EXHIBIT #: SA

To Install the 9V Controller Battery:

Ask an adult to unscrew the battery cover on the back of the radio control unit. Insert the battery as shown and screw the battery cover back in place.

To Operate your RipJaw™ Robot Creature:

Insert a fully charged 6V Ni-cad battery into the battery slot on the bottom of your RipJaw Robot Creature. Be sure that it is installed with the proper polarity.

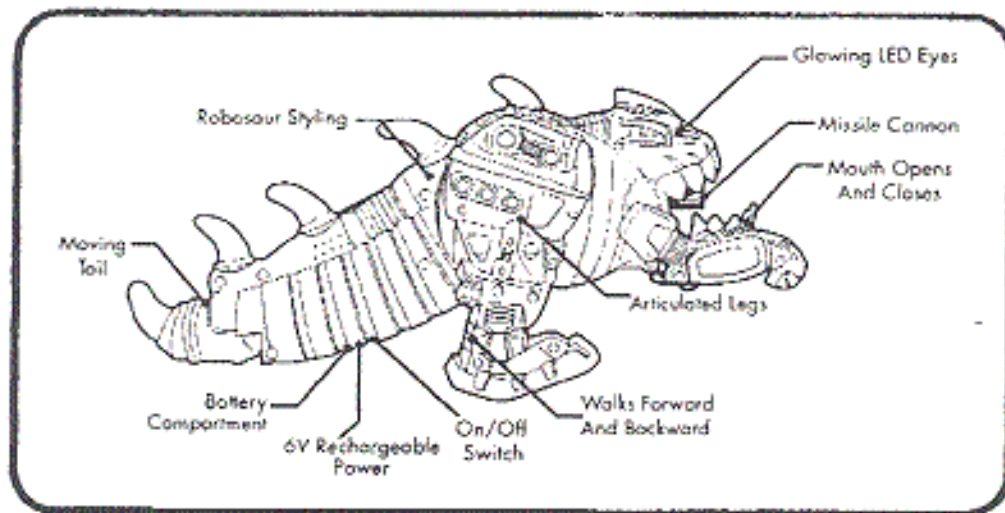

1. Switch the on/off switch on the RipJaw™ Robot Creature to the "on" position. RipJaw will roar letting you know that he has come to life!
2. Turn the radio control unit to the "on" position.

Whenever RipJaw™ Robot Creature is in the "on" position, you will hear "roaring" from his speaker.

RipJaw™ is now in your control.
Your RipJaw™ Robot Creature can be used indoors or outdoors.

Indoors:

Your RipJaw™ Robot Creature works best on flat surfaces such as flooring and light carpet.

Outdoors:

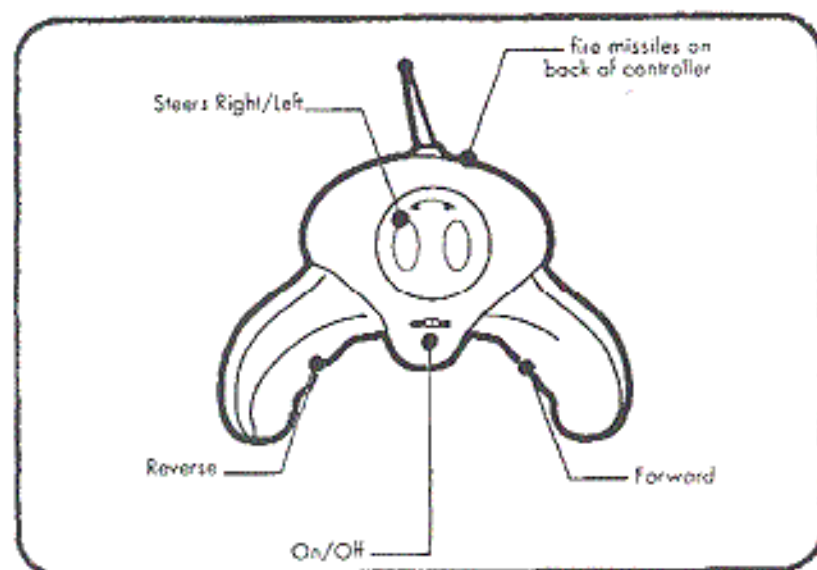

Your RipJaw™ Robot Creature can be used outdoors on clean, flat surfaces. Do not operate it through water or sand - this can damage your RipJaw™ Robot Creature's electronics and gears.

NOTE: If your RipJaw™ Robot Creature falls over you will hear it let out a high pitched roar! This is it's way of asking you to put it back on its feet.

Radio Interference:

Interference can be caused by a variety of devices both inside and outside. If your RipJaw™ Robot Creature does not seem to be responding to the signal from the transmitter, try using your RipJaw™ Robot Creature, in a different location or at a different time.

Control:

Missiles:

To load missiles into your RipJaw™ Robot Creature simply push the missiles into the tubes in it's mouth until it locks in place

NOTE: NEVER TRY TO FIRE ANYTHING OTHER THAN RIPJAW'S MISSILES FROM IT'S CANON!
