The GMR2089-2CK/GMR2099-2CK radio opera on the General Mobile Radio Service (GMRS) frequencies when using Channels 1-7 and channels 15-22. You must have a GMRS license ssued by the Federal Communications Commission to legally use these channels. For

licensing information and application forms, visithe FCC online at: www.fcc.gov/wtb/u/s or call the FCC hotline at 1-800-418-3676. If you have any questions, you can contact the FCC direct at 1-888-225-5322. No license is required for operation on channels 8-14 or operation on any

INSTALL THE BATTERY

) Make sure the radio is off. Release the battery cover clip, then remove the

battery cover.) Put the NMH battery pack in the battery

on the radio, then replace the cover clin

the status of the battenes. When the battery level meters to we, BATT appears and the battery level meter ico image if lashes. Recharge the NMH battery pack mmediately or, if you are using the alkatine statenies, replace the alkatine batteries in order to confinue using the radio.

Warning! To avoid the risk of personal injury or property damage from fire or electrical shock, or use the Uniden accessories specifically designate for this product.

CHARGING THE RADIO

If you use the rechargeable NIMH battery pack, two GMR2089-2CK/GMR2099-2CK radios can be ______tradios can be charged directly or by using the supplied charging tradie.

Charge by Using the Radio
1) Connect the DC adapter's plug to the radios DC
IN 9V jack and plug other end into your vehicle's accessory power outlet.

Using the Charging Cradle

) Connect the adapter's plug to DC IN 9V jack of the charging cradie and plug the other end into an AC outlet. Note: Channels 1-7 and 15-22 have a funical ran Note: Channels 1-7 and 15-22 have a typical rad of up to 20 miles by pressing the Power Boost button. Hi is displayed when you select a GMRS channel, and LO is displayed when you select a FRS channels. an AC outlet.

Set the charging cradle on the desk or tabletop and place the radio in the charging cradle with and place the facio in the crisinging cradie with the keypad facing forward. Charge the battery pack for 16 hours until the battery indicator stops flashing. Then remove the radio from the charging cradie after completing

Warning! The range of channels 1-7 and 15-22 or be boosted only when you use NiMH batteries. When you press Power boost while using alkaline vinen you press **Power boost** whit safferies, the range is not boosted.

lote:
For charging batteries directly without the cradle, use only the #DC-1002 Cigarette Lighter Adapter code, available from WWW.Uniden.com.
Offier power cords could damage your radio.

Use only the supplied battery and AC adapter a approved DC adapter from Uniden. Charge time may vary depending on the battery

the lower charge contacts. Be sure to follow the Do not recharge alkaline batteries. Doing so can create a safety hazard or damage the radio.
 Set a Group Code
 Set a Group Code instructions written on the battery pack's label. Installing the battery pack incorrectly will prevent For fastest charging, turn off the radio before

the unit from operating.

Align the battery cover tabs with the tab holes

Batteries must be installed for operation, even from external power. If battery power is low, you cannot operate the

radio even using enternal power. Let the batteries charge before using. If you try to transmit while power is low, the radio automatically turns off. USING THE RADIO

In order to get the most out of your new radio, read this reference guide completely before attempting to operate the unit. Turning the Radio On and Adjusting the Volum

Indiate volvoff clockwise until it clicks, and set volume to a comfortable listening level. To turn off the radio, rotate volvoff

Adjusting the Sound (Key Reens)

Choosing a Channe Your radio has 22 channels and 142 Privacy codes you can use to talk to others. In order to speak to someone, both your radios must be set to the same channel and Privacy code.

To choose a channel: Press ch tone/scn then press ▲ or ▼ to increase or decrease the channel number displayed

n miNG.

) Press ▲ or ▼ to select the desired ring sound.

With each press, you hear a sample of the selected tone.

3) Press PTT or Power boost to return to norms operation, or press menu/grp to continue to the next section.

Setting the Unit Number ach radio in your group needs to be set to a nique unit number, from 1-16.

Press and hold menu/grp for 2 seconds, then tap menu/grp three times until the radio displays n (or your current nickname). Press ▲ or ▼ to select the desired unit number

Press menu/grp to continue to the next section SETTING UP GROUP MODE etting Your Nickname

Using Group Mode Group mode lets you make direct calls to other Group mode lets you make direct casts to other people in your group without alerting the entire group and also lets you quickly change everyone in your group to another channel from a single radio. Before using group mode, follow the instructions in "Setting Up Group Mode" on every radio in your group. Then, to record the unit ID and everyone's nickname in every radio, send a call to "All" from each radio one time (see "Sending a Direct Call")

Sending a Direct Call Direct Call lets you call everyone in your group at

 Press and hold menu/grp for 2 seconds. The radio displays on GRUP.
 Tap menu/grp. The radio displays Gnnn (n is a number). Press ▲ or ▼ to select the group number. once, or call a single person in your group without anyone else in the group knowing. It is like a "speed dial" directly to the person(s) you want to Press PTT or Power boost to return to norms

To call everyone in your group, press d-call in group mode. The radio flashes ALL. Then, press d-call again. Everyone in your group receives a call chirp? for about 3 seconds. When the chirp ends, begin your conversation.

Note: When you make a direct call to "all," your radio also sends out your nickname or ID so that it will show up in the call list for everyone in your

To call one person in your group, without hasing other people know, press of-call in group mode. Then use \(\alpha \) or select the person you want to call and press of-call again, four radio sounds to call so the call again. You radio sounds to see the case for 3 seconds as a sends the cut. When the selected person answers, you can begin your conversation. You can since the call tones at any time by pressing PTT or Power boost.

Your conversation remains private between you an the person you called until 15 seconds after your last conversation. Then, your radio automatically exits private mode.

Channel Scan Feature Automatically Changing Channels

frur GMR2089-2CK/GMR2099-2CK radio has : Automatically Changing Channess
Auto Channel Change lets you easily coordinate a
channel change for everyone in your group. You
might want to do this when you find you are getting
a tot of interference on your current channel. Or, Your GMH/2009-20X/GMH/2009-20X ratio has a channel scan feature that lets you easily scan all 22 channels. When an active channel is detected, the radio pauses on that channel until the channel is clear. Then after a 2-second delay, the radio resumes scanning. Pressing PTT or Power boost

To start an auto channel change, on any radio in lo start an auto crannel cranning, on any ratio in the group lap of fore/sor thice. The current channel and CHCX appears. Use ▲ or ▼ to selet the target channel. You can check whether the selected channel sic clear. Then press d-call. Your radio chirps for about 10 seconds while it

sends out the channel change signal. As each radio receives the channel change signal, it is once, then changes to the new channel.

Make sure you are in an open environment, where the radio will get the best range.
 Optimize range during the channel change signal by raising the radio over your head to give the best possible height.

Do a "roll call" on the new channel after the move to be sure no one was left behind. If you missed someone, return to the previous channel and issue the signal again.

USING THE RADIO IN STANDARD MODE

Use the radio in standard (not group) mode when you need to be able to communicate with radios that do not have the group feature. Choosing a Privacy Code

You can select a Privacy Code from 1-142 for each channel. **OFF** (OFF) indicates no Privacy code selected and your radio can receive a signal regardless of the code settings of the transmitting radio.

and rx flashes.

Press and hold mon for 2 seconds until two indicator flashes.

2) Press ▲ or ▼ to increase or decrease the code. You can also select oFF.

3) Press ch tone/scn again. beeps sound for continuous listening. The receiver circuit stays open, so you hear both the noise and weak signals

Note: Only tones 1-38 are standard across radio brands. Other settings might differ from brand to brand. See the specifications for the specific tones sed for each setting.

o turn off Monitor Mode: Press mon to return to the previous mode. MON and rx disappear.

turn on the Monitor Mode

while the scan is paused on a channel lets you transmit on that channel.
