your Telit RS car phone.

| | |
|---|--|
|  | <p>Pacemakers The Health Industry Manufacturers Association recommends that a minimum separation of 6 inches (15 centimeters) be maintained between a wireless phone's antenna and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research by and recommendations of Wireless Technology Research. Persons with pacemakers:</p> <ul style="list-style-type: none"> • Should ALWAYS keep the phone more than 6 inches (15 centimeters) from their pacemaker when the phone is turned ON. • Should turn the phone OFF immediately if you have any reason to suspect that interference is taking place. <p>Other Medical Devices If you use any other personal medical device, consult the manufacturer of your device to determine if it is adequately shielded from external RF energy. Your physician may be able to assist you in obtaining this information. Turn your phone OFF in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may be using equipment that could be sensitive to external RF energy.</p> |
|  | <p>Blasting Areas To avoid interfering with blasting operations, turn your Telit RS car phone OFF when in a "blasting area" or in areas posted: "Turn off two-way radio." Obey all signs and instructions.</p> |
|  | <p>Potentially Explosive Atmospheres Turn your phone OFF, and obey all signs and instructions. Sparks from your battery in such areas could cause an explosion or fire resulting in bodily injury or even death. Areas with a potentially explosive atmosphere are often but not always clearly marked. They include: fueling areas such as gasoline stations; below deck on boats; fuel or chemical transfer or storage facilities; areas where fuel odors are present (for example, if a gas/propane leak occurs in a car or home); areas where the air contains chemicals or particles, such as grain, dust, or metal powders; and any other area where you normally would be advised to turn off your vehicle engine.</p> |
|  | <p>Electronic Devices Most modern electronic equipment is shielded from RF signals. However, certain equipment may not be shielded against the RF signals from your wireless phone.</p> |
|  | <p>Posted Facilities Turn your phone OFF in any facility where posted notices so require.</p> |
|  | <p>Service and Repairs If you have questions or need assistance, you may refer to the Warranty supplied with the purchase of this product.</p> |
|  | <p>For Vehicles Equipped with an Air Bag An air bag inflates with great force. Do NOT place objects, including either installed or portable wireless equipment, in the area over the air bag or in the air bag deployment area. If</p> |

RS 900/2100

This product integrates the HE863-EUR 2G/3G module (FCC ID: RI7HE863EU). The HE863-EUR module is granted with a modular approval for mobile applications. Integration has been done meeting the following conditions:

4. At least 20cm separation distance between the antenna and any person body is maintained at all times.
5. To comply with FCC regulations limiting both maximum RF output power and human exposure to RF radiation, the maximum antenna gain including cable loss in a mobile only exposure condition does not exceed 4.2 dBi.
6. The HE863-NAR antenna is not co-located with any other antennas.

1.6. Industry Canada Notice to Users

Operation is subject to the following two conditions: (1) This device may not cause interference and (2) This device must accept any interference, including interference that may cause undesired operation of the device. See RSS-GEN 7.1.5.

1.7. European Union Directives Conformance Statement

1999/5/EC Directive

The RS 900/2100 and RS 850/2100 car kit cellular/gps/bluetooth have been evaluated against the essential requirements of the 1999/5/EC Directive.

| | |
|------------|--|
| Bulgarian | С настоящето TELIT COMMUNICATIONS S.P.A. декларира, че car kit cellular/gps/bluetooth отговаря на съществените изисквания и другите приложими изисквания на Директива 1999/5/EC. |
| Czech | TELIT COMMUNICATIONS S.P.A. tímto prohlašuje, že tento car kit cellular/gps/bluetooth je ve shodě se základními požadavky a dalšími příslušnými ustanoveními směrnice 1999/5/ES. |
| Danish | Undertegnede TELIT COMMUNICATIONS S.P.A. erklærer herved, at følgende udstyr car kit cellular/gps/bluetooth overholder de væsentlige krav og øvrige relevante krav i direktiv 1999/5/EF. |
| Dutch | Hierbij verklaart TELIT COMMUNICATIONS S.P.A. dat het toestel car kit cellular/gps/bluetooth in overeenstemming is met de essentiële eisen en de andere relevante bepalingen van richtlijn 1999/5/EG. |
| English | Hereby, TELIT COMMUNICATIONS S.P.A., declares that this car kit cellular/gps/bluetooth is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC. |
| Estonian | Käesolevaga kinnitab TELIT COMMUNICATIONS S.P.A. seadme car kit cellular/gps/bluetooth vastavust direktiivi 1999/5/EÜ põhinõuetele ja nimetatud direktiivist tulenevatele teistele asjakohastele sätetele. |
| German | Hiermit erklärt TELIT COMMUNICATIONS S.P.A., dass sich das Gerät car kit cellular/gps/bluetooth in Übereinstimmung mit den grundlegenden Anforderungen und den übrigen einschlägigen Bestimmungen der Richtlinie 1999/5/EG befindet. |
| Greek | ΜΕ ΤΗΝ ΠΑΡΟΥΣΑ ΤΗΛΙΤ COMMUNICATIONS S.P.A. ΔΗΛΩΝΕΙ ΟΤΙ car kit cellular/gps/bluetooth ΣΥΜΜΟΡΦΩΝΕΤΑΙ ΠΡΟΣ ΤΙΣ ΟΥΣΙΩΔΕΙΣ ΑΠΑΙΤΗΣΕΙΣ ΚΑΙ ΤΙΣ ΛΟΙΠΕΣ ΣΧΕΤΙΚΕΣ ΔΙΑΤΑΞΕΙΣ ΤΗΣ ΟΔΗΓΙΑΣ 1999/5/ΕΚ. |
| Hungarian | Alulírott, TELIT COMMUNICATIONS S.P.A. nyilatkozom, hogy a car kit cellular/gps/bluetooth megfelel a vonatkozó alapvető követelményeknek és az 1999/5/EC irányelv egyéb előírásainak. |
| Finnish | TELIT COMMUNICATIONS S.P.A. vakuuttaa täten että car kit cellular/gps/bluetooth tyyppinen laite on direktiivin 1999/5/EY oleellisten vaatimusten ja sitä koskevien direktiivin muiden ehtojen mukainen. |
| French | Par la présente TELIT COMMUNICATIONS S.P.A. déclare que l'appareil car kit cellular/gps/bluetooth est conforme aux exigences essentielles et aux autres dispositions pertinentes de la directive 1999/5/CE. |
| Icelandic | Hér með lýsir TELIT COMMUNICATIONS S.P.A. yfir því að car kit cellular/gps/bluetooth er í samræmi við grunnkröfur og aðrar kröfur, sem gerðar eru í tilskipun 1999/5/EC |
| Italian | Con la presente TELIT COMMUNICATIONS S.P.A. dichiara che questo car kit cellular/gps/bluetooth è conforme ai requisiti essenziali ed alle altre disposizioni pertinenti stabilite dalla direttiva 1999/5/CE. |
| Latvian | Ar šo TELIT COMMUNICATIONS S.P.A. deklarē, ka car kit cellular/gps/bluetooth atbilst Direktīvas 1999/5/EK būtiskajām prasībām un citiem ar to saistītajiem noteikumiem. |
| Lithuanian | Šiuo TELIT COMMUNICATIONS S.P.A. deklaruoja, kad šis car kit cellular/gps/bluetooth atitinka esminius reikalavimus ir kitas 1999/5/EB Direktyvos nuostatas. |
| Maltese | Hawnhekk, TELIT COMMUNICATIONS S.P.A., jiddikjara li dan car kit cellular/gps/bluetooth jikkonforma mal-htigijiet essenzjali u ma provvedimenti oħrajn relevanti li hemm fid-Dirrettiva 1999/5/EC. |
| Norwegian | TELIT COMMUNICATIONS S.P.A. erklærer herved at utstyret car kit cellular/gps/bluetooth er i samsvar med de grunnleggende krav og øvrige relevante krav i direktiv 1999/5/EF. |

The conformity assessment procedure referred to in Article 10 and detailed in Annex IV of Directive 1999/5/EC has been followed with the involvement of the following Notified Body

Notified Body:
 AT4 wireless, S.A.
 Parque Tecnológico de Andalucía
 C/ Severo Ochoa 2
 29590 Campanillas – Málaga
 SPAIN
 Notified Body No: 1909

The Technical Construction File (TCF) relevant to the product described above is held at:

Telit Communications S.p.A
 Via Stazione di Prosecco, 5/b
 34010 Sgonico (TRIESTE)
 Italy

This equipment can be operated in the EU without restrictions.

Thus, the following marking is included in the product:

CE 1909

The full declaration of conformity can be found on the following address:

<http://www.telit.com/XXXXXX>

The use of an antenna different to the one supplied and evaluated may affect the compliance; if the antenna is changed the product with the new antenna must be assessed to demonstrate compliance with the essential requirements of the 1999/5/EC Directive. It should be noted that the assessment does not necessarily lead to testing.

1.8. Environmental and Recycling

| | |
|--|---|
|  | <p>This symbol on a Telit product means the product should not be disposed of with household waste. This requirement applies to the European Union and other locations where separate collection systems are available. Do not dispose of these products as unsorted municipal waste. By returning the products to collection you help prevent uncontrolled waste disposal and promote the reuse of material resources.</p> |
| <p>For more information about returning your obsolete product, please contact your local waste authorities or local distributor.</p> | |

2.2. Display

The following icons may appear on the top line of the screen to indicate your phone's status. Depending on your country or service provider, the icons shown on the display may vary.

| Icon | Description |
|---|--|
|  | Signal strength |
|  | Voice call in progress |
|  | Out of your service area |
|  | Normal profile activated Silent profile activated |
|  | Keypad lock activated |
|  | Voice mail received |
|  | Internet connected |
|  | 3G network |

3. Getting Started

3.1. Install your SIM card

With your phone powered off, insert the SIM card into the SIM card socket at the right side of the phone.

3.2. Power Control

When installed properly, the phone powers on and off automatically using the car's ignition switch. For manual operation press and hold the power key () until the display panel lights on/off. Enter your PIN and press  (if necessary).

3.3. Volume Control

When call is inactive, press the volume keys located on the side of the phone to set the Ring Tone Volume.

3.3.1. Call Volume

During a call, press either of the volume keys on the side of the phone to adjust the call volume.

3.3.2. Muting Microphone

During a call, press -R to mute the microphone. To Unmute the microphone, press this key again.

3.3.3. Key Volume

Press the -L →  Settings →  Sounds →  Volume →  Key Tone, and adjust the volume with the up or down keys.

3.4. Menu Access and Navigation

Use the 4-way navigation key  to navigate the menu system and change feature settings. You can navigate graphic menus in any direction – right, left, down and up. The primary movements within list menus are down and up. To change settings in list menus, navigate the datebook or edit text, you can also move left and right.

To access your phone's menus:

1. In Idle mode, press -L to access Menu mode.
2. Use the  key to scroll to a menu or option.
3. Press -L or  key to confirm the highlighted option.
4. Press -R to move up one level; Press  to return to Idle mode.

Note

When you access a menu requiring the PIN2, you must enter the PIN2 supplied with the SIM or USIM card. For details, contact your service provider.

To delete a speed dial entry

1. Press -L → →
2. Choose your speed dial entry from 2-99
3. To delete press -L →

Note

Deleting speed dial will not effect phonebook contact. while deleting a contact from the phonebook list will erase an assigned speed dial.

3.6.3. Fixed Dialing

You can restrict your outgoing calls to selected phone numbers, if this function is supported by your SIM card. To save and edit the numbers, you need the SIM PIN2 code. When you turn on fixed dialing, you can originate calls only to the numbers stored in the fixed dial list.

Turn fixed dialing on or off

1. Press -L → → → →
2. Enter your PIN2
3. Scroll with between Enable/Disable.
4. Press -L to confirm.

Once FDN is enabled you will be able to use and view only FDN list of numbers.

Use the fixed dial list

1. Press -L → → → → →
2. Enter your FDN contacts
3. Enter your PIN2
4. Press -L to confirm.

Note

Updating or editing the fixed dial list FDN status changing or update requires SIM PIN2, you must enter PIN2 supplied with the SIM or USIM card. For details, contact your service provider.

3.6.4. Hold or Mute a Call

While in call press to put all active calls on hold.

While in call press -R to mute all active calls.

3.6.5. Call Waiting

During a call, an alert will be heard indicating for second call.

Press to answer the new call.

- ♦ To switch between calls, press .
- ♦ To connect the 2 calls, use conference option.

3.6.6. Emergency Calls

Your service provider programs one or more emergency phone numbers, such as 911 or 112, so that you can call under any circumstances, even when your phone is locked or the SIM card is not inserted.

1. Press the keypad keys to dial the emergency number.
2. Press  to call the emergency number.

Note

Emergency numbers vary by country. Your phone's pre-programmed emergency number(s) may not work in all locations, and sometimes an emergency call cannot be placed due to network, environmental, or interference issues.

3.6.7. International Calls

If your phone service includes international call dialing, press and hold "0" to insert your local international access code (indicated by +). Then, press the keypad keys to dial the country code and phone number.

Phonebook

Telit RS phonebook support up to 1,000 contacts (up to 3 numbers per each contact). When you select a name from your phone book, the first number would be the contact mobile phone number. The phonebook contact list could be stored in your phone memory, or to your SIM or both. You can also copy entries from a SIM card to your car phone and from the car phone to the SIM card.

3.6.8. Storing a New Number

1. Enter the phone number and press -L → . You can choose to save it as new entry or add it to existing contact.
2. Scroll to select the type: Mobile, Home, Work.
3. Enter your contact name. You can switch the language or change to numeric under -L. Additional number can be added (Home, Work)
4. Upon completion, press  under .
5. Depends on your memory selection the contact will be stored either in phone or SIM card or both.

3.6.9. Searching for names and numbers

1. You can access the list of names and phone numbers quickly from the Idle mode by pressing -R.
2. Press the first letter of the desired name.
3. You can now view all the names stored in your contacts list which start with the selected letter. They are listed in alphabetical order.
4. Scroll with  to the desired name in the list.
5. To make a call to this person, press .
6. To end the call, press .
7. To return to Idle mode, press .

3.6.10. Phonebook Sync

Updates your phonebook with your Google's contacts list. You can update up to 1,000 entries.

While updating, the phone won't be available for use. -L →  → 

3.6.11. Memory Status

You can view your memory status by pressing -L →  → 

3.6.12. Phonebook storage

You can store either to your SIM, phone memory or both, by pressing -L →  → 

3.6.13. Copy from SIM to phone

You can copy your contacts from SIM to phone by pressing

3.7. Call Log

Telit RS displays the phone numbers of missed, received, and dialed calls and the time and date of your calls.

The phone displays missed and received calls only if the network supports these functions and if the phone is switched on and within the network's service area.

In these lists you can view up to 30 of the last calls made to your phone or received or up to 30 numbers you have last dialed. They are provided for your reference. The recently dialed item is shown at the top of the list.

- Dialed Calls are using  icon
- Received Calls are using  icon
- Missed Calls are using  icon
