

VERTU SERVICES

VERTU SELECT

Vertu Select brings you the best in online information, news, recommendations and exclusive Vertu downloads. Delivered directly to your Signature by internationally recognised brands, Vertu Select is only available to Vertu clients.

VERTU FORTRESS

With the click of a button Vertu Fortress automatically backs up all information stored on Signature to ultra-secure servers maintained in an impenetrable ex-military bunker.

VERTU TRAVEL

Understanding that many of its clients are frequent travellers, Vertu developed Vertu Travel, a suite of applications offering weather forecasts for destinations worldwide, access to currency rates from the world's financial markets, and a flight tracker for over 350 of the world's leading airlines.

To take advantage of Vertu Services, you must register your Signature and select your choice of services at www.verturegistration.com. After registration, you will be sent any additional settings that you may need.

To access any of these services, from the Menu, select Vertu Services, then your choice of service. For further information, please refer to the manual on the accompanying CD.

HOW TO USE THE GO TO MENU

The smart Go to menu automatically customises itself to your needs. The menu will present both the five most frequently used and the two last used functions so that you are always only one click away from what you need.

To use a Go to shortcut, press the Go to button, then use the Navigation key to select the shortcut you want.

VERTU CONCIERGE KEY

Signature was developed to meet the needs of the world's most demanding individuals, and naturally service of the highest quality is paramount. So much so, that it is literally built into Signature: a unique, patented button connects directly to Vertu Concierge, a personal service offering expert advice and assistance, around the clock, around the world.

HOW TO CALL VERTU CONCIERGE

To access Vertu Concierge, press the Concierge key (pictured) on the side of the phone to display the Concierge screen, and press Call to call. To take advantage of Vertu Concierge, you must register your Signature first at www.verturegistration.com.

SPECIFICATIONS

DIMENSIONS

Length	130 mm
Width	42 mm
Thickness	13 mm
Volume	65 cc

CONTENTS OF PRESENTATION BOX

- Signature Phone
- 2 x Battery
- Polishing Cloth
- AC Charger
- Vehicle Charger
- USB data cable
- CD ROM (Vertu PC Suite and Reference manual)
- Signature Guide
- Safety & Warranty Booklet
- Certificate of Authenticity

CONNECTIVITY

- Bluetooth
- WLAN
- Micro USB connection
- PC & Mac synchronisation

ACCESSORIES

A collection of beautiful handcrafted, natural leather cases have been created to match and protect each Vertu phone. These cases, hand moulded in the best leather, meet exceptional standards in both design and construction.

- 1 Natural calf leather vertical case with metal V closure. Available in black.
- 2 Natural calf leather horizontal case with metal V closure. Available in black
- 3 Natural calf leather, hinged case. Available in black.

Safety

Read the following simple guidelines. Not following them may be dangerous or illegal.

When using the features in this device, obey all laws and respect local customs, privacy and legitimate rights of others, including copyrights.

SWITCH ON SAFELY

Do not switch the phone on when wireless phone use is prohibited or when it may cause interference or danger.

ROAD SAFETY COMES FIRST

Obey all local laws. Always keep your hands free to operate the vehicle while driving. Your first consideration while driving should be road safety.

INTERFERENCE

All wireless phones may be susceptible to interference which could affect performance.

SWITCH OFF IN HOSPITALS

Follow any restrictions. Switch phone off near medical equipment.

SWITCH OFF IN AIRCRAFT

Follow any restrictions. Wireless devices can cause interference in aircraft.

SWITCH OFF WHEN REFUELLING

Do not use the phone at a refuelling point. Do not use near fuel or chemicals.

SWITCH OFF NEAR BLASTING

Follow any restrictions. Do not use the phone where blasting is in progress.

USE SENSIBLY

Use only in normal position. Do not touch the antenna unnecessarily.

Vertu safety and warranty information

QUALIFIED SERVICE

Only qualified personnel may repair this phone.

ACCESSORIES AND BATTERIES

Use only approved accessories and batteries. Do not connect incompatible products.

WATER RESISTANCE

Your Vertu phone is not water resistant. Keep it dry.

BACK-UP COPIES

Remember to make back-up copies or keep a written record of any important information stored in your phone.

CONNECTING TO OTHER DEVICES

When connecting to any other device, read its user guide for detailed safety instructions. Do not connect incompatible devices.

EMERGENCY CALLS

Ensure the phone is switched on and in service. Press the END key as many times as needed to clear the display and return to the stand-by display. Enter the emergency number, then press the SEND key. Give your location. Do not end the call until given permission to do so.

Traffic safety

Do not use a hand-held telephone while driving a vehicle. If using a hand-held phone, park the vehicle before using the phone in any way. Do not place the phone on the passenger seat or where it can break loose in a collision or sudden stop.

Operating environment

Remember to follow any special regulations in force in any area and always switch off your phone whenever it is forbidden to use it, or when it may cause interference or danger. As with other mobile radio transmitting equipment, users are advised that for the satisfactory operation of the

equipment and for the safety of personnel, it is recommended that the equipment should only be used in the normal operating position.

This phone meets RF exposure guidelines when used either in the normal use position against the ear or when positioned at least 2.2cm (7/8 inch) away from the body. When a carry case, belt clip or holder is used for body-worn operation, it should not contain metal and should position the phone the above-stated distance away from your body.

Use only the supplied or approved parts. Unauthorised antennas, modifications or attachments could damage the phone and may violate regulations governing radio devices.

Electronic devices

Most modern electronic equipment is shielded from radio frequency (RF) signals. However, certain electronic equipment may not be shielded against the RF signals from your wireless phone.

Medical devices

Operation of any radio transmitting equipment, including wireless phones, may interfere with the functionality of inadequately protected medical devices. Consult a physician or the manufacturer of the medical device to determine if they are adequately shielded from external RF energy or if you have any questions. Switch off your device in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may be using equipment that could be sensitive to external RF energy.

Implanted medical devices

Manufacturers of medical devices recommend that a minimum separation of 15.3 centimetres (6 inches) should be maintained between a wireless device and an implanted medical device, such as a pacemaker or implanted cardioverter defibrillator, to avoid potential interference with the medical device.

Vertu safety and warranty information

Persons who have such devices should:

- > *Always keep the wireless device more than 15.3 centimetres (6 inches) from the medical device when the wireless device is turned on;*
- > *Not carry the wireless device in a breast pocket;*
- > *Hold the wireless device to the ear opposite the medical device to minimise the potential for interference;*
- > *Turn the wireless device off immediately if there is any reason to suspect that interference is taking place;*
- > *Read and follow the directions from the manufacturer of their implanted medical device.*

If you have any questions about using your wireless device with an implanted medical device, consult your health care provider.

Hearing aids

Some wireless phones may interfere with some hearing aids. In the event of such interference, consult your service provider.

Other medical devices

Operation of any radio transmitting equipment, including wireless phones, may interfere with the functionality of inadequately protected medical devices.

Switch off your phone in health care facilities when any regulations posted in these areas instruct you to do so.

Vehicles

RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles (e.g. electronic fuel injection systems, electronic anti-skid (anti-lock) braking systems, electronic speed control systems, air bag systems).

Check with the manufacturer or its representative regarding your vehicle. You should also consult the manufacturer of any equipment that has been added to your vehicle.

Only qualified personnel should service the device or install the device in a vehicle. Faulty installation or service may be dangerous and may invalidate any warranty that may apply to the device. Check regularly that all wireless device equipment in your vehicle is mounted and operating properly.

Do not store or carry flammable liquids, gases or explosive materials in the same compartment as the phone, its parts or accessories.

For vehicles equipped with an air bag, remember that an air bag inflates with great force. Do not place objects, including both installed or portable wireless equipment in the area over the air bag or in the air bag deployment area.

Aircraft

Using your device while flying in aircraft is prohibited. Switch off your phone before boarding an aircraft. The use of wireless telephones in an aircraft may be dangerous to the operation of the aircraft, disrupt the wireless telephone network and may be illegal. In the United States, FCC regulations currently prohibit using your Vertu phone while in the air.

Failure to observe these instructions may lead to suspension or denial of telephone services to the offender, or legal action or both.

Vertu safety and warranty information

Potentially explosive atmospheres

Switch off your phone when in any area with a potentially explosive atmosphere and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death.

You are advised to switch off the phone when at a refuelling point or service station. Observe restrictions on the use of radio equipment in fuel depots (fuel storage and distribution areas), chemical plants or where blasting operations are in progress.

Areas with a potentially explosive atmosphere are often but not always clearly marked. They include below deck on boats; chemical transfer or storage facilities; vehicles using liquified petroleum gas (such as propane or butane); areas where the air contains chemicals or particles, such as grain, dust or metal powders; and any other area where you would normally be advised to turn off your vehicle engine.

Water resistance

Your Vertu phone is not water resistant. Keep it dry.

If your Vertu phone is accidentally splashed with water, ensure you dry it completely before removing the back cover. Remove the battery and leave all parts to dry naturally. Do not apply heat.

Never charge your Vertu phone when the connector is damp or wet.

Chargers must only be used in dry conditions. They should never be used when damp or wet.

Make sure the interior of your Vertu phone and the back cover seals are dry, clean, and free of any foreign objects before you replace the back cover.
