### 1. Safety information

Note: Please read this information before you use the headset

### Electronics Devices

GoerTel< 歌尔

To avoid electromagnetic interference, please turn off the headset in any place where posted notices instruct you to do so.

Note: Most modern electronic devices are susceptible to electromagnetic interference (EMI) if inadequately shielded, designed, or otherwise configured for electromagnetic compatibility.

Turn off the headset when on board an aircraft. The use of this headset might interfere with the electrical system of an aircraft.

If you use a medical device, such as a pacemaker, consult the manufacturer of your medical device to determine if it is adequately shielded from electromagnetic interference. Your physician can assist you in obtaining this information.

Only use the supplied power adapter with the headset.

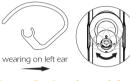

You are advised to put the headset in a safe place where it will not be bent or crushed when not in use otherwise it may bring harm to human body.

Keep the headset away from children. Some small or detachable parts might be swallowed and result in harm.

Any attempt to modify or remove of any part of the headset will void the warranty.

# 4. The function at a glance

In this guide, "Short press" refers to a time period of less than 1 second during which a functional button is being pressed. "Long press" refers to a time period of more than 3 second during which a functional button is being pressed. "Press and hold" refers to a time period of more than 5 second during which a functional button is being pressed. "WHEB" button is the Multi-function button, "Vol+" button is the Volume up button and "Vol-" button is the Volume down button.

## 4.1 Phone operation Pairing the headset with a phone

Before you can use the headset to make calls, you must pair the headset with your phone. Pairing creates a secure link between your phone and the unique ID of the headset. You only have to pair devices once.

(1) To put the headset in pairing mode, press and hold (over 5 seconds) the Multi-function button until the LED flash red/blue.

(2) Scroll to the Bluetooth menu in you phone and search for active devices. (Refer to you phone's user manual for details) (3) When the search completes, a list of devices found is displayed. (The screen examples here are from a Nokia 6230)

(4) Select "GBH861" and when prompted input the default passkey (0000). When successfully paired, the red/blue LED on the headset changes to flashing blue.

Note: You can pair the headset with up to eight Bluetooth devices. When you pair the device with a ninth device, the oldest-paired device is deleted
