**Add new handsets to make your phone more versatile (see page 46)**

Your telephone can accommodate up to six cordless handsets. You can add new handsets (sold separately) at any time. Up to four handsets at a time can be used.

The handset provided with your telephone is automatically registered as Handset 1. Additional handsets will be assigned numbers in the order they are registered (2, 3, 4, etc.) up to a maximum of six handsets.

## Parts checklist

Remember to save your sales receipt and original packaging in case you ever need to ship your telephone for warranty service. Check to make sure the telephone package includes the following:

Telephone base

Wall mount bracket

Telephone handset

Batteries

Power adapter

Long line cord

Short line cord

Belt clip

## Before you begin

### About Caller Identification

Caller ID with Call Waiting features in this telephone let you see who's calling before you answer the phone, even when you're on another call. These features require services provided by your local telephone company.

Contact your telephone service provider if:

- You have both Caller ID and Call Waiting, but as separate services (you may need combined service)
- You have only Caller ID service, or only Call Waiting service
- You don't subscribe to any Caller ID or Call Waiting services.

You can use this phone with regular Caller ID service, and you can use its other features without subscribing to either Caller ID or combined Caller ID with Call Waiting service. There may be fees for these services, and they may not be available in all areas.

Caller ID features will work only if both you and the caller are in areas offering Caller ID service, and if both telephone companies use compatible equipment.

See Caller ID Operation, beginning on page 28, for more details about how these features work.

### Telephone operating range

This cordless telephone operates with the maximum power allowed by the Federal Communications Commission (FCC). Even so, this handset and base can communicate over only a certain distance — which can vary with the locations of the base and handset, the weather, and the construction of your home or office. For best performance, keep the base antenna fully upright.

**If you receive a call while you are out of range**, the handset might not ring — or if it does ring, the call might not connect when you press **PHONE**. Move closer to the base, then press **PHONE** to answer the call.

**If you move out of range during a phone conversation**, you might hear noise or interference. To improve reception, move closer to the base.

**If you move out of range without pressing OFF**, your phone will be left “off the hook.” To hang up properly, walk back toward the telephone base, periodically pressing **OFF** until the call is disconnected.

## Telephone base installation

Install the speakerphone base as shown below. Choose a location away from electronic equipment, such as personal computers, television sets or microwave ovens. Avoid excessive heat, cold, dust or moisture.

**i** **NOTE:** Use only the power cord supplied with this product. If you need a replacement, call 1 800 222-3111.

Be sure to use an electrical outlet not controlled by a wall switch.

## Battery installation & charging

After installation, place the handset in the base and allow the battery to charge for 12 hours before use. You can keep the battery charged by returning the handset to the base after each use. When battery power is fully depleted, a full recharge takes about 8 hours.

**DID YOU KNOW?**  
Optional spare batteries can be kept charged in the base, for quick replacement when handset batteries become depleted (see page 47).
