TOOLS NEEDED:

FLAT HEAD SCREWDRIVER ADJUSTABLE WRENCH PLIERS HAMMFR

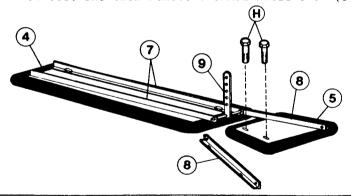

STEP 2 MAIN FRAME ASSEMBLY

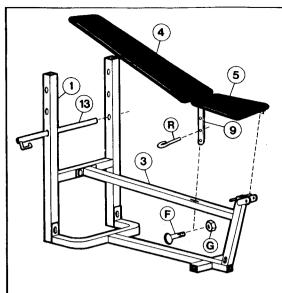

Place MAIN FRAME (3) into position as shown. Align bolt holes and attach to UPRIGHT (1) with 2 HEX HEAD BOLTS (C) and 2 LOCK NUTS (B). Finger tighten. Secure front of MAIN FRAME (3) with HEX HEAD BOLT (C) and LOCK NUT (B). At this time make sure to tighten all bolts of frame assembly. Place 3 SQUARE PLASTIC CAPS (K) into BASE (2).

STEP 3 BACKREST AND SEAT PREPARATION

The BACKREST (4) and SEAT (5) are shipped assembled. Turn this assembly over to expose the work area. Remove 2 HEX HEAD BOLTS (H) from seat and then remove 1 SMALL ANGLE IRON (8).

STEP 4 BACKREST AND SEAT

To aid in this assembly, slide BACKREST ADJ. BAR (13) into any of the hole patterns on the UPRIGHT (1). Lower BACKREST (4) and SEAT (5) assembly to MAIN FRAME (3). Slide SHORT ANGLE IRON (8) over pivot rod on MAIN FRAME (3) and place SEAT ADJ. T (9) through slot on MAIN FRAME (3). MACHINE SCREW (F) and LOCK NUT (G) are placed in the last hole of SEAT ADJ. T (9) to prevent the SEAT ADJ. T from leaving the slot in the MAIN FRAME (3). EYELET PIN (R) is used to adjust the height of the BACKREST and SEAT ASSEMBLY.

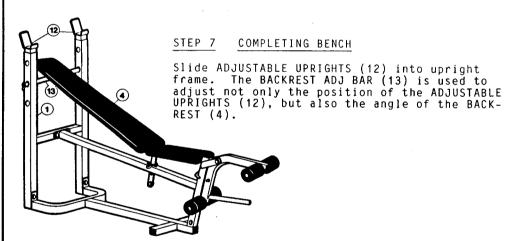

STEP 5 REPLACEMENT OF SHORT ANGLE IRON

To aid in this assembly EYELET PIN (R) should be placed so that the highest possible position of the seat is achieved. Slide SHORT ANGLE IRON (8) over pivot rod on MAIN FRAME (3) and pivot rod on SEAT ADJ T (9). Replace 2 HEX HEAD BOLTS (H) that were removed in STEP 3.

STEP 6 LEG CURL ASSEMBLY

Position LEG CURL (6) between leg curl brackets on MAIN FRAME (3). Secure with HEX HEAD BOLT (D) and LOCK NUT (E). Do not over tighten! Repeat the following instructions until all leg curl parts are in place. First slide PAD BAR (10) through proper hole in LEG CURL (6) until equal amounts of bar are on both sides of LEG CURL (6). To help with the following step, a small amount of liquid dish detergent should be applied to both ends of PAD BAR (10). This acts as a lubricant in assembling FOAM PADS (11) and also acts as an adhesive after it has dried. Slide FOAM PAD (11) onto each end of PAD BAR (10). Insert PLASTIC CAP (K) into end of LEG CURL (6). Insert PLASTIC CAP (P) into weight pin on LEG CURL (6). Place COVER CAP (Q) over rear extended piece of weight pin. LOCKING PIN (J) is used to lock LEG CURL (6) to Main Frame for doing specified exercises.
