TABLE OF CONTENTS

1 SAFETY INSTRUCTIONS/GLOSSARY

● Avoid hearing damage. Set volume at lowest comfortable level. If you experience ringing in your ears or people sound muffled, stop using the headset. Avoid turning up volume to block noisy surroundings (it's possible to adapt to volume that is too high).
● Check with local and state laws regarding cell phone handset usage while operating a motor vehicle.
● Replace only with same or equivalent battery.
● Dispose of batteries according to local regulations.
● Do not throw batteries in a fire, as they could explode.
● Do not immerse any part of this product in water.
● Plastic bags and small parts may cause choking if ingested. Keep them away from small children and pets.
● Use only the power cords included with this product.
● Avoid temperatures exceeding 140°F (will cause equipment failure).

Glossary of Terms

Paired- Two Bluetooth enabled devices agree to communicate with one another.

*On* - Headset is powered on but there is no active Bluetooth connection to the phone.

Standby Mode - Headset is paired and connected (active Bluetooth link) to the cellular phone, ready for an incoming or outgoing call.

Talk Mode- Headset is being used with the cell phone while the cell phone is on an active call.

2 CHARGE THE HEADSET

Select charger cord and plug it into the charger port on the headset, as shown below. Plug cord into power source and charge undisturbed for 12 full hours before first use.

Note: If you do not use your headset for a long period of time, you should repeat this 12 hour charge.

AC Charger   DC Charger

MFB

Charger Port

The Multifunction Button's (MFB) lights may turn from red to green in less than 12 hours. Even so, do not use the headset before the 12 hour charge is complete. Failure to do this may result in shorter battery life.

3 BATTERY POWER INDICATORS

Indicator Lights

After the first initial (required) charge of 12 hours, the headset's indicator lights will indicate the level of battery power as follows.
Green light: Headset is fully charged and will provide

11+ hours talk time.

Green & red lights together: Approximately 60 seconds away from full charge.

Red light: Less than a full charge is on the headset.

TIP *For best battery performance, keep charging headset when it's not in use.*

4 HEADSET CONTROLS

Multifunction Button (MFB) & Indicator Lights

Volume Up & Microphone Mute

Volume Down

Volume Increase: Quickly press and release the Volume Up/Mute button. Repeat until desired volume is attained.

Volume Decrease: Quickly press and release the Volume Down button. Repeat until desired volume is attained.

Microphone Mute/Un-Mute: Hold down the Volume Up/Mute button for 2 seconds until you hear a beep. The microphone will mute and a reminder beep will be heard every 10 seconds while in mute mode.
Repeat the 2-second press to un-mute.

5 TURN HEADSET OFF / ON

Turn Headset Off (conserves battery power)

Hold down the MFB for 2-3 seconds until you hear 2 falling tones. The blue light will stop flashing and the headset will turn off.

TIP *Keep charger plugged into headset when not in use to avoid battery drain. It's not necessary for the charger to be plugged into a power source to take advantage of this benefit.*

Turn Headset On: Hold down the MFB for 2-3 seconds until you hear 2 rising tones. The blue light will flash every 4 sec. Note: After the headset is turned on, it will attempt to connect to the last device that it was paired or connected with if that device is available, i.e. powered on and within range. Otherwise, the headset will remain in the 'on' state.

6 PAIR HEADSET WITH THE PHONE

Keep headset & phone no more than 3 feet apart while pairing and keep all other Bluetooth devices at least 50 ft. away or turn them off. Note: The headset can be paired with up to 3 different devices. Pairing is done just once and not every time a different device is used.
1. Remove headset from charger and turn it off (panel 5). The blue light on the headset's MFB should not be flashing (watch for 5-7 seconds to be sure it's off).
2. Hold down the headset's MFB until the red and blue lights flash. You will hear 2 rising tones, followed by 4 more tones. Important: Wait for all tones and for both lights to flash. This may take up to 15 sec. Release the MFB.
3. Follow the manufacturer's instructions for putting your cellular phone into Bluetooth discovery mode.
4. Wait 5-15 sec. while the devices discover each other. When the phone discovers the headset (VXI B350), select "Pair" and enter a pass code of 0000 when instructed. When pairing is complete the headset's red light will stop flashing and the phone will prompt you to 'connect' to the headset. Enter Yes on the phone to connect to the headset. **The headset is now in standby mode ready to receive a call.**

7 OVER-THE-EAR WEARING STYLE

The B350 includes 3 different size earhooks. Choose the one best suited for your ear size. The headset can be worn on the left or right ear (see photos below) Position the ring on the earhook over the receiver and press the ring down until it snaps into place. Some resistance is normal.

Right ear mount   Left ear mount

Wrap earhook around the back of your ear as shown.

8 OVER-THE-HEAD WEARING STYLE

1. **Remove the earhook if it is attached (see panel 7).**

2. On the headband ring is a small headset icon. Position the icon so that it *faces down* on the receiver and press down until it snaps into place. Some resistance is normal.

2. Select a leatherette or foam ear cushion and insert the matching size circular disk inside the cushion as shown. Make sure the ridge faces outward.

3. Snap the disk onto the receiver. Some resistance is normal. Rotate headset to place on right or left ear. Place headband over your head and adjust for comfort.

9 MICROPHONE POSITIONING

Position the microphone near the corner of your mouth as shown.

Correct microphone positioning is important to ensure that the microphone's noise cancellation technology works properly. Slight adjustment of the microphone may help to achieve optimum performance.

PLEASE READ IMPORTANT!

10 MAKE A CALL / END A CALL

If you have not paired the headset and phone together yet, you must do so (panel 6). Remember, in order to make a call, the headset must be in standby mode.

1. Turn on your cell phone. Note: Be sure the Bluetooth option is enabled on your phone. Refer to your phone's user guide for instruction.

2. Remove the headset from the charger, put it on your head and properly position the microphone (panel 9). Turn on the headset by pressing the MFB for 2-3 seconds. The headset will automatically attempt to connect with the last device it was paired or connected with.

3. Once connected, the headset will enter standby mode. Dial the phone and make a call as usual.

4. To end the call, quickly press the MFB on the headset and release. You will hear 2 falling tones; the call will terminate and the headset will enter standby mode.

11 ANSWER A CALL / END A CALL

In order to receive a call, the headset must be in standby mode.

1. Place the headset on your head and properly position the microphone (panel 9).

2. When your cell phone rings, you should hear the ring tones in the headset. Answer the call by quickly pressing the headset's MFB and release.

3. To end the call, quickly press the MFB on the headset and release. You will hear 2 falling tones; the call will terminate and the headset will revert to standby mode.

FUNCTIONS AND INDICATORS AT A GLANCE

Function	Button/Duration of press	Audio Indicator	Visual Indicator Lights
	(MFB = Multifunction Button)		
Power on	MFB / 2-3 sec.	Two rising tones	Blue light flashes
Power off	MFB / 3-5 sec.	Two falling tones	All lights go off
Enter pairing mode	MFB / 5-15 sec.	Four rising tones	Red & blue lights flash _alternately_
Volume up	Vol Up / quick press	Single tone	None
Volume down	Vol Dwn / quick press	Single tone	None
Mute on	Vol Up / 2 sec.	Single tone	None
Mute off	Vol Up / 2 sec.	Singe tone	None
		(_Short reminder beep every 10 seconds while mute is on_)	
Voice dial (start)	MFB / 2 quick presses	Single tone	None
Voice dial (end)	MFB / 2 quick presses	Single tone	None
Last number redial	Vol Dwn / 1 sec.	Single tone	None
Answer a call	MFB / quick press	Two rising tones	Blue light flashing every 1 sec.
End a call	MFB / quick press	Two falling tones	Blue light flashing every 4 sec.
Reject a call*	MFB / 2 sec.	Two falling tones	None
*Sends call to Voice Mail (if available)			
Transfer audio	Vol Dwn / 1 sec.	Long tone	None

12 PAIRING WITH A COMPUTER

Keep headset & computer no more than 3 feet apart while pairing and keep all other Bluetooth devices at least 50 ft. away or turn them off. Note: The headset can be paired with up to 3 different devices. Pairing is done just once and not every time a different device is used.

1. Remove the headset from charger and turn it off (panel 5). The blue light on the headset's MFB should not be flashing (watch for 5-7 seconds to be sure it's off).
2. Open the Bluetooth connection manager application on your computer. The Bluetooth connection manager application is supplied by the PC or dongle manufacturer, not VXI.
3. Put headset into pairing mode (see Panel 6- Step 2).
4. Instruct the Bluetooth connection manager application to discover Bluetooth devices. Enter a pass code of 0000 when prompted (refer to the device's user manual for detailed instructions).

---

13 PAIRING WITH A COMPUTER

Continued

5. Wait 5-15 seconds while the devices discover each other. The headset's red light will stop flashing and the blue light will continue to flash. After pairing is complete, the Bluetooth computer will 'ring' the headset. Press and release the MFB once to connect (establish a Bluetooth link) to the computer. Press and release the MFB again to disconnect from the computer.

NOTE: The connection can be initiated from the headset by pressing the volume down button for 1-2 seconds. Tones will be heard and a connection should be established.

---

14 ADDITIONAL FUNCTIONS

Note: Your cell phone must support the following functions. If unsure whether your phone supports these features, consult the phone owner's manual.

LAST NUMBER REDIAL
To re-dial the last number that was dialed from the cell phone, press and hold the volume down button for approximately 1 second. A beep will be heard and the phone will redial the last number.

REJECT A CALL
To reject an incoming call, press and hold the MFB for 2 seconds. You will hear 2 falling tones and the incoming call will be transferred to your voice mail (if available).

---

15 ADDITIONAL FUNCTIONS

Note: Your cell phone must support the following functions. If unsure whether your phone supports these features, consult the phone owner's manual.

VOICE DIAL
To use the voice dial feature of the cell phone, quickly double press the MFB on the headset; a tone will be heard and the phone's voice dialer should open; clearly speak the command. Repeat quick double press of the MFB to end voice dial. The headset must be in standby mode to use this feature.

TRANSFER AUDIO
To transfer audio from the headset to the cell phone while on a call, press and hold the volume down button for 1-2 seconds. A tone will be heard and audio will transfer to the phone; repeat to transfer audio back to the headset. When audio is transferred to the phone, all headset activity (lights and sounds) will stop until audio is transferred back to the headset.

---

16 ADDITIONAL FEATURES

TURN HEADSET INDICATOR LIGHTS OFF/ON
To turn the headset indicator lights off or on, press both the volume up and volume down buttons at the same time for approximately 1 second. A tone will be heard and the indicator lights will turn off; repeat to turn the indicator lights on. Headset must be in standby mode or on an active call (or connected to Bluetooth enabled computer or dongle) to use this feature. The default state of the indicator lights upon power up is on.

RECONNECT ON POWER ON
When the headset is powered on, it will attempt to connect to the last device it was paired with. If the headset was paired with multiple devices and the last connected device is not available (turned off, out of range, etc.), the headset will attempt to connect to the second to the last device it was connected to, etc. It is also possible to reconnect to the device by pressing the headset's MFB for approximately 1 sec. A tone will be heard and the two devices should connect.

---

17 MULTIPLE DEVICE PAIRING

The B350 can pair with up to three devices at the same time; however, only one device may be connected to the headset at a time. To pair the headset with a Bluetooth cell phone or other Bluetooth device such as a Bluetooth enabled computer, follow the instructions in panel 6 and 12 of this manual. Remember that all devices except for the one being paired must either be powered off or at least 50 ft. away during the pairing process.

Once all devices are paired, connection to the last paired device can be made by turning the headset off and then on again, or by pressing the MFB for 1 second. The headset will connect to the devices in opposite order of pairing. For instance, if device A, B and C were paired in that order, connection will be established to C first. If C is not available (turned off, out of range), the headset will connect to B, etc.

---

18 SPECIFICATIONS

Range: 66 ft. Note- Best range is achieved with line-of-sight positioning of headset and cell phone.

Certain conditions and obstructions, such as wireless devices, walls, etc., can inhibit radio wave transmission and reduce range.

Talk Time Duration: 11+ hours on a 12 hour charge.

Standby Time Duration: Up to 150 hours on a 12 hr. charge.

Auto (DC) Charger Inline Fuse Replacement: If neither of the headset charging indicators light when the auto adapter is connected to the headset and power source, check the charger's inline fuse. Replace with 1A 250V Slow-Blow glass fuse (3AG) if necessary. Fuses are available at most automotive stores. To replace, simply unscrew the tip of the auto adapter (see photo, right) and remove the fuse (be careful not to lose the spring that is inside). Put new fuse in and screw the tip back on.
