How to use

Start up

1. Open the battery cover, take the USB dongle out which is under the battery cover.

4. The connection is successful (slide your finger on touchpad you can see the cursor moving on the screen)

2. Plug USB dongle into any USB port of your device (Raspberry Pi/Smart TV /PC)

Power Switch

3. Turn the unit on by switching the power switch to on (the LED would be flashing then go out)

Charge your keyboard: when your keyboard  flashing all the time that means your keyboard is in low charge, and need to charge, Connect your keyboard to your computer with micro end of USB cable to your keyboard and another end to computer, then  will light up with steady on, and go out when it is fully charged.

To avoid the RF-signal blocked by TV metal case Please use the supplied extend USB cable

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
