2 Security measures

2.1 Safety Precautions

When mobile phone use is prohibited or the use may cause interference or danger, please do not turn on it, and turn off the automatic startup function. Please read and follow the simple rules to prevent dangerous and illegal use.

2.2 Use of the environment

When you take a plane the phone should be turned off, wireless devices may cause interference in aircraft.

In the hospital should be powered off, the phone may make some medical equipment (such as pacemakers, hearing aids, etc.) have an impact.

At gas stations, oil depots, chemical plants, where blasting operations or near flammable materials and chemicals areas, do not use the phone.

Do not use mobile phones while driving, before using, you should stop your car.

2.3 Fair Use

Just use your phone in the normal position.

When you connect it to other devices, please read the instructions for detailed and safety actions, do not connect incompatible products.

Only qualified personnel can install and repair the phone.

2.4 Accessories and batteries

Use only the specified batteries and accessories.

The use of any unauthorized accessories may affect the phone's performance, even lead to physical danger or in violation of state on the relevant provisions of communication terminal products.

2.5 Data Backup

Please note that back up all important data, so as to avoid loss.

3 Getting used

3.1 How to install the battery

1. Open the back cover.
2. Insert the battery into the battery slot.

3. Close the phone cover.

3.2 How to remove the battery

1. Open the back cover.
2. Remove the battery from the battery slot.

Note: We recommend first off and then remove the battery to avoid loss of data in mobile phones.

3.3 How to charge the battery

Plug one end of the charger to the phone charging port, the other end into a household power outlet.

Note: This machine can be connected to a computer USB port to charge.

When charging the battery level indicator on the screen icon was dynamic display, until the battery is full up.

After charging, disconnect the power, then unplug the charger, so that the charger no-load.

3.4 How to install & remove the SIM card

1. The machine supports two SIM cards. Before doing the following, make sure the phone is turned off and no charging.
2. Open the back cover, remove the battery.
3. Make the golden contacts of the SIM card face down, Card gap facing the slot gap, and then put into it.
4. Install the battery and close the battery cover.

SIM card's removal and installation steps are in reverse.

4 IME

This phone supports multiple languages input. The IME can be alternated by pressing the "Shift" key in the edit interface. Then press the corresponding keys in the keyboard to input.

5 Make & receive calls

5.1 make a call

Enter the phone number in the standby screen, press the Send key with the selected SIM card to make calls.

When to input, press RSK to delete the number.

During the call press the end key to end the call.

You can also choose from a number of direct contacts to allocate;

Press RSK in the standby screen enter the phone number screen, and press the navigation key to select to dial the number.

Press the Send key to call the selected number.

Directly in the call log can also call:

1. In the idle screen press the Send key to enter the call log.
2. Press the navigation up and down keys to select the number to dial.
3. Pressing the Send key will make the call.

5.2 Make an emergency call

Within the GSM system, you can make an emergency call. When making an emergency call, please do not arbitrarily terminate the call. Phone without a SIM card can still make emergency calls.

Enter the emergency number, press the Send key to make an emergency call.

Note: As with any mobile phone, due to the network coverage reasons or wireless signal transmission case, may not support the characteristics of the mobile phones. Some networks do not even support the 112 emergency call service. Thus, for particularly critical communications (eg: medical emergencies), should not rely solely on mobile phones. Please check with your local network operator and reconciliation.

5.3 International calls

In the idle screen press "+" key then in turn enter the country code, area code and telephone number.

Press dial key to make international calls.

Note: International dialing code of some networks is not "+" sign, please be discretion.

5.4 Answer the call

If there is an incoming call, press the Send key to answer the phone, hang up the keys to reject a call.

Press the End key to end the call.

5.5 adjust the volume

During the call you can press navigation up and down to adjust the volume.

19 Common Questions

Unable to make some calls

■ Call barring has been set and barred utilization of the mobile phone. Please check and cancel call barring.

Other person is answering my call

■ The mobile phone has been set into divert your calls to another phone number. Please check and cancel call divert.

The mobile phone cannot search for the network

■ The mobile phone is outside of the network coverage area (or there are physical obstructions between the mobile phone and the transmitter), and calls cannot be made or answered. If you are in one room, please move close to the window.

In the operation process, the mobile phone may display the following operating tips:

"Emergency"

■ You are outside the network coverage area of the service provider. But another network area where you locate allows you to make emergency call according to the signal strength.

"Invalid SIM"

■ The SIM card of the mobile phone is locked and the inserted SIM card is unable to be accepted. Please insert the correct SIM card or contact with the vendor.

"Please Enter PUK"

■ The SIM card has been locked since the wrong PIN code has been inputted for three times. You must consult your network provider for special PUK code with eight numbers to unlock the SIM card (The PUK code may have been provided with your PIN code at the same time).

Warning:

The SIM card will be permanently locked if you input the wrong PUK

code for ten consecutive times and you must apply for a new SIM card from your network provider.

20 Maintenance Guideline

Welcome to use i607. If there is a problem when you using the phone, please contact with the vender or consult the local maintenance center. If your mobile phone is in need of repair, you can take your phone to local maintenance center, if there is no local maintenance center, please pass your phone and the purchasing invoice to the vendor.

FCC WARNING

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

Note 1:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Note 2:

Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC RF Exposure Information and Statement

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radiofrequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. * Tests for SAR are conducted with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output. Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. The maximum scaled SAR value for this model phone when tested for use at the ear is **0.73W/Kg** and when worn on the body, as described in this user guide, is **1.09W/Kg**(Body-worn measurements differ among phone models, depending upon available accessories and FCC

requirements), While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure. The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of <http://www.fcc.gov/oet/fccid> after searching on FCC ID: **WA61607** Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications Industry Association (CTIA) web-site at <http://www.wow-com.com>. * In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

Body-worn Operation

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of **15mm** must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
