MINI

Mini RF Modulator

HOW CAN THE MINI MODULATOR WORK FOR ME?

The TERK MINI modulator is a compact, inexpensive modulator that will convert any video source to VHF for viewing on your TV on either channel 3 or 4. Its low signal loss enables it to deliver excellent picture and sound quality. The MINI allows you to connect additional A/V components, such as a DVD player or a gaming system, to your TV when there are no available RCA jacks. It is the optimum modulator for anyone looking to extend the functionality of any TV without sacrificing space, price or ease of installation.

HOW CAN YOU REDUCE THE CLUTTER AROUND YOUR TV AND PROVIDE A HIGH-PERFORMANCE A/V CONNECTION?

Most common A/V devices are gaming systems and DVD players that take up space around your TV. Conventional modulators, usually set on top of your TV, can add to this disorder. Unlike other modulators, the MINI is compact; it reduces the clutter around your TV by easily mounting on your wall or entertainment center. The MINI was designed to be in-line, so that it can hang or be mounted on a vertical surface and out-of-sight. After first installation, there is no need to access the MINI again. It features automatic signal detection and automatically switches between A/V sources when a signal is detected.

KEY FEATURES:

Easy Installation

- Compact design makes the MINI easy to hide while eliminating the space of a conventional component
- Mounting slots make the MINI easy to mount on a wall or any other surface
- Double-sided adhesive allows for screwless mounting
- Automatic signal detection; once installed, the MINI requires no adjustments

Quality & Performance

- Takes A/V device's low frequency signal and converts it to a high frequency (VHF-channel 3 or 4)
- High-quality components: low signal loss for excellent picture and sound performance
- Automatic signal detection
- High-quality material: product will last through years of use

Applications

- TVs with no RCA connection
- TVs with all RCA connections used
- For consumers who want to simplify use of A/V components

SPECIFICATIONS:

Electrical Specifications:

Video carrier output
Level: 60-69.5 dB μ V
RF output
Channels: 3 or 4
Impedance: 75 ohms
Audio Input impedance: $13 \pm 3K$ ohms

Dimensions

3.18" W x 3.87" H x 1.43" D
