

Shamu Mini PCI Express Card

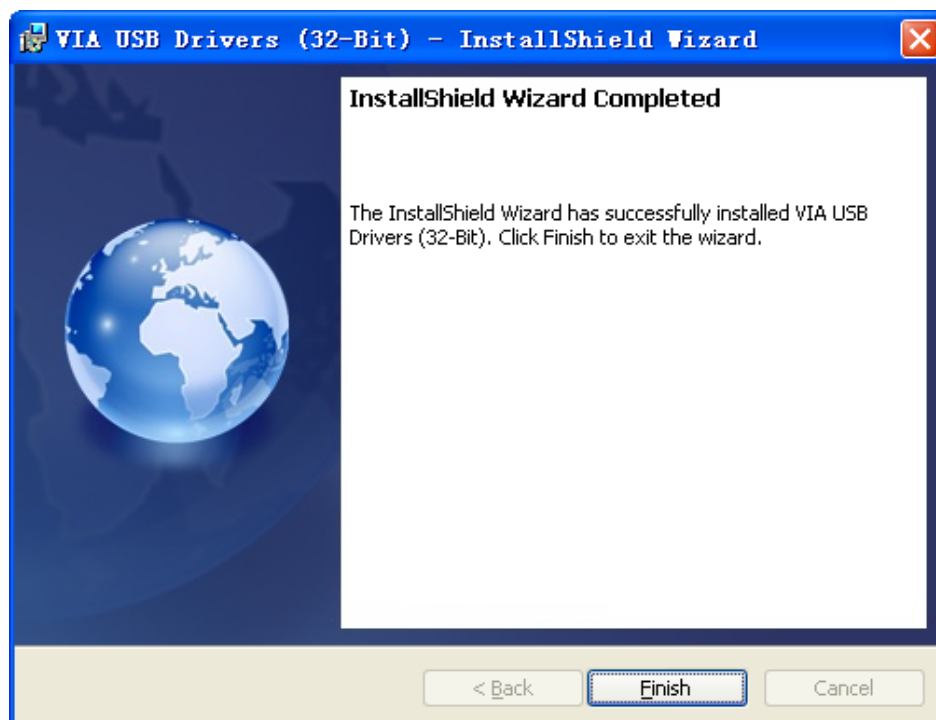

User Manual

● USB Driver Installation

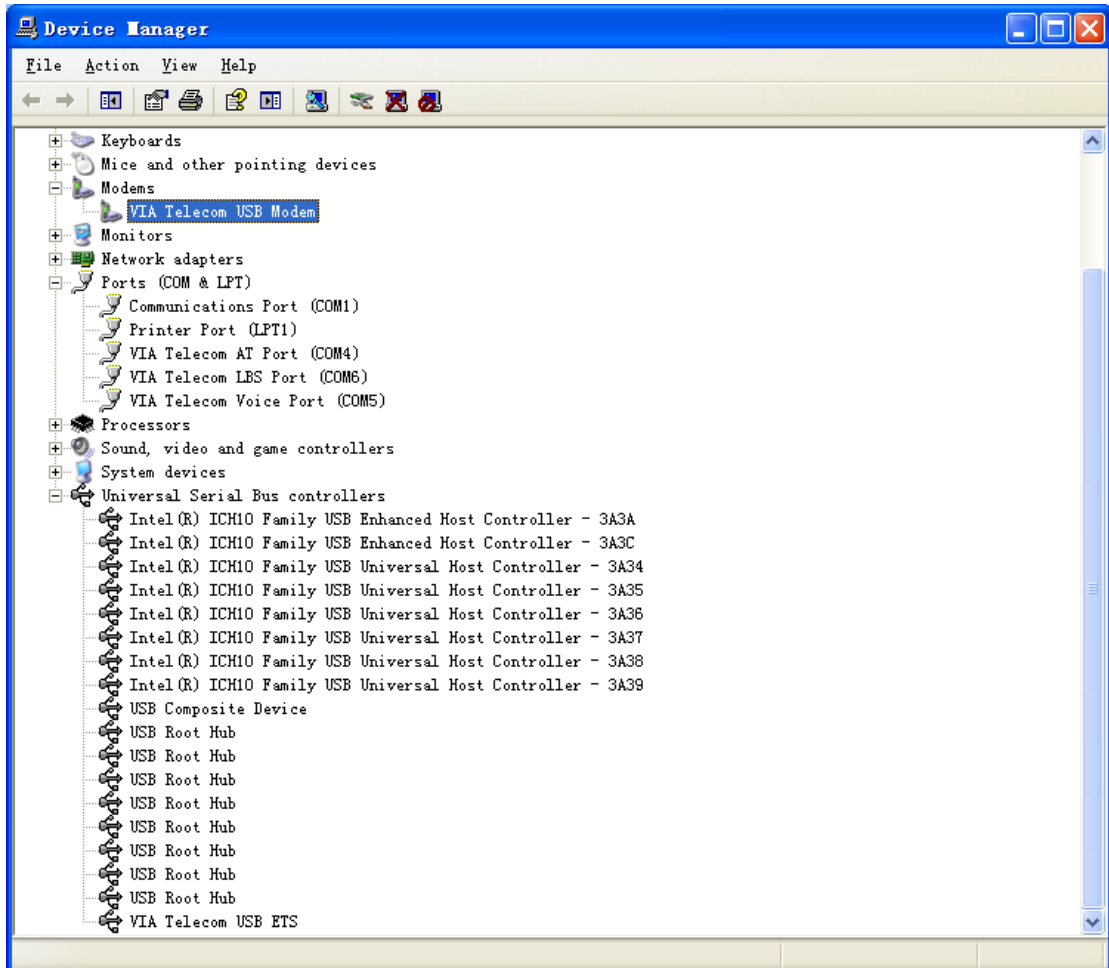

1. To install the VIA USB Windows device driver, you must first start the Setup application, **VIA USB Drivers 2.1.5 (32-Bit).exe**, by double-clicking the associated icon.
2. Choose the directory for the application to be installed.

3. Click **Install**, then this setup program will copy all the files into the directories on the local system drive of your PC. The following dialog box will appear upon execution.

4. Click **Finish** when this action has been completed.
5. Power up the notebook which has Shamu PCIe data card installed inside. Then Windows will install all the related drivers automatically. You can find **“VIA Telecom USB Modem”**, **“VIA Telecom AT Port”**, **“VIA Telecom LBS Port”**, **“VIA Telecom Voice Port”** and **“VIA Telecom USB ETS”** in Device Manager.

● Dial up Application Setup

1. Select “New Connection Wizard”

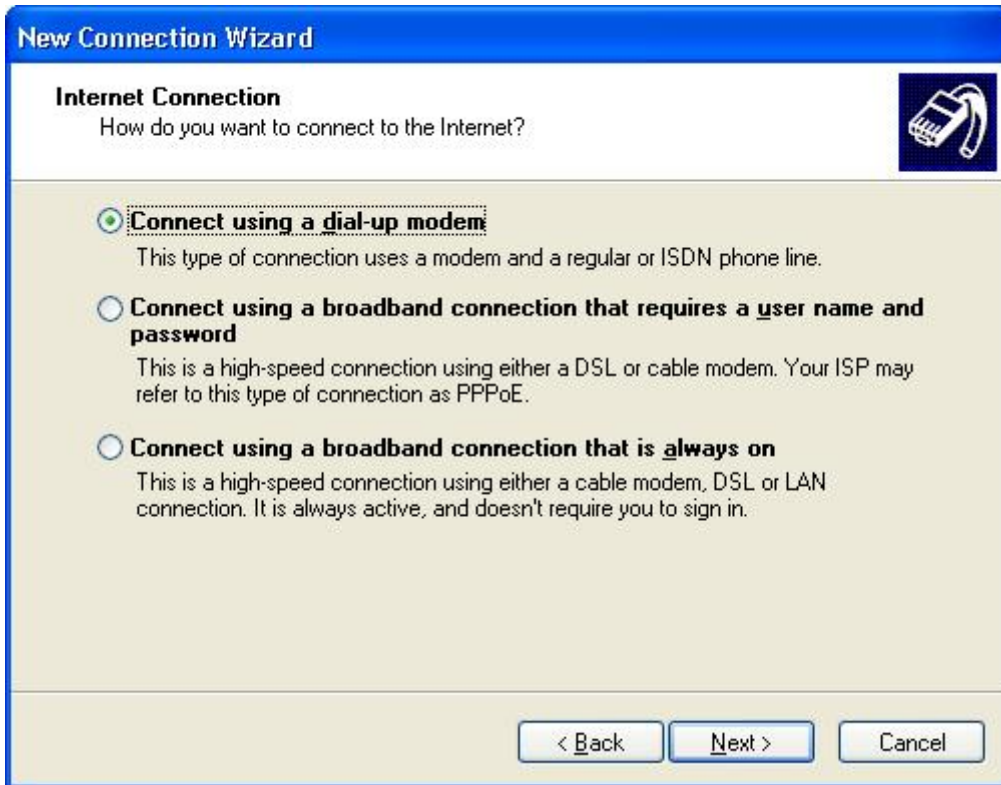

2. Select Connect to the Internet

3. Select "Set up my connection manually"

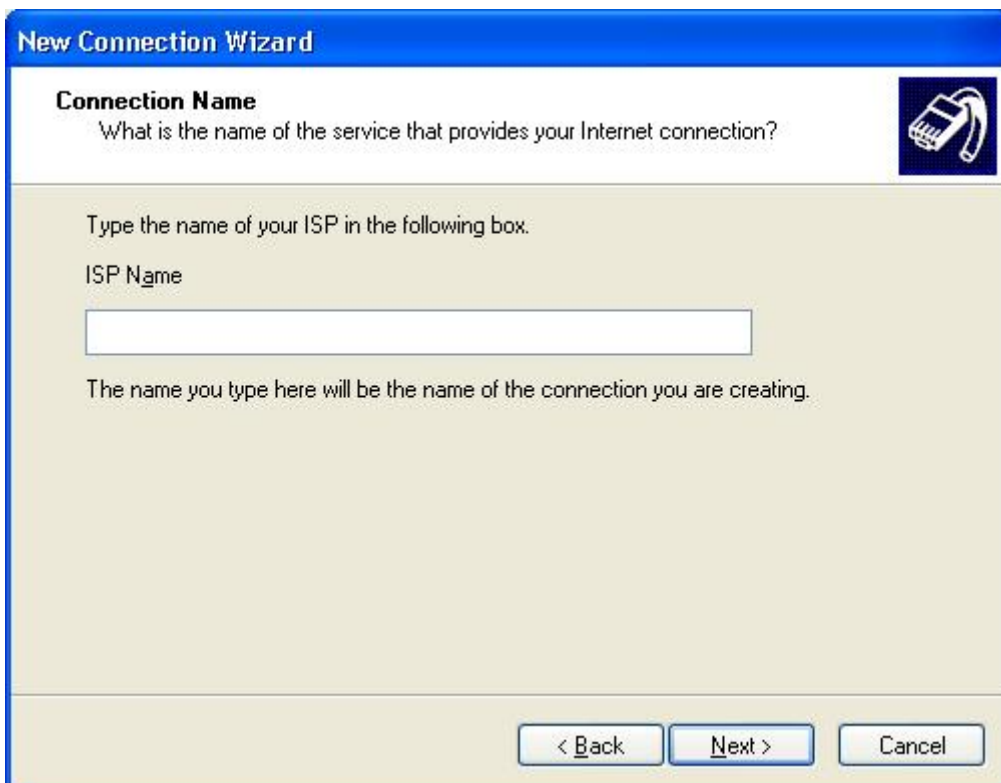

4. Select "Connect using a dial-up modem"

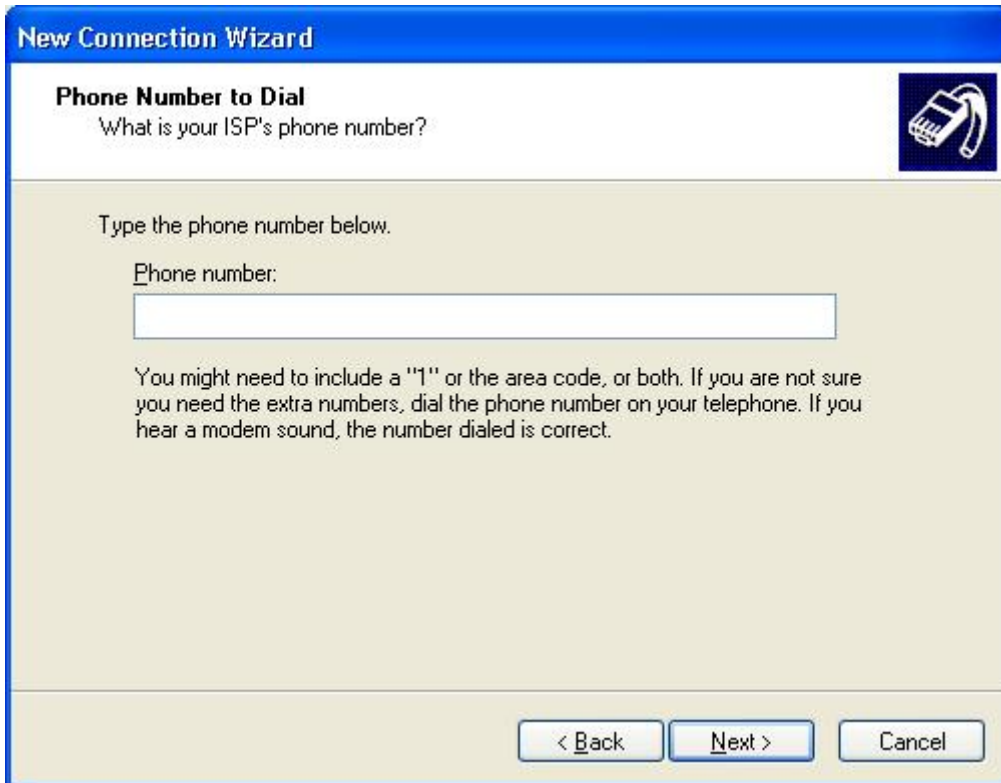

The screenshot shows the 'New Connection Wizard' window. The title bar is blue with the text 'New Connection Wizard'. Below the title bar, the main area has a light beige background. At the top left, it says 'Internet Connection' in bold, followed by the question 'How do you want to connect to the Internet?'. On the top right, there is a small icon of a modem. Three radio button options are listed: 1. 'Connect using a dial-up modem' (selected with a green dot), with a sub-description: 'This type of connection uses a modem and a regular or ISDN phone line.' 2. 'Connect using a broadband connection that requires a user name and password', with a sub-description: 'This is a high-speed connection using either a DSL or cable modem. Your ISP may refer to this type of connection as PPPoE.' 3. 'Connect using a broadband connection that is always on', with a sub-description: 'This is a high-speed connection using either a cable modem, DSL or LAN connection. It is always active, and doesn't require you to sign in.' At the bottom right, there are three buttons: '< Back', 'Next >', and 'Cancel'.

5. Enter your ISP name

The screenshot shows the 'New Connection Wizard' window at the 'Connection Name' step. The title bar is blue with the text 'New Connection Wizard'. Below the title bar, the main area has a light beige background. At the top left, it says 'Connection Name' in bold, followed by the question 'What is the name of the service that provides your Internet connection?'. On the top right, there is a small icon of a modem. The text 'Type the name of your ISP in the following box.' is followed by the label 'ISP Name' and an empty text input box. Below the input box, it says 'The name you type here will be the name of the connection you are creating.' At the bottom right, there are three buttons: '< Back', 'Next >', and 'Cancel'.

6. Enter your Number to Dial

New Connection Wizard

Phone Number to Dial
What is your ISP's phone number?

Type the phone number below.

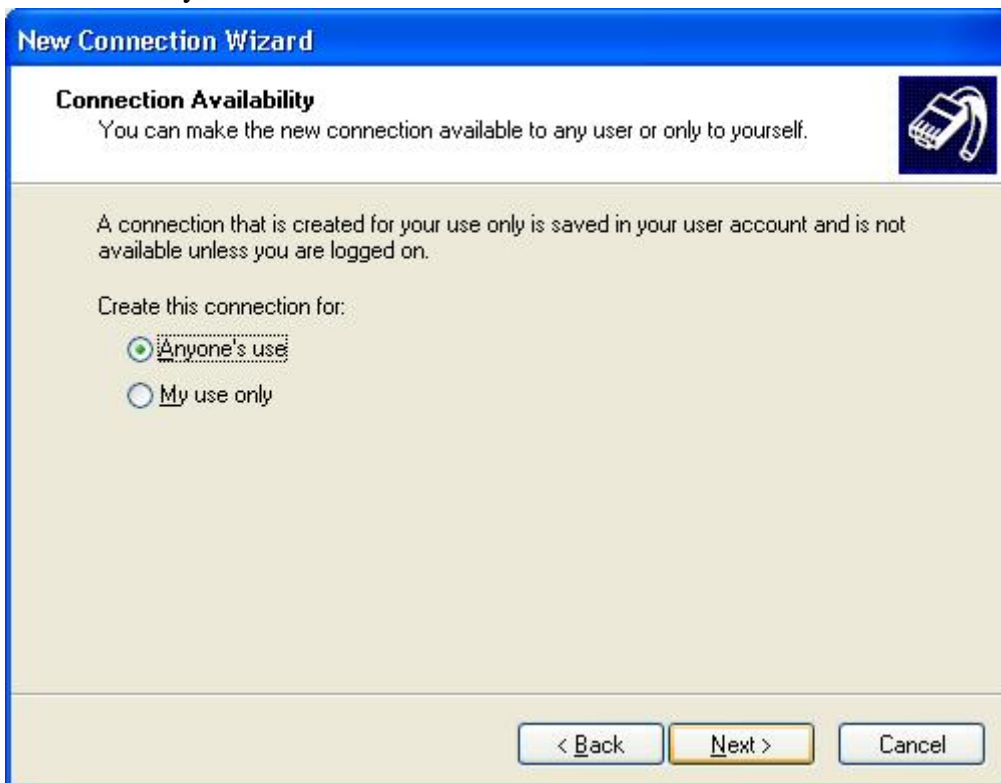

Phone number:

You might need to include a "1" or the area code, or both. If you are not sure you need the extra numbers, dial the phone number on your telephone. If you hear a modem sound, the number dialed is correct.

< Back Next > Cancel

The screenshot shows a Windows XP-style dialog box titled "New Connection Wizard". The main heading is "Phone Number to Dial" with a sub-question "What is your ISP's phone number?". Below this is a text input field labeled "Phone number:". A note explains that users might need to include a "1" or an area code. At the bottom, there are three buttons: "< Back", "Next >", and "Cancel". A small icon of a telephone handset is in the top right corner.

7. Select Anyone's use

New Connection Wizard

Connection Availability
You can make the new connection available to any user or only to yourself.

A connection that is created for your use only is saved in your user account and is not available unless you are logged on.

Create this connection for:

Anyone's use
 My use only

< Back Next > Cancel

The screenshot shows a Windows XP-style dialog box titled "New Connection Wizard". The main heading is "Connection Availability" with a sub-question "You can make the new connection available to any user or only to yourself.". Below this is a paragraph explaining that connections for personal use are only available when logged on. Then, there are two radio button options: "Anyone's use" (which is selected) and "My use only". At the bottom, there are three buttons: "< Back", "Next >", and "Cancel". A small icon of a telephone handset is in the top right corner.

8. Enter user name and password

New Connection Wizard

Internet Account Information
You will need an account name and password to sign in to your Internet account.

Type an ISP account name and password, then write down this information and store it in a safe place. (If you have forgotten an existing account name or password, contact your ISP.)

User name:

Password:

Confirm password:

Use this account name and password when anyone connects to the Internet from this computer

Make this the default Internet connection

< Back Next > Cancel

9. After finishing the configuration, you can set up a connection

Connect Dial-up Connection

User name:

Password:

Save this user name and password for the following users:

Me only

Anyone who uses this computer

Dial Cancel Properties Help

If Driver is properly installed, you can see “VIA Telecom USB Modem” in the *properties* menu.

● RF Exposure

Your device contains a transmitter and a receiver. When it is ON, it receives and transmits RF energy. When you communicate with your device, the system handling your connection controls the power level at which your device transmits.

Important safety information regarding radio frequency radiation (RF) exposure. To ensure compliance with RF exposure guidelines the device must be used with a separation from the body. Failure to observe these instructions could result in your RF exposure exceeding the relevant guideline limits.

The maxim permissible exposure is defined in 47 CFR 1.1310 with 0.5498 mW/cm*cm(CDMA800MHz) and 1 mW/cm*cm (CDMA 1900MHz). The transmitter is using external antenna that operate at 20cm or more from nearby persons. The maxim power density is 0.0701mW/cm*cm (CDMA 800MHz) and 0.1006 mW/cm*cm (CDMA1900MHz) at 20cm.
