Solution to Keyboard's 2.4G mode connection issue

1. Turn on the power switch and switch the keyboard to 2.4G mode.
2. Press Esc and  button for 3-5 seconds and release until the indicator of 2.4G mode flashes.

3. Plug the receiver into the computer. It is successfully connected when the indicator of 2.4G mode stops flashing. It can work then.

Solution to keyboard's BT1 mode connection issue

1. Clear the Bluetooth connection list of computer.
2. Turn on the power switch and switch it to BT1 mode.
3. Long press the button of BT1 mode for over 3s and release until its indicator light flashes.
4. Turn on the Bluetooth of computer. If your computer system is Win 7 or earlier, please select to connect "BT3.0 KB". If your computer system is Win 8 or later, please select to connect "BT5.0 KB". The keyboard's BT1 mode can work after successful connection.

BT2 Mode

Refer to BT1 mode solutions.

Note

If the product is still unworkable after above solutions, you could repeat those steps for a few times. If your problem can't get solved yet, please contact our Customer Service for help (**Email: support@victsing.com**).

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Statement: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

RF exposure compliance statement:

This device has been evaluated to meet the general RF exposure requirement
