II. Receiver – RX (Components Introduction)

1. Antenna;
2. CHB: When the connection is normal, the status indicator of channel B will be on for a long time.
3. OUTPUT: Audio output interface;
4. CHA: When the connection is normal, the status indicator of channel A will be on for a long time.
5. PHONE: (listener) connector; Monitor headphone interface
6. Charging interface: DCSVIA;
7. Charging indicator: When charging, the indicator light is on, and when it is fully charged, the light is off;
8. Mono/stereo switch.
9. Power switch: long press On/Off Button for three seconds to turn on or turn off.

III. NOTES

- Do not use this equipment in rain or damp environment. Please keep away from fire or high temperature environment to avoid the danger.
- At the time of starting up the automatic code checking, the code time receiver and transmitter remain at 1M distance. Otherwise, the code may not succeed.
- To avoid the current interference in the course of operation, such as voice channel switching, dial insertion connector and so on.
- The antenna affects receiving distance. Please protect it to avoid man-made damage.
- When the device is connected to the phone, you must use the TRS TRRS audio conversion line separately (Some mobile phone's original ecosystem recording system is temporarily not supported, and the third party software is recommended).
- If you don't use the device for a long time, please remove the battery and store it in the dry environment.
- Charging time of the device is about 3 hours, and the standby time of the Transmitter is about 8 hours, and the standby time of the receiver is about 5 hours.
- In the process of using, when the power is insufficient, the indicator light will flicker. The indicator light can be used for about 20 minutes after flashing. In order not to affect

V. SPECIFICATION

| | |
|-----------------------------|-----------------------------|
| 1. Transmitter(TX) | |
| Channels | 50CH*2 |
| Type of Oscillator | Digital PLL |
| Carrier Frequency | 538.5MHz - 592.1MHz |
| Signal/Noise | >65dB |
| Sound Delay | <0.15ms |
| Audio Input | 3.5mm |
| Reference audio input level | +60dBV |
| Audio Distortion | <0.9% |
| Weight | 69g |
| Battery | 3.7V 850mAh lithium battery |
| Working Temperature | 0°C to 50°C |
| Size | 79*40*16MM |
| Antenna | External Antenna |
| Gain | 0dB |

| | |
|---------------------|------------------------------|
| 2. Receiver(RX) | |
| Channels | 50CH*2 |
| Type of Oscillator | Digital PLL |
| Audio Output | 3.5MM |
| Receiver Frequency | 538.50MHz - 592.1MHz |
| Signal/Noise | > 65 dB |
| Sound Delay | <0.15ms |
| Frequency range | 40 Hz to 18 kHz |
| Audio Distortion | <0.9% |
| Weight | 73g |
| Battery | 3.7V 850 mAh lithium battery |
| Working Temperature | 0°C to 50°C |
| Size | 78*45*15MM |

VI. WARRANTY & CUSTOMER SUPPORT

Any technique support, or warranty claims, please contact us with the way below that corresponds with your region (please attach your amazon order-ID).
 Email: support@travor.cn

VII. WARM NOTICE

TRAVOR can only provide after-sales service for products purchased directly from TRAVOR. Any orders from other sellers are not covered by our warranty.

Warning:
 Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE:
 This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC STATEMENT:
 This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
 —Reorient or relocate the receiving antenna.
 —Increase the separation between the equipment and receiver.
 —Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 —Consult the dealer or an experienced radio/TV technician for help.

RF exposure compliance statement:
 This device has been evaluated to meet the general RF exposure requirement

Travor

NOTE: Please use the receiver 3.5mm out to connect your amplifier/speaker.

Wireless microphone

USER MANUAL

ENGLISH

Thanks for purchasing TRAVOR Wireless Microphone. Please read the instructions carefully before using it. The TRAVOR wireless microphone shell is made of aluminum alloy, which features good texture, light weight, small size and portable wireless operation. It can be used in a variety of environments, such as video recording on phone, DSLR camera and camera field recording, television broadcasting, TV news gathering and street interviewing.
 Transmission distances can reach over 60 meters in an open space.
 The wireless part adopts stable analog UHF frequency band FM modulation, and the audio part adopts DSP digital processing, which can provide a wide frequency range and cover multiple channels. TRAVOR wireless microphone series is a high-quality, professional grade pickup wireless microphone.

I. MAIN FEATURES

- The optional A/B dual audio group
- 50 channels can be used for multi-position complex occasions
- The transmission distance up to 60 meters (70 meters in an open and non-interfering environment)
- Receiver end has monitoring function
- Automatic ID matching function
- Volume 10 adjustable
- Mono/Stereo Switch
- Two input modes, MIC and LINE IN, are available
- Transmitter screen function display
- Built-in lithium battery
- Ultra-low power consumption, super standby time

II. PACKAGE CONTENTS

1. Transmitter*2
2. Receiver*1
3. 3.5mm Mic Audio Input Cable*2
4. 3.5mm-3.5mm Audio Output Cable*1
5. TRS ?TRRS Audio conversion line *1
6. Belt Clip*1
7. Camera Cold-shoe Mount*1
8. Windproof cotton*2
9. Portable Package*1
10. User Manual*1
11. Charging Cable *2

III. COMPONENTS INTRODUCTION AND FUNCTION

I. Transmitter (TX)

(1) Components Introduction

1. Antenna;
2. Status light: flicker when sound source enters;
3. Power indicator: long on when the power is on;
4. INPUT: Access MIC audio cable or line input;
5. Display screen;
6. a. Switch /SET: long press the button to switch the machine on and off. In the boot mode, short press as setting option (in setup mode, short press as confirmation key);
 b. Setting options in turn is (options will jump): volume adjustment, frequency adjustment, channel selection, input mode selection.
 c. Volume adjustment: The volume is adjustable at 10 levels, 00-09.
 d. Frequency band adjustment: The frequency band is adjustable in 50 sections, 00-49.
 e. The right selection key is reduced and the left selection key is increased.
 f. Channel selection: Channel selection: Available in both A and B channels.
 g. Input mode: mic and line in are optional
7. Right selection key: increase options;
8. Left selection: reduce options;
9. DCSVIA charging port;
10. Charging indicator: When charging, the indicator lamp will be on for long time and will be off when it is full.

(2) Display window

basic information input mode selectionvolume adjustment

1. CH:03(539.700MHz) is the frequency band value;
2. B (group A and group B) is the channel value;
3. LBAT indicates low voltage;
4. MIC (LN) input mode selection;
5. VOL 07 volume control.
