

Radio Frequency Signals

This Product meets the government's requirements for exposure to radio waves.

In USA FCC requirements: Part: 2.989/1057
Part 15. 107/109/207
Part 24. 232/235/238
SAR

In Canada IC RSS-133

FCC RF EXPOSURE INFORMATION

Read this information before using your handset

In August 1996 the Federal Communications Commission (FCC) of the United States with its action in Report and Order FCC 96-326 adopted an updated safety standard for human exposure to radio frequency (RF) electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S., and international standards bodies. The design of this phone complies with the FCC guidelines and these international standards.

Use only the supplied or an approved antenna. Unauthorized antennas, modifications, or attachments could impair call quality, damage the phone, or result in violation of FCC regulations.

Do not use the phone with a damaged antenna. If a damaged antenna comes into contact with the skin, a minor burn may result. Please contact your local dealer for replacement antenna.

Body-worn Operation

This device has been tested for FCC RF exposure requirements with a VTech 80-5237 belt-holster providing a 1.6cm separation distance between the back of the phone and the user's body.

In order to comply with FCC RF exposure requirements a minimum separation distance of 1.5 cm must be maintained between the user's body and the back of the phone, including the antenna. Third-party belt-clips, holsters, and similar accessories should not contain any metallic components.

For more information about RF exposure, please visit the FCC website at www.fcc.gov

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However there is no guarantee that interference will not occur in a particular installation.
