4.End key	8.Receiver	12.earphone jack

Note: All the illustrations, simulated screen and related images used in this manual are for reference only. Please refer to your handset for actuality.

Contents

1. Safety Information

Batteries

Never use a charger or battery that is damaged in any way.

Properly use the battery. Do not short-circuit the battery, which may damage the battery, cause heat or cause fire.

Do not dispose of batteries in high temperature of in a fire as they may explode.

Return the waste battery to the dealer or designated recycling center. Do not dispose as household waste.

Battery charging time depends on the remaining battery charge, the type of battery and the charger used. The battery can be charged and discharged hundreds of times, but it will gradually wear out. When your phone's operating time is noticeably shorter than normal, it is time to buy a new battery.

Use only original or approved chargers and batteries.

Unplug the charger from the electrical plug and the device when not in use.

Do not overcharge, which will damage the battery and shorten its life.

Leaving the battery in extremely hot or cold places will reduce the capacity of the battery. Cool down or heat up the temperature to normal level (Li-ion batteries are particularly affected by temperatures below 0℃ (32°F)).

Road safety

Your wireless phone gives you the powerful ability to communicate by voice, almost anywhere, anytime. Therefore, you must uphold some important responsibility.

When you are driving, driving is your first responsibility. When using your wireless phone while driving, be more alert and follow local regulations.

Understand the wireless phone and features, such as speed dial and redial which can help you make a call more conveniently without disturbing your driving.

Use a hands-free set if possible. Hands-free accessories may promote the convenience and safety of using your wireless phone.

Place your phone where is easy to access and does not require you to move your eyesight. If receiving a call at an inconvenient moment, let your voicemail answer for you.

When on the phone, tell your conversation partner that you are driving. Hang up in traffic jams or bad weather. Rain, rain with snow, snow, ice and traffic may be dangerous.

Air bags, brakes, speed control systems and fuel injection should not be influenced by radio transmission. If you have these problems, contact your car dealer immediately.

Switch off your mobile phone when fueling or anywhere two-way radio equipment usage is prohibited. Do not put your phone near flammable and explosive substances. Internal spark may cause fire or explosion.

Switch off the mobile phone prior to airplane take-off. To prevent interference to communication systems in the plane, never use a phone during flight. Using a phone before the plane takes off may be allowed by the crew in accordance with safety regulations.

During flight, make sure that your phone will not be automatically switched on by an alarm you have set.

Operating environment

Remember to follow any special regulations in force in your area and always switch off your phone whenever it is forbidden to use it, or it may cause danger.

When connecting the phone or any accessory to another device, read its user's guide for detailed safety instructions. Do not connect incompatible products.

It is recommended that the equipment only be used in the normal operating position (held to your ear with the antenna pointing over your shoulder) for your satisfactory operation of the equipment and for the safety of personnel.

Do not expose the equipment to temperature below -10℃ (14°F) or above 50℃ (122°F).

Electronic devices

Most electronic equipment is shielded from radio frequency signals. Consult the manufacturer for relevant information.

Pacemakers: Maintain a minimum distance of 6 inches (15cm) between a wireless phone and a pacemaker; do not put your phone in a pocket near the chest; use your ear furthest from the pacemaker to reduce possible interference. If you have any reason to suspect that interference is taking place, switch off your phone immediately.

Hearing aids: Some digital wireless phones may interfere with some hearing aids. In the event of such interference, you may consult your hearing aid manufacturer.

Other medical devices: If you use any other personal medical devices, consult the manufacturer of your device to determine if it is adequately shielded from external RF energy. Your physician may be able to assist you in obtaining this information. Switch off your phone in health care facilities when regulations posted in these areas instruct you to do so.

Vehicles: RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles. Check with the manufacturer.

Emergency calls

This phone, like any wireless phone, operates using radio signals, which cannot guarantee connection in all conditions. Therefore, you should never rely solely on any wireless phone for essential communications like medical emergencies.

To make or receive calls, the phone must be switched on and in a service area with adequate

signal strength.

To make an emergency call, enter the local emergency number in standby mode and press Snd to call.

Other important safety information

● Use original or approved accessories. Any unapproved accessory may affect the performance of your phone, damage your phone or even cause personnel injury.

● Your wireless phone sends out an electromagnetic field. Do not put the phone near magnetic storage media such as computer disks. Neighboring electric appliances such as TVs, phones, radio receivers and PCs may affect the use of your phone and its performance.

● Do not connect the phone to an incompatible device.

● Only qualified personnel should service the phone or install the phone in a vehicle.

Care and maintenance

Your phone is a product of superior design and craftsmanship and should be treated with care. The suggestions below will allow you to enjoy this product for many years.

● Keep your phone out of the hands of small children and pets. They may accidentally damage the phone or choke on small parts.

● Keep the phone dry and avoid liquids that corrode the phone.

● Do not use the phone with a wet hand, which may cause an electric shock.

● Do not store the phone in hot areas, which can shorten the life of electronic devices, damage batteries or melt accessories.

● Do not store the phone in cold areas. When the phone warms up to its normal operating temperature, moisture can form inside the phone, which may damage the phone's electronic circuit boards.

● Do not expose your phone to hot sun which may overheat your phone.

● Do not place your phone near flammable liquids, gases or explosive substances.

● Do not drop or knock the phone. Rough handling can break internal circuit boards.

● When cleaning your phone, use a slightly damp or anti-static cloth. Do not use a dry or static cloth. Do not use chemicals such as cleaning solvents to clean the surface. Switch off the phone first and then do the cleaning.

● Do not paint the phone. Paint can prevent proper operation.

● If your phone has a flash, do not use it too close to the eyes. This may cause damage to eyes.

● If the phone or battery gets wet and the label in the phone is damaged, phone repairs are no longer guaranteed by the manufacturer's warranty, even if the warranty for your phone has not expired.

Improper use will invalidate the warranty! These safety instructions also apply to original accessories.

2. Essential

2.1 Install the SIM card

Keep your SIM cards away from the children.

Please consult your SIM card franchiser about the services and usage. SIM franchiser can be the service provider, network provider or other franchisers.

Please turn off your mobile device and disconnect it with charger before removing the battery.

Note: turn off your mobile device and disconnect it with charger or any other device before removing the battery door. Place the door on the phone before using your mobile phone.

1，Remove the battery door:

Press and slide the battery door to the top of the phone, then take the battery door off.
2，Insert the SIM card into the card slot:

Now you can see two card slots side by side, please insert the SIM cards with the right direction as shown.

2.2 Battery Use and Installation

Battery tips

Battery life depends on the network, signal strength, temperature, and accessories you use.

Always use Original batteries and chargers. The warranty does not cover damage caused by non-original batteries, charger and/or accessories.

New batteries or batteries stored for a long time may take more time to charge

When charging your battery, keep it near room temperature.

When storing your battery, keep it uncharged in a cool, dark, dry place.

Never expose batteries to temperatures below -10°C (14°F) or above 45°C (113°F).

Always take your phone with you when you leave your vehicle.

It is normal for batteries to gradually wear down and require longer charging times. If you notice a change in your battery life, it is probably time to purchase a new battery.

Never dispose of batteries in a fire because they may explode.

Battery installation

1，Slide the battery door up and then remove the door.
2，Aim the metal terminals of the battery at those in the battery compartment and then push down and into it.
Battery charging:

New batteries are not fully charged. Open the protective cover on your phone's accessory connector port, then insert the battery charger plug into the accessory connector port on the side of your phone as shown, and plug the other end into an electrical outlet. Your phone might require several hours to charge fully. When your phone is power off, it might take a few seconds to show charging display and it shows charge complete when finished. When your phone is power on, the battery icon flickers when it starting charging and become still with full bars in battery icon when finished.

2.3 Memory Card

The memory card is built-in the phone and non-removable & unexposed, You can save music and other files.

2.4 Power on/off

Caution: On power up, the phone may prompt you to enter your SIM card PIN code to unlock the SIM card. If your phone shows Input PUK code meaning your SIM card is locked, please contact your service provider.

To turn on your phone, press and hold the power on/off key for two seconds. If prompted, enter your four-to-eight-digit SIM card PIN code and/or four-digit unlock code.

If you don't insert a SIM card, your phone shows Insert SIM. None of the functions related to SIM card can be used and you can make an emergency call only.

To turn off your phone, press and hold the power on/off key for two seconds.

2.5 Make a call

1. Input the telephone number directly.
2. Press the send key to dial calls.
3. After calling, press the power on/off key or end key to end.

2.6 Answer or Reject a call

When there is an incoming call, the phone rings and /or vibrates showing the number or the corresponding name.

Now the phone provide three mode,

Not any key(set in profiles): Press **answer key** or enter **option** and then select **answer** to

receive a call. If you don't want to answer, you can press the power on/off key or right soft key.

Any key: Except power on/off key and right soft key, press any key to answer a call.

Earphone/Bluetooth mode: when plugging the earphone (including bluetooth headsets), you can answer a call by pressing the key on the earphone; when you are not convenient to press the key, you can turn on the auto-answer mode (only in earphone mode) and make sure the earphone is plugged, your phone auto-answers a call 5 seconds after it rings and/or vibrates.

2.7 Operation during a call

Press **Option** to perform following operation during a call:

Hold Single: Hold this call

End Single: Hang up and end this call

New Call*:   Enter a new dialing display to make a new call

PhoneBook: Enter the phone book

Messages: Enter messages

If you feel your phone is not working properly, please try reset settings first, and then follow the Troubleshooting Guide. If you are still unable to solve problems, please contact the authorized service center or the store from where you purchased the phone.

Issue	Solutions
Can not answer or make a call	Make sure that the phone has been switched on. Make sure that the battery is charged. Make sure that the signal intensity is high enough. Make sure the own number function in the call setting is system preset or number sending. Make sure the line switch in call setting is the system preset line. Check whether you have set up call barring or fixed dialing or any other safety function. Check whether you have set up call diverts. Check whether you have inserted the proper SIM card correctly.
Low voice	Check if the volume has been set too low.
No ring	Check whether you have set up the" Silent" option. Check whether the ring volume is not too low Move away from a noisy place to check if you can hear the phone ringing. Check whether you have set up call diverts.

Specific Absorption Rate Data

This model meets international guidelines for exposure to FM Radio waves.

Your mobile device is a FM Radio transmitter and receiver. It is designed not to exceed the limits for exposure to FM Radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organization ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health.

The guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR. The ICNIRP SAR limit for mobiles devices used by the general public is 2 W/kg.

This wireless phone meets the government's requirements for exposure to radio waves.

The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR, The SAR limit set by the FCC is 1.6 W/Kg.

Information from the World Health Organization

The World Health Organization has stated that present scientific information does not indicate the need for any special precautions for the use of SAR Data mobile devices. They note that if you want to reduce your exposure then you can do so by limiting the length of calls or using a "hands-free" device to keep the mobile phone away from the head and body. Improvement of this device may cause a little change of the SAR data. However, the device is designed in accordance with the guidelines in any case.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no

guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

—Reorient or relocate the receiving antenna.

—Increase the separation between the equipment and receiver.

—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

—Consult the dealer or an experienced radio/TV technician for help.
