- **APP INSTALLATION** Find the free Nickwatch app on Google Play or App Store.
- Or scan OR code to go to the app in the Google Play or App Store.

CREATE THE ACCOUNT

Launch the mobile app. tap "Create Account". and follow the on-screen prompts. You will need to enter a valid email address

Verify your email address (on your phone) and accept the Privacy Policy and Terms of Service to create the account.

Tap "Add Watch"

Scan the QR code displayed on the watch display with the phone's camera.

If purchased via nickwatch.com, Enter the subscription activation code that was sent to you.

Enter your child's information

CHARGING THE WATCH

Charge the watch by connecting it to the Connect-o Cable OR the Power Station.

Connect the USB to a power source (not included) and ensure that the contacts on the back of the watch engage the port on the charging dock. When the watch is fully charged, remove it from the charging dock.

The watch is rated IP68 for dust and splash resistance. You CANNOT immerse the watch in water (for swimming or other sports), and it should not be worn during showering or bathing.

Care should be taken to avoid exposure from moisture due to rain, hand washing or perspiration.

- (1) This device may not cause harmful interfer
- (2) this device must accept any interference re eived, including interference that may cause undesired operation.
- Any Changes or modifications not expressly ap proved by the party responsible for compliance could void the user's authority to operate the

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide resonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off Specific Absorption Rate (SAR) information:

This device meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organiza-tions through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or

FCC RF Exposure Information and Statement:

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types: Nick-Watch V1 (FCC ID: 2AAI6-TRKNICK001) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use when properly worn Front of face is 1.485 W/kg (separation distance is 10mm) and Wrist: 2.971 W/kg (separa tion distance is 0mm). The use of belt clips, hol sters and similar accessories should not contain metallic components in its assembly. The use

RF exposurerequirements, a minimum separation distance of 10mm must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF-exposure requirements and should be avoided. Use only the supplied or an approvedantenna.

SPECIFIC ABSORPTION RATE (SAR)

The watch is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific or-ganisation ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health.

The guidelines use a unit of measure known as the Specific Absorption Rate, or SAR The SAR limit for devices is 2W/kg. The highest SAR value for this device when tested complied with this limit.

SAR is measured utilising the watch's highest transmitting power and where supported with multiple simultaneous transmitters. The actual SAR of the watch while practing it trinighly until below the while operating is typically well below the indicated above. This is due to automatic changes to the power level of the watch to ensure it only uses the minimum power reguired to communicate with the network.

LIMITING EXPOSURE TO **RADIO FREQUENCY (RF)** FIELDS

For individuals concerned about limiting their exposure to RF fields, the World Health Organisation (WHO) provides the following advice in Fact Sheet 193 Electromagnetic fields and public health: mobile devices (October 2014):

Precautionary measures: Present scientific information does not indicate the need for any special precautions for the use of mo-bile devices. If individuals are concerned, they might choose to limit their own or

COLOR:

their children's RF exposure by limiting the length of calls or using 'hands-free' devices to keep mobile devices away from the head and

Further information on exposure to radio waves can be obtained from the WHO http://www. who.int/mediacentre/factsheets/fs193/en/

REGULATORY INFORMATION

The following safety approvals and notice apply in specific regions as noted.

The manufacture, hereby, declares that this product is in compliance with the essential requirements and other relevant provisions of Directive (RED) 2014/53/EU.

A full copy of the Declaration of Conformity can be found at

PRODUCT HANDLING

You alone are responsible for how you use you device and any consequences of its use.

You must always switch off your device wherever the use of a device is prohibited. Use of your device is subject to safety measures designed to protect users and their environment.

- Your device has an IP68 water and dust resistance rating. However, the watch is not designed for swimming, diving, or prolonged submersion
- Do not charge your watch while it is wet.
- · Always treat your device and its accessorie

with care and keep it in a clean and dust-free

- · Do not expose your device or its accessories o open flames or lit tobacco products. · Do not expose your device or its accessories
- to liquid, moisture or high humidity · Do not drop, throw or try to bend your device or its accessories.
- · Do not use harsh chemicals, cleaning solvents, or aerosols to clean the device or its
- · Do not paint your device or its accessories. $\boldsymbol{\cdot}$ Do not attempt to disassemble your device or its accessories, only authorised personnel
- must do so. · Do not expose your device or its accessories to extreme temperatures, minimum –20 C° and maximum +40 C°. Any temperatures below –20 C° the display/battery may have reduced function due to freezing. After recovering to room temperature full function will be regained. Do not leave the device in your car along, because temperatures in parked
- cars can exceed this range · Please check local regulations for disposal of electronic products.
- Do not carry your device in your back pocket as it could break when you sit down.

SMALL CHILDREN

Do not leave your device and its accessories within the reach of children under the age of 3 years old or allow them to play with it.

They could hurt themselves or others or may accidentally damage the device. Your device contains small parts with sharp edges that may cause an injury or which could become de-tached and create a choking hazard.

POWER SUPPLY

Do not connect your device to the power supply or switch it on until instructed to do so in the in-

DEMAGNETISATION

To avoid the risk of demagnetisation, do not allow electronic devices or magnetic media close to your device for a long time.

Avoid other magnetic sources as these may cause the internal magnetometer or other sensors to malfunction and provide incorrect data. Glass Display

are made of glass. Be careful since the product may be damaged by severe impact. If damaged, be careful not to get hurt by pieces of broken glass. If the product's window is damnediately cease product use and contact Customer Service for repair.

SEIZURES/BLACKOUTS

Use only approved accessories and chargers

ELECTRICAL SAFETY

Use only approved accessories and chargers nect with incompatible products or

Take care not to touch or allow metal objects, such as coins or key rings, to contact or short-circuit the battery terminals, charger, and device charging point or any electrical contacts

Do not touch your charger with wet hands

Do not touch the power cord with wet hands or disconnect the charger by pulling the cord. Doing so may result in electrocution.

FAULTY AND DAMAGED PRODUCTS

Do not attempt to disassemble the device or its

Only qualified personnel should service or repair the device or its accessory.

If your device or its accessory has been sub-merged in water or other liquid, punctured, or subjected to a severe fall, do not use it until you have taken it to be checked at an authorised

BATTERY HANDLING AND SAFETY

The battery in this device is not user removable. Do not make any attempt to remove the battery or disassemble the device to access the battery.

Only use the charger supplied, or manufacents intended for use with your device. Using other chargers could be

Improper use of your device may result in fire explosion or other hazards.

If you believe the battery has been damaged. do not use or re-charge the device and take it to a authorised service centre for testing.

Do not puncture or crush the device or allow it to be subjected to any external pres

INTERFERENCE

Care must be taken when using the device near personal medical devices, such as pacemakers and hearing aids.

PACEMAKERS

Pacemaker manufacturers recommend that a minimum separation of 15 cm be maintained between a mobile device and a pace-maker to avoid potential interference with the

HEARING AIDS

People with hearing aids or other cochlear implants may experience interfering noises when using wireless devices or when one is nearby.

The level of interference will depend on the type of hearing device and the distance from the interference source, increasing the separation between them may reduce the interfermanufacturer to discuss alternatives.

MEDICAL DEVICES

Please consult your doctor and the device man ufacturer to determine if operation of your de vice may interfere with the operation of you

HOSPITALS

Switch off your wireless device when requested to do so in hospitals, clinics or health care facilities. These requests are designed to prevent possible interference with sensitive medical equipment. equipment

AIRCRAFT

Switch off your wireless device whenever you are instructed to do so by airport or airline staff Consult the airline staff about the use of wireless devices on board the aircraft, if your device offers a 'flight mode' this must be enabled prio to boarding an aircraft.

EXPLOSIVE ENVIRONMENTS

In locations with potentially explosive atmospheres, obey all posted signs to turn off wire-less devices such as your device or other radio

reas with potentially explosive atmospheres include fuelling areas, below decks on boats, fuel or chemical transfer or storage facilities,

or particles, such as grain, dust, or metal

BLASTING CAPS AND AREAS

Turn off your mobile device or wireless device when in a blasting area or in areas posted turn off "two-way radios" or "electronic devices" to avoid interfering with

DISPOSAL AND RECYCLING

This symbol on your device, battery and accessories means that these products must be taken to collection points at the end of their life:

Municipal waste disposal centers with specific bins for these items of

· Collection bins at points of sale

They will then be recycled, preventing substances being disposed of in the environment, so that their components can be reused.
