Security and performance

◆ In thunder raining days, please do not use the mobile phone when charge it or outdoor, so as to avoid being struck by thunder or other injuries.

◆ Please do not put the battery in high-temperature environment (high temperature will lead to heat of the battery upgrading), and keep the phone being charged and the charger away from people or other flammable and explosive articles in order to avoid fire, explosion or other dangers!

◆ Please strictly adhered to the rules and do shut down the mobile phone on occasions which use of mobile phone is prohibited!

◆ Please do not arbitrarily refit or teardown the phone and accessories. Only the authorized organizations can repair the phone.

◆ Please do not use batteries, charger or accessories of non-standard original models.

◆ Please do not join the two poles of the battery, so as not to result in battery short-circuit.

◆ Please do not use the mobile phone when driving. In case of emergency, please use hand-free devices (which may be bought separately).

◆ Please do not put the phone on car insurance airbag or region reachable by the airbag after spreading. Otherwise when the airbag expands or ruptures, the mobile phone is likely to cause serious damage to the people in the car due to strong external force.

◆ In order to comply with provisions of RF leakage, when you wear a phone or use the data functions, please maintain the distance between the antenna and the body at least 1 inch (2.5 cm).

◆ Do not use chemical lotion, scrubbing cleanser to wipe the mobile phone or the charger, otherwise it may damage the components or cause fire. Slightly wet and anti-static soft clean cloth can be used.

◆ Please do not throw the old and abandoned lithium batteries into trash can, send them to the designated locations.

◆Please do not use the phone to make bold to camera, video and recording that may infract the rights of the copyright owners. The company will not be responsible for any losses caused by not recording, deleting, destructing or damage of the photos, video and recordings caused by its accessories or software on the use of the functions including camera, video and audio.

◆In the use of network function, if the users download a file with virus, which make the mobile phone cannot be used normally; the company does not undertake any responsibility arising therefore.

Warning: The original manufacturer will not take on any responsibility for the users who are not in compliance with the above advices or improperly use the mobile phone.

Note: The application of value-added services of the mobile phone is provided by relevant service providers. Please refer to the relevant help or providers' notes for detailed information.

Statement: The Company reserves the right to improve the product without making any advance notice, and keeps final interpreting rights on the product performance. Such changes are not notified additionally, your understanding is appreciated.

1 Start Using

- Battery

Battery is attached with the phone. Please recharge it for use after completely using up the battery for the first three times, which makes this battery easier to achieve the best using state.

In actual use, the standby time and talk time of the phone varies with the network status, working environment and different using manners.

With the back of the mobile phone facing upward, then take off the rear cover. Lift the battery from the bottom and take the battery out.

When inserting the battery, insert the metal teeth at the top of the battery into corresponding slot of the mobile phone, and then press the battery down to insert the battery in place. The battery must be correctly inserted before powering on.

- SIM card

The SIM card is the key for accessing to the digital GSM network.

Prior to using the phone, you need to insert effective SIM card in the phone.

In order to prevent illegal use, SIM card adopts PIN code (personal identification code) encryption protection.

If this function is selected, PIN code should be input correctly each

time when you power on the phone, thus to unlock the SIM card for normal use. Users can disarm the SIM card protection but illegal use of the SIM card cannot be prevented.

If the PIN code input is error for three consecutive times, your SIM card will be locked by the network. There will enquire the PUK code which provided by your network operator. If the PUK code input is wrong for 10 times, the SIM card will be permanently barred.

Note:

Your network operator will set a standard PIN code and you should change it to private password.

- Plug the memory card

Open the memory card holder, and insert the memory card into the slot at the bottom according to the chat below, then close the memory card holder.

- Plug the earphone

Open the USB cover and insert the connector of the earphone to the earphone jack at the top of the mobile phone. Gently pull out the earphone to remove it.

- Status bar and content

In standby screen you can get the information that you need from the indication icons on the screen.

	Indicating that the SIM1 is connecting network currently
	Indicating there is text message not read of SIM1
	Indicating there is MMS not read of SIM 1
	Divert all voice calls has been set of SIM1
	Indicating missed call of SIM1
	The current alert type is ring only
	The current alert type is vib. Only
	The current alert type is vib. and ring
	The current alert type is vib. then ring
	Indicating that silent mode activated
	The mobile phone is locked
	Indicating that earphone has been inserted
	Indicating that the bluetooth has been activated
	Indicating that WLAN has been connected
	Indicating that alarm has been set
	T-flash card is inserted and recognized

1.5.1 Keys

Functions of the keys are described as following:

SN	Keys	Function description
1	Send key (Snd)	Making a call; in standby screen press the key to enter Call history.
2	Message key	Enter message module in standby or menu screen.
3	Menu key	Tap to enter the main menu screen in standby mode or active detail menu in other program screens; short press to enter the dedicated application.
4	Home key	Go to the standby screen.
5	Back key	Go back to previous screen.
6	End key	Hang up a call; short press to lock the phone; long press to power on/off the phone.

7	Receiver	Listen to the voice of the other side when calling.
8	USB jack	Connecting USB cable or charger.
9	Earphone jack	Connecting earphone.
10	Camera	For finding a view with the camera.
11	Speaker	Listen audio or calls in hands-free mode.

1.5.2 Text input and edit window

Enter the text input screen, you can short press the **Sym** key to enter the symbols selecting screen; short press **A** key to switch input method; short press **⇧** key to switch detailed input method.

2 Dial and answer the call

- Dialing a call

When the network operator's logo appears on the screen, the mobile phone enters into the normal standby state in which you can dial or answer a call. The call quality is relatively largely impacted by obstacles. Therefore, movement in a small range can effectively improve the signal strength.

In the standby screen, input the call numbers or select contact in phonebook, and then press the **Snd** key or use touch screen to make the call.

If the speed dial function is activated, in standby screen, long press the number keys **☐-☐** to dial the number that has been set up automatically. If speed dial has not been set for the number key you long pressed, the mobile phone will hint you "No speed dial number".

- Answering a call

If there is a new incoming call when in call progress, the phone will pop up caller screen (call waiting is activated). When you answer the new call, the original call will enter holding status. At this time,

you can activate **More** menu to select **Swap** to active the original call, and the new call will enter holding status.

Note:

When you are in call progress, the new call to another SIM card can't be dialed in.

If two calls are connected, you can operate as follows:

Conference: when making conference call, you can have a talk separately with designated conference participant. In conference call mode, all the others can hear your voice.

Transfer (network support is required): transfer the current call to your designated phone number.

DTMF: on/off settings can be conducted. If the function is activated, when calling the telephone exchange, you can call the extension in accordance with voice clues; the aforesaid functions are unavailable if the function is off.

Emergency call

If you are in the network coverage area (you can check the network signal strength at the top of standby screen), even without the SIM card, you are also able to make an emergency call.

Note:

The emergency call numbers in different countries or regions are different. Please refer to the local numbers for specific emergency service numbers.

3 Menu operation

In the standby screen, press **Menu** key to enter the main menu, you can press navigation keys or corresponding number key to select the function you want to enter.

File manager	Phonebook	User profiles
WLAN	Settings	Call history
Dialer	Messaging	Security guard
Connectivity	Email	Camcorder

Image viewer	Media player	Sound recorder
Radio FM	Calendar	Tasks
Alarm	World clock	Notes
Synchronization	Phone sync	Opera
Calculator	Health	Currency converter
Stopwatch	Ebook reader	Answering machine
Bluetooth	Applications	STK
eBuddy	

4 Characteristic function

- Switch pages

In standby mode or the main menu interface, scroll the screen to the right or the left to switch pages.

In standby mode, press the **Home** key, choose one page in the pop-up interface to switch to pages.

- Free-style menu

Enter notes, you can create a new note through menu. The user can view, edit, and delete each note.

26Synchronization

Enter synchronization screen, select an account, choose to **Edit account** by set the parameters such as account name, transport type, server settings, applications to sync and so on. After set the account correctly, select **Sync now** to sync the data.

Note:

The server you have set should support synchronization.

27Phone sync

Enter phone sync screen, you can select **Sync** to process the synchronization with paired Bluetooth device.

28Opera

You can use this function to browsing the website.

	Go to previous page		Go to next page
	Refresh the page		Switch web pages
	Enter into settings		

29Calculator

The calculator performs four operations as addition, subtraction, multiplication and division. Enter calculator screen, you can input numbers directly and press Calculate button which you need, then start calculation.

30Health

Enter into health; you can select **BMI** or **Menstrual** to check the detail information.

31Currency converter

In this function, if you input the rate and the amount of money in local, you can get the result of the equivalence money of foreign.

32Stopwatch

In stopwatch screen, you can select the typical stopwatch or nWay stopwatch and view records that you have saved.

33Ebook reader

This function can be used for reading the files with .txt format in phone(memory card)/Ebook folder. Activate **Menu** to change settings, especially pay attention to the storage.

34Answering machine

The telephone answering machine is a device designed to record audio messages directly on its local memory with connecting to a server to listen to the recordings, thus avoiding the relative charges. Moreover, you can customize your answering machine message, using the phone's microphone. The answering machine will turn on after a preset number of rings, or can be operated manually as answer option.

35Bluetooth

Enter Bluetooth screen, when power on the Bluetooth, in **My device** you can select **Search new device** to search and compare with other Bluetooth device. You can select **Inquiry audio device** to search the hands-free device. If the **Visibility** state is off, the others will not find the phone via Bluetooth.

Note:

The received file that transmitted by Bluetooth are stored in Received folder automatically.

36Applications

You can install Java files and play games using the application. You also can edit the settings for Java.

37STK

Enter STK(SIM Tool Kit), the name and content of the menu are

based entirely on the services provided by the network operator. For more information, please contact with the network operator.

38eBuddy

For richness your entertainment life, there provide you the interesting application of eBuddy. Please get more information in the instructions of the phone.

39Other Functions

Mass storage: this function is used to read and write files from PC to the storage.

Webcam: activated this function, you can do the video chat with other person.

COM port: you can synchronize your phone with PC. Details about the related tools, please consult with Customer Service Center.

40 Common Questions

Unable to make some calls

■ Call barring has been set and barred utilization of the mobile phone. Please check and cancel call barring.

Other person is answering my call

■ The mobile phone has been set into divert your calls to another phone number. Please check and cancel call divert.

The mobile phone cannot search for the network

■ The mobile phone is outside of the network coverage area (or there are physical obstructions between the mobile phone and the transmitter), and calls cannot be made or answered. If you are in one room, please move close to the window.

In the operation process, the mobile phone may display the following operating tips:

“Emergency”

■ You are outside the network coverage area of the service provider. But another network area where you locate allows you to make emergency call according to the signal strength.

“Invalid SIM”

■ The SIM card of the mobile phone is locked and the inserted SIM card is unable to be accepted. Please insert the correct SIM card or contact with the vendor.

“Please Enter PUK”

■ The SIM card has been locked since the wrong PIN code has been inputted for three times. You must consult your network provider for special PUK code with eight numbers to unlock the SIM card (The PUK code may have been provided with your PIN code at the same time).

Warning:

The SIM card will be permanently locked if you input the wrong PUK code for ten consecutive times and you must apply for a new SIM card from your network provider.

41 Maintenance Guideline

Welcome to use I675. If there is a problem when you using the phone, please contact with the vender or consult the local maintenance center. If your mobile phone is in need of repair, you can take your phone to local maintenance center, if there is no local maintenance center, please pass your phone and the purchasing invoice to the vendor.

FCC RF Exposure Information and Statement

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types i675 & i674 (FCC ID: WA6I675) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the ear is 0.589W/kg and when properly worn on the body is 0.598W/kg. This device was tested for typical body-worn operations with the back of the handset kept 1.5cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.5cm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

FCC WARNING

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
