## QUICK TIPS QUICK TIPS

away from these!

3. If your vehicle gets too far away, it won't work properly, Your maximum range should be about 65',

4. Don't drive your vehicle in sand or through water or snow. If your vehicle does get wet, wipe with a towel and allow to dry completely overnight.

5. Don't store your vehicle near heat or in direct sunlight. Always turn switch OFF and remove all batteries for storage.

1.When your vehicle starts to lose power, it may lose functions or performance. It's time for fresh batteries, Your vehicle's running time may change depending on your driving style.

2. Radio interference can make your vehicle run badly. Interference can be caused by other R/C vehicles running on the same frequency; electrical wires; large buildings; or C8 radios. Try to stay away from these!

## **DRIVING TIPS**

1. You can also start with your vehicle resting on its side skid plate: push the left stick forward and steer with the right stick (into and then out of the turn). Your vehicle will get up and go! But remember: if you start this way, it'll take the stabilizer a little while to come up to full speed. And you'll get different results on different driving surfaces.

2. Your vehicle will run really well on hard packed dirt, asphalt and other similar surfaces,

3. When you want to stop, it's best to turn into a skid while braking, instead of hitting the brakes suddenty while going straight.

### >>> STOP & START! STOP & START!

Push the left stick all the way forward to accelerate, Now use the right stick to steer into a skid (either right for left), while reducing speed. When your vehicle's die skid just touches the pavenent, quickly jam the left stick forward again and steer out of the turn. Your vehicle will right itself and keep driving to the next exciting stunt! Push the jeft stick all the way forward to accelerate, Now use the right stick to steer into a skid (either right or left), while reducing speed, When your vehicle's die skid just touches the pavenent, quickly jam the left stick forward again and steer out of the turn, Your vehicle will right itself and keep driving to the next exciting stunt!

### **FCC Warning**

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the

receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.
