Safety Information

Before using your phone, please read the following important information to eliminate or reduce any possibility of causing damage and personal injury.

	Do not use wireless phones while driving.
	Switch off wireless devices in an aircraft. Using them on aircrafts is illegal for the signal may cause interference during flights.
	Do not use mobile phones in explosive environments. Follow any regulations and rules strictly.
	Do not use mobile phones at or near Gas stations and chemicals
	Follow any regulations or rules in hospitals and health care facilities. Switch phone off near medical equipments.
	All wireless devices may get interference that could affect the performance.
	Only qualified service personnel can install or repair this device.
	Use only approved accessories and batteries.
	Use only in the normal position. Do not expose your phone to extreme high temperatures above +60 °C (+140°F) . Do not use static material to clean your phone.
	Ensure the phone is turned on and in service. Enter the emergency number, then press the Pick Up key. Give your location. Do not end the call until told to do so.

Improper use will invalidate the warranty! These safety instructions also apply to original accessories.

Basic Functions

Switching Your Phone On/Off

Press and hold down Power Key for a few seconds to switch your phone on.

If the phone asks for a phone lock code:

Enter the phone lock code, and press OK.

If the phone asks for a PIN code:

Enter the PIN code, and press OK. The PIN code is usually provided with the SIM card. Please consult with your network provider for more information.

Access the standby mode.

Press and hold Power Key for a few seconds to switch your phone off.

Inserting the SIM card and memory card

Note of using SIM Card

Your mobile phone number, PIN (Personal Identification Number), PIN2, PUK (Personal Unlock Key), PUK2 (Personal Unlock Key2), IMSI (International Mobile Subscriber Identity), the network information, the phonebook data, SMS (short messages) and other data are stored in your SIM card.

Note: This phone model only supports the SIM cards of 1.8V and 3V.

Some network operators don't offer PIN2 and PUK2, so functions using those passwords will be unavailable.

The SIM card and its contacts can be damaged and lost by scratches or bending easily, so be careful while handling, inserting or removing the card.

Keep all SIM cards out of children's reach.

Note: Always make sure the phone is switched off before you insert or remove the SIM card, otherwise it may damage the SIM card.

Mounting the SIM Card

Remove the battery cover by sliding it. Insert the SIM card, push the metal cover, and turn up the cover. Insert the Slave card into the metal cover; return the metal cover to its original position.

As the following picture shows:

Note:

If the SIM Card is installed improperly or damaged, the prompt words "Insert SIM" will display on the screen after you switch on your phone. Remove the SIM Card and check the way that performs as pictures show, and then mount it again.

If "Insert SIM" still appears on the screen after you have inserted the SIM correctly, there may be something wrong with your SIM card. Please ask the network operator to repair it.

If the screen displays that the SIM card is locked permanently, please consult with your network provider.

Mounting the T-Flash Card

Please follow steps described as below:

Push the metal cover, and turn up the cover. Insert the Memory card into the metal cover; return the metal cover to its original position. As the following picture shows:

Charging the Battery

Note: Please always keep your phone connector and charger dry. Connect the travel adapter to the phone.

Plug the travel adapter into a proper AC wall outlet.
When your phone indicates that the battery is fully charged, please pull the travel adapter out from the I/O socket of the phone.

Tip:

1. If the battery is totally empty or low, it may take a few minutes before the charging indicator appears on the screen.

2. You can turn on/off, and use the phone while charging.

Warning: Make sure that the standard voltage/power of the place where you charge the battery matches with the rated voltage/power of our travel adapter.

Quick User Manual

Call function

You can dial and receive calls when signals of network providers are shown on the display screen.

Making calls

Making a call

Enter the phone number (with the area code)

General call settings

Call Waiting:

1. Activate: The mobile phone will connect to the network when Call Wait is enabled. After a while, the network will respond by sending messages to ensure your operation. If Call Wait is enabled, the network will alert you. At the same time, another incoming call number will display on the screen when the first call is ongoing and a new call is coming thru.
2. Deactivate: If you cancel Call Waiting, the network won't alert you when the first call is ongoing and a new call is coming thru.
3. Query Status: With this function, you can inquire about the current status from the network.

Call Divert: This function allows your phone to divert incoming calls to another phone:

1. Divert All Voice Calls: When this function is enabled, all incoming calls will be diverted to another phone. Set it On or Off, the phone will connect to the network. After a while, the network will respond and tell you the result of an operation.
2. Divert If Unreachable: When this function is enabled, the incoming call will be diverted to another phone number if the phone is unreachable.
3. Divert If No Answer: When this function is enabled, the incoming call will be diverted to another phone number if there is no answer in some time.
4. Divert If Busy: When this function is enabled, the incoming call will be diverted to another phone number if the phone number you dialed is busing.
5. Divert All Data Calls: You can divert all data calls with the need of your network operator's support.
6. Cancel All Divert: Use to cancel all diverting functions.

Call Barring: This function makes use of Call Barring to limit some selected calls. When you configure this function, you should consult with your network provider for the password. If the password is incorrect, the phone will prompt the fault message. After the desired number is selected, please continue to select On or Off. After a while, the network will respond and tell you the result.

Line Switching: Switch to Line 1 or Line 2, the default is Line 1.

Note: If Line 2 is selected, making calls from Line 2 depends on the network operator

Close user group: Press the left soft key to access Group List, and then select Add to input the group's name. Press the left soft key to select Done, and then add the index. Press the left key to finish. Select Option to Edit, Add, Activate, Deactivate or Delete the existent group.

Note: This service needs the network support

2. Browse Style: Select a browse style.
3. Use as: Send to Wallpaper, Screen Saver, power on display, power off display, Caller picture.
4. Send: send the phone as multimedia msg.
5. Rename: Rename the specified picture files.
6. Delete: Delete the specified picture files.
7. Delete All Files: Delete all picture files.
8. Sort by: Sort all picture files by name, type, time, size and none.
9. Storage: You can store the picture files in phone or T-Flash card.

Camera Settings:

1. EV: You can adjust exposure value to improve the image quality according to the actual conditions.
2. Banding: 50Hz, 60Hz.
3. Delay Timer: Off, 5 seconds, 10 seconds, and 15 seconds.

Tip: You can use the selection key repeatedly to select the desired option.

4. Cint. Shot: Off, 1 shot.

Image Settings:

1. Image Size: You can take and store pictures in various sizes. The larger the image size is the more memory space will occupy on your phone's memory.
2. Image Quality: Normal, High, and Low. Higher quality images will take up more space.

Tip: You can use the selection key repeatedly to select the desired option.

3. White Balance: Adjust the color balance of the image. You can make your photo appear warmer or cooler.

4. Scene Mode: You can set Auto or Night.
5. Effect Settings: You can add a distinct appeal to your pictures with the following effects Normal, Grayscale, Sepia, Sepia Green, Sepia Blue, Color Invert.
6. Storage: You can store the picture files in phone or T-Flash card.
7. Restore Default: Camera Parameters will be restored to factory parameters with this function.

Image Viewer

The Image viewer provides you with a quick view of the picture functions. Please refer to the Photos operations of the Camera for more details.

Video Player

You can perform the following operations:

Play: You can play the specified video.

Use as: You can forward the video to Caller video.

Rename: You can rename the specified video.

Delete: You can delete the specified video.

Delete All Files: You can delete all videos.

Sort by: You can sort all video files and display them in a new order; you can choose to Sort By Name, By Type, By Time, By Size and None.

Storage: You can store the Video in phone or T-Flash card.

Audio Player

The Play, Stop, Back, Forward functions correspond to the Up, Down, Left and Right Key respectively. The available music formats. Select **List** to access the **Play List**, and then select **Options** to perform the following functions: play, details, add to rings, refresh list, settings.

Note: The Audio Player of the phone will automatically play music files from the **Music** folder. You may need to refresh it manually from the settings in case you have earlier opted for manual refresh settings.

Warning: Make sure that the volume is appropriate for your hearing while using the audio player.

Sound Recorder

The mobile phone supports two recording formats: WAV and AMR. You can record conversations. If there is a record, press the left soft key you

can do: Record, Play, Append (only for AMR), Rename, Delete, Delete All, Settings and Forward.

Note: If a call is incoming while recording, the record will abort and the data will be saved into the record folder automatically. AMR adopts dynamic compression and provides a longer recording time than WAV's while utilizing the same storage space.

FM Radio

You can use your phone to listen to FM radio stations once the original Headset is plugged into the accessories connector. Select **FM Radio** in the **Menu** to access the radio controls.

Press the Down key to Power on/ off the FM radio.

Press the Left/ Right key to step down/ up to the next frequency.

Press the / # keys to adjust radio volume.

Press Options to access the following options: channel list, manual input and so on.

Schedule FM Record

With this function, your phone can record the FM program as the schedules once the original Headset is plugged into the accessories connector. You can set On/Off, the date and time, repeat style, channel settings and record settings.

Melody Compose

The mobile phone enables you to compose your favorite music as the tune of the incoming call, alarm or memo.

Note: The phone can save multiple tones edited according to the volume of tones.

When the Tune Editing List is blank, you can edit your favorite tunes by pressing "Add". After you have finished editing, press **Options** to select a music instrument or playing speed to play the editing tunes. You also can save the editing tunes.

Select the edited music, and press **Options** to perform the following operations: Play, edit, add rename and so on.

Note: A maximum of 150 notes can be edited with a piece of self-edit tune.

In the window of Tone Editing, press **Options** to perform the following operations: Play, adjust play speed and so on.

The rules by which the tone is composed as follows:

0: Insert one pause;

1: Insert Do;

2: Insert Re;

3: Insert Mi;

4: Insert Fa;

5: Insert So;

6: Insert La;

7: Insert Si;

8: Insert a vibration note;

9: Insert a backlight;

*: Modify the playing rhythm of the current tone;

#: Modify the current note with halftone;

↑: Modify the tone of current note (high, middle, low);

↓: Modify the tone of current note (high, middle, low)

File Manager

You can use the function to manage all types of files saved in the phone or memory card.

Games

There are several interesting games in the phone. Please refer to instructions from the game menu for more details.

Tip: The game menu includes Start Game, Best Grades and Game Help.

Organizer

Calendar

You can Jump to a specific date.

To Do List

You can View, Add, Edit Task, Delete, Delete All and Send vCalendar as desired. Start up the **Memo** and press OK. Press **Option> Add** or **Add** to access to add a new memo.

Alarm

The mobile phone provides several alarms and you can set them at your preference. If you have set an alarm, an icon indicated that you have configured the alarm will appear. No icon will show if you don't set an alarm. Select "Edit" to set the alarm.

Tip: You can set FM Radio as your alarm Audio options.

Calculator

The calculator can add, subtract, multiply and divide. To use the calculator:

Press the # key to enter the decimal point

Press the up, down, left and right key and OK key to select +, -, *, /, = respectively.

Press **Clear** to delete the figure.

Units Converter

You can make the units conversion for weight and length. Enter the number into the column, and then press "OK" to get the result.

Currency Converter

You can make currency conversions. Press **OK** after enter the exchange rate, and then enter the number of the currency, and press **OK** to get the result.

Stopwatch

The stopwatch has two modes - Split Timing and Lap Timing, and you can view the records of both the modes.

World Clock

Scroll to browse every city's time zones in the world map. The related date and time will display at the bottom of the screen.

Health

Provides the reference of body mass index (height, weight and sex).

Bluetooth

You can establish a wireless connection with other compatible devices using Bluetooth technology. Such compatible devices include cell phone, computer, earphone and vehicle parts. For the compatibility of other devices please consult the manufacturer. You can use Bluetooth to send pictures, videos, music, notes and voice segments; or establish a wireless

connection with compatible PC (to send files for example). As the communication between two Bluetooth devices is just wireless, so it's not necessary to keep the mobile phone dead against the other device. You shall ensure that the distance between two Bluetooth devices is no more than 10 meters (about 32 feet). But however, the Bluetooth connection may be interfered by obstacles like wall or other electronic devices.

In some circumstance, the application of Bluetooth may be restricted. Please consult your local authorities or service providers.

Application of Bluetooth technology in your cell phone will accelerate the consumption of electricity power and thus shorten the service life of your battery.

Power: select to switch on or off Bluetooth.

Inquiry Audio Device: Searching for hand-free devices: after confirmation, your phone will search for Bluetooth devices and a list of available devices will be displayed in the screen. Select a Bluetooth device and input a correct password to establish a security connection.

Note: the initial password of Bluetooth earphone is 0000 or 1122. For details please contact your device provider.

Remote Control: Control other Bluetooth appliances through cell-phone far away, based on Bluetooth Technology.

My Device: search for new devices and show the list all Bluetooth devices within the scope of your phone. Select an available device, press OK and then you have the following options:

1. Connect: Enter into service record option after confirmation.
2. Rename: Rename a device.
3. Delete: Delete a device.
4. Delete All: Delete all the devices.
5. Service List: Press left soft key to Refresh OPP profile, DUN profile, SPP profile function.

Active Devices: show all devices already connected.

Settings: After selecting, you have the following options:

After select, you have the following options: Visibility, Change Device name, Authentication, Audio path, Block list, Storage location, FTP settings, Bip settings.

About: show detail the Bluetooth serviced provided by this phone.

Browser

STK Service

In addition to the functions available in the phone, your SIM card may provide additional services, which is supported by your SIM card. Please consult your network operator for more information.

WAP

WAP enable you tour around the Internet world easily and pleasantly.

Please follow the steps described as below:

HomePage: The default Internet Web Address.

BookMarks: Save the Web address you often use.

Recent Pages: Records after you browse the Website.

Offline Pages: to view the offline pages.

Input address: Press the left soft key to access Enter Address, and then input the web address to go to the Internet.

Service inbox: to view your push message.

Settings: You can configure: Profile, Browser Options, Service Message Settings, Clear Cache, Clear Cookies and Trusted certificates.

Data Account

Press the left soft key to perform following steps:

GSM Data: Edit the GSM account.

GPRS: Edit the GPRS account.

User Profiles

Normal/ Silent/ Outdoor/ Indoor/ Headset/ Bluetooth

Activate

Customize

1. Tone Setup: Includes Incoming Call, Power on, Power off, Cover Open, Cover Close, Message Tone, and Keypad Tone.

2. Volume: Includes the volume setting of Ring Tone and Key Tone. The volume degree is from 1 to 7.

3. Alert Type:

Ring: Just ringing, no vibration.

Vib. Only: Just Vibrating, no ringing.

Vib. and Ring: Vibrating and ringing.

Vib. then Ring: Ringing after vibration.
Silent: no ringing, no vibration.

4. Ring Type:
Single: Rings once when a call is coming.
Repeat: Rings continuously when a call is coming.
Ascending: Rings continuously and the volume increases gradually.
Tip: Human singing tone cannot be played in Ascending Ring.

5. Extra Tone:
Warning: If necessary, you will be warned by the prompt tone.
Error: You will be warned by a tone if you make a mistake.
Camp On: A prompt tone will be heard after searching the network successfully.
Connect: A prompt tone will be heard after getting through to the dialed number.

6. Answer Mode: You can select Cover Answer or Any Key.

Tips:
Insert the earphone and the phone will access the Headset mode automatically. This mode has no Activate option.
Press and hold the # key to enable or cancel the silent mode.

Trouble Shooting

This section lists some problems that you might meet while using your phone. If you feel that your phone do not operate normally, please reset settings first, and then follow Troubleshooting Guide. If you are still unable to solve problems, please contact the authorized service center or the store from where you purchased the phone.

Problems	Solutions
Can not answer or make a call	Make sure that the phone has been switched on. Make sure that the battery is charged. Make sure that the signal intensity is high enough. Make sure the own number function in the call setting is system preset or number sending. Make sure the line switch in call setting is the system preset line. Check whether you have set up call barring or fixed dialing or any other safety function. Check whether you have set up call diverts. Check whether you have inserted the proper SIM card correctly.
Low voice	Check if the volume has been set too low.
No ring	Check whether you have set up the "Silent" option. Check whether the ring volume is not too low Move away from a noisy place to check if you can hear the phone ringing. Check whether you have set up call diverts.
T-Flash card detect slowly	Format your T-Flash card with your phone. Note: To protect your files from getting lost, please backup the important information into the safe place before you formatting card.

Security Setup

Use of Passwords

Your mobile phone and SIM card have various passwords. Those passwords avoid unauthorized use of your phone and SIM card.

Phone Code

The Phone code can be used to avoid unauthorized use of your phone. The factory setting for the phone code is 0000. If phone lock is enabled, you will be asked to input the phone password when you switch on your phone.

PIN (4 to 8 digits)

The PIN (Personal Identification Number) code protects your SIM card from unauthorized use. The PIN code is usually supplied with the SIM card. When the PIN code request is enabled, the password is asked every time the phone is turned on.

Three times wrong PIN input, the SIM card will be locked and you will need to use the PUK to unlock it. PUK is usually set by the network operator.

Enter the correct PUK to unlock the SIM card, and then enter the new PIN and press **OK**.

If you are prompted to enter the new PIN again, enter it and press **OK**.

If the PUK is correct, the SIM card will be unlocked and the PIN will be reset.

PUK (8 digits)

The PUK (Personal Unblocking Key) code is required to change a blocked PIN code. Please contact your network operator for the code.

Note: Ten times wrong input in succession, the SIM card will be invalid and you need to consult with your network operator for a new SIM card.

PIN2 (4 to 8 digits)

The PIN2 code, supplied with some SIM card, is used for some functions, such as Call Cost, Fixed Dial and so on. Please consult your network operator to confirm whether your SIM card supports those services or not.

Three times wrong PIN2 code input, the SIM card will be locked and you will need to use the PUK2 to unlock it.

Enter the correct PUK2 to unlock PIN2, and then enter the new PIN2 and press **OK**.

If you are prompted to enter the new PIN2 again, enter it and press **OK**.

PUK2 (8 digits)

The PUK2 code, supplied with some SIM card, is required to change a blocked PIN2 code. It may be supplied with the SIM card. If not, contact your network operator.

Note: Ten times wrong input in succession, the SIM card will be invalid and you need to consult with your network operator for a new SIM card.

Barring Code

To activate call barring, you need a Barring Code. You obtain the password from your service provider.

Health and safety information

Charing and Discharging

The charger is designed to be used in temperatures between 0°C to 40°C.

Do not charge the phone in wet and damp conditions.

Use only batteries approved by the phone manufacturer and recharge your battery only with the charges approved by the manufacturer.

We strive to produce products in compliance with global environmental standards

The charger meets the standard for safety of information technology equipment and office equipment use. It must be used for this purpose only.

Your phone is powered by a rechargeable battery. Full performance of the battery is achieved only after two or three complete charge and discharge cycles.

When the battery level is low, "Low Battery" will be displayed on the LCD screen. If you have selected Alert Tone (Warning Tone of any profile in Profiles), the phone will sound the alert tone.

When a charger is not in use, disconnect it from the power source. Do not leave the battery connected to a charger for longer than 12 hours, since overcharging may shorten its life.

Temperature extremes will affect the ability of your battery to charge.

Tips for Battery

Placing the battery in hot or cold places, such as in a closed car in summer or winter, will reduce the capacity and lifetime of the battery.

Do not let metal contacts on the battery touch other metal contacts. It could short-circuit and damage the battery. Use the battery only for its intended purpose.

Do not disassemble or modify the battery by yourself.

Do not clean the battery with water or any organic solvent.

Always keep the battery dry.

The battery can be charged and discharged many times but it will wear out as last. When the talk and standby time is obviously shorter than normal, please change the original battery approved by manufacturer.

Do not short-circuit the battery.

Turn off mobile phone before removing the battery.

Do not dispose of batteries in fire.

If you smell anything strange from the battery or find that the battery is overheated, you should stop using it immediately and contact the authorized After Service Center in your region.

If you don't use the battery for a long time, please fully charge the battery before you store it.

Batteries should never be placed in municipal waste. Batteries must be recycled or disposed of properly. Please follow local regulations for disposal of batteries.

Vehicle Use

Please check if local laws and regulations restrict the use of mobile phones while driving or require drivers to use handsfree solutions. We recommend that you use handsfree solutions intended for use with your phone.

Please note that because of possible interference to electronic equipment, some vehicle manufacturers forbid the use of mobile phones in their vehicles unless a handsfree kit with an external antenna supports the installation.

Always give full attention to driving and pull off the road and park before making or answering a call if driving conditions so require.

Note: Use of cellular phones on board an aircraft may cause interference to the aircraft's navigational system. FCC regulations prohibit using your phone while in the air. Switch off your phone before boarding an aircraft.

Usage & Maintenance

To maintain your product at an optimal functioning level, take a moment to review the following usage & maintenance tips, which will help you to fulfill any warranty obligations and to enjoy this product for many years.

Keep your phone and all its parts and accessories out of children's reach.

Your products are not water-resistant. Keep it dry. Precipitation, humidity and liquids contain minerals that will corrode the connectors.

Always treat your products with care and keep it in a clean and dust-free place.

Do not expose your product to extreme high or low temperatures. Your phone operates best in temperature between 15 °C and 25°C. Minimum and maximum temperatures recommended by the manufacturer are -10°C and 55°C.

Do not expose your product to open flames or lit tobacco products.

Do not attempt to disassemble or modify your product. Only authorized personnel should perform service.

Do not drop, throw or try to bend your product.

Do not paint your product.

Do not use harsh chemicals, cleaning solvents, or strong detergents to clean it.

Keep anything magnetic, such as credit cards, far away from your product.

If you find that the battery has any crack, deformation or anything else, you should stop using the battery immediately.

If the electrolyte leak out and contact your skin or clothes, you should immediately use soap and clean water to clean it. In case the electrolyte spatters into your eyes, you must use the clean water to wash your eyes thoroughly and go to the hospital immediately.

If your phone or any accessory doesn't function normally, please send them to the nearest authorized service facility. The qualified personnel there will assist you, and if necessary, arrange for service.

Radio Frequency (RF) Exposure and SAR

This phone is designed and manufactured not to exceed limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission (FCC) of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age or health.

The exposure standard for this phone employs a unit of measurement known as the Specific absorption Rate, or SAR. The SAR limits set by the FCC are 1.6W/kg. Tests for SAR are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value.

This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station, the lower the output power. Before a phone model is available for sale to the public in the U.S. and Canada, it must be tested and certified by the FCC that it does not exceed the limits established by each government for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) that conform to a uniform testing methodology determined by an expert standards body and then reported to the FCC. The highest SAR values for this model phone when tested for use on the body were 1.542 W/kg (GSM band 850 MHz), and 0.485 W/kg (PCS band 1900 MHz).

While there may be differences between the SAR levels of various phones and at various positions, they all met the governmental requirements for safe exposure. Please note that improvements to this

product model could generate differences in the SAR value for later products; in all cases, products are designed to be within the guidelines.

Emergency Calls

This phone, like any wireless phones, operates using radio signals, wireless and landline networks which cannot guarantee connection in all conditions. Therefore, you should never rely solely upon any wireless phone for essential communications (e.g. medical emergencies)

To make an emergency call:

Switch your phone on.

Some networks may require that a valid SIM card is properly inserted in the phone

Dial the official emergency number. Emergency numbers vary by location.

While making an emergency call, please remember to give all information as particularly as possible. Never hand off the call please until you are given permission to do so.

Term definition

To help you understand the terms used in this manual we provide the definition of the terms below.

ALS (change lines service)

ALS provides the function to connect with two lines in the same SIM Card. Dial and receive call in one of the lines as required when using this service.

Call Limitation

Limit the outgoing and incoming calls.

Call forwarding

Forward an incoming call to another mobile phone or telephone.

Call Keeping

Keep another call when receiving and making a Call; switch them if necessary.

Call Waiting

Notify user another call is coming while another call is in progress.

Line identification service (show incoming call)

The user can view the phone number of incoming call and hide or display user's phone number on other party's phone. GSM (Global System

for Mobile Communication) International Standard of Cellular mobile communication can ensure compatibility between different network providers.

Multi-parties calls

Establish conference calls that allow up to 5-party- participants simultaneously.

Roaming

Use mobile phone outside of local service area.

SIM Card (Subscriber Identity Module Card)

SIM Card contains CMOS chip, which contains information of (network or memorizer information, and users' individual data). SIM Card can be inserted into small slot back of mobile phone after removing the battery.

SMS (Short Message Service)

Network service function that enables sending messages to other mobile phones or receive messages without making a phone call with the other party.

Soft key

Functions of Left Soft Key (LSK) and Right Soft Key (RSK) in mobile phone:

To change the current menu.

To select/confirm the menu

Voice Mail Server

Computer response service: it will automatically give response (your own voice can be used), send greetings and record information when you cannot answer a call.

Other

GPRS: General packet radio service

SMS-CB: Short message service- Cell Broadcast

WAP: Wireless application protocol

FDN: Fixed dialing number International Mobile Equipment

IMEI: Identification code, which consists of 15 digits, one mobile phone has only one corresponding IMEI number.

FCC RF Exposure Information and Statement

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types i705 (FCC ID: WA6I705) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the ear is 0.816W/kg and when properly worn on the body is 0.455W/kg. This device was tested for typical body-worn operations with the back of the handset kept 1.5cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.5cm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
