- Device has soap water, shower gel,detergent,perfume,lotion,oil etc.

08

- Taking hot shower, spa, this kind of high temperature/moisture occasion.

3.4 It is beyond warranty scope if damage causes by liquid inside.

4 Cautions

4.1 For android 6.0.1 or above, need turning on GPS location permission, then could show the bluetooth device name on bluetooth list. Do setting by accessing phone' s setting> location (Different phones possibly is with different path to find)

4.2 For iOS13 or above, if you have turned on notification reminder but still could not receive notification, it' s suggested to do setting via iphone settings>bluetooth>device name, click the **!** icon, to turn on "share system notifications".

4.3 When monitoring heart rate, you need to attach the photoelectric sensor on the back of the device to your wrist to keep it comfortable and fit. If you wear too loose or too tight, it will affect the test data.

4.4 It shows the skin temperature on the wearing position, the showed skin temperature data is related to the environment and clothing, could not indicate deep skin temperature, the data is

09

not used for diagnosis or medical use. Valid detecting temperature scope: 0°C~50°C, that is, 32°F-122°F.

- 4.5 The device is not medical device, the data is just for reference.
- 4.6 On the device screen, you could find the basic data on different function pages, sync to APP for showing more details.(Device keeps the data of 7 days for limited memory, to avoid losing data, it's suggested to connect to APP every day.)

FCC Warning Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
