Controls and Indicators

- 1 Antenna
- 2 Belt Clip
- 3 Adapter Jack
- 4 Battery
- 5 Battery Release Clip
- 6 PTT (Push to Talk) Key
- 7 USA/International/Canadian Button (*UIC*)
- 8 WX Mode/Weather Alert Button (WX/ALERT)
- 9 TX Power/Lock Button (1/5W/LOCK)
- 10 Microphone
- 11 Speaker MIC (Optional) Jack
- 12 Volume/Power Knob
- 13 Squelch Knob
- 14 LCD Display
- 15 Memory Button (*MEM*)
- 16 Scan Button (*SCAN*)
- 17 Channel Up Button (A)
- 18 16/9 Triple Watch Button (16/9/TRI)
- 19 Channel Down Button (▼)
- 20 Speaker

- A Transmit Indicator
- B TX Power Indicator
- C USA/International/Canadian (US/INT/CAN) Indicator
- D Channel Number Display
- **E** Memory Indicator
- F Scan Indicator
- G Battery Indicator
- H Triple Watch Indicator
- I Weather Mode Indicator
- J Weather Alert Indicator
- K Key Lock Indicator

Warning!

- The **ATLANTIS 250** is waterproof only when both the antenna and the battery are properly attached.
- Do not operate the transmitter of any radio equipment unless all the Radio Frequency (RF) connectors are secure and any open connectors are properly terminated.
- Do not operate the transmitter of any radio equipment near electrical blasting caps or in an explosive atmosphere.
- Do not let children operate any transmitter-equipped radio equipment without proper supervision.
- Have your radio equipment serviced by a qualified technician.
- Do not operate the transmitter of any radio equipment with the antenna touching or close to the eyes, face, or exposed body parts.

Ni-MH Battery Pack Warning

- This equipment contains a Ni-MH Battery Pack.
- The Ni-MH Battery Pack contained in this equipment may explode if disposed of in a fire.
- Do not short-circuit the Battery Pack.
- Do not charge the Ni-MH Battery Pack used in this equipment with any Adapter other than the one designed to charge this Battery Pack. Using another Adapter may damage the Battery Pack or cause the Battery Pack to explode.
- Ni-MH batteries must be disposed of properly.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

Introduction

The **ATLANTIS 250** is a waterproof, portable two-way VHF transceiver. It is compact, lightweight, rugged and fits easily in your hand.

This handheld VHF marine radio will give you consistent, outstanding performance in virtually all conditions and situations. To ensure that you get the most from the **ATLANTIS 250's** features, please read this operating guide carefully before using the unit.

Features

- Waterproof (meets JIS4 waterproof specifications)
- Triple Watch Mode
- Priority Channel Startup (Channel 16)
- Programmable Memory
- One-Touch Channel 16/9
- 10 Weather Channels
- Weather Alert
- Memory Scan
- USA, International and Canadian Channels
- Table-Top Drop-In Charger (can also be wall-mounted)
- Rechargeable Ni-MH Battery Pack
- Battery Save Operation
- Key Lock
- Back-Lit Keys and Display
- Belt Clip
- Wrist Strap
- TX Power 1W/5W

Technical Support and Service

Your Uniden dealer can provide you with sales assistance and information. If your marine radio does not perform properly, follow the troubleshooting tips in the back of this operating guide.

For technical support contact Uniden at 1-800-586-0409. The radio contains no user-serviceable parts.

Unauthorized adjustment will void the warranty and may cause illegal radio operation.

Be sure that a qualified technician services your radio equipment.

Caution: Changes or modifications to this product not expressly approved by Uniden, or operation of this product in any way other than as detailed by this Operating Guide, can void your authority to operate this product.

Maritime Radio Services Operation

This transmitter will operate on channels/frequencies that have restricted use in the United States. The channel assignments include frequencies assigned for exclusive use of the U.S. Coast Guard, use in Canada, and use in international waters. Operation in these frequencies without proper authorization is strictly forbidden. For frequencies/channels that are currently for use in the world see page 22~29. Please contact the FCC Call Center at 1-888-CALL-FCC for any additional channel information.

Included in your Package

If any of these items are missing from the box, contact your Uniden Dealer or the Uniden Parts Department at (800)-554-3988.

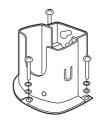

Getting Started

Mounting the Cradle

Mount the Cradle to either a counter or wall.

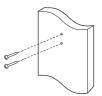

To counter:

Attach the Cradle using the mounting screws and washers as follows.

To wall:

Insert the two mounting screws into the wall keeping the same space as the holes on the charger.

Place the charger with the screws through the larger holes then turn the charger.

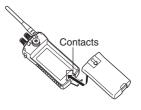

Attaching the Antenna

Attach the antenna to the **ATLANTIS 250**. Be sure the antenna is firmly seated.

Attaching the Battery Pack

- 1 Snap the battery release clip out and remove the battery case. Then place the battery pack onto the back of the radio. It will only fit in one way.
 - Use this battery case with Alkaline AA batteries (not included) in an emargency case.

2 Snap the battery release clip until it clicks. Be sure the battery pack fits tightly against the ATLANTIS 250's body.

Attaching the Beltclip

1 Hold the beltclip in the direction as follows.

2 Apply it to the hanger piece on the back of the radio. Then slid it up.

3 You will hear a click. The beltclip is firmly attached.

4 To take the beltclip off the radio, turn it and slid it up.

Charging the Battery Pack

Your marine radio is powered by a specially designed Ni-MH battery pack.

- Before operating the ATLANTIS 250, charge the Ni-MH battery pack for 22 hours without interruption with the Adapter.
- 1 Place the ATLANTIS 250 in the Cradle.

2 Plug one end of the AC adapter into the wall outlet and the other end into the Adapter jack on the back of the ATLANTIS 250.

- 3 The red LED illuminates and stays On.
- The charger won't overcharge the battery pack. When charging is completed, the charge LED is no longer illuminated.
- Do not transmit when the ATLANTIS 250 is in the Cradle!
- You can monitor incoming calls while the ATLANTIS 250 is in the Cradle.
- When you mount the Cradle on your boat, use the DC adapter instead.

Operation

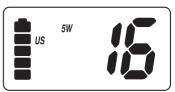

- See "Controls and Indicators" (page. 2) for button, knob, and key positions.
- When you turn On your ATLANTIS 250, it is automatically tuned to channel 16, the United States Coast Guard frequency for distress, safety, and calling.
- When you press any key (except PTT), a short tone sounds.

Turning On the Unit and Setting Squelch

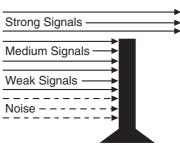

1 Before you turn On the unit, turn the **Squelch** knob fully counterclockwise.

Then, turn On the unit by turning the *Volume/Power* knob clockwise until you hear a hissing sound.

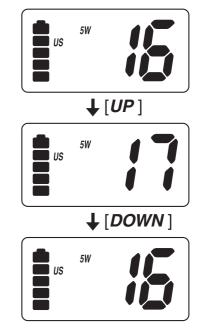

Turn the *Squelch* knob clockwise, just until the hissing sound stops. Use the knob to adjust to the desired squelch level. Think of the squelch control as a frequency gate which controls access to weak or strong signals depending on its setting.

- To listen to a weak or distant station, turn the knob counterclockwise. If reception is poor, turn it clockwise to cut out weak transmissions.
- If the squelch control is adjusted so you continually hear a hissing sound, the unit will not scan properly.
- 4 To turn Off the unit, turn the **Volume/Power** knob counterclockwise until it clicks.

Selecting a Channel

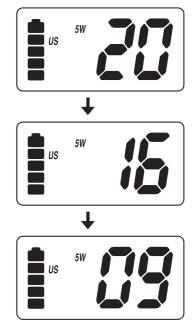

- 1 Turn On your ATLANTIS 250.
- 2 To select a higher channel, press the ▲ button.
- 3 To select a lower channel, press the ▼ button.
 - To change the channel continuously, press and hold the ▲ or ▼ button for more than 1 second.

One-touch Channel 16/9/TRI

Example: While you are monitoring channel 20, you want to check channel 16 or channel 9.

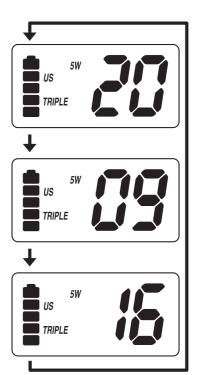

- 1 You are now on channel 20.
- 2 To monitor channel 16, press the **16/9/TRI** button.
- 3 To monitor channel 9, press the **16/9/TRI** button again.
- To return to channel 20, press the **16/9/TRI** button again.

Triple Watch

Triple Watch mode monitors channels 16 and 9 for a signal while you listen to the currently selected channel. The marine radio checks channel 16 and 9 for activity every 2 seconds.

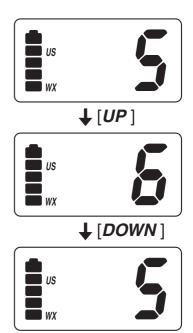

- To select Triple Watch mode, press and hold the *16/9/TRI* button for 2 seconds. A double confirmation tone sounds.
- 2 To exit from Triple Watch, press and hold *16/9/TRI* for 2 seconds. A double confirmation tone sounds.
 - While in Triple Watch mode, you can change the currently selected channel using the ▲ or ▼ button.
 - A momentary press of the 16/9/TRI
 button interrupts Triple Watch mode
 and remains on 16, or on channel 9 if
 you press once more. To return to
 the previous mode, simply press the
 button again.

Monitoring Weather Channels

The **ATLANTIS 250** has 10 preprogrammed weather channel frequencies, represented by 0 through 9.

- 2 To move up, press the ▲ button.
- 3 To move down, press the ▼ button.
- To exit, press *WX/ALERT*. Will disappears from the display.
 - To change the channel continuously, press and hold the ▲ or ▼ button for more than 1 second.

Weather Alert

Weather Alert allows your **ATLANTIS 250** to function as a severe weather warning radio. If the NOAA issues a severe weather warning while the Weather Alert is turned On, the **ATLANTIS 250** sounds an alert tone. You will then hear the emergency weather broadcast.

- 1 To use Weather Alert, select the weather channel in your area.
- 2 Press and hold WX/ALERT for 2 seconds. A double confirmation tone sounds.

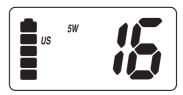

3 When the unit receives a warning signal, it beeps for 5 seconds. ₩X, ₱LERT, and the channel number blinks.

- 4 To turn Off Weather Alert, press and hold **WX/ALERT** for 2 seconds. A double confirmation tone sounds.
 - When Weather Alert is activated, the highest priority is given this function. If the unit is in Scan, Triple Watch, or any other marine channels, it checks the weather alert signals every 7 seconds and switches to the warning receive mode automatically.

USA, International and Canadian Channels

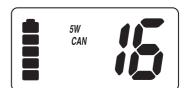

1 The ATLANTIS 250 is initially set for USA marine channels when you turn On your radio.

2 To listen to international marine channels, press *UIC* once.

To listen to Canadian marine channels, press *UIC* again.

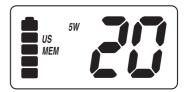

- 4 The radio will keep the last mode setting that was selected when turned back On.
 - For USA, international and Canadian marine channels and functions, refer to the tables starting on page 22.

Programming a Channel into Memory

Before using the scanning feature, you have to program channels into memory.

- 1 Select the channel to enter into memory by pressing the ▲ or ▼ button.
- 2 Press the *MEM* button to store the channel.

 ☐ ☐ ☐ ☐ appears on the display.

Deleting a Channel from Memory

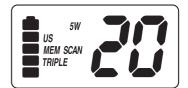

- 1 Select the channel to delete from memory by pressing the ▲ or ▼ button.
- Press the *MEM* button.

 ☐☐☐☐ disappears from the display.

Scanning

To begin scanning the programmed channels, press the *SCAN* button. SCAN and TRIPLE appear on the display.

- 2 To stop scanning, press the *SCAN* button once more. SCAN and TRIPLE disappear from the display.
 - Scanning starts from the lowest to highest channel and stops when it finds an active channel. It remains on that channel until the transmission ends, then resumes scanning after a 2 second delay period.
 - When in the scan mode, the unit automatically activates the Triple Watch feature. To deactivate Triple Watch from the scanning mode, press and hold the 16/9/TRI button for 2 seconds.

TRIPLE disappears from the display.

Transmitting

1 Transmission power can be set to either 5W or 1W.

Press the *1/5W/LOCK* button to make the change, then the 50 or the 10 indicator on the display changes accordingly.

- To return to receive, release the **PTT** key. Time disappears from the display.
 - If the **PTT** key is pressed for more than 5 minutes, TX starts blinking and the transmission ends. The TX time out tone will sound until the **PTT** key is released.
 - If the battery indicator drops to the 1-mark level on the display, when the *PTT* key is pressed, the radio will not transmit and the TX icon starts blinking.
 (Refer to the description of the Battery Indicator on the next page.)

Lighted Keys and Display

To light the display, press any key excluding the PTT key.

 If you press any button other than the *PTT* key while the display and keypad are illuminated, it remains illuminated for another 5 seconds.

Battery Indicator

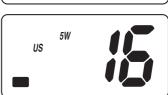

When the unit is On, battery power is always indicated on the display.

When the battery is fully charged, the battery indicator appears as follows:

us 5W

When the battery is nearly discharged, the battery indicator appears as follows:

 When the battery indicator drops to the 1-mark level on the display, the radio will receive but will not transmit.

Key Lock

To prevent accidental entries, you can lock the keypad.

- 1 Press and hold the *1/5W/LOCK* key for 2 seconds. The unit will beep two times to confirm that the keypad is locked with LOCK indication on the display.
- 2 To unlock the keypad, press and hold the 1/5W/LOCK key again for 2 seconds. The unit will beep twice to confirm that the keypad is unlocked, and LOCK will disappear.
 - You can also unlock the keypad by turning the radio Off and then On again.

Specifications

General

Channels Transmit 54 US/International/Canada

Receive 89 US/International/Canada

Weather 10

Freq. Control PLL

Freq. Tol. Transmit 1.5 PPM (at 25°C)

Receive 1.5 PPM (at 25°C)

Oper. Temp. $-4^{\circ}F$ (-20°C) to

+122°F(+50°C) Flexible Whip

Antenna Flexible Whip
Microphone Built-in Electret type
Display Liquid Crystal Display

Speaker 8Ω 1 Watt

Power Source Rechargeable Ni-MH Battery Pack

7.2V 1350 mAh

Size (without antenna) 5.9 (H) x 2.7 (W) x 2.5 (D) inch

147 (H) x 67 (W) x 63 (D) mm

Weight (w/battery & antenna) 8.8 oz (250g)

Transmitter

Frequency Range 156~158 MHz
Frequency Stability ±10 PPM
Power Output 1.0 W & 5W
Spurious Emissions -60 dBc (5W)

Current Drain 700mA (1W), 1500mA (5W)

Receiver

Receiver Type Double Conversion Super

Heterodyne Phase

Locked Loop system for Local Oscillator

Frequency Range 156~164 MHz

Sensitivity 0.35µV for 12dB SINAD

Squelch Sensitivity Threshold 0.25µV Audio ±6 dB 500 to 2000Hz

Frequency Response

Adjacent Channel 70 dB @ ±30 kHz

Selectivity

Hum & Noise Ratio 40 dB

Audio Output Power 0.6 W @ 10 % THD

Current Drain Squelched 40mA

Max. Audio 170mA

Specifications shown are typical and subject to change without notice.

Troubleshooting

■ Not enough range

Cause: Line of sight blocked

- ⇒ Increase antenna height.
- Will not transmit on 5 watt range but will transmit on the 1 watt range.

Cause: Low voltage

- \Rightarrow Recharge or replace the batteries.
- Will not transmit while on the charger.

Cause: Low voltage

- ⇒ The unit is not designed to transmit while on the charger. The charger does not supply enough power for transmitting.
- Battery will not charge.

Cause: Charger inoperative

⇒ Replace charger. Damage to the charger can be a result of keying up the radio while on the charger.

FCC RF EXPOSURE INFORMATION

WARNING! Read this information before using the radio

In August 1996 the Federal Communications Commission (FCC) of the United States with its action in Report and Order FCC 96-326 adopted an updated safety standard for human exposure to radio frequency electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies. The design of the radio complies with the FCC guidelines and these international standards.

 Never allow children to operate the radio without adult supervision and the knowledge of the following guidelines.

WARNING!

It is up to the user to properly operate this radio transmitter to insure safe operation. Please adhere to the following:

Use only the supplied or an approved antenna. Unauthorized antennas, modifications, or attachments could impair call quality, damage the radio, or result in violation of FCC regulations.

Do not use the radio with a damaged antenna. If a damaged antenna comes into contact with the skin, a minor burn may result. Please contact your local dealer for a replacement antenna.

Body-worn Operation

This device was tested for typical body-worn operations using the supplied belt-clip, which typically provides a space of 1 inch from the body. To maintain compliance with FCC RF exposure requirements, body-worn operations are restricted to the supplied belt-clip.

For hand-held operation, the radio should be held 1 inch from the user's face. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements and should be avoided. For more information about RF exposure, please visit the FCC website at www.fcc.gov.

 When using an external speaker microphone, USE ONLY THE UNIDEN MODEL HHVTA07. Use of any other accessory for this purpose may invalidate your authority to operate this device.

Three-Year Limited Warranty

Important! Evidence of original purchase is required for warranty service.

WARRANTOR: Uniden

ELEMENTS OF WARRANTY: Uniden warrants for three years, to the original retail owner, this Product excluding Li-ion battery pack to be free from defects in materials and craftsmanship with only the limitations or exclusions set out below. Uniden warrants for 12 months, to the original retail owner, the Ni-MH battery pack to be free from defects in material and craftmanship with only the limitations or exclusions set out below.

WARRANTY DURATION: This warranty to the original user shall terminate and be of no further effect 36 months (12 months for the Ni-MH battery pack) after the date of original retail sale. The warranty is invalid if the Product is (A)damaged or not maintained as reasonable or necessary, (B)modified, altered, or used as part of any conversion kits, subassemblies, or any configurations not sold by Uniden, (C)improperly installed, (D)serviced or repaired by someone other than an authorized Uniden service center for a defect or malfunction covered by this warranty, (E)used in any conjunction with equipment or parts or as part of any system not manufactured by Uniden, or (F)installed or programmed by anyone other than as detailed by the Operation Guide for this product.

STATEMENT OF REMEDY: In the event that the product does not conform to this warranty at any time while this warranty is in effect, warrantor will either, at its option, repair or replace the defective unit and return it to you without charge for parts, service, or any other cost (except shipping and handling) incurred by warrantor or its representatives in connection with the performance of this warranty. Warrantor, at its option, may replace the unit with a new or refurbished unit. THE LIMITED WARRANTY SET FORTH ABOVE IS THE SOLE AND ENTIRE WARRANTY PERTAINING TO THE PRODUCT AND IS IN LIEU OF AND EXCLUDES ALL OTHER WARRANTIES OF ANY NATURE WHATSOEVER, WHETHER EXPRESS, IMPLIED OR ARISING BY OPERATION OF LAW, INCLUDING, BUT NOT LIMITED TO ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THIS WARRANTY DOES NOT COVER OR PROVIDE FOR THE REIMBURSEMENT OR PAYMENT OF INCIDENTAL OR CONSEQUENTIAL DAMAGES. Some states do not allow this exclusion or limitation of incidental or consequential damages so the above limitation or exclusion may not apply to you.

LEGAL REMEDIES: This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

This warranty is void outside the United States of America.

PROCEDURE FOR OBTAINING PERFORMANCE OF WARRANTY: If, after following the instructions in this Operating Guide you are certain that the Product is defective, pack the Product carefully (preferably in its original packaging). The Product should include all parts and accessories originally packaged with the Product. Include evidence of original purchase and a note describing the defect that has caused you to return it. The Product should be shipped freight prepaid by traceable means to warrantor at:

Uniden America Corporation
Parts and Service Division
4700 Amon Carter Blvd.
Ft Worth, TX 76155
(800) 235-3874, 8 AM to 5 PM. Central, Monday through Friday
