- Did you program memory location correctly?

TELEPHONE NETWORK INFORMATION

Should your equipment be used in a country other than the one in which it was purchased, you should contact the telephone company, your distributor, or your retailer for information on the telephone network in that country. The telephone company may require changes in its procedures when you use the phone in another country. If these changes are required to allow the phone to be used in another country, you should contact the telephone company for more information. The telephone company will help you to obtain the necessary information to allow you to maintain service when you travel.

REN NUMBER

On the bottom of this equipment is a label indicating the REN (Registered Equipment Number) for your phone. The REN is a measure of the maximum power that the phone can draw from the telephone line. If you have more than one phone on the same line, the sum of the RENs for all the phones must not exceed 5.0. If the sum of the RENs for all the phones on a line exceeds 5.0, you should contact the telephone company for more information.

SERVICE

ATLHEM Communications Canada, Inc. warrants the purchase of any equipment that it manufactures or distributes. This warranty does not apply to equipment that has been modified or altered in any way. This warranty does not cover damage to the product resulting from accidents, misuse or handling. This warranty does not perform properly during the warranty period, please contact your retailer for more information.

REPAIRS
