2 Security measures

2.1 Safety Precautions

When mobile phone use is prohibited or the use may cause interference or danger, please do not turn on it, and turn off the automatic startup function.

Please read and follow the simple rules to prevent dangerous and illegal use.

2.2 Use of the environment

When you take a plane the phone should be turned off, wireless devices may cause interference in aircraft.

In the hospital should be powered off, the phone may make some medical equipment (such as pacemakers, hearing aids, etc.) have an impact.

At gas stations, oil depots, chemical plants, where blasting operations or near flammable materials and chemicals areas, do not use the phone.

Do not use mobile phones while driving, before using, you should stop your car.

2.3 Fair Use

Just use your phone in the normal position.

When you connect it to other devices, please read the instructions for detailed and safety actions, do not connect incompatible products.

Only qualified personnel can install and repair the phone.

2.4 Accessories and batteries

Use only the specified batteries and accessories.

The use of any unauthorized accessories may affect the phone's performance, even lead to physical danger or in violation of state on the relevant provisions of communication terminal products.

2.5 Data Backup

Please note that back up all important data, so as to avoid loss.

3 Getting used

3.1 How to install the battery

1. Open the back cover.
2. Insert the battery into the battery slot.

3. Close the phone cover.

3.2 How to remove the battery

1. Open the back cover.
2. Remove the battery from the battery slot.

Note: We recommend first off and then remove the battery to avoid loss of data in mobile phones.

3.3 How to charge the battery

Plug one end of the charger to the phone charging port, the other end into a household power outlet.

Note: This machine can be connected to a computer USB port to charge.

When charging the battery level indicator on the screen icon was dynamic display, until the battery is full up.

After charging, disconnect the power, then unplug the charger, so that the charger no-load.

3.4 How to install & remove the SIM card

1. The machine supports two SIM cards. Before doing the following, make sure the phone is turned off and no charging.
2. Open the back cover, remove the battery.
3. Make the golden contacts of the SIM card face down, Card gap facing the slot gap, and then put into it.
4. Install the battery and close the battery cover.

SIM card's removal and installation steps are in reverse.

4 IME

5 Make & receive calls

5.1 make a call

Enter the phone number in the standby screen, press the Send key with the selected SIM card to make calls.

When input, press RSK to delete the number.

During the call press the end key to end the call.

Directly in the call log can also call:

1. In the idle screen press the Send key to enter the call log.

In the operation process, the mobile phone may display the following operating tips:

"**Emergency**"

■ You are outside the network coverage area of the service provider. But another network area where you locate allows you to make emergency call according to the signal strength.

"**Invalid SIM**"

■ The SIM card of the mobile phone is locked and the inserted SIM card is unable to be accepted. Please insert the correct SIM card or contact with the vendor.

"**Please Enter PUK**"

■ The SIM card has been locked since the wrong PIN code has been inputted for three times. You must consult your network provider for special PUK code with eight numbers to unlock the SIM card (The PUK code may have been provided with your PIN code at the same time).

Warning:

The SIM card will be permanently locked if you input the wrong PUK code for ten consecutive times and you must apply for a new SIM card from your network provider.

19 Maintenance Guideline

Welcome to use i607. If there is a problem when you using the phone, please contact with the vender or consult the local maintenance center. If your mobile phone is in need of repair, you can take your phone to local maintenance center, if there is no local maintenance center, please pass your phone and the purchasing invoice to the vendor.

FCC Caution.

§ 15.19 Labelling requirements.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

§ 15.21 Information to user.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

§ 15.105 Information to the user.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These

limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

Specific Absorption Rate (SAR) information:

This Automotive Diagnosis Computer meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and

thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

FCC RF Exposure Information and Statement The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types: I603A (FCC ID: WA6I603A) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the **ear is**1.41W/kg and when properly worn on the body is 0.81W/kg. This device was tested for typical body-worn operations with the back of the handset kept **1.5cm** from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a **1.5cm** separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

Body-worn Operation

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of **1.5 cm** must be maintained between the user’s body and the handset, including the antenna.

Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
