## Getting Started

### **Congratulations!**

You've purchased one of the most advanced and easy to setup control systems available. The MX-350's built-in library includes thousands of different brands and models of remote controls. In most systems, all you have to do to setup the MX-350 is enter which brands and models you own. If you own a component too new to be in the library, the MX-350 uses advanced learning technology to quickly set each MX-350 button, one at a time. Setting up your MX-350 to replace all your existing remote controls can be done in a few minutes. Basic Setup is described on pages 5 to 13.

The MX-350's exciting advanced features automate and customize operation in many ways. You could use Macro Setup to power on all of your components and start the show with the press of one button! With the MX-350's unique Favorite Channel capability, you can tune in a channel with the press of one button instead of entering the entire channel number. Any of the button names on the display can be edited as you like. It is best to delay any Advanced Setup (described on pages 14 to 36) until after you finish Basic Setup.

### **Battery Installation**

Remove the battery compartment cover by pressing up the cover lock. Insert four AAA batteries into the battery compartment as shown in the diagram.

## Button Layout

\*Note: When a command, macro or favorite channel is being transmitted, an icon will appear in the top right corner of the display. While the MX-350 is "busy", it will ignore a button push.

## The MX - 350

### Selecting a New DEVICE Changes All Button Commands Instantly

The MX-350 can operate ten different devices even though it is only one remote control. Let's try it now! Press the MAIN button, then press the TV DEVICE button.

The top of the screen changes from MAIN to TV. Now all of the buttons change their function to operate a TV. Press the page buttons. Watch the labels of the display buttons change with each press. There are eight pages of display buttons already labeled for TV operation. To operate another component (e.g., VCR, DVD etc.), press the MAIN button to return to the MAIN menu. The MAIN menu displays five of your Devices on the screen. Simply press one of the screen-labeled Device buttons to operate another device. If you don't see the device name you want, then use the PAGE buttons to display the remaining five devices on page 2 of the MAIN menu.

### Light Button

Press the LIGHT button to backlight all the buttons. To turn off the backlighting, press the LIGHT button again, or just wait ten seconds (the backlighting automatically shuts itself off).

## Basic Setup

You can start setting up your MX-350 using either the Pre-Programmed Method or the Learning Method. However, all the buttons of the MX-350 are setup at once with the Pre-Programmed Method, so it is usually faster than the one-button-at-a-time Learning Method.

## Pre-Programmed Method

- 1 Power on the A/V component you wish to setup, so that you can test codes by sending power off commands.
- 2 Refer to the pre-programmed code tables on pages 38 - 59 and write down the code numbers listed for your A/V component. The code numbers are listed by categories of devices, then by brand. See page 37 for a category list.
- 3 Press and hold both the MAIN and ENT (Enter) buttons for approximately three seconds. The top of the display will show "SETUP". You are in SETUP mode now.

**Note:** You have 30 seconds to perform a step while you are in SETUP mode. If you don't press a button within that time, the MX-350 will time out and return to normal operation.

## The MX - 350

- 4 Press the P-PRO button to select the Pre-Programmed Method.

The display changes so that you can select which Device button to setup.

Press a Page button to display the other five Device names.

- 5 In this step you choose the name of the device you'd like to setup. Use the cursor UP or DOWN buttons to change the flashing name. When it is correct, press the SELECT button.

*For Example: I wanted to setup the TV Device button first, so I pressed the cursor UP or DOWN until "TV" was flashing in the display.*

The bottom of the display will flash "FROM TABLE".

## Universal Remote Control, Inc.

- 6 In this step you verify the type of component you plan to operate with this device button. If the flashing name is correct, press SELECT.

*If the name flashing in the display is incorrect (for example, you are setting up AUX to operate a Laser Disc Player), use the UP and DOWN buttons to change the flashing name to the correct type of component.*

**Note:** Each name that appears in the display may include several types of components. For example, the DVD category includes DVD players and Laser Disc Players. See page 37 for a list of component types each Code Table contains.

- 7 Point the MX-350 at the component, then enter the first three digit code number from your notes using the numbered buttons. After you enter each three digit number, look at the component to see if it turned off.

Continue to enter code numbers until the component powers off.

*For Example: I have a Sony TV. I found the code numbers 070, 139, 147, 126, 185, 194 and 085 under Sony in the TV TABLE. Using the numbered buttons on the MX-350, I entered 070 and looked at the TV. It didn't turn off, so I entered 139, then 147 and so on, until I found the code that powered off the TV.*

## The MX - 350

**Note:** If a component fails to turn off after you have entered all of the code numbers listed for your brand, you can scan through the other brands in the table using the UP and DOWN buttons (there is a chance that your component was actually manufactured by another brand). However, most of the code tables are so large it is usually faster to use the Learning Method on Page 9.

- 8 When the component turns off, save the code number you entered by pressing the SAVE button that appears on the screen.

- 9 Exit SETUP mode by pressing the MAIN button two times. When the display shows "MAIN", you are back in normal operating mode.

## Universal Remote Control, Inc.

- Repeat steps one through nine for each of your devices. If you are missing any commands, use the learning method, described next

### Learning Method

The MX-350 can learn commands from your old remote controls one-button-at-a-time by following these simple steps:

- Line-up the MX-350 with your old remote control, head-to-head, one or two inches apart.

- On the MX-350, press and hold the MAIN and ENT (Enter) buttons at the same time for approximately three seconds. The top of the display will show "SETUP". You are in SETUP mode now.

**Note:** You have 30 seconds to perform a step while you are in SETUP mode. If you don't press a button within that time, the MX-350 will time out and return to normal operation.

- Press the LEARN button.

The top of the screen will change to "LEARN".

## The MX-350

- 4 The display will show a list of the first five devices.
- 5 Select the device you would like to teach commands to by pressing the Device button.

- 6 Now, press any button you want to teach a command to.

**Note:** If you don't see the display button you would like to teach, use the PAGE buttons. The only buttons you can't teach are the PAGE and MAIN buttons.

Once you press a button, the top of the display will change from "LEARN" to "READY".

## Universal Remote Control, Inc.

- 7 Press and hold the button you want on your old remote control until the display changes to either "GOOD" or "FAILED".

If the "GOOD" label appears on top of the display, you were successful. Now, press the next button you wish to teach. Keep repeating steps 6 through 7 until you have learned all the buttons you want.

If the "FAILED" label appears on top of the display, try to teach the same button in MX-350 once again by repeating steps 6-7.

- 8 Continue to teach any commands from any of your remote controls by repeating steps 5-7 (to go back to step five, press MAIN once).
- 9 Once you completed teaching all the buttons, return to normal operation by pressing the MAIN button twice. Test all your new commands. If any of them don't work, try learning again using these notes:

*Move to another room. Plasma TVs, sunlight, halogen or quartz lighting can interfere with the learning process.*

*Although the old remote control seems to work fine, change the batteries to fresh alkaline batteries.*

*Vary the distance between the remote controls gradually. Try 1/4", 1", 2" and so on, up to 4 feet.*

*Tap the button on the original remote control instead of pressing and holding it during the learning process.*

### Volume Control Punch Through

In most home entertainment systems, the sound volume is only controlled by one device. In some systems, it is the TV speakers that make the sound, so you would use the TV device on the MX-350 to raise and lower the volume. In another system, it might be a surround sound receiver and speakers that control the sound, so you would use the MX-350's AUDIO device to adjust the volume. Constantly switching the MX-350 to TV or AUDIO to adjust the volume is inconvenient in daily life.

You can use Punch Through to set the MX-350's volume buttons to always control the sound in your system. That way when the MX-350 is set to VCR or DVD, the volume up, down and mute buttons will work perfectly without switching back to AUDIO or TV. Here's how:

- 1 Enter Setup mode by pressing and holding both MAIN and ENT for three seconds. The top of the display show you are in SETUP mode now.

**Note:** You have 30 seconds for each step, otherwise the MX-350 will time out automatically.

- 2 Press the PAGE UP button to get to page 2 of the SETUP menu. Press the PUNCH button.
- 3 Press the VOL button. The display confirms by displaying "VOL" at the top of the screen. This sets up the group of three buttons (Volume Up, Volume Down and Mute) in one action!

The bottom of the display flashes "PUNCH TO".

## Universal Remote Control, Inc.

- 4 Press the device button for the device that doesn't have volume control commands yet (i.e.,DVD). This is the device you are going to PUNCH TO for the volume and mute commands.

**Note:** If you wish to PUNCH to the MAIN device, press the POWER OFF button at this time.

- 5 The bottom of the display will then flash "PUNCH FROM". Now you select the device that has the volume commands you want (i.e.,TV for systems using the TV speakers, AUDIO for systems with surround sound receivers). The bottom of the display will flash "SAVED".
- 6 Repeat steps 3-5 until all your devices operate the volume perfectly. Press the MAIN button twice to return to normal operating mode and test your Punch Through settings.

**Note:** The Punch Through feature is not limited to volume and can also be applied to channel or other functions. If you find yourself switching to a particular device frequently to use a group of controls, consider using Punch Through for another group, as listed here:

**VOL** - Volume Up, Volume Down and Mute

**CH** - Channel Up, Channel Down, Prev. Channel and Number buttons (0-9, +10, ENT)

**PLAY** - Play, Stop, Pause, Rewind and Fast Forward

**VOD** - Guide, Menu, Info, Exit, Up, Down, Left, Right, Sel

**POWER** - Power On and Power Off

## Advanced Operation

### Setting Backlight Options

You can adjust the amount of time that the MX-350 backlight stays on by entering the SETUP mode and proceeding to page two (using the PAGE UP button), then pressing the LIGHT button on the display (not the Backlight button). Then enter the amount of time you would like the light to stay on using the number pad (0-99 seconds). After making your selection, press the SAVE button.

If you don't want backlighting at all (this extends battery life), press the ON button that appears on the screen. The ON will change to OFF. Press the SAVE button. Exit the setup mode by pressing the MAIN button.

### The FAV Button

When you press the FAV button, the display changes to a list of your favorite TV channels. Each button can be set to instantly select the channel on your TV. There are eight pages of five favorite channel buttons for a total of 40. Simply touch the PAGE buttons to display the other favorite channels. To return to the last device you viewed, press MAIN once (a second press will take you to the MAIN menu).

To setup your Favorite Channel buttons go to page 21.

# Universal Remote Control, Inc.

## Adjusting Contrast

You can make the text darker by pressing both the MAIN and cursor UP buttons at the same time. To make the text appear lighter, press both the MAIN and cursor DOWN buttons at the same time.

Contrast set low.

Contrast set high.

## Transmitting (Busy Signal) Icon

When a command is being transmitted, an icon will appear in the top right corner of the display. It is a useful aid when setting up Macros and FAVs, since it flashes with every step of a sequence of commands.

## Advanced Setup

After you've finished all your basic setup, you can choose to make operation easier by customizing the MX-350 just the way you want, using the Advanced Setup features described in this section.

### Editing Button Labels

You can change the name of any of the display buttons (including Favorite Channels) by following these steps:

- 1 Press and hold both the MAIN and ENT (Enter) buttons for approximately three seconds. The top of the display will show "SETUP". You are in SETUP mode now.

**Note:** You have 30 seconds to perform a step while you are in SETUP mode. If you don't press a button within that time, the MX-350 will time out and return to normal operation.

- 2 Press the EDIT button.

- 3 The display changes to the EDIT menu. Press the TEXT button.

- 4 The screen displays the list of devices and "EDIT" will appear at the top of the screen. Navigate to the device and page where there is a button label you want to EDIT, selecting between the FAV, MAIN, DEVICE, then using the PAGE button.

## The MX - 350

- 7 When you are finished editing the button, press the button you edited and "SAVED" will flash at the bottom of the display.
- 8 To change any other button labels on the same device, press the next button, then repeat steps 6-8. If you wish to edit a button on another device, press the MAIN button once, then repeat Steps 4-8.
- 9 Once you've finished editing buttons, press the MAIN button four times to return to normal operation.

### Edit the MAIN Menu Title or a MAIN Menu Device Label

You can change the title of the MAIN Menu or a MAIN Menu device label by following these steps after you've entered TEXT Edit mode (described in the steps one through four in the preceding pages).

- 1 Once you've entered TEXT Edit mode, the top of the screen displays EDIT and the first five devices of the MAIN Menu. There are five pages you can access via the Page UP or DOWN buttons. When the top of the screen says EDIT, pressing a device button jumps to the pages for that device so that you can edit a device's LCD buttons normally. However, if you continue to tap the Page button, the top of the screen will change from EDIT to MAIN. While it says MAIN, there are three pages of LCD buttons. The first two list the Devices of the MAIN Menu and enable you to change the device names when pressed. The third page titled MAIN has only one entry for the LCD buttons; "MAIN". When you press the corresponding hard button, you can relabel the MAIN title itself.
- 2 Select the title to edit by pressing the adjacent hard button.
- 3 Edit the text (described on steps 5 and 6 on page 17).
- 4 Press the button you edited to save the changes. Here's an example:

*The MAIN Menu title has been changed to PATIO, so whenever the MAIN button is pressed, the user is reminded that this is the Patio remote.*

*Each of the MAIN menu device buttons has been custom labeled for the activities the user likes to use out on the Patio.*

# Macro Button Setup

Imagine turning on your TV, your DVD player and your surround sound receiver by pressing a single button on your MX-350! What would normally take three remotes and three button pushes, the MX-350 can accomplish with the press of one button. We call that a “Macro”. Any of the Display buttons, the Power On or the Power Off buttons (on any Device or Page) can be set to be Macro buttons!

To setup a macro button, follow these easy steps:

- 1 Enter the SETUP mode by pressing and holding both MAIN and ENT for three seconds.

**Note:** You have 30 seconds for each step, otherwise the MX-350 will time out automatically.

- 2 Press the MACRO button. The top of the display will show “MACRO”. The bottom of the display will flash “SELECT”.
- 3 Navigate to the Device and Page where there is a button you would like to set as a Macro button using the MAIN, DEVICE, and PAGE buttons.

### Advanced Options:

If you wish to set one of the DEVICE buttons as a macro, on step 3, press the Page Up button twice. The top of the display changes to MAIN, and you can navigate to MAIN page 1 or page 2 before going on to Step 4.

Another option for DEVICE button macros is to only send the macro if the button is pressed and held. This is setup by entering a delay as the first step of the macro. The amount of delay determines how long the user must press the button before the macro is sent. The advantage of this option is that a normal press of the DEVICE button will simply switch devices without issuing the macro.

- 4 Press the button you want to set as a Macro button. The top of the screen will display the label of the button you selected. At the bottom of the screen it displays “STEP0”, indicating that no macro steps have been entered yet.

## The MX - 350

- 5 Navigate to the Device and Page that has a button you want in your macro using the MAIN, DEVICE and PAGE buttons. Then press the button with the command you want. Whenever a button is pressed, another Macro step is counted and displayed at the bottom of the screen.

*Don't worry about the number of steps. Each macro button can store up to 190 steps, so you are not likely to run out of steps!*

**Note:** You can program delays in between commands by pressing the PAUSE button. Each press adds half a second to the delay.

- 6 Press the LIGHT button to end your macro. A new screen displays three choices:

**SAVE** — If you are happy with your macro, press the SAVE button.

**UNDO** — The UNDO button lets you erase the last step.

**EXIT** — The EXIT button erases all the macro steps.

- 7 Press the MAIN button twice to return to normal operation.

## Favorite Channel Setup

Imagine surfing all your favorite channels, without ever typing in a channel number. By simply setting up each of the favorite channel buttons, you can make TV, cable or satellite operation fun and easy. To setup a Favorite Channel button, follow these steps:

- 1 Enter SETUP mode by pressing and holding both MAIN and ENT for three seconds.

**Note:** You have 30 seconds for each step, otherwise the MX-350 will time out automatically.

- 2 Press the FAV display button.

The top of the display will show "FAV". The bottom of the display will flash "SELECT".

- 3 Use the Page buttons until you can see the name (i.e., ABC, CBS, NBC) of the favorite channel you wish to setup.
- 4 Press the favorite channel button you wish to setup. The top of the screen changes to show the channel name. The bottom of the screen displays "STEP0", indicating that you have not entered the channel number yet.
- 5 Press either the TV, SAT or CABLE Device button (select the device you use to enter channel numbers).
- 6 Press each of the number buttons for the channel.

**Note:** Some brands of television require an ENT(Enter) command after the channel numbers.

## The MX - 350

**Note:** If a number is repeated when setting the channel (for example, channel "33" or "522") it is usually best to set a half second delay in between the identical numbers by pressing the PAUSE button. Each press of the PAUSE button increases the delay by a half second.

*Use the PAUSE Button to set delays between steps, each press of the pause button increases the delay by a half second.*

- 7 Press the LIGHT button after you enter the channel number. A new screen appears:

To save the channel you entered, press the SAVE button. The UNDO button lets you erase the last entry. The EXIT button erases all entries for this button.

- 8 When you are finished setting up Favorite Channel buttons, press the MAIN button twice to return to normal operation.

## Hiding and Adding Pages

Each of your MX-350 Devices contains up to eight pages (if a page has no IR data, it will be HIDDEN). However, you can HIDE any page from the users view. A hidden page still appears in SETUP modes, so can be used in macros. If you change your mind and would like the user to see a hidden page, you can ADD them. You can add or hide pages on devices, or on your favorite channel pages using this simple process:

**Note:** Be sure to program your Macros before you hide pages with a potential macro step in them. You can't access hidden pages during macro setup. However, after you finish Macro setup, you can hide pages without affecting operation of your macros.

- 1 Enter SETUP mode by pressing and holding both MAIN and ENT for three seconds.

**Note:** You have 30 seconds for each step, otherwise the MX-350 will time out automatically.

- 2 Press the EDIT button.

- 3 Press the PAGE button.

"PAGE" appears at the top of the screen.

## The MX-350

- 4 Navigate to any page, using the MAIN, DEVICE, FAV, and PAGE buttons.

- 5 When you select a page, the top of the screen indicates whether you want to "ADD?" or "HIDE?" the page displayed. When you would like to change a page's visibility, press the LIGHT button.

This page is hidden.  
To ADD it, press the  
LIGHT button.

This page is visible.  
To HIDE it, press the  
LIGHT button.

- 6 You can continue to ADD or HIDE pages on other devices by repeating Steps 4 and 5.
- 7 When you are finished adding and hiding pages, press the MAIN button four times to return to normal operation.

### Erasing

You can erase an individual button with a learned command, a macro or a favorite channel. You can erase an entire Device's learned command or macro buttons. You can also erase ALL your learned commands on all devices or all your macros or favorite channels everywhere. If you really want a fresh start, it is possible to reset everything to the factory default condition.

#### Erasing Learned Buttons, Macros or Favs

- 1 Enter SETUP mode by pressing and holding both MAIN and ENT for three seconds.

**Note :** You have 30 seconds for each step, otherwise the MX-350 will time out automatically.

- 2 Press a PAGE button to display page two of Setup.
- 3 Press the ERASE button.
- 4 Press either the LEARN, MACRO or FAV button. The following screen appears:

**ALL** — If you press ALL, the MX-350 displays a SURE? button. After the SURE button is pressed, all the buttons will be erased.

**DEVICE**— If you press DEVICE, a list of Devices will appear. Press the device button that you wish to erase. The bottom of the screen will flash ERASE twice, then ERASED.

**KEY**— If you press KEY, you'll have to navigate to the Device and Page you want using the MAIN, DEVICE and PAGE buttons. Press a button to erase it. The bottom of the display will flash ERASE twice, then ERASED.

To return to normal operating mode, press the MAIN button four times.

## The MX-350

### Erasing the Entire MX-350

To erase EVERYTHING, press and hold both the MAIN and the STOP buttons for 15 seconds. After 15 seconds, the RESET screen appears. Press the SURE button to erase all of your settings and return to the factory default setup.

### Cloning One MX-350 to Another

If you own two or more MX-350, you can copy and transfer all the setup from one MX-350 to another. Just follow these easy steps:

- 1 Enter SETUP mode by pressing and holding both MAIN and ENT for three seconds.

**Note:** You have 30 seconds for each step, otherwise the MX-350 will time out automatically.

- 2 Press a PAGE button to display page two of Setup.
- 3 Press the CLONE button.
- 4 Align the two MX-350 head-to-head, about an inch apart.

- 5 Press the RECV display button on the new MX-350 you would like to setup by cloning.
- 6 Press the SEND display button on the MX-350 you previously setup.
- 7 Press the START button on the new MX-350 and then press the START button on the MX-350 you previously setup.

**Note:** Cloning typically takes about 90 seconds.

After completion, the cloned MX-350 will flash "GOOD".

- 8 Return to normal operation by pressing the MAIN button twice.

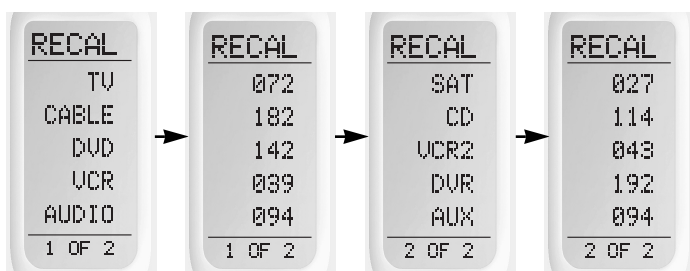

# Recalling Pre-Programmed Settings

If you didn't write down the code numbers you setup your MX-350 with, you can recall them via this simple process:

- 1 Enter SETUP mode by pressing and holding both MAIN and ENT for three seconds.

**Note:** You have 30 seconds for each step, otherwise the MX-350 will time out automatically.

- 2 Go to page two of the SETUP menu via the PAGE UP button.
- 3 Press the RECAL button. The display changes to the recall screens. The screen automatically switches between four screens, alternately flashing page one devices and code numbers then those for page two.

**Note:** Pay attention to the page numbers on the bottom of the screen. Page 1 code numbers are the ones setup for the Page 1 Devices. Page 2 code numbers are the ones setup for the Page 2 Devices.

- 4 Write down the code numbers as they appear.
- 5 Return to normal operation by pressing the MAIN button twice.

# Utilizing Optional RF Base Stations

You can use the MX-350 as you would your other remote controls. It transmits very powerful line-of-sight output using infrared light commands (invisible to the naked eye). When you point the MX-350 at the components, expect the range to be between 30 and 50 feet. When the remote is not pointed in the general direction of the components, the range will vary (depending on reflective surfaces, lighting, etc.).

However, the MX-350 also sends radio signals in every direction. By purchasing the MRF-100 or the addressable MRF-250 or MRF-350 base stations, you can operate your equipment with the MX-350 50 to 100 feet away (through walls, doors, cabinets, inside or outside). Since the RF Base Station picks up the MX-350's radio signals from any direction, regardless of distance, the MX-350 *doesn't have to be pointed!*

### Using MRF-250 or MRF-350 Addressable Base Stations

By installing an MRF-250 or MRF-350 base station you gain freedom from interference from a nearby room, house or condo where someone else might be using an RF remote control. Addressable base stations are assigned one of 15 unique ID#'s. This allows multiple equipment locations in one house to be controlled by any MX-350. In operation it's simple: when you select a device located in the Den, the MX-350 only talks to the base station in the Den. When you select a device located in the Family Room, the MX-350 only talks to it!

When used with an MRF-250 or MRF-350 base station, the MX-350 can be programmed to control identical components, for example, a media room array of TV's. The intelligent routing of the MRF-250 or the MRF-350 base station will send your commands only to the TV you want to control. The other identical TV's will not receive commands. Of course, if your system utilizes identical satellite receivers, cable boxes, VCR's or disc changers you can utilize IR routing just as easily for them. If you have more than six identical components, up to 15 addressable MRF-250's or MRF-350's can be installed to control them (thus allowing up to 90 identical components in one house).

**Note:** The MX-350's radio signals will not control components directly. Components that came with "no pointing" radio remote controls cannot be operated by the MX-350 unless the component can be switched to standard

## Universal Remote Control, Inc.

The MX-350 sends radio signal to the MRF-100, MRF-250 or the MRF-350 RF Base Stations.

The RF Base Station converts radio signals to standard infrared commands and sends them out via a built-in front blaster to components in the same cabinet space.

Self-adhesive “flashers” (included with the MRF-250 or the MRF-350) affix to the front panels of your components. The flashers relay infrared commands to components out-of-sight of the front blaster. The flashers plug into the rear flasher line output jacks. Each flasher has a 10’ cable to easily reach components on nearby shelves.

## The MX - 350

### RF Settings Overview

The MX-350 is factory set to work out of the box with an MRF-100 base station, which is not addressable. The only setting that affects operation with an MRF-100 is the RF/IR setting (to operate, the MX-350 must be set to IR/RF or RF- it will not operate the MRF-100 in IR mode). The MX-350 will operate with an MRF-250 or MRF-350 base station set to ID#0 with the factory default settings. However, in order to gain the advantages of addressable base stations (no interference between systems within one house or a condo development with potential interference between two different condos, turning the front blaster on or off, or routing identical commands to a stack of identical televisions or satellite receivers etc.) you must reset the MX-350 and the Base Station ID# to any address other than ID#0. ID#0 is an “open door” to any RF signal, it is not a true address. It is extremely useful for testing whether any interference is present, since the base station’s STATUS LED will flicker if interference is present. Once the base station is moved to a location where the LED does not flicker, the ID# can be changed to one of the other addresses.

Note that ID#0 does not allow any emitter or blaster configuration. Before changing any emitter or blaster settings, you must reset the ID# to an address other than 0. Here are the factory default RF settings of the MX-350:

**IR/RF (Type of Signal)** - All devices are factory set to send both an IR line of sight signal and an omnidirectional RF signal.

**ID# (Base Station Address)** - All devices are factory set with ID #0.

**EMITT (IR Emitter Line Output)** - All devices are factory set to output IR commands through ALL IR Emitter Line Outputs.

**BLAST (Base Station Front Panel Blaster)** - The blaster is factory set to be on.

### Changing the RF Settings

- 1 Enter SETUP mode by pressing and holding both MAIN and ENT for three seconds.

**Note:** You have 30 seconds for each step, otherwise the MX-350 will time out automatically.

- 2 Press the PAGE buttons until page three of Setup is displayed (RF is the only choice on Page 3).

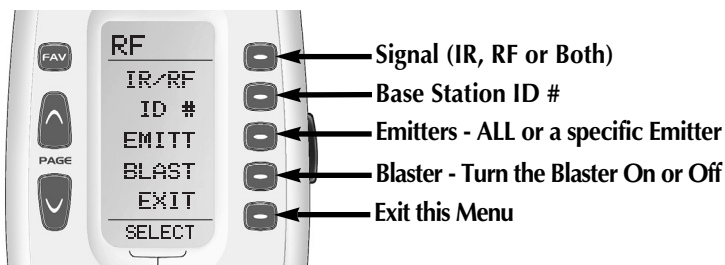

## Universal Remote Control, Inc.

- 3 Press the RF button.

- 4 The RF Settings Menu appears. See the notes on the following pages for more info on each option. Make your selection by pressing the button you want:

- 5 After you've made a new setting and SAVED your change, use the EXIT button to return to the RF settings menu to change any other setting. Once you are finished all settings, use the MAIN button to return to normal operation

### IR/RF Signal Setting

You can set the signal to be IR line-of-sight only, RF only or IR and RF simultaneously. Additionally, you can set the signal the same way for ALL ten of your devices OR you can set the signal differently for each device (the plasma TV could be set to be IR line-of-sight only, while the DVD player and the Satellite receiver are set to be RF only). A good reason to set the signal to RF only is to prevent too much IR being sent to a sensitive component from two arrivals at the front panel (one directly from the MX-350, one from the RF base station). A good reason to set the signal to IR only is that another room has an MRF-100 base station (no RF address) so it will receive commands from the MX-350 unless it is set to IR only.

## The MX-350

- 1 From the RF Settings Menu, select IR/RF.
- 2 Decide whether you are changing the Signal for all devices or just one of the devices of the MX-350.

Select ALL to change the signal settings to ALL devices in the MX-350. Then, go to Step 4.

Select DEVIC to change the signal settings to just one of the devices in the MX-350. Then, go to Step 3.

- 3 The display changes to a list of the names of your devices. If you have two pages of devices, pressing either of the page buttons will display the other page. Select the device you would like to change IR/RF settings, then go to Step 4.

Page Buttons display the other page of devices.

Select a device

- 4 Select the new setting by pressing the desired button, then press SAVE to save your new setting and return to the RF settings menu.

Both IR and RF will be output

Only IR line-of-sight

Only RF will be output

Save the new setting

Exit this Menu without changing the IR/RF settings

## Universal Remote Control, Inc.

### ID # - Setting Base Station Address

When you are installing a system within 100 feet of another equipment location in the same home OR near a home, condo, yacht or motor home that might potentially have an RF remote control of any kind, it is recommended that you use an addressable base station and set the address as described here.

You can operate up to 15 different equipment locations, each with an MRF-250 or MRF-350 assigned a unique Receiver ID#. You program each or all of your MX-350 devices to the appropriate equipment location by assigning the corresponding ID# in the RF Settings Menu.

- 1 From the RF Settings Menu, select ID#.
- 2 Decide whether you are changing the ID# for all devices or just one of the devices of the MX-350.

- 3 The display changes to a list of the names of your devices. If you have two pages of devices, pressing either of the page buttons will display the other page. Select the device you would like to change the ID#, then go to Step 4.

## The MX - 350

- 4 Select the new setting by pressing the desired button, then press SAVE to save your new setting and return to the RF settings menu.

### EMITT - Setting IR Emitter Outputs

The MRF-250 and MRF-350 Base Stations enable you to route or steer the IR commands from any Device to any or all of the IR Line Outputs. This allows you to control identical devices using the exact same IR commands (such as an array of television sets in a media room or a stack of identical satellite receivers installed in a central location with one satellite receiver dedicated to each room with a television). Each button push (or macro step) is routed to the specific IR Line Output you've assigned to a device. In the factory set default settings, the MX-350 is set to route IR commands from any device to ALL IR Line Outputs simultaneously. To change the MX-350 default settings follow these steps:

- 1 From the RF Settings Menu, select EMITT.
- 2 Decide whether you are changing the Emitter settings for all devices or just one of the devices of the MX-350.

## Universal Remote Control, Inc.

- 3 The display changes to a list of the names of your devices. If you have two pages of devices, pressing either of the page buttons will display the other page. Select the device you would like to change the Emitter settings, then go to Step 4.

- 4 Select the new setting by pressing the desired button, then press SAVE to save your new setting and return to the RF settings menu.

### BLAST - Setting the Front Panel Blaster On or Off

The MRF-250 and MRF-350 Base Stations have a configurable front panel high power IR LED or “blaster” for controlling components in the same cabinet space without emitters attached to their front panel. The front panel blaster can overpower or saturate the sensors of some A/V components, so if intermittent operation occurs, the blaster should be turned off.

The blaster is incompatible with a stack of identical components, since all components will receive IR commands at once, no matter what device is selected. Turn off the front panel blaster by following the steps described on the next page:

## The MX-350

- 1 From the RF Settings Menu, select **BLAST**.
- 2 Decide whether you are changing the Blaster for all devices or just one of the devices of the MX-350.

- 3 The display changes to a list of the names of your devices. If you have two pages of devices, pressing either of the page buttons will display the other page. Select the device you would like to change IR/RF settings, then go to Step 4.

- 4 Select the new setting by pressing the desired button, then press **SAVE** to save your new setting and return to the RF settings menu.

# Pre-Programmed Code Tables

The MX-350's Pre-Programmed code library is divided into categories (TV, VCR, AUX, etc.). Each category actually includes many types of components. For example, the VCR category includes TV/VCR combo units.

Within each category, the code numbers are listed in rows by brand (Sony, Panasonic, B & K, etc.). Some brands have more than one three digit code for you to try. Just circle the correct row and refer to it while you setup (step-by-step instructions for using Pre-Programmed codes are found on page 5).

# Frequently Asked Questions

### **What is a “macro” button?**

*It is an MX-350 button you set to make a lot of things happen when you press it. For example, to watch a DVD in most home theaters requires several remote controls and many button presses (power up the TV, power up the surround sound, power up the DVD player, set the TV to the correct video input, set the surround sound to the correct audio input and finally; press play on the DVD player remote control).*

*Instead of pressing all of those buttons one at a time, the MX-350 enables you to setup one button that does it all automatically with one press. For more information on how and why you should setup macro and favorite channel buttons, read pages 19-22.*

### **If the batteries run out, will I lose my settings?**

*No. The MX-350 stores all of your settings in non-volatile FLASH memory. You could remove the batteries for months, replace them at your convenience and the MX-350 would still remember your settings.*

### **Who can I call for more answers?**

*The Universal Remote Control technical support and customer service staff are ready to answer any questions you might have.*

*Call us at 1-914-835-4484  
Monday - Friday, 9AM to 6PM (EST)*

## USALimited Warranty Statement

Your Universal Remote Control, when delivered to you in new condition, is warranted against defects in materials or workmanship as follows: **UNIVERSAL REMOTE CONTROL, INC.** warrants this product against defects in material or workmanship for a period of one (1) year and as set forth below. Universal Remote Control will, at its sole option, repair the product using new or comparable rebuilt parts, or exchange the product for a comparable new or rebuilt product. **In the event of a defect, these are your exclusive remedies.**

This Limited Warranty covers only the hardware components packaged with the Product. It does not cover technical assistance for hardware or software usage and it does not cover any software products whether or not contained in the Product; any such software is provided "AS IS" unless expressly provided for in any enclosed software Limited Warranty.

To obtain warranty service, you must deliver the product, freight prepaid, in its original packaging or packaging affording adequate protection to Universal Remote Control at the address provided in the Owner's Manual. It is your responsibility to backup any macro programming, artwork, software or other materials that may have been programmed into your unit. It is likely that such data, software, or other materials will be lost during service and Universal Remote Control will not be responsible for any such damage or loss. A dated purchase receipt, Bill of Sale, Installation Contract or other verifiable Proof of Purchase is required. For product support and other important information visit Universal Remote Control's website: <http://www.UniversalRemote.com> or call the Customer Service Center (914) 835-4484.

This Limited Warranty only covers product issues caused by defects in material or workmanship during ordinary consumer use. It does not cover product issues caused by any other reason, including but not limited to product issues due to commercial use, acts of God, third-party installation, misuse, limitations of technology, or modification of or to any part of the Universal Remote Control product. This Limited Warranty does not cover Universal Remote Control products sold as USED, AS IS, REFURBISHED, so-called "B STOCK" or consumables (such as batteries). This Limited Warranty is invalid if the factory-applied serial number has been altered or removed from the product. This Limited Warranty is valid only in the United States of America. **This Limited Warranty specifically excludes products sold by unauthorized resellers.**

## Universal Remote Control, Inc.

### LIMITATION OF REMEDIES

UNIVERSAL REMOTE CONTROL SHALL NOT BE LIABLE FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES FOR BREACH OF ANY EXPRESS OR IMPLIED WARRANTY OR CONDITION ON THIS PRODUCT. IN NO EVENT SHALL UNIVERSAL REMOTE CONTROL BE LIABLE, WHETHER IN CONTRACT OR IN TORT (INCLUDING NEGLIGENCE) FOR DAMAGES IN EXCESS OF THE PURCHASE PRICE OF THE PRODUCT, ACCESSORY OR SOFTWARE, OR FOR ANY INDIRECT, INCIDENTAL, SPECIAL OR CONSEQUENTIAL DAMAGES OF ANY KIND, OR LOSS OF REVENUE OR PROFITS, LOSS OF BUSINESS, LOSS OF INFORMATION OR DATA, SOFTWARE OR APPLICATIONS OR OTHER FINANCIAL LOSS ARISING OUT OF OR IN CONNECTION WITH THE ABILITY OR INABILITY TO USE THE PRODUCTS, ACCESSORIES OR SOFTWARE TO THE FULL EXTENT THESE DAMAGES MAY BE DISCLAIMED BY LAW.

EXCEPT TO THE EXTENT PROHIBITED BY APPLICABLE LAW, THERE IS NO OTHER WARRANTY EXPRESSED OR IMPLIED. UNIVERSAL REMOTE CONTROL WILL NOT BE HELD RESPONSIBLE FOR STATEMENTS MADE BY OTHERS CONCERNING THE MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE ON THIS PRODUCT. Some states or jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, or allow limitations on how long an implied warranty lasts, so the above limitations or exclusions may not apply to you. This Limited Warranty gives you specific legal rights and you may have other rights which vary from state to state or jurisdiction to jurisdiction.

REV020708

## Specifications

Learning Capability - 784 IR commands at standard frequencies (15KHz to 455 KHz)

Macro Capability - 472 Macros of up to 190 steps each

IR Range (Line of Sight via Infrared): 30-50 feet, depending on the environment

RF Range (radio frequency): 50 to 100 feet, depending upon the environment

RF Frequency: 418MHz

Weight: 8 oz. (with batteries)

Size: 8.5" x 2 7/16" x 1"

Batteries: Four AAA Alkaline batteries included

LCD Size: approximately 7/8" x 1-7/8"

## Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one more of the following measures:

- ◆ Reorient or relocate the receiving antenna.
- ◆ Increase the separation between the equipment and receiver.
- ◆ Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- ◆ Consult the dealer or an experienced radio/TV technician for help.

## Warning!

Changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.

Note : The manufacturer is not responsible for any Radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

## FCC Caution

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the authority to operate equipment.

The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

## NOTE
