Important information: This product is not intended for use in areas where the use of radio frequency devices is prohibited. Please refer to the local regulations for more information.

Warranty: The manufacturer warrants that the product is free from defects in materials and workmanship under normal use for a period of 12 months from the date of purchase. This warranty does not cover damage caused by misuse, accident, or unauthorized repair.

Customer support: For more information, please contact our customer support team at 1-800-123-4567 or visit our website at www.hellobaby.com.

2. Safety Precautions

Read the manual: Please read the manual carefully before using the product. The manual contains important information about the product's features, safety, and maintenance.

Use the product correctly: Do not use the product in areas where it is not intended to be used. Do not use the product near water or other hazardous environments.

Electromagnetic Interference (EMI): This product may cause EMI or be affected by EMI. Please use the product in areas where EMI is not a concern. Do not use the product near power lines, electrical equipment, or other sources of EMI.

Fire safety: Do not use the product near fire, heat, or other sources of fire. Do not use the product in areas where fire is a concern.

Child safety: This product is not intended for use by children. Please keep the product out of the reach of children. Do not use the product in areas where children are present.

Privacy: This product may capture video and audio of the area around it. Please use the product in areas where privacy is not a concern. Do not use the product in areas where privacy is a concern.

Power: Do not use the product in areas where power is not available. Do not use the product in areas where power is a concern. Do not use the product in areas where power is a concern.

Temperature: Do not use the product in areas where the temperature is too high or too low. Do not use the product in areas where the temperature is a concern.

3. Installation

Camera Unit: The camera unit should be placed in a location where it can see the area you want to monitor. Please avoid placing the camera unit in areas where it may be obstructed or where it may be damaged.

Parent Unit: The parent unit should be placed in a location where you can see the screen and hear the audio. Please avoid placing the parent unit in areas where it may be obstructed or where it may be damaged.

4. Operation

Power On: Press the power button on the parent unit to turn the system on. The camera unit will start recording and the parent unit will display the video feed.

Power Off: Press the power button on the parent unit to turn the system off. The camera unit will stop recording and the parent unit will stop displaying the video feed.

Volume: Press the volume buttons on the parent unit to adjust the audio volume. The volume can be adjusted from mute to maximum.

Camera Settings: Press the camera button on the parent unit to access the camera settings menu. You can adjust the camera's resolution, frame rate, and other settings.

Audio Settings: Press the audio button on the parent unit to access the audio settings menu. You can adjust the audio's volume, tone, and other settings.

Video Settings: Press the video button on the parent unit to access the video settings menu. You can adjust the video's brightness, contrast, and other settings.

Night Vision: Press the night vision button on the parent unit to turn the night vision on or off. Night vision allows you to see the camera's field of view in low light conditions.

Two-Way Audio: Press the two-way audio button on the parent unit to turn the two-way audio on or off. Two-way audio allows you to talk to the baby through the camera.

Temperature: Press the temperature button on the parent unit to turn the temperature monitoring on or off. Temperature monitoring allows you to see the current temperature of the camera's field of view.

Recharge: The camera unit and parent unit have rechargeable batteries. Please recharge the batteries when they are low. The camera unit's battery life is approximately 10 hours, and the parent unit's battery life is approximately 12 hours.

Update: Please check for updates to the product's firmware. Updates may be available to improve the product's performance and add new features.
