SAFETY PRECAUTIONS

Handling the Phone, Battery and Charger

🗥 DANGER

Only use the battery and charger specified for the phone. Failure to do so can result in damage to the phone, electric shock or fire.

Prohibited	Do not drop, shake or throw the phone or charger. Rough handling can damage internal circuit boards and the battery pack.
Prohibited	Do not use the phone in the vicinity of volatile gases. Leave the area before using the phone. Failure to leave the area can result in the risk of fire or an explosion.
Disassembly prohibited	Do not disassemble or modify the phone, charger, or battery. Incorrect modifications, reassembly, or tampering may result in malfunction or personal injury.

Safety Precautions

Handling	Handling the Phone	
⚠ DANGER		
Prohibited	Do not use the phone while operating a vehicle.	
Compulsory	Observe local regulations for specialized areas (hospital, aircraft, etc) when using the phone.	
Prohibited	Do not use the phone near electronic equipment prone to interference. Radio frequency interference may result in electronic equipment malfunction. The following electronic equipment may be affected: Hearing aids, pacemakers and other clinical electronic devices, smoke detectors, automatic doors and other automatically controlled devices.	
Prohibited	Keep all storage media (magnetic cards, floppy disks, credit cards, etc.) away from the phone. Close encounters or contact can erase or damage the storage media.	
Prohibited	Keep all sharp metal objects (pins, nails, hairpins etc.) away from the phone handset. The handset earpiece contains a strong magnet that can attract and hold metal objects. To avoid personal injury, remove any objects from the handset earpiece before using.	
Compulsory	In case of emergency, dial the emergency number (911 for example in US), press the Talk key, then let the operator know your specific location. Don't hang up until you are told to do so.	
Compulsory	1 91	

Safety Precautions

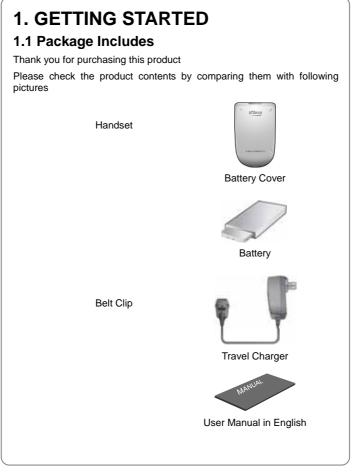

Handling the Battery	
Prohibited	Do not dispose of the battery pack in a fire. It may explode. Check with local waste management codes for disposal instructions.
Prohibited	Do not force the battery pack into the phone. Improper installation can cause malfunctions or damage the battery pack. This may result in fire or personal injury.
Prohibited	Use caution in handling batteries in order not to short the battery on conductive materials such as rings, bracelets, and keys. The battery and/or conductor may overheat and cause burns.
Disassembly prohibited	If the battery becomes too hot while recharging, it should be removed immediately from the charger.
Compulsory	When clothes or skin are exposed to battery leakage, rinse with clean water at once to prevent skin irritation.
Compulsory	Do not use a cracked, leaking or odor-emitting battery pack near an open flame or high temperatures.

Compulsory	If a fully discharged battery is stored for a long period of time, it may not be possible to recharge the battery.
Prohibited	Observe local waste management codes for proper battery disposal instructions.

Safety Precautions

ger
power source that provides the appropriate C100~240 V) for the charger. An unsuitable rce can result in damage to the charger, ck or fire.
the charger if the power supply cord or plug d or frayed (exposed or broken wires, etc). sult in the risk of fire or electric shock.
t circuit the charger connector jack. This may or electric shock.
ent that liquid is spilled into the unit, / unplug the charger from the wall outlet to or electric shock.

Compulsory	To avoid the risk of electric shock, always unplug the charger from the wall outlet before cleaning.
Prohibited	To avoid damage, do not place heavy objects on the cord.
Compulsory	To avoid damage and the risk of electric shock, always grip the power plug when removing the charger from the wall outlet. Do not pull on the power supply cord.

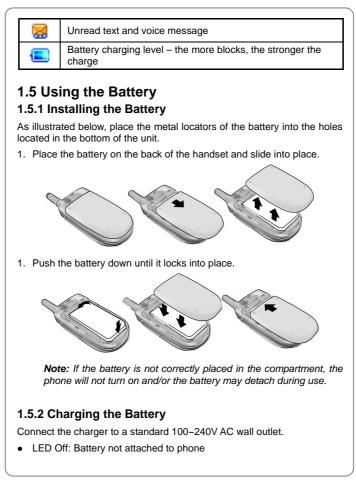

Getting Started

Getting Started

cons	Descriptions
Ъđ	Current signal strength: the more lines, the stronger the signal.
G.	Phone cannot receive a signal from the system.
Ø	Call is in progress.
Φ	911 only.
(Location Service is on.
181	Vibrator alert mode on. Phone will vibrate when call is received.
0	Silence alert mode on.
١ ا	Appears when either an event or an alarm is set.
R	Phone is roaming (out of service area).
4	Phone is in Speaker Phone mode.
9	Phone is in TTY mode.
2	Phone is in emergency mode.
۵	Phone is in Network Out of Amps mode.
12	Phone is in the 1X service area.
	Unread text message Urgent unread message: Blinking Normal unread message: ON No unread message: Turn OFF
8	Unread voice message.

Getting Started

- LED Blinking (500msec): Battery problem. The battery temperature is abnormal.
- LED Blinking (1sec on, 3 sec off): Battery is charging.
- Service Light: Charging completed
- Note: In case of a sudden electric power interruption, the travel charger may not function properly. If this occurs, disconnect the travel charger from the wall outlet, and try charging again after 5 seconds.

1.5.3 Battery Level Indicator

You can monitor the battery status by checking the battery level indicator. The number of blocks indicates the battery's condition as follows:

Flashing indicates discharged

1.5.4 Power Management

Battery	Mode	Talk Time	Standby Time
Lithium Ion	Digital	160~210 min	45~140 Hours
800 mAh	Analog	70~90 min	11~13 Hours

The criteria of measurement are in accordance with our internal specifications.

These operating times are for a new battery. Approximate values may vary depending on network configuration, signal strength and handset usage.

2. BASIC OPERATIONS

2.1 Turning the Phone On/Off

To turn the phone on/off, press and hold *for approximately 3 seconds.*

2.2 Making a Call

- 1. In idle mode, enter the phone number with the area code. (A maximum of 32 digits can be displayed.)
- 1. To make a call, press 📐
- To correct a number:
 - To clear the last digit, press 闭.

To erase all the digits entered, press and hold \square .

- If the call fails to go through:
- Press 📐 twice to redial the number

2.3 Ending a Call

If you wish to cancel or disconnect a call, press *M*, or close the flip.

2.4 Last Number Redial

- 1. To display the outgoing call list, press **S**.
 - Highlight an entry then press <a>[.

2.5 Speed Dialing

If you know the speed dial location of the telephone number that you want to call, enter the one, two or three digits of your phonebook address and hold down the last digit. (2 to 9, 10 to 99 or 100 to 500)

Note: If two telephone numbers are stored in the address, the Primary Number will be dialed.

2.6 Emergency Call

This feature allows you to place an emergency call even if your phone is in "Phone Lock" or "Restrict" mode when you dial the preprogrammed

Basic Operations

emergency number, 911, #911, or *911. It also operates in out-of-service areas.

The phone maintains the emergency mode until you press A after disconnecting an emergency call. In emergency call mode, the phone can receive an incoming call from any available system. However, it cannot make a normal call

To Call "911" in "Phone Lock" or "Restrict" mode:

- 1. Enter 📂, 🔍 🔍
 - "911" will appear on the screen.
 - 2. Press 📐

"911" and "Emergency" will appear on the screen.

2.7 Answering a Call

When you receive an incoming call, the screen will display the name or telephone number of the caller, if you have subscribed to a Caller ID service.

The caller's name will be displayed only when his/her telephone number and name are stored in the Phonebook.

If you wish to answer a call in normal mode, simply press the 🐚 key.

2.8 Caller ID with Name

This feature allows you to preview in your display the number and name of the party calling you before you answer the call. The name appears as you programmed it into the phonebook.

- 1. When the phone rings, the caller's number appears on the display.
- The last 20 Caller ID's are stored in the memory for your review and redial. After the 20th call, the oldest entry is deleted.
- Source: When Caller ID is restricted or not available, "Number Restricted" or "Number Unavailable" appears on the display.

2.9 Adjusting the Earpiece Volume

To adjust the earpiece volume during a call, use the navigation key

2.10 Viewing Call Histories

To view the outgoing call, incoming call or missed call history, press +

2.11 Call Waiting

Call Waiting notifies you of an incoming call when you are already on a call by sounding a beep tone. "Call Waiting" and the caller's phone number will appear on the display. If the caller is already programmed into your phonebook, their name will appear as well.

This is system dependent feature. Please contact your service provider for more information.

- 1. To answer the new call, press **S**.
- 2. To switch between the two calls, press 🐚 again.

Storing a Phone Number

3. STORING A PHONE NUMBER

The phonebook stores up to 500 names, each with up to three different phone numbers

- 1. Enter the phone number you want to store then press *s*.
- 2. Use the Navigation Key to select the phone type: Home/Work/Mobile then press > or .
- 3. To select "Name," press 💿 and then press 🕥 to enter name edit mode.

To change the input mode, press \checkmark . Press \bigcirc or \bigcirc to select the desired input method and language (Symbols, 123, Abc, T9, Language) then press \checkmark .

After entering the name and phone numbers, press

4. To save it, press 🔊.

The following illustrates how to utilize the available functions for each assigned key:

Кеу	Function
Space	Press once to accept a word and add a space.
💉 Mode	Press to change the input mode and language. [Symbols], [123], [T9], [Abc],[Language]
Ð	Press to change the shift mode: 1. T9 English: T9 En->T9 EN -> T9 en 2. ABC English: ABC En -> ABC EN -> ABC en
Clear	Press once to delete the character to the left of the cursor or press and hold to delete all characters.
00	Press to select the next matched word in T9 mode.
Left Right	Press to move the cursor.

Storing a Phone Number

Keypad	1	2=	3	4	5	6-	7.00	8 rue	9	00
1 Time		а	d	G	j	m	р	t	w	0
Repetitions 2 Times	,	b	е	н	k	n	q	u	х	
Repetitions 3 Times	-	с	F	I	I	0	r	v	у	
Repetitions 4 Times	?	2	3	4	5	6	s	8	z	
Repetitions 5 Times	!						7		9	
Repetitions 6 Times	٤									
Repetitions 7 Times	@									
Repetitions 8 Times	:									
Repetitions 9 Times	1									

Note: This table is for English input mode. Other language input modes will have different character sequences.

The T9 Input Mode incorporates a built-in dictionary to determine a word based on the entered characters. A word can be entered more quickly by pressing a key once per character.

For example, to enter "meeting:"

• Press: 10, 12, 13, 18, 4, 10, 14

4. CALL HISTORY 4.1 Outgoing Calls

- 1. To access your Call History, press 💉, 🖳
- 2. Select the parameter by moving the Navigation Key left and right.

Displays information of the 20 most recently dialed calls.

To call an entry in the list, highlight it then press

- To see a list of the 20 most recently dialed numbers, press 🔪 🖳 If the number is already stored in your Phonebook, only the name appears. If the number is not stored, only the phone number appears.
- Press the Navigation Key to select a record then press
 to delete
 the record or press to view detailed information.
- After 20 dialed calls, the oldest call will automatically be erased from the history.
- Call details include type of call, date, time and phone number.

4.2 Incoming Calls

- 1. To access your Call History, press 🛹, 🔍, 📧.
- 2. Select the parameter by moving the Navigation Key left and right.

Displays information of the 20 most recently answered calls.

To call an entry in the list, highlight it then press

- Press
 , If the number is already stored in your Phonebook, only the name appears. If the number is not stored, only the phone number appears.
- Press the Navigation Key to select a record and then press st to delete the record or press to view detailed incoming call information.
- After 20 incoming calls, the oldest call will automatically be erased from the history.
- Call details include type of call, date, time and phone number.

4.3 Missed Calls

- 1. To access your Call History, press 💉, 🔍, 🔎.
- 2. Select the parameter by moving the Navigation Key left and right.

Displays information of the 20 most recently missed calls.

To call an entry in the list, highlight it then press

- To see a list of the 20 most recently missed calls, press
 If the number is already stored in your Phonebook, only the name appears. If the number is not stored, only the phone number appears.
- Press the Navigation Key to select a record and then press st to delete the record or press to view detailed missed call information.
- After 20 incoming calls, the oldest call will automatically be erased from the history.
- Call details include type of call, date, time and phone number.

4.4 Erase History

To clear all call histories:

```
Call History
```

```
1. Press 💉, < then 🔍
```

 Select "Yes" or "No" with the scroll key. Press . When you select "Yes", you will see "Enter Lock Code" on the display then input your lock code.

4.5 Air Time

To help you manage your calls, your phone is equipped with several Call Timers. To access Call Timers:

1. Press 💉, 🖳

2. Press 5m.

4.5.1 All Calls

To view total usage time and the total number of calls:

• Press 💉, 🔍 🗺. This timer is resettable.

4.5.2 Last Call

To view the time of the last call:

• Press 🖍, 🔍, 🗺, 💽

5. PHONEBOOK

5.1 Search

The Phone Book stores up to 500 entries, each of which can be assigned to a group.

Entries can be retrieved by Quick Search, Srch by Name, Srch No, Srch by Index, Srch by E-mail, and Srch by URL. To search for an entry:

1. Press 💉.

2. Press 💽, 🖳

Select the parameter using the Navigation Key.

5.1.1 Quick Search

To search for phonebook data via address index storing:

```
1. Press 💉, 🖭, 🔍
```

2. Press the Navigation Key or input the search name to select an entry, then press to view detail information.

5.1.2 Srch by Name

To search phonebook data by entering part of a name:

1. Press 💉, 🗵, 🗵

2. Use the Navigation Key to select the search range of all phonebook or existing groups, then press I to delete the record or press I to view detailed information.

Phonebook

5.1.3 Srch by

To search phonebook data by number:

```
1. Press 💉, 💽, 🔎.
```

2. Input part of a phone number then press to find out the matching number. Press to delete the record or press to view detail information.

5.1.4 Srch by Index

To search phonebook data via index number:

```
1. Press 💉, 📧, 🖳
```

Enter the index that you want to find.

- 2. To select a record, press \rightarrow or \bigcirc then press \checkmark to delete the record
- or press 🛸 to view detailed information.
- Maximum number of input characters: 3 digits. (1~500)

5.1.5 Srch by E-mail

To search phonebook data using part of an e-mail address:

1. Press 💉, 🖭, 🔙.

Enter E-mail address.

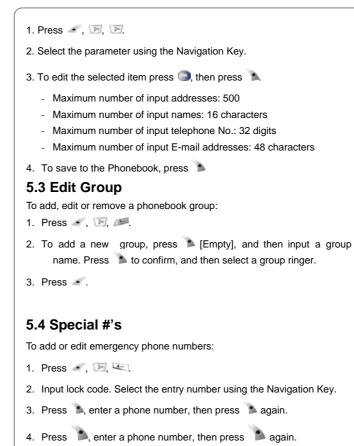

2. Press the Navigation Key to select a record then press 💉 to delete the record or press 🍗 to view detail information.

• Maximum number of input characters: 48 characters

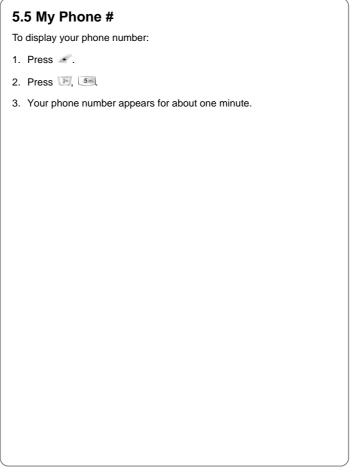

5.2 Record

To record phone numbers to empty phonebook address:

```
Phonebook
```

Phonebook

6. MESSAGING

6.1 Send New

To create and send text messages by selecting a new submenu, press $\bigodot,$

6.1.1 Input a Destination Phone Number

- 1. Input the phone number.
- 2. To search for a phone number in the phonebook or Call History, press O or S.

6.1.2 Edit a Default Callback Number

- 1. Press 💽.
- 2. Edit the default Callback Number.
- 6.1.3 Select the Priority
- 1. Press 💽.
- 2. To change the Priority (Normal/Urgent/Emergency), press

2. Select the message using 💿 or 💽.		
3. To display the message, press 🔘 or ` .		
4. To use the saved option, press 🕥 or 🔈		
6.5.1 (Re)Send		
1. To resend to the message, press		
2. After sending, the message will be automatically deleted from the saved folder.		

Messaging

6.5.2 Lock Msg To lock or unlock the message, press III. 6.5.3 Delete To delete the message, press IM. 6.5.4 To Quick Text To save the text message to the Quick Text, press IM. 6.6 Quick Text To edit the quick text messages: 1. Press 💽, 📂 2.To add a new message , press 🛸 3. Select the message using 6 or 6. 4. To delete a saved message, press 💉. 5. To display the message, press 6. To edit the message , press 🕥 or 🔌 6.6.1 Edit Message 1. Input text message. 2. To delete one character, press \square . 3. To delete all characters, press and hold $\hfill \hfill \hfil$ To save the message, press <a>O or . <a>>.

6.7 Settings

To customize the messaging features:

Press 💽, 🖂

6.7.1 Receive Alert

- 1. Press 👰, 🖂, 🔍
 - Bell: Use beep and lamp
 - Vibrate: Use vibrator and lamp
 - LED: Use LED only
- 2. Use the Navigation Key to select the receive alert method then press \bigcirc or \searrow to confirm.

6.7.2 Reminder

If you have not read new incoming messages, the phone will alert using the selected option.

- 1. Press 👰 🗠 📧 sequentially
 - One Time
 - Every 2 Min: Alert every 2 minutes
- Use the Navigation Key to select the alert reminder method then press
 or b to confirm.
- 6.7.3 Memory Full

If your phone memory is full, you might not be able to receive messages. The phone can be programmed to automatically delete the oldest message or warn you a message cannot be received because the memory is almost full.

```
Messaging
```

1. Press 💽, 🚈, 좯.

- Warn to user: Show warning message to user and automatically reject when memory is full.
- Auto Delete: If the memory is full, previous messages are automatically deleted.

6.7.4 Priority

To set the priority for outgoing messages:

- 1. Press 👰, 🚈, 🔙
- Use the Navigation Key to select the priority setting method then press
 or b to confirm.
 - Normal: Normal messages.
 - Urgent: Urgent messages.
 - Emergency: Emergency messages.

6.7.5 Save Sent Msg

After sending outgoing messages, you can choose to automatically save sent messages.

- 1. Press 💿, 💌, 絤.
 - Auto Save: Automatically save sent messages
 - Prompt: Phone asks you each time if you want to save the sent message
 - Do Not Save: Do not save sent messages

```
2. Use the Navigation Key to select the desired option for sent messages,
      then press 💿 or 🍗 to confirm it.
6.7.6 Default Callback
The phone will automatically include a call back number when you write a
new message.
1. Press 💽, 🚈, 📂.
     Press 🔘 or ` after inputting a callback number.
2.
6.7.7 Edit Voice CB#
1. Press 💽, 🗠, 🗠
2. Press is or after inputting a voice callback
      number.
6.7.8 Entry Mode
The Entry Mode incorporates a built-in-dictionary to
determine a word based on the entered characters. A
word can be entered more quickly by pressing a key once per character. To select an Entry Mode:
1. Press 💽, 🗠, 🔤.
2. Press 🙆 or 👰
   Select the Entry Mode for your default text input mode:
   - Abc
   - 123
   - T9
```

```
Messaging
```

6.7.9 Message Log

1. Press 💽, 🔍, 📂.

```
6.7.9.1 Incoming Log
```

Displays information on the incoming message including "Stored Msg/Read Msg"

1.Press 👰, 🖂, 📂, 🔍.

```
6.7.9.2 Outgoing Log
```

Displays information on the outgoing message such as "Sent Msg".

```
1.Press 👰, 🚈, 📂, 💽.
```

```
6.7.9.3 Reset Log
```

To reset message logs.

- 1. Press 🔍, 🖂, 💴, 🔎.
- 2. Select "Incoming Log" or "Outgoing Log" with Navigation Key, then press O or .

"Reset Confirm" will be displayed. Press - [Yes] or [No]

6.8 Erase All

To delete Inbox/Outbox Messages (except for Locked Messages):

- 1. Press 🔍, 💌.
- Use the Navigation Key to select the desired option, then press
 or
 to confirm.
 - Inbox: To delete inbox messages
 - Read Inbox: To delete only Read Inbox messages
 - Outbox: To delete outbox messages
 - Saved: To delete saved folder messages

2. Press 📿, 🌆
   Select the language using the Navigation Key:
   - English
   - Français
3. To save, press 🖒 .
10.6 Phone Info
To display your phone number:
1. Press 🥌.
2. Press 7. , 600
Your phone number appears for about one minute.
10.7 System
To change the system properties of the phone:
1. Press 💉.
2. Press 🖾, 🚈
```

Settings

10.7.1 Set Mode

To select the Set Mode:

1. Press 💉

2. Press 🚈, 🚈, 💶.

Select the parameters using the Navigation Key:

- Standard: Automatic system selection
- Home Only: Service is limited to home system only
- 3. To save, press 🔊.

10.7.2 Privacy

This function enhances voice privacy and avoids tapping during a call.

- 1. Press 💉.
- 2. Press 🖾, 🖾, 📧.

Select the parameters using the Navigation Key

- Standard: Voice privacy not activated when it is available by system
- Enhanced: Voice privacy activated when it is available by system

3. To save, press 🔪.

10.7.3 TTY Mode

Your phone is able to operate with a TTY (Teletypewriter) device in both analog and digital modes. This feature is system dependent and may not be available in all areas.

1. Press 💉, 💌, 💌, 🕬

```
Settings
```

TTY Off TTY Talk
TTY Hear TTY Full
2. To save, press
10.7.4 Location
To share your phone's location information with network services other than emergency services:
Press 🛋, 🗺, 🗺, 🗺
E911 only: Location information is shared only when making a 911 call.
Location On: Location information is always shared with network.

Call

11. CALL

11.1 Mute/Unmute

The Mute function prevents the other party from hearing your voice, but allows you to hear the other party:

- 1. Press 💉.
- 2. Press 🖳
- 3. Select the desired option using the Navigation Key:
- 4. To save, press 🛸.

11.2 Send Own Num

- 1. Press 💉.
- 2. Press 🖭
- 3. Select the desired option using the Navigation Key:
- 4. To save, press 🛸.

11.3 Silent

- 1. Press 💉.
- 2. Press 🔎
- 3. Select the desired option using the Navigation Key:
- Note : You can deactivate "Sending DTMF" so that keypad tones will not be transmitted to the calling party.
- 56

11.4 Privacy

This function enhances voice privacy and avoids tapping during a call.

- 1. Press 💉.
- 2. Press 🖳
 - Select the parameters using the Navigation Key
 - Standard: Voice privacy not activated when it is available by system
 - Enhanced: Voice privacy activated when it is available by system
- 3. To save, press 🔌.

11.5 Tone Length

To select the sent DTMF tone length for when you press digit keys in the calling state:

- 1. Press 💉.
- 2. Press 5ml.
- 3. Select the desired option using the Navigation Key:
 - Normal: Send DTMF in 150msec
 - Long: Send DTMF when digit key is released. (Max. 2 secs.)
- 4. To save, press 🛸.

11.6 Messaging

Can use message menu during conversation.

Safety And Warranty

12. SAFETY AND WARRANTY

This chapter addresses the safety guidelines and precautions to follow when operating your phone. Before operating your phone, please be aware of all the safety details

This chapter contains the terms and conditions of services and the warranty for your phone. Please review them thoroughly $% \left({{{\rm{A}}_{\rm{B}}}} \right)$

- SAFETY INFORMATION FOR WIRELESS HANDHELD PHONES
- SAFETY INFORMATION FOR FCC RF EXPOSURE
- SAR INFORMATION
- FDA CONSUMER UPDATE
- PROTECT YOUR WARRANTY
- 12 MONTH LIMITED WARRANTY

12.1 Safety Information for Wireless Handheld Phones

Read This Information Before Using Your Handheld Portable Cellular Telephone

12.1.1 EXPOSURE TO RADIO FREQUENCY SIGNALS

Your wireless handheld portable telephone is a low power radio transmitter and receiver. When it is ON, it receives and also sends out radio frequency (RF) signals

In August 1996, the Federal Communications Commissions (FCC) adopted RF exposure guidelines with safety levels for handheld wireless phones. Those guidelines are consistent with the safety standards previously set by both U.S. and international standards bodies:

- ANSI C95.1 (1992) *
- NCRP Report 86 (1986) *
- ICNIRP (1996) *

Those standards were based on comprehensive and periodic evaluations of the relevant scientific literature. For example, over 120 scientists,

engineers, and physicians from universities, government health agencies, and industry reviewed the available body of research to develop the ANSI Standard (C951)

The design of your phone complies with the FCC guidelines (and those standards)

12.1.2 ANTENNA CARE

Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications, or attachments could damage the phone and may violate FCC regulations

12.1.3 DRIVING SAFETY

Talking on the phone while driving is extremely dangerous and is illegal in some states. Remember, safety comes first. Check the laws and regulations on the use of phones in the areas where you drive. Always obey them. Also, if using your phone while driving, please:

- Give full attention to driving. Driving safely is your first responsibility
- Use hands-free operation, if available
- Pull off the road and park before making or answering a call, if driving conditions so require

If you must use the phone while driving, please use one-touch, speed dialing, and auto answer modes $% \left({{\left({{{\mathbf{x}}_{i}} \right)}} \right)$

An airbag inflates with great force. DO NOT place objects, including both installed or portable wireless equipment, in the area over the airbag or in the air bag deployment area. If in-vehicle wireless equipment is improperly installed and the air bag inflates, serious injury could result

 \triangle **Warning:** Failure to follow these instructions may lead to serious personal injury and possible property damage

12.1.4 ELECTRONIC DEVICES

Most modern electronic equipment is shielded from RF energy. However, certain electronic equipment may not be shielded against the RF signals from your wireless phone

Safety And Warranty

12.1.4.1 Pacemakers

The Health Industry Manufacturers Association recommends that a minimum separation of six (6") inches be maintained between a handheld wireless phone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research by and recommendations of Wireless Technology Research

Persons with pacemakers:

- ALWAYS keep the phone more than six inches from your pacemaker when the phone is turned on
- Do not carry the phone in a breast pocket
- Use the ear opposite the pacemaker to minimize the potential for interference
- If you have any reason to suspect that interference is taking place, turn your phone OFF immediately

12.1.4.2 Other Medical Devices

If you use any other personal medical device, consult the manufacturer of your device to determine if they are adequately shielded from external RF energy. Your physician may be able to assist you in obtaining this information

Turn your phone OFF in healthcare facilities when any regulations posted in these areas instruct you to do so. Hospitals or healthcare facilities may be using equipment that could be sensitive to external RF energy

12.1.4.3 Posted Facilities

Turn your phone OFF where posted notices so require

12.1.5 OTHER SAFETY GUIDELINES

12.1.5.1 Aircraft

FCC and Transport Canada Regulations prohibit using your phone while in the air. Turn your phone OFF before boarding an aircraft

12.1.5.2 Blasting Areas

To avoid interfering with blasting operations, turn your phone OFF when in a "blasting area" or in areas posted: "Turn off two-way radio." Obey all

signs and instructions

12.1.5.3 Potentially Explosive Atmospheres

Turn your phone OFF when in any area with a potentially explosive atmosphere and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death

Areas with a potentially explosive atmosphere are often, but not always, clearly marked. They include fueling areas such as gas stations; below deck on boats; fuel or chemical transfer or storage facilities; vehicles using liquefied petroleum gas (such as propane or butane); areas where the air contains chemicals or particles, such as grain, dust, or metal powders; and any other area where you would normally be advised to turn off your vehicle's engine

12.1.6 PRECAUTIONS

Your Handheld Portable Telephone is a high quality piece of equipment. Before operating, read all instructions and cautionary markings on (1) AC Adaptor (2) Battery and (3) Product Using Battery

Warning: DO NOT use this equipment in an extreme environment where high temperature or high humidity exists

DO NOT abuse the equipment. Avoid striking, shaking or shocking. When not using, lay down the unit to avoid possible damage due to instability

DO NOT expose this equipment to rain or spilled beverages

DO NOT use unauthorized accessories

DO NOT disassemble the phone or its accessories. If service or repair is required, return unit to an authorized UT Starcom cellular service center. If unit is disassembled, the risk of electric shock or fire may result

DO NOT short-circuit the battery terminals with metal items etc.

12.2 SAFETY INFORMATION FOR FCC RF EXPOSURE

MARNING: Read this information before using

12.2.1 CAUTIONS

In August 1996 the Federal Communications Commission (FCC) of the United States with its action in Report and Order FCC 96-326 adopted an updated safety standard for human exposure to radio frequency electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies. The design of this phone complies with the FCC guidelines and these international standards. Use only the supplied or an approved antenna. Unauthorized antennas, modifications, or attachments could impair call quality, damage the phone, or result in violation of FCC regulations. Do not use the phone with a damaged antenna. If a damaged antenna comes into contact with the skin, a minor burn may result. Please contact your local dealer for replacement antenna

12.2.2 BODY-WORN OPERATION

This device was tested for typical body-worn operations with the back of the phone kept 2.0 cm. from the body with a beltclip that contains metallic components. To maintain compliance with FCC RF exposure requirements, use only belt-clips, holsters or similar accessories with which this device was tested. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

Note: For more information about RF exposure, please visit the FCC website at <u>www.fcc.gov</u>

62

13. SAR INFORMATION

THIS MODEL PHONE MEETS THE GOVERNMENT'S REQUIREMENTS FOR EXPOSURE TO RADIO WAVES

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radiofrequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. * Tests for SAR are conducted with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output

Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. The highest SAR value for this model phone when tested for use at the ear is 1.32 W/Kg and when worn on the body, as described in this user guide, is 0.537 W/Kg. (Body-worn measurements differ among phone models, depending upon available accessories and FCC requirements). While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure

The FCC has granted an Equipment Authorization for this model phone

Sar Information

with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of http://www.fcc.gov/oet/fccid after searching on O6Y-C1200

Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications Industry Association (CTIA) website at http://www.wow-com.com

* In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements

14. FDA CONSUMER UPDATE

FDA: U.S. Food and Drug Administration -Center for Devices and Radiological Health Consumer Update on Wireless Phones

1. Do wireless phones pose a health hazard?

The available scientific evidence does not show that any health problems are associated with using wireless phones. There is no proof, however, that wireless phones are absolutely safe. Wireless phones emit low levels of radiofrequency energy (RF) in the microwave range while being used. They also emit very low levels of RF when in the stand-by mode. Whereas high levels of RF can produce health effects (by heating tissue), exposure to low level RF that does not produce heating ef-fects causes no known adverse health effects. Many studies of low level RF exposures have not found any biological ef-fects. Some studies have suggested that some biological ef-fects may occur, but such findings have not been confirmed by additional research. In some cases, other researchers have had difficulty in reproducing those studies, or in determining the reasons for inconsistent results

2. What is FDA's role concerning the safety of wireless phones?

Under the law, FDA does not review the safety of radiation-emitting consumer products such as wireless phones before they can be sold, as it does with new drugs or medical de-vices. However, the agency has authority to take action if wire-less phones are shown to emit radiofrequency energy (RF) at a level that is hazardous to the user. In such a case, FDA could require the manufacturers of wireless phones to notify users of the health hazard and to repair, replace or recall the phones so that the hazard no longer exists. Although the existing scientific data do not justify FDA regula-tory actions, FDA has urged the wireless phone industry to take a number of steps, including the following:

- Support needed research into possible biological effects of RF of the type emitted by wireless phones
- Design wireless phones in a way that minimizes any RF ex-posure to the user that is not necessary for device function

Fda Consumer Update

 Cooperate in providing users of wireless phones with the best possible information on possible effects of wireless phone use on human health.

FDA belongs to an interagency working group of the federal agencies that have responsibility for different aspects of RF safety to ensure coordinated efforts at the federal level. The following agencies belong to this working group:

- National Institute for Occupational Safety and Health
- Environmental Protection Agency
- Federal Communications Commission
- Occupational Safety and Health Administration
- National Telecommunications and Information Administration

The National Institutes of Health participates in some inter-agency working group activities, as well. FDA shares regulatory responsibilities for wireless phones with the Federal Communications Commission (FCC). All phones that are sold in the United States must comply with FCC safety guidelines that limit RF exposure. FCC relies on FDA and other health agencies for safety questions about wireless phones. FCC also regulates the base stations that the wireless phone networks rely upon. While these base stations operate at higher power than do the wireless phones themselves, the RF expo-sures that people get from these base stations are typically thousands of times lower than those they can get from wire-less phones. Base stations are thus not the subject of the safety questions discussed in this document

3. What kinds of phones are the subject of this update?

The term "wireless phone" refers here to hand-held wireless phones with built-in Antennas, often called "cell," "mobile" or "PCS" phones

These types of wireless phones can expose the user to measurable radiofrequency energy (RF) because of the short distance between the phone and the user's head. These RF exposures are limited by Federal Communications Commission safety guidelines that were developed with the advice of FDA and other federal health and safety agencies. When the phone is located at greater distances from the user, the exposure to RF is drastically lower because a person's RF exposure decreases rapidly with

increasing distance from the source. The so-called "cordless phones," which have a base unit connected to the telephone wiring in a house, typically operate at far lower power levels, and thus produce RF expo-sures far below the FCC safety limits

4. What are the results of the research done already?

The research done thus far has produced conflicting results, and many studies have suffered from flaws in their research methods. Animal experiments investigating the effects of radiofrequency energy (RF) exposures characteristic of wireless phones have yielded conflicting results that often cannot be repeated in other laboratories. A few animal studies, how-ever, have suggested that low levels of RF could accelerate the development of cancer in laboratory animals. However, many of the studies that showed increased tumor develop-ment used animals that had been genetically engineered or treated with cancer-causing chemicals so as to be pre-dis-posed to develop cancer in the absence of RF exposure. Other studies exposed the animals to RF for up to 22 hours per day. These conditions are not similar to the conditions under which people use wireless phones, so we don't know with certainty what the results of such studies mean for human health. Three large epidemiology studies have been published since December 2000. Between them, the studies investigated any possible association between the use of wireless phones and primary brain cancer, glioma, meningioma, or acoustic neuroma, tumors of the brain or salivary gland, leukemia, or other cancers. None of the studies demonstrated the existence of any harmful health effects from wireless phone RF exposures. However, none of the studies can answer questions about long-term exposures, since the average period of phone use in these studies was around three years

5. What research is needed to decide whether RF exposure from wireless phones poses a health risk?

A combination of laboratory studies and epidemiological studies of people actually using wireless phones would provide some of the data that are needed. Lifetime animal exposure studies could be completed in a few years. However, very large numbers of animals would be needed to provide reliable proof of a cancer promoting effect if one exists. Epidemiological studies can provide data that is directly applicable to human populations, but 10 or more years' follow-up may be needed to

Fda Consumer Update

pro-vide answers about some health effects, such as cancer. This is because the interval between the time of exposure to a cancer- causing agent and the time tumors develop - if they do -may be many, many years. The interpretation of epidemiological studies is hampered by difficulties in measuring actual RF exposure during day-to-day use of wireless phones. Many factors affect this measurement, such as the angle at which the phone is held, or which model of phone is used

6. What is FDA doing to find out more about the possible health effects of wireless phone RF?

FDA is working with the U.S. National Toxicology Program and with groups of investigators around the world to ensure that high priority animal studies are conducted to address important questions about the effects of exposure to radiofrequency energy (RF). FDA has been a leading participant in the World Health Organization International Electromagnetic Fields (EMF) Project since its inception in 1996. An influential result of this work has been the development of a detailed agenda of research needs that has driven the establishment of new research programs around the world

The Project has also helped develop a series of public information documents on EMF issues. FDA and the Cellular Telecommunications & Internet Association (CTIA) have a formal Cooperative Research and Development Agreement (CRADA) to do research on wireless phone safety. FDA provides the scientific oversight, obtaining input from experts in government, industry, and academic organizations. CTIA-funded research is conducted through con-tracts to independent investigators. The initial research will include both laboratory studies and studies of wireless phone users. The CRADA will also include a broad assessment of additional research needs in the context of the latest research developments around the world

7. How can I find out how much radiofrequency energy exposure I can get by using my wireless phone?

All phones sold in the United States must comply with Federal Communications Commission (FCC) guidelines that limit radiofrequency energy (RF) exposures. FCC established these guidelines in consultation with FDA and the other federal health and safety agencies. The FCC limit for RF exposure from wire-less telephones is set at a Specific Absorption

Rate (SAR) of 1.6 watts per kilogram (1.6 W/kg). The FCC limit is consistent with the safety standards developed by the Institute of Electrical and Electronic Engineering (IEEE) and the National Council on Radiation Protection and Measurement. The exposure limit takes into consideration the body's ability to remove heat from the tissues that absorb energy from the wireless phone and is set well below levels known to have effects. Manufacturers of wireless phones must report the RF expo-sure level for each model of phone to the FCC. The FCC website (http://www.fcc.gov/oet/rfsafety) gives directions for locating the FCC identification number on your phone so you can find your phone's RF exposure level in the online listing

8. What has FDA done to measure the radiofrequency energy coming from wireless phones ?

The Institute of Electrical and Electronic Engineers (IEEE) is developing a technical standard for measuring the radiofrequency energy (RF) exposure from wireless phones and other wireless handsets with the participation and leader-ship of FDA scientists and engineers. The standard, "Recommended Practice for Determining the Spatial-Peak Specific Absorption Rate (SAR) in the Human Body Due to Wireless Communications Devices: Experimental Techniques," sets forth the first consistent test methodology for measuring the rate at which RF is deposited in the heads of wireless phone users. The test method uses a tissue-simulating model of the human head. Standardized SAR test methodology is expected to greatly improve the consistency of measurements made at different laboratories on the same phone. SAR is the mea-surement of the amount of energy absorbed in tissue, either by the whole body or a small part of the body. It is measured in watts/kg (or milliwatts/g) of matter. This measurement is used to determine whether a wireless phone complies with safety guidelines

9. What steps can I take to reduce my exposure to radiofrequency energy from my wireless phone?

If there is a risk from these products—and at this point we do not know that there is—it is probably very small. But if you are concerned about avoiding even potential risks, you can take a few simple steps to minimize your exposure to radiofrequency energy (RF). Since time is a key factor in how much exposure a person receives, reducing the amount of time spent

Fda Consumer Update

using a wireless phone will reduce RF exposure

If you must conduct extended conversations by wireless phone every day, you could place more distance between your body and the source of the RF, since the exposure level drops off dramatically with distance. For example, you could use a headset and carry the wireless phone away from your body or use a wireless phone connected to a remote antenna

Again, the scientific data do not demonstrate that wireless phones are harmful. But if you are concerned about the RF exposure from these products, you can use measures like those described above to reduce your RF exposure from wire-less phone use

10.What about children using wireless phones?

The scientific evidence does not show a danger to users of wireless phones, including children and teenagers. If you want to take steps to lower exposure to radiofrequency energy (RF), the measures described above would apply to children and teenagers using wireless phones. Reducing the time of wire-less phone use and increasing the distance between the user and the RF source will reduce RF exposure. Some groups sponsored by other national governments have advised that children be discouraged from using wireless phones at all. For example, the government in the United Kingdom distributed leaflets containing such a recommendation in December 2000. They noted that no evidence exists that using a wireless phone causes brain tumors or other ill effects. Their recommendation to limit wireless phone use by children was strictly precautionary; it was not based on scientific evidence that any health hazard exists

11.What about wireless phone interference with medical equipment?

Radiofrequency energy (RF) from wireless phones can inter-act with some electronic devices. For this reason, FDA helped develop a detailed test method to measure electromagnetic interference (EMI) of implanted cardiac pacemakers and defibrillators from wireless telephones. This test method is now part of a standard sponsored by the Association for the Advancement of Medical instrumentation (AAMI). The final draft, a joint effort by FDA, medical device manufacturers, and many other groups, was completed in late 2000. This standard will allow manufacturers to ensure that cardiac pacemakers and defibrillators are safe from wireless

phone EMI. FDA has tested hearing aids for interference from handheld wireless phones and helped develop a voluntary standard sponsored by the Institute of Electrical and Electronic Engineers (IEEE). This standard specifies test methods and performance requirements for hearing aids and wireless phones so that that no interference occurs when a person uses a "compatible" phone and a "compatible" hearing aid at the same time. This standard was approved by the IEEE in 2000. FDA continues to monitor the use of wireless phones for possible interactions with other medical devices. Should harmful interference be found to occur, FDA will conduct testing to assess the interference and work to resolve the problem

12.Where can I find additional information?

For additional information, please refer to the following re-sources:

- FDA web page on wireless phones (http://www.fda.gov/cdrh/ phones/index.html)
- Federal Communications Commission (FCC) RF Safety Pro-gram (http://www.fcc.gov/oet/rfsafety)
- International Commission on Non-Ionizing Radiation Protection (http://www.icnirp.de)
- World Health Organization (WHO) International EMF Project (http://www.who.int/emf)
- National Radiological Protection Board (UK) (http://www.nrpb.org.uk/)

Protect Your Warranty

15. PROTECT YOUR WARRANTY

Read your Warranty carefully, with the special consideration to paragraph seven of the Limited Warranty for your unit

"Warranty does not apply to... or to any product or part thereof which has suffered through alteration... mishandling misuse, neglect or accident"

Many companies are making look alike accessories and in some cases, promoting that their product is equal to or better than the Audiovox product. Be careful. Some of these products may not be compatible to use with your Audiovox product and may damage the unit or cause it to malfunction. If service is required on your unit and it is determined that a non-Audiovox accessory has created the problem with your unit, the Warranty will not apply. In addition, if the unit has already suffered irreversible damage by reason of a non-compatible accessory, the Warranty will be voided. To protect your Warranty, use only compatible accessories which cannot damage or interfere with the functioning of your Audiovox product

UTSTARCOM/AUDIOVOX COMMUNICATIONS

555 Wireless Blvd., Hauppauge, New York 11788, 800-229-1235 16808 Marquardt Avenue, Cerritos, California 90703, 562-802-5100 UTStarcom Canada Company 5155 Spectrum Way, Unit #5, Mississauga, Ontario Canada L4W 5A1, 800-465-9672

16. 12 MONTH LIMITED WARRANTY

UTStarcom/Audiovox Communications (the Company) warrants to the original retail purchaser of this Audiovox handheld portable cellular telephone, that should this product or any part thereof during normal consumer usage and conditions, be proven defective in material or workmanship that results in product failure within the first twelve (12) months period from the date of purchase, such defect(s) will be repaired or replaced (with new or rebuilt parts) at the Company's option, without charge for parts or labor directly related to the defect(s)

The antenna, key pad, display, rechargeable battery and battery charger, if included, are similarly warranted for twelve (12) months from date of purchase

This Warranty extends only to consumers who purchase the product in the United States or Canada and it is not transferable or assignable

This Warranty does not apply to:

- Product subjected to abnormal use or conditions, accident, mishandling, neglect, unauthorized alteration, misuse, improper installation or repair or improper storage
- Product whose mechanical serial number or electronic serial number has been removed, altered or defaced
- Damage from exposure to moisture, humidity, excessive temperatures or extreme environmental conditions
- Damage resulting from connection to, or use of any accessory or other product not approved or authorized by the Company
- Defects in appearance, cosmetic, decorative or structural items such as framing and non-operative parts
- Product damaged from external causes such as fire, flooding, dirt, sand, weather conditions, battery leakage, blown fuse, theft or improper usage of any electrical source

The Company disclaims liability for removal or reinstallation of the product, for geographic coverage, for inadequate signal reception by the antenna

12 Month Limited Warranty

or for communications range or operation of the cellular system as a whole $% \left({{{\left[{{{c_{{\rm{s}}}} \right]}} \right]}} \right)$

To obtain repairs or replacement within the terms of this Warranty, the product should be delivered with proof of Warranty coverage (e.g. dated bill of sale), the consumer's return address, daytime phone number and/or fax number and complete description of the problem, transportation prepaid, to the Company at the address shown below or to the place of purchase for repair or replacement processing

In addition, for reference to an authorized Warranty station in your area, you may telephone in the United States (800) 229-1235, and in Canada (800) 465-9672 (in Ontario call 905-712-9299)

THE EXTENT OF THE COMPANY'S LIABILITY UNDER THIS WARRANTY IS LIMITED TO THE REPAIR OR REPLACEMENT PROVIDED ABOVE AND, IN NO EVENT, SHALL THE COMPANY'S LAIBILITY EXCEED THE PURCHASE PRICE PAID BY PURCHASER FOR THE PRODUCT

ANY IMPLIED WARRANTIES, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, SHALL BE LIMITED TO THE DURATION OF THIS WRITTEN WARRANTY. ANY ACTION FOR BREACH OF ANY WARRANTY MUST BE BROUGHT WITHIN A PERIOD OF 18 MONTHS FROM DATE OF ORIGINAL PURCHASE. IN NO CASE SHALL THE COMPANY BE LIABLE FOR AN SPECIAL CONSEQUENTIAL OR INCIDENTAL DAMAGES FOR BREACH OF THIS OR ANY OTHER WARRANTY, EXPRESS OR IMPLIED, WHATSOEVER. THE COMPANY SHALL NOT BE LIABLE FOR THE DELAY IN RENDERING SERVICE UNDER THIS WARRANTY OR LOSS OF USE DURING THE TIME THE PRODUCT IS BEING REPAIRED OR REPLACED

No person or representative is authorized to assume for the Company any liability other than expressed herein in connection with the sale of this product

Some states or provinces do not allow limitations on how long an implied warranty lasts or the exclusion or limitation of incidental or consequential damage so the above limitation or exclusions may not apply to you. This Warranty gives you specific legal rights, and you may also have other

rights which vary from state to state or province to province IN USA : UTStarcom/Audiovox Communications 555 Wireless Blvd. Hauppauge, NY 11788 (800) 229-1235 IN CANADA : UTStarcom Canada Company 5155 Spectrum Way, Unit #5 Mississauga, Ontario L4W 5A1 (800) 465-9672
