EQUIPMENT APPROVAL INFORMATION

Your telephone equipment is approved for connection to the Public Switched Telephone Network and is in compliance with parts 15 and 68, FCC Rules and Regulations and the Technical Requirements for Telephone Terminal Equipment published by ACTA.

1   Notification to the Local Telephone Company

On the bottom of this equipment is a label indicating, among other information, the US number and Ringer Equivalence Number (REN) for the equipment. You must, upon request, provide this information to your telephone company.

The REN is useful in determining the number of devices you may connect to your telephone line and still have all of these devices ring when your telephone number is called. In most (but not all) areas, the sum of the RENs of all devices connected to one line should not exceed 5. To be certain of the number of devices you may connect to your line as determined by the REN, you should contact your local telephone company.

Notes

* This equipment may not be used on coin service provided by the telephone company.
* Party lines are subject to state tariffs, and therefore, you may not be able to use your own telephone equipment if you are on a party line. Check with your local telephone company.
* Notice must be given to the telephone company upon permanent disconnection of your telephone from your line.

2   Rights of the Telephone Company

Should your equipment cause trouble on your line which may harm the telephone network, the telephone company shall, where practicable, notify you that temporary discontinuance of service may be required. Where prior notice is not practicable and the circumstances

* Party lines are subject to state tariffs, and therefore, you may not be able to use your own telephone equipment if you are on a party line. Check with your local telephone company.
* Notice must be given to the telephone company upon permanent disconnection of your telephone from your line.

2   Rights of the Telephone Company

Should your equipment cause trouble on your line which may harm the telephone network, the telephone company shall, where practicable, notify you that temporary discontinuance of service may be required. Where prior notice is not practicable and the circumstances warrant such action, the telephone company may temporarily discontinue service immediately. In case of such temporary discontinuance, the telephone company must: (1) promptly notify you of such temporary discontinuance; (2) afford you the opportunity to correct the situation; and (3) inform you of your right to bring a complaint to the Commission pursuant to procedures set forth in Subpart E of Part 68, FCC Rules and Regulations.

The telephone company may make changes in its communications facilities, equipment, operations or procedures where such action is required in the operation of its business and not inconsistent with FCC Rules and Regulations. If these changes are expected to affect the use or performance of your telephone equipment, the telephone company must give you adequate notice, in writing, to allow you to maintain uninterrupted service.

INTERFERENCE INFORMATION

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference; and (2) This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

* Reorient or relocate the receiving antenna (that is, the antenna for radio or television that is "receiving" the interference).
* Reorient or relocate and increase the separation between the telecommunications equipment and receiving antenna.
* Connect the telecommunications equipment into an outlet on a circuit different from that to which the receiving antenna is connected.
* Consult the dealer or an experienced radio/TV technician for help.

If these measures do not eliminate the interference, please consult your dealer or an experienced radio/television technician for additional suggestions. Also, the Federal Communications Commission has prepared a helpful booklet, "How To Identify and Resolve Radio/TV Interference Problems." This booklet is available from the U.S. Government Printing Office, Washington, D.C. 20402. Please specify stock number 004-000-00345-4 when ordering copies.

HEARING AID COMPATIBILITY

This telephone system meets FCC standards for Hearing Aid Compatibility.

US NUMBER IS LOCATED ON THE CABINET BOTTOM
REN NUMBER IS LOCATED ON THE CABINET BOTTOM

Introduction

> ⚠ **CAUTION:** When using telephone equipment, there are basic safety instructions that should always be followed. Refer to the IMPORTANT SAFETY INSTRUCTIONS provided with this product and save them for future reference.
Your cordless telephone is designed to give you flexibility in use and high quality performance. To get the most from your new cordless telephone, we suggest that you take a few minutes right now to read through this instruction manual.

> **IMPORTANT:** Because cordless phones operate on electricity, you should have at least one phone in your home that is not cordless, in case the power in your home goes out.

Before You Begin

Parts Checklist

Make sure your package includes the items shown here.

| Base | Handset | Handset battery | Mounting bracket | AC power supply | Telephone line cord |

Modular Jack Requirements

You need an RJ11C type modular phone jack, which is the most common type of phone jack and might look like the one pictured here. If you don't have a modular jack, call your local phone company to find out how to get one installed.
Digital Security System

Your cordless phone uses a digital security system to provide protection against false ringing, unauthorized access, and charges to your phone line.

When you place the handset in the base, the unit verifies its security code. After a power outage or battery replacement, you should place the handset in the base for about 20 seconds to reset the code.

WARNING: TO PREVENT FIRE OR ELECTRICAL SHOCK HAZARD, DO NOT EXPOSE THIS PRODUCT TO RAIN OR MOISTURE.

⚡	**CAUTION** RISK OF ELECTRIC SHOCK DO NOT OPEN	⚠
THE LIGHTNING FLASH AND ARROW HEAD WITHIN THE TRIANGLE IS A WARNING SIGN ALERTING YOU OF "DANGEROUS VOLTAGE" INSIDE THE PRODUCT.	CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.	THE EXCLAMATION POINT WITHIN THE TRIANGLE IS A WARNING SIGN ALERTING YOU OF IMPORTANT INSTRUCTIONS ACCOMPANYING THE PRODUCT.
	SEE MARKING ON BOTTOM / BACK OF PRODUCT	

Installation and Setup

> ⚠ **CAUTION:** Always disconnect phone cords from the wall outlets before battery installation or replacement.

> **INSTALLATION NOTE:** Some cordless telephones operate at frequencies that may cause interference to nearby TVs, microwave ovens, and VCRs. To minimize or prevent such interference, the base of the cordless telephone should not be placed near or on top of a TV, microwave oven, or VCR. If interference continues, moving the cordless telephone farther away from the TV or VCR will often reduce or eliminate the interference.
> Certain other communications devices may also use the 2.4 GHz frequency for communication, and, if properly set, these devices may interfere with each other and/or your new telephone. If you are concerned with interference, please refer to the owner's manual for these devices on how to properly set channels to avoid interference. Typical devices that may use the 2.4 GHz frequency for communication include wireless audio/video senders, wireless computer networks, multi-handset cordless telephone systems, and some long-range cordless telephone systems.

Important Installation Information

• Never install telephone wiring during a lightning storm.

MODULAR JACK REQUIREMENTS

You need an RJ11C type modular phone jack, which is the most common type of phone jack and might look like the one pictured here. If you don't have a modular jack, call your local phone company to find out how to get one installed.
DIGITAL SECURITY SYSTEM

Your cordless phone uses a digital security system to provide protection against false ringing, unauthorized access, and charges to your phone line.

When you place the handset in the base, the unit verifies its security code. After a power outage or battery replacement, you should place the handset in the base for about 20 seconds to reset the code.

	CAUTION RISK OF ELECTRIC SHOCK DO NOT OPEN	
THE LIGHTNING FLASH AND ARROW HEAD WITHIN THE TRIANGLE IS A WARNING SIGN ALERTING YOU OF "DANGEROUS VOLTAGE" INSIDE THE PRODUCT.	CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL. 	SEE MARKING ON BOTTOM / BACK OF PRODUCT	

WARNING: TO PREVENT FIRE OR ELECTRICAL SHOCK HAZARD, DO NOT EXPOSE THIS PRODUCT TO RAIN OR MOISTURE.

INSTALLATION AND SETUP

⚠️ **CAUTION:** Always disconnect phone cords from the wall outlets before battery installation or replacement.

INSTALLATION NOTE: Some cordless telephones operate at frequencies that may cause interference to nearby TVs, microwave ovens, and VCRs. To minimize or prevent such interference, the base of the cordless telephone should not be placed near or on top of a TV, microwave oven, or VCR. If interference continues, moving the cordless telephone farther away from the TV or VCR will often reduce or eliminate the interference.
Certain other communications devices may also use the 2.4 GHz frequency for communication, and, if properly set, these devices may interfere with each other and/or your new telephone. If you are concerned with interference, please refer to the owner's manual for these devices on how to properly set channels to avoid interference. Typical devices that may use the 2.4 GHz frequency for communication include wireless audio/video senders, wireless computer networks, multi-handset cordless telephone systems, and some long-range cordless telephone systems.

IMPORTANT INSTALLATION INFORMATION

- Never install telephone wiring during a lightning storm.
- Never install telephone jacks in wet locations unless the jack is specifically designed for wet locations.
- Never touch uninsulated telephone wires or terminals, unless the telephone line has been disconnected at the network interface.
- Use caution when installing or modifying telephone lines.
- Temporarily disconnect any equipment connected to the phone such as faxes, other phones, or modems.

INSTALLING THE PHONE

Your cordless telephone should be placed on a level surface such as a desk or table top, or you can mount it on a wall.

CONNECTING THE AC (ELECTRICAL) POWER

Plug the power supply cord into the power jack on the bottom of the base and the other end into an electrical outlet. The charge/in use indicator turns on to indicate the battery is charging.

Allow the phone to charge for 12 hours prior to first use. If you don't properly charge the phone, battery performance will be compromised.

> ⚠️ **CAUTION:** Use only the ATLINKS USA, Inc. 5-2527 (black) or 5-2526 (white) power supply that came with this unit. Using other adapters may damage the unit.

CONNECTING THE TELEPHONE LINE

1. Plug the one end of the telephone line cord into the jack on the back of the base and the other end into a modular wall phone jack.

2. Set the RINGER switch (on the handset front) to ON, and place handset in the cradle on the base.
> **NOTE:** The phone automatically defaults to touch-tone dialing. To change to pulse (rotary) dialing, see "Tone/Pulse Dialing." If you don't know which type of service you have, check with the phone company.

WALL MOUNTING

> **NOTE:** For best results, leave the phone on a flat surface during initial charging before you hang the phone on the wall.

1. Turn the base over.

2. Attach the wall mounting pedestal by first inserting the tabs on the open edge of the pedestal into the slots on the lower portion of the bottom of the base. Then push down and snap the pedestal into place.

3. Slip the mounting holes (on the back of the base and pedestal) over the wall plate posts and slide the unit down into place. (Wall plate not included.)

MAKING A CALL

After initial set up, put handset in the base for 12 hours to charge the battery.

The only two things you need to know to make a call are:

• Press the TALK button before you dial.

• Press TALK or place the handset in the base to hang up.

IN USE INDICATOR

The phone is ON when the TALK button/indicator on the handset is lit and the charge/ in use indicator on the base is lit.
REDIAL

Press the redial button to quickly redial the last number you called (up to 32 digits).

RECEIVING A CALL

To answer a call, you must press the TALK button before you can talk

1. Turn the base over.
2. Attach the wall mounting pedestal by first inserting the tabs on the open edge of the pedestal into the slots on the lower portion of the bottom of the base. Then push down and snap the pedestal into place.
3. Slip the mounting holes (on the back of the base and pedestal) over the wall plate posts and slide the unit down into place. (Wall plate not included.)

MAKING A CALL

After initial set up, put handset in the base for 12 hours to charge the battery.

The only two things you need to know to make a call are:

- Press the TALK button before you dial.
- Press TALK or place the handset in the base to hang up.

IN USE INDICATOR

The phone is ON when the TALK button/indicator on the handset is lit and the charge/ in use indicator on the base is lit.

REDIAL

Press the redial button to quickly redial the last number you called (up to 32 digits).

RECEIVING A CALL

To answer a call, you must press the TALK button before you can talk.

FLASH

Use the flash button to activate custom calling services such as Call Waiting or call transfer, which are available through your local phone company.

> **TIP:** If you press the TALK button to activate custom calling services such as call waiting, you'll hang up the phone. Press "flash" instead.

VOLUME

The Vol left and right arrow buttons control the volume of the handset's earpiece.

RINGER SWITCH

The handset ringer switch can be set to ON or OFF. If the switch is off, the unit will not ring.

RINGER TONE

To select the ringer tone:

1. Press and hold the program (prog) button.
2. Press 1 or 2 for Ringer Tone selection.
3. Press the program (prog) button again. You will hear a confirmation tone.
TONE/PULSE DIALING

This adjustment allows you to select tone (touch-tone) or pulse (rotary) mode dialing. The phone is automatically set for touch-tone use. To set tone or pulse dialing:

1. Make sure the phone is **OFF**.
2. Press and hold the program (prog) button until the unit beeps.
3. Press * for TONE or # for PULSE.
4. Press the program (prog) button again. You will hear a confirmation tone.

TEMPORARY TONE

This feature enables pulse (rotary) service phone users to access touch-tone services offered by banks, credit card companies, etc., by pressing the *TONE button to temporarily make the phone touch-tone compatible. To get information about your bank account, for example, you would:

1. Press the TALK button.
2. Call the bank's information line.
3. Press the *TONE button after your call is answered.
4. Follow the voice instructions to complete your transaction.
5. Hang up when finished. The phone returns to pulse (rotary) service.

PAGING THE HANDSET

Press the PAGE button on the base to locate a misplaced handset. When you press the PAGE button, the handset beeps and the TALK button/indicator on the handset and the charge/in use indicator on the base blinks. Press the TALK button when you locate the handset. The page signal is three beeps every two seconds for two minutes. Press the base PAGE button to stop paging.

> NOTE: You can still page the handset with the ringer off.

CHAN BUTTON

If you ever experience any interference or don't have clear voice quality, press the chan button on the handset to advance to another channel.

MEMORY

Store up to ten 20-digit telephone numbers in memory for quick dialing.

STORING A NUMBER IN MEMORY

1. Make sure the phone is **OFF**.
2. Press the memory button.
3. Press any number key (0-9) to store the phone number in that memory location.
4. Press memory button.
5. Use the keypad to enter the number (up to 20 digits) you want to store in that memory location.
6. Press the memory button again to confirm.

CHANGING A STORED NUMBER

Use the same procedure to change a stored number as you do to store a number— you're just replacing the phone number with a different number.

STORING A REDIAL NUMBER

1. Make sure the phone is **OFF**.
2. Press the memory button.
3. Press any number key (0-9) to store the phone number in that memory location.
4. Press the memory button
5. Press redial.
6. Press the memory button again to confirm.

STORING A PAUSE IN MEMORY

Use the # PAUSE button to insert a pause when a delay is needed in the dialing sequence (for example, when you must dial a 9 to get an outside line or when you must enter codes to access your bank's information line). Each pause counts toward the 20-digit limit.

> **NOTE:** You can still page the handset with the ringer off.

CHAN BUTTON

If you ever experience any interference or don't have clear voice quality, press the chan button on the handset to advance to another channel.

MEMORY

Store up to ten 20-digit telephone numbers in memory for quick dialing.

STORING A NUMBER IN MEMORY

1. Make sure the phone is **OFF**.
2. Press the memory button.
3. Press any number key (0-9) to store the phone number in that memory location.
4. Press memory button.
5. Use the keypad to enter the number (up to 20 digits) you want to store in that memory location.
6. Press the memory button again to confirm.

CHANGING A STORED NUMBER

Use the same procedure to change a stored number as you do to store a number— you're just replacing the phone number with a different number.

STORING A REDIAL NUMBER

1. Make sure the phone is **OFF**.
2. Press the memory button.
3. Press any number key (0-9) to store the phone number in that memory location.
4. Press the memory button
5. Press redial.
6. Press the memory button again to confirm.

STORING A PAUSE IN MEMORY

Use the # PAUSE button to insert a pause when a delay is needed in the dialing sequence (for example, when you must dial a 9 to get an outside line or when you must enter codes to access your bank's information line). Each pause counts toward the 20-digit limit.

If you need to dial 9 to get an outside line and want to store a number in memory without having to dial 9 each time, you would:

1. Make sure the phone is **OFF**.
2. Press the memory button.
3. Press any number (0-9) to store the phone number in that memory location.
4. Press memory again.
5. Enter the number 9 (or any other appropriate number) to access an outside line.
6. Press # PAUSE.
7. Enter the phone number you want to store in memory.
8. Press the memory button again to confirm.

> **TIP:** If you need a longer pause, press the # PAUSE button twice.

DIALING A STORED NUMBER

1. Make sure the phone is **ON** by pressing the TALK button.
2. Press the memory button.
3. Press the number (0-9) for the desired memory location. The number dials automatically.

> **IMPORTANT:** If you make test calls to emergency numbers stored in memory, remain on the line and briefly explain the reason for the call to the dispatcher. Also, it's a good idea to make these calls in off-peak hours, such as early morning or late evening.

CHANGING THE BATTERY

Make sure the telephone is **OFF** before you replace battery.

1. Remove the battery compartment door.
2. Disconnect the battery plug from the jack inside the battery compartment and remove the battery pack from the handset.
3. Insert the new battery pack and connect the cord into the jack inside the handset.
4. Put the battery compartment door back on.
5. Place handset in the base to charge. **If you don't charge the handset battery properly (for 12 hours) when you first set up the phone and/or when you install a new battery pack, the battery's long-term performance will be compromised.**
> ⚠ **CAUTION:** To reduce the risk of fire or personal injury, use only the battery listed in the instruction book.

BATTERY SAFETY PRECAUTIONS

* Do not burn, disassemble, mutilate, or puncture. Like other batteries of this type, toxic materials could be released which can cause injury.
* To reduce the risk of fire or personal injury, use only the battery listed in the User's Guide.
* Keep batteries out of the reach of children.
* Remove batteries if storing over 30 days.

> **NOTE:** The RBRC seal on the battery used in your ATLINKS USA, Inc. product indicates that we are participating in a program to collect and recycle Nickel Cadmium batteries throughout the United States. Please call 1-800-8-BATTERY for information or contact your local recycling center.

TROUBLESHOOTING GUIDE

In case of difficulty, please check the following Troubleshooting Guide before seeking service.

Problem	Solution
No dial tone	• Check installation: Is the base power cord connected to a working electrical outlet? Is the handset TALK button and the charge/in use indicator on the base lit? Is the telephone line cord connected to the base unit and the wall phone jack? • Disconnect the base from the wall phone jack and connect another phone to the same jack. If there is no dial tone on the second phone, the problem might be your wiring or local service. • Is the handset out of the base unit's range? Move closer to the base unit. • Make sure the battery is properly charged (12 hours). • Is the battery pack installed correctly? • If the phone still does not work, disconnect the power cord and remove the battery pack. Then reconnect the power cord and reinstall the battery pack. Place handset in the base for 10 seconds to allow it to reinitialize.

BATTERY SAFETY PRECAUTIONS

- Do not burn, disassemble, mutilate, or puncture. Like other batteries of this type, toxic materials could be released which can cause injury.
- To reduce the risk of fire or personal injury, use only the battery listed in the User's Guide.
- Keep batteries out of the reach of children.
- Remove batteries if storing over 30 days.

NOTE: The RBRC seal on the battery used in your ATLINKS USA, Inc. product indicates that we are participating in a program to collect and recycle Nickel Cadmium batteries throughout the United States. Please call 1-800-8-BATTERY for information or contact your local recycling center.

TROUBLESHOOTING GUIDE

In case of difficulty, please check the following Troubleshooting Guide before seeking service.

Problem	Solution
No dial tone	• Check installation: Is the base power cord connected to a working electrical outlet? Is the handset TALK button and the charge/in use indicator on the base lit? Is the telephone line cord connected to the base unit and the wall phone jack? • Disconnect the base from the wall phone jack and connect another phone to the same jack. If there is no dial tone on the second phone, the problem might be your wiring or local service. • Is the handset out of the base unit's range? Move closer to the base unit. • Make sure the battery is properly charged (12 hours). • Is the battery pack installed correctly? • If the phone still does not work, disconnect the power cord and remove the battery pack. Then reconnect the power cord and reinstall the battery pack. Place handset in the base for 10 seconds to allow it to reinitialize.
Handset does not ring	• Make sure the RINGER switch on the handset is turned to ON. • You may have too many extension phones on your line. Try unplugging some phones. • See solutions for "No dial tone."
Cannot hear phone	• Press the left and right arrow button to adjust the conversation volume to the desired listening level.
You experience static, noise, or fading in and out	• Change channels. • Is the handset out of range? Move closer to the base. • Does the base need to be relocated? • Charge the handset battery for 12 hours. • Make sure the base is not plugged into an electrical outlet with another household appliance.
Range is shorter than normal	• Press the channel button during the conversation to select a new channel.

Battery will not hold a charge·	• Be sure you sufficiently charge the battery (for 12 hours), and you can expect approximately 4 hours of talk time. • Check to be sure battery contacts on both the handset and the base are making contact and are clean; free of dirt or lint. • When the handset is placed in the base, check that the base charge/in use indicator is on.
Phone dials in pulse with tone service.	• Make sure the dial mode is set to TONE.
Phone won't dial out with pulse service	• Make sure dial mode is set to PULSE.
Memory dialing doesn't work	• Did you program the memory location keys correctly? • Did you follow the proper dialing sequence? • Make sure the tone/pulse setting is programmed correctly.
Unit locks up and no communication between the base and the handset	• If the phone still does not work, disconnect the power cord and remove the battery pack. Then reconnect the power cord and reinstall the battery pack. Place the handset in the base for 10 seconds to reset it . • If a power outage occurs while the handset is away from the base, return the handset to the base when the power returns.

LIMITED WARRANTY

What your warranty covers:
• Defects in materials or workmanship.

For how long after your purchase:
• One year, from date of purchase.

(The warranty period for rental units begins with the first rental or 45 days from.date of shipment to the rental firm, whichever comes first.)

What we will do:
• Provide you with a new or, at our option, a refurbished unit. The exchange unit is under warranty for the remainder of the original product's warranty period.

How you get service:
• Properly pack your unit. Include any cables, etc., which were originally provided with the product. We recommend using the original carton and packing materials.

• "Proof of purchase in the form of a bill of sale or receipted invoice which is evidence that the product is within the warranty period, must be presented to obtain warranty service." For rental firms, proof of first rental is also required. Also print your name and address and a description of the defect. Send via standard UPS or its equivalent to:

> **ATLINKS USA, Inc.**
> **c/o Thomson multimedia Inc.**
> **11721 B Alameda Ave.**
> **Socorro, Texas 79927**

• Pay any charges billed to you by the Exchange Center for service not covered by the warranty.

• Insure your shipment for loss or damage. ATLINKS accepts no liability in case of damage or loss.

• A new or refurbished unit will be shipped to you freight prepaid.

What your warranty *does not* cover:
• Customer instruction. (Your Owner's Manual provides information regarding operating instructions and user controls. Any additional information, should be obtained from your dealer.)

• Installation and setup service adjustments.

• Batteries.

• Damage from misuse or neglect.

• Products which have been modified or incorporated into other products.

• Products purchased or serviced outside the USA.

• Acts of nature, such as but not limited to lightning damage.

Product Registration:
• Please complete and mail the Product Registration Card packed with your unit. It will make it easier to contact you should it ever be necessary. The return of the card is not required for warranty coverage.

Limitation of Warranty:

and the handset

the battery pack. Place the handset in the base for 10 seconds to reset it .

- If a power outage occurs while the handset is away from the base, return the handset to the base when the power returns.

Limitation of Warranty:
- THE WARRANTY STATED ABOVE IS THE ONLY WARRANTY APPLICABLE TO THIS PRODUCT. ALL OTHER WARRANTIES, EXPRESS OR IMPLIED (INCLUDING ALL IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE) ARE HEREBY DISCLAIMED. NO VERBAL OR WRITTEN INFORMATION GIVEN BY ATLINKS USA, INC., ITS AGENTS, OR EMPLOYEES SHALL CREATE A GUARANTY OR IN ANY WAY INCREASE THE SCOPE OF THIS WARRANTY.
- REPAIR OR REPLACEMENT AS PROVIDED UNDER THIS WARRANTY IS THE EXCLUSIVE REMEDY OF THE CONSUMER. ATLINKS USA, INC. SHALL NOT BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES RESULTING FROM THE USE OF THIS PRODUCT OR ARISING OUT OF ANY BREACH OF ANY EXPRESS OR IMPLIED WARRANTY ON THIS PRODUCT. THIS DISCLAIMER OF WARRANTIES AND LIMITED WARRANTY ARE GOVERNED BY THE LAWS OF THE STATE OF INDIANA. EXCEPT TO THE EXTENT PROHIBITED BY APPLICABLE LAW, ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE ON THIS PRODUCT IS LIMITED TO THE APPLICABLE WARRANTY PERIOD SET FORTH ABOVE.

How state law relates to this warranty:
- Some states do not allow the exclusion nor limitation of incidental or consequential damages, or limitations on how long an implied warranty lasts so the above limitations or exclusions may not apply to you.
- This warranty gives you specific legal rights, and you also may have other rights that vary from state to state.

If you purchased your product outside the USA:
- This warranty does not apply. Contact your dealer for warranty information.

SERVICE

This product may be serviced only by the manufacturer or its authorized service agents. Changes or modifications not expressly approved by ATLINKS USA, Inc. could void the user's authority to operate this product. For instructions on how to obtain service, refer to the warranty included in this guide or call customer service at **1-800-448-0329**.
