## Split System Air Conditioners Odyssey™

R-22 Dry Charge

Cooling Condenser — 7.5, 10, 15 and 20 Tons — 60 Hz

## Introduction

Trane's reputation for providing quality comfort solutions continues with the development of the next generation Light Commercial Odyssey Split Systems.

With wide network availability, flexible applications, installation ease, built-in reliability and easy servicing, Odyssey will meet any number of customer applications. Add to that Trane's outstanding customer service and you have the formula to make Odyssey the clear choice for continued customer satisfaction.

## Wide network availability

A broad distribution network provides owners, maintenance personnel, contractors, etc., the means to get their hands on equipment when they need it. Whether it's an emergency replacement or a new construction project in its infancy stages, Odyssey products meet an array of needs at the right time and right price.

## Flexible applications

No matter what the application, Odyssey provides the solution. A broad array of models and tonnages are available with single or dual compressors, single or dual circuits and numerous accessories. Condensing units can be installed on the ground or on a rooftop along with extended piping runs, while air handlers can be free discharge on the ground or horizontally suspended with long duct runs from a ceiling. Should application challenges arise, Odyssey delivers.

## Easy to install

Small footprints and low weights combined with factory installed components like TXVs, filter driers, etc., reduce installation time and cost. Colored and numbered wiring and factory tested units make Odyssey the right choice.

## Built-in reliability

Keeping in mind that productivity only occurs when equipment is operational, Trane has taken the steps to ensure that Odyssey is up and running. Early indicators such as phase/reversal monitors and loss of charge protection provide diagnostics which prevent failure and provide years of worry-free service and operation.

## Easy to service

When preventive maintenance or service is required, technicians will find efficient access to both air handlers and condensers. Panels provide complete, easy access coupled with standardized cabinets in which all components are located in proximity. Odyssey's improved design results in minimum service times and costs.

With these capabilities, Odyssey provides customers high efficiency and superior performance for the best all-around value in the market today.

<sup>(a)</sup> Cycles fan on/off, (no modulating).

<sup>(b)</sup> Quantity of 1 required for each fan (2 total for ).

<sup>(c)</sup> ReliaTel™ requires onboard EDC function to be disabled when BAYLOAM is used, remove OA sensor from terminal J8-1&2

<sup>(d)</sup> Kit mounts external to the outdoor unit and operates by sensing ambient and liquid line temperatures.

# Model Number Description

## Cooling Condenser

TTA	120	A	3	00	*	*
1 2 3	4 5 6	7	8	9 10	11	12

All products are identified by a multiple-character model number that precisely identifies a particular type of unit. An explanation of the alphanumeric identification code is provided. Its use will enable the owner/operator, installing contractors, and service engineers to define the operation, specific components, and other options for any specific unit. When ordering replacement parts or requesting service, be sure to refer to the specific model number, serial number, and DL number (if applicable) stamped on the unit nameplate.

### DIGITS 1 - 3: Product Type

TTA = Split System Cooling

### DIGITS 4 - 6: Nominal Gross Cooling Capacity (MBh)

090 = 7.5 Tons (60Hz)

120 = 10 Tons (60Hz)

180 = 15 Tons (60Hz)

240 = 20 Tons (60Hz)

### DIGIT 7: Major Development Sequence

A = Single Compressor, Single Circuit, R-22

B = Dual Compressor, Dual Circuit, R-22

### DIGIT 8: Electrical Characteristics

3 = 208–230/60/3

4 = 460/60/3

### DIGITS 9 - 10: Factory Installed Options

00 = Packed Stock

### DIGITS 11: Minor Design Sequence

\* = Current Design Sequence<sup>1</sup>

### DIGITS 12: Service Digit

\* = Current Design Sequence<sup>1</sup>

<sup>1</sup>. \* = sequential alpha character
