OPERATING MANUAL

Introduction

BLUETOUCH® offers you the capability to connect mobile sources of music such as Apple™iPod®, SD-cards, USB sticks, audio streaming via Bluetooth®-A2DP and MP3 telephones and players.
At the same time, BLUETOUCH® is a convenient hands-free system for Bluetooth® telephones.

Bluetooth® Technology

With the help of the wireless Bluetooth® technology, you can transfer data (telephone contacts, music) from your mobile phone to **BLUETOUCH®**.
Thus hands-free telephony and playback of your music files are possible in the vehicle. To use these functions, read the operating manual of your mobile phone and the notes on this page and the last page.
Contents

The following elements are included as standard equipment:

· Touch screen

· Ball joint support

· Display cable

· Electronic box (CIB-Box)

· External microphone

· 3.5 mm plug

Further connection cables are specific to the vehicle and the radio. You will find the exact contents listed on the label of the product packaging.

Optimal mounting in the vehicle

External microphone

Touch screen

Optional accessories

· iPod connection cable

· Mobile phone specific adapter cable (to connect a music capable mobile phone, see page ??).

· Mobile phone specific charging cradle (charging function and antenna connection).

Information concerning accessories and the current product range can be found at **www.bluetouch.de**

Road safety is the highest priority. Operate the BLUETOUCH® system only when traffic permits. Make yourself familiar with the system before you leave.

BLUETOUCH® was developed for subsequent installation in vehicles therefore only qualified technical personnel are permitted to install the system.

If BLUETOUCH® does not start with ignition of engine touch the display for one second.

Position the screen so that you are able to glance at the display quickly and easily. The device should also be positioned in a way that avoids reflections and glare from the screen. The screen should also not be positioned within he area directly in front of the airbag as this may prevent the airbag from inflating. Make sure the device is sufficiently secure so that it will not become dislodged even in the event of emergency braking or a collision.

Please do not use any cleaning agents or detergents to clean the screen and case of the device. The best method is to use a soft, damp cloth.

Overview of the touch screen

The control of all functions takes place via the touch screen. There are readouts and *keys* **(framed)** on the touch screen. Only *keys* can be pressed in order to activate an action or switch into another menu.

02 Software update via USB link

03 3.5 mm stereo audio input

04 Mounting surface for the ball joint mounting

05 Port for attaching the connection cable to the electronic box

06 Light sensor for the automatic adjustment of the display brightness

Ⓐ Ⓑ Ⓒ Elements of the ball joint

Ⓓ Connection cable to the electronic box

Mounting of the touch screen

Select a place for installation where the touch screen is both easy to read and operate. Mount the ball joint Ⓑ with the screw Ⓐ on the display. Press both firmly onto the ball unit Ⓒ , which must be mounted beforehand. Now attach the connection cable Ⓓ to the touch screen so that the plug fits in the housing. Due to the ball joint any view can be set individually.

Operation of the function keys

All *keys* (framed) trigger a function or lead into a further menu. Some *keys* have double functions in order to reach a certain function faster. This double function is activated by holding the res- pective *key* (hold 1 second, then release). If a key has a double function (hold 1 second, then release) this is briefly explained below in *italics*.

Some music functions can be controlled via speech. You will find more information to speech recognition on the next page.

After audio source selection please go back to the music menu where you can control the music.

After audio source selection the music starts auto- matically in the last position.

HINT: There are many "hidden" key functions. You will find operating assistance for these on the BLUETOUCH® homepage under "Tipps+Tricks".

(2) Title / playback control is available only with iPod®, SD/MMC or USB connection. Music playback via Bluetooth®A2DP doesn´t support the title menu.

(1) Concerning the music menu

If this key appears on your touch screen, please follow the directions on the attached card (FM- modulation). The functions are identical to those of the music menu.

Bluetooth® connection

In order to use the hands-free function as well as the music transfer via Bluetooth®A2DP, the following requirements must be fulfilled:

· BLUETOUCH® has been correctly mounted and is switched on.

· Bluetooth® is activated on your mobile phone.

· Your mobile phone was paired with BLUETOUCH®.

First pairing of your mobile phone

· Press the *search key* in the Bluetooth® menu.

· When the search procedure is finished, select your mobile phone shown on the display.

· BLUETOUCH® now demands a PIN-code. Enter this PIN (0000 is preset) on your mobile phone.

· BLUETOUCH® and the mobile phone are now paired and your directory of contacts is downloaded automatically ✹ ← 📱 . The download is finished when the Bluetooth® symbol ✹ is displayed.

· Your mobile phone is now in the list of known devices.

**Pairing and deleting a mobile phone from the list of known devices**

· Select the desired mobile phone from the list of known devices.

You can now do the following with the selected mobile phone:

· *Automatic pairing* so that the selected device is paired to BLUETOUCH® as soon as you approach the system.

· *Manual coupling.*

· *Delete from list.*

Changing the PIN-code

· Press the *PIN-code key* to read the keypad.

· Enter a combination of at least 4 digits and confirm by pressing *OK.*

With all described Bluetooth® functions please consult the operating manual of your mobile phone first. Inform yourself which Bluetooth® profiles and functions your mobile telephone supports. Signal level, battery status, provider, directory entries and downloads are mobile phone specific, and how they are supported depending on the individual mobile phone.

My W810i
Key: Delete
Key: Connect
Key: Automatic connect ON / OFF

You can also establish a connection to BLUETOUCH® from your mobile phone. In order to do set BLUETOUCH® to "visible" and follow the operating manual of your mobile phone.

A multiple pairing of up to five mobile phones is possible.

ADVISE: Give your mobile phone a special name in order to find it more easily in the selection list (see page ??) among same mobile phones. Look in the operating manual of your mobile phone for further information.

Music playback

BLUETOUCH® offers you the connection of mobile sources of music such as Apple™iPod®, SD cards, USB sticks, audio streaming via Bluetooth®A2DP and MP3 telephones and players.
The touch screen allows for the easy and convenient operation of all music functions.

Selection of the desired music source

· In the music menu, press the *key select music source.*

· Now activate the desired source (the audio source is activated when the circle is filled out).

· Using the *back key,* you will return to the music menu. From there you will be able to use the various functions of this menu for music navigation.

Management of music using music lists

This function is only available with SD/MMC card, USB storage medium and iPod®!

· Press the *key navigator music lists* in the music menu.

· You now have convenient access to all titles with information about the artists, genre etc. as well as to possible saved playlists.

Management of music using music files

This function is only available with SD/MMC card, USB storage medium and iPod®!

· Press the *key title / file navigator* in the music menu.

· You have now access to all music files.

## Playback of the music from SD/MMC card and USB stick

BLUETOUCH® supports the music playback of SD/MMC cards and USB storage media, e.g. USB stick. Connect the desired audio source with the touch screen as illustrated on the right; then activate this in the music menu, as described above. You now have access to all music lists or to the saved music files.

Be sure to connect only one audio source to the touch screen in each case; otherwise, delays can occur during playback.

SD/MMC cards and USB storage media support the playback of MP3 files.

You will get more information on connection and operation of the various audio sources from the following articles.

Insert the SD/MMC card with label forward (contacts on reverse) into the provided opening until the card locks into place (clicking sound).

BLUETOUCH
name of the phone

Insert the USB stick into the provided slot on the side (control light on the USB stick will flash).

Playback and connection of an iPod®

BLUETOUCH® was developed for the use with all iPods with dock connector. The touch screen offers the possibility of operating the iPod menu.
You can browse through your tracks, artists, albums and play lists to the full extent, just as you are used to doing with your iPod.

· Connect your iPod with the connection cable.
· Start BLUETOUCH®, switch to the music menu, and using the *iPod key* you will reach the iPod menu navigation familiar to you.
Disconnecting the iPod

· Slightly press both sides of the locking mechanism Ⓐ of the cable jack in order to remove the cable from the iPod.

When connected with the cable the iPod is in charge mode.

As soon as the iPod is connected to the cable, the BLUETOUCH® logo appears in the display of the iPod. Now you operate only via BLUETOUCH®.

Ⓐ

After disconnecting the iPod from the connection cable, operating errors can occur on the iPod. Simply RESET the iPod by pressing and holding the "MENU" and the "SELECTION" button at the same time until the BLUETOUCH® logo disappears and the iPod switches off.
Speech recognition for iPod®

BLUETOUCH® offers the possibility to control the iPod® via speech recognition.

· Activate the speech recognition in the main menu. (for this, see section "speech recognition" starting from page ??).

· Now give one of the speech prompts specified on the right.

You will find further speech prompts and information on the way they function beginning on page ??.

· IPOD GENRE

Musik via Bluetooth® A2DP

BLUETOUCH® unterstützt die Übertragung von Musik via Bluetooth® Audiostreaming (A2DP). Falls Ihr Mobiltelefon diese Funktion unterstützt, können Sie ganz einfach die Musik von Ihrem Handy auf die Fahrzeuglautsprecher übertragen.

· Pair your phone with BLUETOUCH®.

· Activate in the music menu the *Bluetooth®A2DP key*.

· Press the *title / playback control key* and you can then operate the tracks:
FORWARD, BACK, PLAY / PAUSE

A2DP-DISPLAY

name of A2DP device

Forward
Pause / Play
Back

Further information concerning this function can be found in the corresponding section of the operating manual of your mobile phone.

Music playback via Bluetooth®A2DP doesn´t support the title menu.

Connection of audio sources (e.g. MP3 player) via 3.5 mm plug.

BLUETOUCH® offers the option to connect numerous audio sources with the included stereo audio cable.
· Connect the 3.5 mm-stereo audio cable ⓪① with BLUETOUCH® and your audio source.

· Activate the *plug key*.

· Now you can listen to your music.

The volume can be set on both your audio device and your radio. Control of the entire music operation (play, track, pause, ...) is conducted through your audio device.

With a mobile phone specific adapter cable* ⓪② you can connect your music-capable mobile phone, which does not support Bluetooth®A2DP, to BLUETOUCH®.

The connection via the stereo audio cable does not support a charging function.

Telephoning

After pairing your mobile phone with BLUETOUCH® (see page ??), you can accept and make calls using the hands-free system, provided that the system is switched on and the mobile phone is within range. When a call is received or you make a call, the stereo system of the vehicle automatically switches itself on mute.

Functions during a telephone call

· Adjust the volume using *+ and - keys*.

· End the call with the *hang-up key*.

· If you want to transmit key tones (e.g. mailbox), press the *DTMF key* and you will reach the keypad. Now enter your desired numbers or press *Back* if you have completed your input.

· During a call press the *microphone key* in order to switch the microphone off;
press again in order to continue the call.

· Press the *private key (1)*, in order to continue the conversation discreetly on your mobile phone; pressing it again allows you to speak freely again.

Answering calls

Depending on the mobile phone, the name and/or the number is displayed on the touch screen.

· Press the *call answering key.*

Making a call

· Press the *toplist key* (your most frequent contacts are calculated) and select the desired number or the dialogue partner from the list.

· Press the *directory key* to display your mobile phone book entries and select your desired contact from the list.

· Press the *call list key* to display the call lists (dialed, received, missed) and select the desired number.

· Press *re-dial.*

· Press the *keypad* and you can dial as usually. After dialing press the *call key* and the call is made.

Voice dialing (mobile phone dependent)

· In order to use voice dialing you must first record the commands on your mobile phone (comply with the operating manual of your mobile phone).

· Hold the *directory key* (long click) and follow the instructions on the display.

Speech recognition

BLUETOUCH® offers the possibility of controlling telephone and music functions by speech. At present, speech recognition for the German, English and French languages is available.
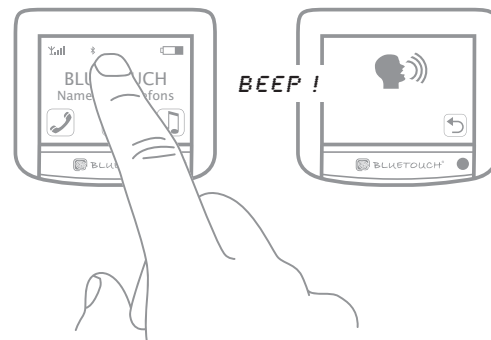

Setup speech recognition

· Select the *key setup speech recognition* in the setup menu.

· You can now set the volume of the voice output and the country language.

Activation of speech recognition

The speech recognition can be started only using the start display:

· Press onto the upper half of the touch screen and hold for a longer interval; after the beep, give the desired speech prompt. (see page ??).
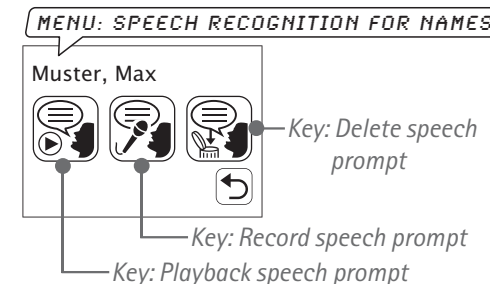

All speech prompts can be activated ONLY from the start display!!

Trouble shooting and other steps

Before you consult your installation service please
Follow these simple checking steps. More steps and
information may be found on www.bluetouch.de

BLUETOUCH® cannot be paired

· The Bluetooth® function on the mobile phone must
  be activated.

· BLUETOUCH® must be switched on.

· No solid objects should be between the mobile
  phone and BLUETOUCH®.

· BLUETOUCH® is possibly paired with another mo-
  bile phone. Cut the connection to the other device
  (page 17).

· Possibly another hands-free system is paired with
  the mobile phone. Some mobile phones can only
  manage one hands-free system in the list of paired
  mobile phones. Consult the operating manual of
  the mobile phone.

· Clear the list of known devices in BLUETOUCH®
  and pair your mobile phone again.

· Clear the list of Bluetooth® devices on your mobile
  phone and couple again.

Some functions of BLUETOUCH® cannot be used.

· Check the operating manual of your mobile phone
  to determine whether it supports the respective
  function or the corresponding Bluetooth® profile.
  A list of all mobile phones which support Blue-
  tooth®A2DP at present can be found on
  www.bluetouch.de

The dialogue partner hears an echo.

· Increase the distance between microphone and the
  vehicle loudspeakers (distance should be at least
  80 cm).

· Reduce the volume of BLUETOUCH®.

iPod cannot be accessed.

· Make sure that the iPod connection cable is
  attached correctly.

No music playback via 3.5 mm plug.

· Make sure that no calls are being conducted via
  BLUETOUCH®.

· Check that the cables are firmly mounted.

· Switch the *AUX key* on.

⚠ *Restore to factory configuration (all modifica-
   tions and adjustments you have made will be
   lost): Go to the telephone menu and enter the
   following in the keypad:*
   #000# 📞

*Using mobile phones reception interference can
occur which can impair the system performance.
Therefore we recommend an additional cradle
with an external antenna. This considerably im-
proves the transmission and reception proper-
ties of the mobile phone, and your mobile phone
is always fully charged.*

*BLUETOUCH® SOFTWARE UPDATES
You can easily conduct necessary software up-
dates via the USB interface. Additional infor-
mation on this can be found under:
www.bluetouch.de*

*Regulate the music volume as usual via your
car hi-fi system.
Note the volume preset (optional).*

ropean Union. You can find the complete text of the de-
claration of conformity under www.bluetouch.de

CE

Conformity to FCC-Rules:

This device contains Transmitter Module   **FCC-ID: QWY-BLUETOUCH**

RF exposure:

The max sourcebased time-averaged output of 0.48 mW is below the low threshold of 24mW for d < 2.5 cm.
This is very low power configuration. The antenna shown in this filing can be co-located or operated in con-
junction with any other antenna or transmitter. For portable applications installer need no additional testing
or SAR evaluation.

USA only:

Statement according to FCC part 15.19:
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
   (1) this device may not cause harmful interference, and
   (2) this device must accept any interference received, including interference that may cause undesired
       operation.

Statement according to FCC part 15.21:
Modifications to this device not expressly approved by this company could void the user's authority to operate
the equipment.

Statement according to FCC part 15.105:
Note: This equipment has been tested and found to comply with the limits for a Class A digital device, pursu-
ant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful
interference when the equipment is operated in a commercial environment. This equipment generates, uses,
and can radiate radio frequency energy and, if not installed and used in accordance with the user manual, may
cause harmful interference to radio communications. Operation of this equipment in a residential area is likely
to cause harmful interference in which case the user will be required to correct the interference at his own
expense.

Statement according to FCC part 15.27:
With this device will no additional special accessories be shipped or marketed. This equipment (BLUETOUCH)
has to be assembled by professional installing personnel of the vehicle manufacturer. It is the responsibility of
the installer to install the equipment in that way that the resulting system complies with the regulations.

Canada only:

Statement according to RSS-210:
This device complies with RSS-210 of Industry Canada. Operation is subject to the following two conditions:
   (1) this device may not cause harmful interference, and
   (2) this device must accept any interference received, including interference that may cause undesired
       operation.
Modifications to this device not expressly approved by this company could void the user's authority to operate
the equipment.
