## Welcome to your SmartThings Vision

## Installation Guide

- Indoor installation is recommended. Avoid installing in wet or humid place, otherwise it
  may cause malfunctions.
- 2. Avoid installing in high temperature environment or near a radiator, heating device, stove, and other heat sources (including an amplifier).
- This product must be attached to flat and clean wall surface. Remove the film on the tape before use. In addition, holder can be attached to iron surface or furniture by utilizing magnet on the holder.
- Avoid installing on the appliances that generate vibration, such as refrigerator or air conditioner. Otherwise it may cause malfunctions.
- Since this product connects to WI-FI, please avoid installing it near devices that emit strong EM waves.

## Trouble Shooting

- In the event of Internet is disconnected:
   The indicator light shows red. Please check your internet connection.
- In the event of device fails to operate:
   Please unplug the power cable and plug again after 1 minute. If this status persists,
   press and hold the function button for more than 7 seconds to reset the device.
- \* Reset takes several minutes. Please do not unplug the power cable before indicator LED status alternately flashes green and red light.
- In the event of app fails to operate:
   Please re-start the app. If this status persists, please visit www.SmartThings.com.

| Status                 |                | LED Status Indicator |  |
|------------------------|----------------|----------------------|--|
| Power off              |                | 0                    | No light                                   |
| Power on               |                | •                    | Green On                                   |
