## **WD Service and Support**

Should you encounter any problem, please give us an opportunity to address it before returning this product. Most technical support questions can be answered through our knowledge base or email support service at *http://support.wd.com*. If the answer is not available or if you prefer, please contact WD at the best telephone number shown below.

Your product includes 30 days of free telephone support during the warranty period. This 30-day period starts on the date of your first telephone contact with WD Technical Support. Email support is free for the entire warranty period and our extensive knowledge base is available 24/7. To help us keep you informed of new features and services, remember to register your product online at *http://register.wd.com*.

#### Accessing Online Support

Visit our product support website at *http://support.wd.com* and choose from these topics:

- Downloads Download drivers, software, and updates for your WD product.
- **Registration**—Register your WD product to get the latest updates and special offers.
- Warranty & RMA Services Get warranty, product replacement (RMA), RMA status, and data recovery information.
- Knowledge Base—Search by keyword, phrase, or answer ID.
- **Installation**—Get online installation help for your WD product or software.
- WD Community—Share your thoughts and connect with other WD users.
- Online Learning Center Start here to get the most out of your personal cloud storage device (http://www.wd.com/setup).

### Contacting WD Technical Support

When contacting WD for support have your WD product serial number, system hardware, and system software versions available.

## Important User Information

Important Safety Instructions Recording Your WD Product Information

## **Important Safety Instructions**

This device is designed and manufactured to assure personal safety. Improper use can result in electric shock or fire hazard. The safeguards incorporated into this unit will protect you if you observe the following procedures for installation, use, and servicing.

- Follow all warnings and instructions marked on the product.
- Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.
- Do not use this product near any liquids.
- Do not place this product on an unstable surface. The product may fall, causing serious damage to the product.
- Do not drop the product.
- Do not block the slots and openings on the top and bottom of the chassis; to ensure proper ventilation and reliable operation of the product and to protect it from overheating, these openings must not be blocked or covered. Making sure the drive is standing upright also helps prevent overheating.
- Operate this product only from the type of power indicated on the marking label. If you are not sure of the type of power available, consult your dealer or local power company.
- Do not allow anything to rest on the power cord. Do not locate this product where persons will walk on the cord.
- If an extension cord is used with this product, make sure that the total ampere rating of the equipment plugged into the extension cord does not exceed the extension cord ampere rating. Also, make sure that the total rating of all products plugged into the wall outlet does not exceed the fuse rating.
- Never push objects of any kind into this product through the chassis slots as they
  may touch dangerous voltage points or short out parts that could result in a fire or
  electric shock.
- Unplug this product from the wall outlet and refer servicing to qualified service personnel under the following conditions:
  - When the power cord or plug is damaged or frayed.
  - If liquid has been spilled on the product.
  - If the product has been exposed to rain or water.
  - If the product does not operate normally when the operating instructions are followed. Adjust only those controls that are covered by the operating instructions since improper adjustment may result in damage and require extensive work by a qualified technician to the product to normal condition.
  - If the product has been dropped or the chassis has been damaged.
  - If the product exhibits a distinct change in performance, contact WD Customer Support at *http://support.wd.com*.

## **Recording Your WD Product Information**

Remember to write down the following WD product information, which is used for setup and technical support. Your WD product information is found on the label on the back of the device.

- Serial Number
- Model Number
- Purchase Date
- System and Software Notes

## Product Overview

About the System Features About the Online Learning Center Package Contents Product Components Requirements Product Components Handling Precautions

## About the System

Finally, a cloud of your own. Save everything in one place with twice the data protection and access it anywhere from computers, tablets and smartphones. My Cloud™ Mirror™ personal cloud storage works concurrently with multiple operating systems such as Mac OS, Win 8, iOS and Android with mobile apps.

## Features

**Your media and files on your own personal cloud** – Unlike a public cloud, My Cloud Mirror allows you to keep all your content in one safe place on your home network instead of a remote server. No mysterious location of your data. No monthly fees. No limits. Just blazing-fast, dual-drive performance for your high-speed digital life.

**Centralized, dual-drive storage of your family's media collection** – Store and organize all your family's photos, videos, music, and important documents in one secure place on your home network.

**Access from anywhere** – Enjoy your photos, videos, music, and more from anywhere on your PC, Mac<sup>®</sup>, tablet, or smartphone. With WD's free apps, your personal cloud is always with you.

**Mirrored data protection** - With Mirror Mode (RAID 1) as the default setting, one drive is used to store your data and the other is used for a duplicate copy. Your data is twice as safe, giving you twice the peace of mind.

Automatic file backup for all your computers – Easily back up the files from all the PC and Mac computers in your home. PC users, WD SmartWare<sup>™</sup> Pro offers options for how, when, and where you back up your files. Mac users, utilize all the features of Apple<sup>®</sup> Time Machine<sup>®</sup> backup software to protect your data.

**Remote backup** – Protect your data with remote backup to another My Cloud Mirror, integrated cloud backup or local LAN/WAN backup.

**Expand your tablet and phone storage** – Upload photos and videos directly to your personal cloud from anywhere.

**Connect to Dropbox™ and more** – Easily transfer files between your personal cloud, Dropbox, and other public cloud accounts using WD's free My Cloud apps.

**Increase your personal cloud capacity** -- Simply attach a compatible USB 3.0 hard drive directly to one of the two USB expansion ports on the My Cloud Mirror drive and instantly expand your storage capacity.

**Transfer and stream faster** – Gigabit Ethernet and 1.2 GHz processor deliver faster file transfers and high-speed streaming.

**Unleash your media** – Seamlessly stream your videos, photos, and music to your connected TVs, media players, gaming consoles, and other DLNA<sup>®</sup> – certified devices. With My Cloud Mirror's iTunes<sup>®</sup> server, you can easily stream your music collection to any PC or Mac computer with iTunes.

**Password protection for privacy** – Your data is always safe and completely under your control. Protect your personal cloud from unauthorized access with password protection available for every user.

**Set up in minutes** – Get up and running in minutes with WD's rich web-based user interface for seamless web-guided setup. WD's software will auto-detect your drive to make it easy. Need extra help? Visit wd.com/setup/wdmycloudmirror for help with the installation of My Cloud Mirror and WD's free apps for your computers and mobile devices.

## About the Online Learning Center

WD's online Learning Center provides the latest information, instructions, and software to help users get the most out of their personal cloud storage. This web-based guide offers step-by-step help with setting up remote access, backing up data, monitoring device status and more. It's an interactive resource to walk users through installing and using their WD My Cloud Mirror device. The online Learning Center allows you to:

- Learn about your new personal cloud storage product.
- Download the latest software for your product.
- Find in-depth, interactive information on how to explore each of your product's features.
- Update your product whenever new features become available.
- Access an always-available resource online, without a manual or CD.

## Requirements

### **Operating System**

#### Windows®

- Windows 8.1 or earlier
- Windows 7
- Windows Vista<sup>®</sup>
- Windows XP (32 bit) SP3 or later

#### Mac OS X®

- Mavericks (Mac OS 10.9)
- Mountain Lion (Mac OS 10.8)
- Lion (Mac OS 10.7)
- Snow Leopard (Mac OS 10.6)

**Note:** Compatibility may vary depending on your computer's hardware configuration and operating system.

#### Web Browsers

- Internet Explorer 8.0 and later on supported Windows computers
- Safari 6.0 and later on supported Mac computers
- Firefox 21 and later on supported Windows and Mac computers
- Google Chrome 27 and later on supported Windows and Mac computers

#### Local Network

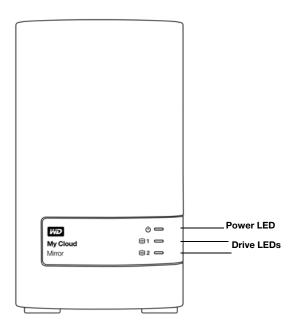

Router/switch (Gigabit recommended to maximize performance.)

#### Internet

 Broadband Internet connection is required for initial setup and software downloads, as well as for remote access and mobile apps.

#### **Product Components**

#### **Front View**

#### **Back View**

Component	lcon	Description
Ethernet port		Connects the device to a local network.
USB 3.0 port	SS←	Connects to a USB hard drive for additional storage.
Reset button	()	Restores settings such as the administrator user name and password for the device.
Power port		Connects the device to an AC adapter and the power outlet.
Kensington security slot	ß	For device security, the device is equipped with a security slot that supports a standard Kensington security cable. Visit <i>http://www.kensington.com/</i> for more information.

#### LEDs

#### Front Panel Power LED

The following table describes the front panel power LED behavior.

State	Color	Appearance	State Description
Power Down	Not lit	N/A	Drive is off.
Standby	Blue	Pulsing	Drive is in standby mode.
Powering Up	Yellow	Flashing	Device is powering on or in the process of updating the firmware.
Power Up	Blue	Solid	Device is in a powered up state.
Power Up (degraded)	Red	Flashing	Device is powered up but the storage is degraded. See Knowledge Base Answer ID 87607.
Action required	Yellow	Flashing	A condition, such as a network cable having become unplugged, which requires you to act.

Note: For non-compatible drives, the power LED blinks yellow during power up.

#### Front Panel Hard Drive (HDD) LEDs

The following table describes the front panel hard drive LED behavior.

Function	Color	Appearance	Function Description
No drive	Not lit	N/A	Drive is not present.
Drive present, no activity	Blue	Solid	Drive is present but there is no activity.
Active drive	Blue	Flashing	Drive is present and showing drive activity.
Hard drive error	Red	Flashing	Drive is present but has a hard drive error or failure.
Hard drive in standby	Not lit	N/A	Drive is inactive.

**Note:** For incompatible drives, the hard drive LEDs blink red rapidly as the unit powers up.

#### **Back Panel Ethernet (Network) LEDs**

The following table describes the network and activity LEDs:

**Note:** Looking at the Ethernet port, the LED on the top right is the Activity LED, and the one on the bottom right is the Link LED.

State	LED	Appearance	State Description
Link down	Link	Off	Cable or device is not plugged in, or other end of link is not operational.
Link up – 100 Mb connection	Link	Yellow	Cable is plugged in, and both ends of the link have successfully established communications. 100 Mb network connection.
Link up – 1000 Mb connection	Link	Green	Cable is plugged in, and both ends of the link have successfully established communications. 1000 network connection.
Link idle	Activity	Solid	Active communication is not in progress.
Link busy	Activity	Green - Blinks	Active communication is in progress.

#### **Pre-installation Instructions**

Before beginning installation, select a suitable location for your device to obtain maximum efficiency. Place it in a location that is:

- Near a grounded power outlet
- Clean and dust free
- On a stable surface free from vibration
- Well ventilated, with nothing blocking or covering the slots and openings on the top and bottom of the device, and in fields from electrical devices such as air conditioners, radio and television receivers.

#### **Handling Precautions**

WD products are precision instruments and must be handled with care during unpacking and installation. Rough handling, shock, or vibration can damage the device drives. Observe the following precautions when unpacking and installing your external storage product:

- Do not drop or jolt the device.
- Do not move the device while it is powered on.
- Do not use this product as a portable device.
- Do not remove both data drives at the same time. This will cause your device to become unresponsive.

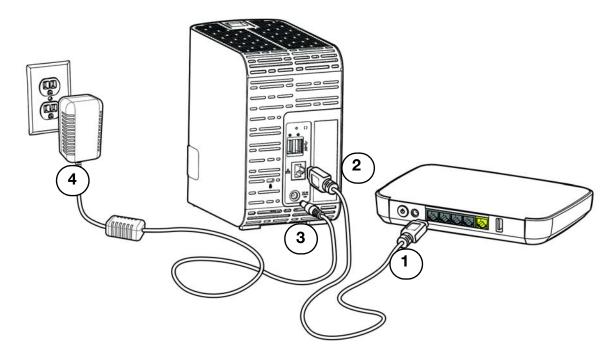

## Getting Started

Physically Connecting the Device Getting Started Using Online Setup Software Getting Started Without Online Setup Software Accessing Content

It's easy to set up the WD My Cloud Mirror Personal Cloud Storage device -- all you have to do is unpack your device, connect it, and wait for the Power LED on the front of your device to turn a solid blue. Then, download and run the quick setup software, available at *http://www.wd.com/setup*.

**Note:** For information about safely shutting down and disconnecting the device, see "Utilities" on page 120

## **Physically Connecting the Device**

Follow the steps below to connect the WD My Cloud Mirror Personal Cloud Storage device to a home or small office network.

**Important:** To avoid overheating, make sure the device is upright as shown in the illustration above and nothing is blocking or covering the slots and openings on the top and bottom of the device. In the event of overheating, the device will perform a safe shutdown, interrupting all processes currently being performed. If this occurs, data may be lost.

**Important:** We recommend that you use the enclosed Ethernet cable for optimal performance.

- 1. Using the provided Ethernet cable, connect one end of the Ethernet cable to the Ethernet port located on the back of the device.
- 2. Connect the other end of the Ethernet cable directly into a router or network switch port.
- 3. Connect one end of the power adapter into the power supply socket on the back of the device.
- 4. Plug the other end of the power adapter into a power outlet. The unit powers up automatically.

**Important:** Wait for the WD My Cloud Mirror device to finish powering up (approximately three minutes) before configuring it. You will know it is ready when the power LED stops flashing and turns blue.

5. When the power LED on your device turns a solid blue, continue to "Getting Started Using Online Setup Software" on page 11.

#### **Getting Started Using Online Setup Software**

The online setup software walks you through the steps to easily connect your device to your home or small office network. Use the following steps to download and run the online setup software, discover the device, and get started using it. The online setup software is available from WD's Online Learning Center at *http://wd.com/setup/wdmycloudmirror* 

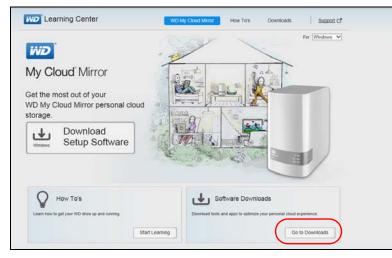

#### Downloading and Installing the Online Setup Software

After connecting your device:

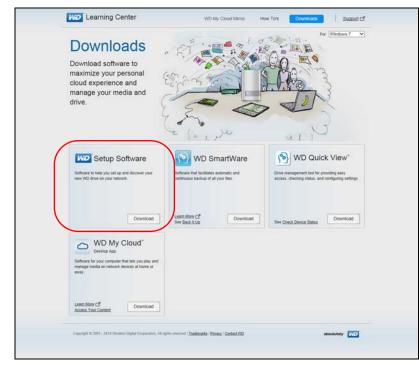

- 1. Open a web browser. (For browser requirements, see "Web Browsers" on page 6.)
- 2. In the address field, type *http://wd.com/setup/wdmycloudmirror* to display the Welcome to the Learning Center page:

3. Click WD My Cloud Mirror to display the Download Setup Software page:

- **Note:** The online Learning Center automatically detects your operating system (OS). If you'd like to download setup software for a different operating system, select your OS from the drop-down menu at the top of the page before clicking the **Download Setup Software** button.
- 4. Click the **Download Setup Software** button. The Downloads page displays.

5. Click the Setup Software **Download** button.

 Access the downloaded files and double-click Setup.exe (Windows) or WD My Cloud Mirror Personal Cloud Storage Setup.dmg (Mac) to open the setup software. The Getting Started window displays.

<b>iiiD</b> My	Cloud Mirror		? ×
071	:	My Cloud Mirror Personal Cloud Storage Getting started is easy - we'll guide you through setup so you can start using your personal cloud in just a few minutes. Cet Started	

7. Continue to "Connecting to the Network and Creating a Personal Cloud," below.

Connecting to the Network and Creating a Personal Cloud

1. On the Getting Started window (above), click **Get Started** to display the Western Digital End User License Agreement:

2. Read the agreement and select the **"I accept the terms of the License Agreement"** check box.

3. Click **Next** to display the Getting powered up and connected screen.

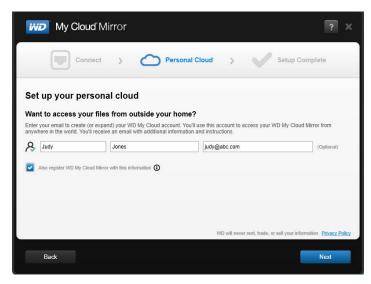

4. Review the information on the screen, and when the power LED on your WD My Cloud Mirror device is solid blue, click **Next**. The software discovers your device and displays it on the Select your WD My Cloud Mirror screen.

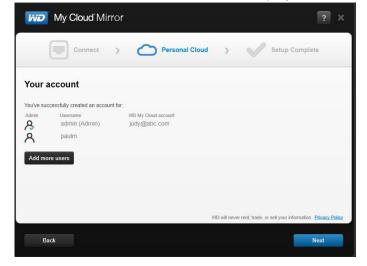

Note: If your device is not detected, follow the on-screen directions.

5. Select your WD My Cloud Mirror device and click **Next**. The Set up your personal cloud screen displays.

- **Note:** WD My Cloud Mirror provides fee-free remote access to your personal cloud device. Once you create your account, you can access your device using your mobile devices with Internet access and from the WD My Cloud desktop app.
- 6. Enter your first and last name and, optionally, your email address. The email address is needed if you want to create an account with remote access capability. Make sure the check box for **Also register WD My Cloud Mirror with this information** is selected.
- 7. Click Next. The Your account screen displays.

8. If you'd like to add users, click **Add more users,** enter the user information and click the plus sign (+).

If you'd like to skip the add an account step, click **Next**. You'll have the opportunity to create a personal cloud when you create a user account (see "Adding a Single User" on page 42.)

**Note:** It may take a few minutes for your email inbox to receive instructions on accessing the WD My Cloud Mirror device remotely.

9. Check your email to confirm your new account and click **Next** to display the Setup Complete screen.

**Note:** You may need to check your email spam folder if your spam filter does not allow email from WD. The Congratulations! screen displays. You've successfully set up your WD My Cloud Mirror device. Now you can select the options provided on the screen.

#### **Selecting Options**

All options on the Congratulations! screen (above) are enabled by default. The table below explains what happens when the options are enabled or disabled.

1. Select your desired options, clearing the check box for any option you want to disable:

Option	Result
Install the WD My Cloud app	If the option is enabled:
	An installation wizard launches automatically.
	<ul> <li>See "Launching the WD My Cloud Desktop App" on page 37 for instructions.</li> </ul>
	<ul> <li>WD My Cloud app icon displays on the Desktop.</li> </ul>
	If the option is disabled:
	The online Learning Center     Welcome page displays.
	<ul> <li>The Public share displays in Explorer (Windows) or Finder (Mac).</li> </ul>

Option	Result
Place helpful shortcuts on my Desktop (Setup software required)	VD My Cloud E Cloud EX2 Cloud EX
	The online Learning Center Welcome page.
	The Public share in Explorer (Windows) or Finder (Mac).
	The WD My Cloud dashboard fo configuring your WD My Cloud Mirror device.
Recommended: Automatically update WD My Cloud whenever new firmware becomes	The online Learning Center Welcome page displays.
available	The Public share displays in Explorer (Windows) or Finder (Mac).
	• If the option is enabled, the firmware turns on automatic updates at 3:00 AM daily. To change settings for automatic updates, see "Firmware Update" on page 130.

2. Click **Finish** to close the setup wizard.

### **Getting Started Without Online Setup Software**

If you don't want to use the setup software to get started, you can use a browser instead. If you don't want to use either, you can still:

- Use your WD My Cloud Mirror personal cloud storage device as an external hard drive, dragging and dropping files to and from it.
- Configure the device using the WD My Cloud Mirror device's dashboard. (See "The Dashboard at a Glance" on page 57.)
- Back up files using USB, Remote, Internal, and Cloud backup (see "Backing Up and Retrieving Files" on page 71).

#### Setting up the Device Using a Browser

To set up the WD My Cloud Mirror device:

1. Open a browser and enter *http://wdmycloudmirror* for Windows or *http://wdmycloudmirror.local* for a Mac and press **Enter.** The login page appears:

My Clou	u <b>d</b> Mirror
User	admin ×
Password	
	Remember Me
	Login

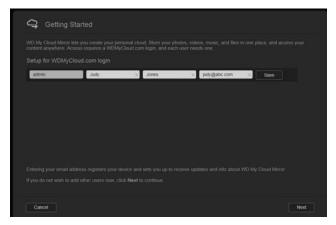

2. Click **Login**. You do not need to enter a password because you haven't set one up yet. The Choose your language screen appears:

	Choose your language	English 📀
	☑ I agree to the <u>WD End User</u>	License Agreement
<b>H H</b>		
	Continue	
	Continue	

- 3. From the drop-down list, select the language of the user interface.
- 4. Click the link to read the Western Digital End User License Agreement. if you agree, click **I accept** or return to the previous page and click the **I agree** check box.

	Western Digital Technologies, Inc. License Agreement Read the license agreement carefully.

The screen provides three links to important processes, which are discussed in later chapters:

- •Upload Content: See "Accessing Content" on page 20.
- **Backup PC/Mac:** See "Backing Up and Retrieving Files" on page 71.
- **Access Mobile App:** See "Mobilizing Your Files with iOS and Android Mobile Apps" on page 24.
- 10. Do the following (optional):
  - •To have your device's firmware up dated automatically, click the **Automatically** update device firmware when available check box.
  - •To register your device, click the **Register the WD My Cloud Mirror device to** receive continuous product support check box.

11. Click **Finish** to display the WD My Cloud Mirror dashboard. For instructions on using the dashboard, see "The Dashboard Home Page" on page 59.

## **Accessing Content**

Note: This manual uses the term shares and folders interchangeably.

The WD My Cloud Mirror device's Public folder contains Shared Music, Shared Pictures, and Shared Videos subfolders. The existing content of the subfolders are files that you dragged and dropped or files that have been backed up from your computer or an attached USB drive.

**Note:** Any of the folders can hold any type file.

Once you've physically connected your WD My Cloud Mirror device (see "Physically Connecting the Device" on page 10), use the following steps to access the contents of your device.

If your operating systems is	The	en
Windows 8 or 8.1	1.	On the Start page, type <b>Computer</b>
	2.	Click <b>Computer</b> .
	З.	In the left pane, click <b>Network</b> .
	4.	Double-click <b>WDMYCloudMirror</b> and locate the device's Public folder.
	5.	Double-click the Public folder to display the Shared Music, Shared Pictures, and Shared Videos subfolders. You can now drag and drop files into (and from) the shared media folders using Windows Explorer.
Windows XP/Vista/Windows 7	1.	Click  Click or Start > Computer > Network > WDMYCloudMirro and, if required, enter your network (router) credentials. The device Public and private folders (shares) display.
	2.	Double-click the Public folder to display the Shared Music, Shared Pictures, and Shared Videos subfolders. You can now drag and drop files into (and from) the shared media folders using Windows Explorer.
Mac OS X (Snow Leopard, Lion, Mountain Lion,	1.	In a Finder window, click <b>WDMyCloudMirror</b> under the shared items in the side bar.
Snow Leopard, Lion, Mountain Lion, lavericks)	2.	If presented with an authorization page, select <b>Guest</b> and click <b>Connect</b> to display the Public share:
	3.	Double-click the Public folder to display the subfolders: Shared Music, Shared Pictures, and Shared Videos. You can now drag ar drop files into the shared folders using Finder.
	4.	If you want to create a shared drive icon permanently on your desktop, create an alias. Following are two ways to do this:
		Note: Before creating an alias, click Finder > Preferences > General and make sure Connected Servers is checked
		- Click the item you wish to alias (e.g., Shared Music), hold dow the mouse button, hold down the <b>Cmd</b> and <b>Option</b> keys simultaneously, and drag the item to where you want the alias appear. Instead of moving the original item, this action creates an alias at the new location.
		<ul> <li>-OR -</li> <li>Right-click the item you want to alias (e.g., Shared Music) and click File &gt; Make Alias.</li> </ul>

#### Mapping the Public Folder (Windows)

To map the WD My Cloud Mirror Public folder for quick access in the future:

- 1. In Windows Explorer, under Network, click **WDMYCLOUDMIRROR**.
- 2. Right-click the Public folder and select **Map Network Drive** from the menu.
- 3. Select an available letter from the **Drive** drop-down list.
- 4. Select the **Reconnect at login** check box.
- 5. Click **Finish**. Your Public drive is now mapped.

## Accessing Your Cloud Remotely

Enabling Cloud Access for the WD My Cloud Mirror Device Configuring Cloud Access for a User Mobilizing Your Files with iOS and Android Mobile Apps

A personal cloud is your content, at home, secure and under your control. Unlike public clouds, a personal cloud allows you to keep all of your content in one safe place on your home network. Share files, stream media, and access your content anywhere, from your PC or Mac computer and from mobile devices. No monthly fees. No mysterious location for your data. Keep your videos, music, photos, and files safe at home and always with you.

This chapter explains how to set up the WD My Cloud Mirror device for remote access and describes some of the ways you can take advantage of its many capabilities.

## Enabling Cloud Access for the WD My Cloud Mirror Device

Before you can use your WD My Cloud Mirror device remotely, it must be enabled for cloud access (enabled is the default). To verify that the WD My Cloud device is enabled for remote access and to check the status of its remote connection(s), see "Cloud Access" on page 108.

## Configuring Cloud Access for a User

Once you've enabled cloud access on the WD My Cloud Mirror device, use the following steps to give remote access capability to your device users.

1. On the navigation bar, click the **Cloud Access** icon.

2. In the left pane, select the user you'd like to configure for cloud access.

Configure Access A admin A admin A admin A admin A admin A pro A p	< A	Shares Cloud Access	Backops	Storage	>
A admin A usert Correctors Status Correctors Co A usert A usert A usert Could devices for joe Choud devices for joe There is no code devices user user for the status are marked or and the status are	Configure Access				
A john A user4 Auser5 Cloud devices for joe There is no contained where a contain configured to an output of the output of the mentals of index There is no contained where a containe configured to an output of the data to be mentals of index There is no contained where a containe configured to an output of the data to be mentals of index	A, admin				
A users Cloud devices for joe Or cose There is no device access and devices for joe or cose or cose and devices an	Ajohn			- A -	
activation code for your cloud devices. Codes are valid for 40 hours from the time of	A user5				

- 3. In the WDMyCloud.com Login for <user name> area, click the **Add/Change Email Address** icon .Click this icon if you have not previously added an email address to the user account or if you need to update/change the user's email address.
- 4. Enter the user's email address. This email address is used to send the user confirmation information and instructions on setting up and activating a password for cloud access.
- 5. Click Save.
- 6. If you have entered an email address, this icon is greyed out. Add an email address and return to this link to send cloud access information.

To generate an activation code for a user's mobile device(s) and My Cloud Desktop app:

**Important:** Codes are valid for 48 hours from the time of the request and can be used only once.

1. On the bottom of the screen, click **Get Code**. You'll need to generate one code for each mobile device and app you want to activate. You also need a code to activate WD My Cloud for desktop app. A dialog box displays the user's activation code and its expiration date and time.

Note: Make sure to write down the access codes you generate.

2. Click **OK**. Once you use the code(s), the Configure Access page displays the cloud devices to which the user now has access along with the activation code used.

## Mobilizing Your Files with iOS and Android Mobile Apps

The WD My Cloud and WD Photos mobile apps and WD My Cloud desktop app allow you to access all the content on your personal cloud from any device.

#### WD Photos Mobile App

#### Important: WD Photos enables you to view photos in .jpg format only.

Turn your mobile device into the ultimate photo album. View all the photos stored on your personal cloud with your smartphone or tablet. Or, take a photo or video clip and instantly upload it from your gallery directly to your WD My Cloud Mirror device with ease.WD Photos is compatible with leading Apple mobile devices and many popular Android devices. Photos are automatically optimized for viewing on your mobile device.

**Note:** Thumbnail images are not available for an attached USB device.

With WD Photos, you can:

- Instantly post photos to Facebook.
- Play a slide show with transitions to create digital art.
- Access previously viewed photos even when you are off line.
- View your photos all at once or filter them by folder or album.
- Search by file name, folder name, or date using the built-in search options.
- Email a photo to a friend.
- Assign a photo to a contact.
- Download a photo from your personal cloud storage to the camera roll on your mobile device.
- Upload photos and videos from the camera roll on your mobile device directly to your personal cloud storage, no matter where you are.

**Note:** WD Photos automatically creates a subfolder with the mobile device name in the Public directory on the WD My Cloud Mirror device for uploaded photos. Similarly, the app creates a subfolder with the mobile device name in the Public/Shared Videos directory for uploaded videos.

For more features and instructions for using WD Photos, see its online Guide Me page and Quick Tips, and go to *http://wdphotos.wd.com*.

#### Installing WD Photos Mobile App on Your Mobile Device

**Important:** Make sure the photos you want to view on the mobile device are stored in the Shared Pictures subfolder in the Public share of your WD My Cloud Mirror device. WD Photos lets you view photos in .jpg format only.

#### Requirements

- WD My Cloud Mirror personal cloud storage with the most recent firmware, connected to the Internet.
- An iPhone<sup>®,</sup> iPad<sup>®,</sup>or iPod<sup>®</sup> touch with iOS 4.3 or higher
- Android smartphone or tablet running versions 2.3 or higher

To install WD Photos on your mobile device:

- 1. Download WD Photos from the Apple App or Google Play store and install it on your mobile device.
- 2. Launch WD Photos on your mobile device to display the WD Photos page:

3. Tap **Connect Now** to display a page offering several connection options:

•0000 Verizon 🗟	4:24 PM	* 68% 💷
Welcome	WD Photos	
Found in Ne		
⊕ _	WDMyCloud	Mirror #2
Cloud Sign		
• 🔿	WDMyCloud	.com
Add Manua		
(†) 🕅	WD Device	
	Q	

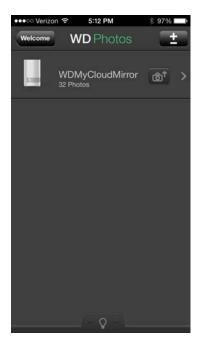

The WD Welcome page contains the following sections:

- Found in Network: If the mobile device is on the same Local Area Network or Wi-Fi Network as the WD My Cloud Mirror device, the activation code is automatically provided behind the scenes and does not need to be entered.
  - a. In the Found in Network section, tap 🕙 to the left of WDMyCloudMirror.
  - b. Select your user name from the Select User Account list.
  - c. Enter your user password.

- Add Manually: If the mobile device is not on the same LAN or Wi-Fi network as the WD My Cloud device:
  - a. In the Add Manually section, tap 💽 to the left of WD device.
  - b. Enter the activation code generated on the WD My Cloud Mirror's dashboard and tap **Activate**:

de Me	4	Add Device	Cancel
		Activation Code	E
		Activate	

- **Note:** You must generate one code for each app you want to activate. Codes are valid for 48 hours from the time of request and can be used one time only.
- A page displaying your WD My Cloud device appears:

4. Tap your WD My Cloud Mirror device to view your album(s) and tap an album to display the photos contained within it:

**Note:** If you have problems installing WD Photos, visit *http://wd.com/setup/wdphotos*. For more features and instructions, see the app's online Guide Me page and tips and go to *http://wdphotos.wd.com*.

### WD My Cloud Mobile App

You are always connected to your personal cloud. Save valuable space on your mobile devices with easy photo and video uploads directly to your personal cloud, then securely access and share your memories.

The WD My Cloud mobile app also allows you to easily transfer files between your personal cloud, Dropbox<sup>™</sup>, and other public cloud accounts.

With WD My Cloud mobile app, you can:

- Open and view the important files stored on your WD My Cloud Mirror device from anywhere without copying them to your mobile device.
- Show off the photos stored on your WD My Cloud Mirror device.
- Connect to other cloud sites such as Dropbox from your tablet or smartphone.
- Stream and enjoy music and video files stored on your WD My Cloud Mirror device.
  - **Note:** Video streaming performance is best over your LAN and when your mobile device is connected using Wi-Fi wireless connections. WAN streaming performance may be limited by upload speeds on your home Internet connection.
- Share your presentations on your Apple or Android tablets.
   Your WD My Cloud app supports most major file types, such as Microsoft Word documents, Microsoft Excel spreadsheets, and PowerPoint presentations.

For more features and instructions, see the Help, Guide Me page, and Quick Tips within the WD My Cloud mobile app, or go to *http://wdmycloud.wd.com*.

**Note:** WD My Cloud app brings your data from your personal cloud to your tablet, handset, or other portable devices using Google Android or Apple iOS. WD My Cloud provides a convenient file list of the WD My Cloud Mirror device contents and then launches your favorite player or viewer for any files you want to open. For file types your mobile device supports, see the device's manual.

#### Requirements

- WD My Cloud Mirror personal cloud storage with the most recent firmware, connected to the Internet.
- Access to cloud services requires the WD My Cloud app and an active Dropbox, Google Drive, or OneDrive<sup>™</sup> account.
- iOS iPhone or iPad running versions 5.0 or later software.
- Android smartphone or tablet running versions 2.3 or later software.

#### Installing the WD My Cloud Mobile App

- 1. Download the WD My Cloud mobile app from the Apple App or Google Play store and install it on your mobile device.
- 2. Launch the app. The End User License Agreement displays.
- 3. Accept the agreement. The Welcome page displays:

	Welcome	
	y Cloud <sup>®</sup>	1
L	Connect Now	
	Demo Drive	
WD My C	cloud 3.0.0	5

4. Tap **Connect Now** to display a page offering several connection options:

•	MyNetN900	С
Cloud Sign In		
•	Dropbox	
•	Google Drive	e
	ClauDaina	
Cloud Do	wnloads Activity	Settings

- 5. You have the following options for connecting to the WD My Cloud device:
  - From Your Local Network: If the mobile device is connected by Wi-Fi to the same Local Area Network as the WD My Cloud device, the app is automatically activated.
  - Cloud Sign in: Tap and sign into your personal cloud using your
     WDMyCloud.com (cloud access) login account email address and password.
  - **Connect Manually**: If the mobile device is not on the same LAN or Wi-Fi network as the WD My Cloud device:
    - In the Add Manually section, tap the WD My Cloud Mirror device.
    - Enter the activation code generated on the WD My Cloud's dashboard and tap **Activate**. (See "Configuring Cloud Access for a User" on page 22.)

Cancel	Add Device	Guide Me
	Enter Activation Code	
	Activate	

**Note:** You must generate one code for each app you want to activate. Codes are valid for 48 hours from the time of request and can be used one time only.

A page displaying your WD My Cloud Mirror device displays:

6. Tap your device to display its share(s):

- 7. Tap a share to display its subfolders.
- 8. Tap a subfolder to display a list of files.
- 9. Tap a file to access it.

**Note:** For more features and instructions, see the app's online Guide Me page, Help, FAQs, and tips, or go to *http://wd.setup/wd.mycloudapps*.

If you have problems installing the app, go to *http://wd.com/setup/wmycloudmobileapps*.

### WD My Cloud for Desktop App

This app keeps your PC or Mac connected to your personal cloud, no matter where you are. From the application, you can easily drag and drop to transfer, manage your files, and share links to specific files or folders via email.

With WD My Cloud desktop app, you can:

- View the files to which you have access.
- Assign favorites for quick access to your favorite folders, files and recently accessed information.
- Add and remove device content by dragging and dropping files and folders from your computer.

The WD My Cloud for Desktop app opens to the Getting Started screen.

6. Click **Start**. Refer to the application's online help if you have questions.

# 5

# Managing Users, Groups, and Shares

About Users About Groups About Shares

# About Users

The Administrator, normally the device owner, is the person in charge of setting up the device. As the WD My Cloud Mirror device owner, you have a special user account (admin) that provides you with administrator privileges. With these privileges, you can set up and configure the device to your specific needs and add other users to your personal cloud. You also have the power to determine exactly what users can access on the device.

As a default, the administrator (admin) user name does not have a password. You can create one at anytime (see "Updating a User Password" on page 47).

**Note:** Only one individual at a time can use the Administrator logon ID to log into the web browser app. Because of this, ensure that you log out of the WD My Cloud Mirror device web browser app when you're not using it. This allows other users authorized to use the Administrator logon ID to access the web browser app.

See Energy Saver - Web Access Timeout on "Energy Saver" on page 109 to automatically log out of the app after a set amount of time.

The Users screen displays a list of the current users and allows the Administrator to view user details, create new users, create groups, and grant a user access to existing shares and groups.

# **Viewing Users**

1. On the navigation bar, click Users to display the Set Up Users screen.

2. To view user details, click a user name on the left pane. The user's profile and share access information display. A user can have read only, read/write, or no access to a share.

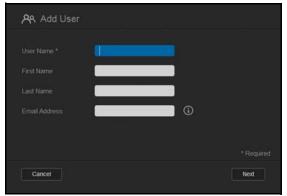

< the second sec	A Users	Constant Shares	Cic	aud Access	Backups	Storage	>
Set Up Users

**Note:** The shares in the Share Access section that don't require access permission are grayed out. Once you make a share private, the share displays in the list and you can edit it. (See "Making a Share Private" on page 54.)

#### Adding a Single User

The Administrator adds user accounts and sets the parameters of the shares that a user can access. Use the following steps to add a single user account.

- 1. To add a user, click A+ in the lower left side of the screen.
- 2. Enter the User Name, First Name, Last Name and Email address (optional) of the user you'd like to add and click **Next**.

3. To assign a password, click the toggle button **w** to ON, enter a password and confirm the user's password. Click **Next**.

📯 Add User			
	•••••	×	
	•••••		
Back Can	cel		Next

4. To assign a group to the new user, click the check box next to a group and click **Next**.

<b>ዶ</b> ዪ Add User

### Adding Multiple Users

Use the following steps to add multiple user accounts:

1. To add multiple users, click Add Multiple Users in the lower left side of the screen.

Set Up Users	
Users Groups	About Users
A₂admin	
Add Multiple Users	

- 2. Select how you'd like to enter your users into the device and click **Next**:
  - Create Multiple Users: Allows you to enter users manually. See "Creating Multiple Users" on page 44.
  - Import Users: Allows you to import a list of users into the device. Continue to "Import Multiple Users" on page 46.

Create Multiple Users	Import Users	

#### **Creating Multiple Users**

- 1. Enter the following information on the Create Multiple Users screen and click Next:
  - Username Prefix: Enter a prefix for your user name. This will be added to the Account Prefix to create the User Name. (Example: HR)
  - Account Prefix: Enter a numeric account prefix. This will be added to the Username Prefix to create the User Name (Example: 143)
  - **Number of Users**: Enter the number of user accounts you'd like to create. The maximum number you can add displays to the right.
  - **Password**: Enter a password for the user accounts.
  - **Confirm Password**: Confirm the password for the user accounts.

 Overwrite Duplicate Accounts (optional): Select this check box to overwrite any existing duplicate accounts on your device.

Username Prefix	<u>(</u> )
Account Prefix	0
Number of Users	( 505 max. )

#### **Import Multiple Users**

1. Click **Download** to download a .txt file identifying the format you'll need to set up your user import file.

- 2. Create and save your import file. Your import file should be formatted as follows:
  - **User import file format**: #user name/user password/user groups/ shared folder(rw)/ shared folder(ro)/ shared folder(deny)/user quota
  - **Example**: #user/pw/g1:g2/folder1:folder2/folder3:folder4/folder5:folder6/0:0:0:0
- 3. Click **Import User List** and select the import file you created.
- 4. Click **Next**.
- 5. Select the apps you'd like the new user accounts to have access to and click **Next**.

CIFS	
AFP	
FTP Access	

6. Click **Save**. Your new user accounts save to your personal cloud.

#### **Editing User Settings**

- 1. On the Set Up Users screen, select the user whose information you want to edit. The User Profile and Share Access panels display.
- 2. Modify the required and optional settings as desired.
- 3. If a private share has been created on the Share screen, it displays in the Share Access area of the Set Up Users screen. You can assign an access level to it for each user. (See "Making a Share Private" on page 54 for information on creating a private share.)

#### Updating a User Password

When viewing details about a user, the Administrator can add or change the user's password (no password is the default setting).

Use the following steps to update a user password:

- 1. On the Set Up Users screen, select a user from the list on the left.
- 2. Click the toggle button mini if no password has been previously created.
- 3. Click **Configure** to the right of the toggle button **to** display the Edit Password screen:

R Edit Password	
Confirm password	
Cancel	Save

- 4. Enter the new password in both the Password and Confirm Password fields.
- 5. Click Save.

#### Assigning a User to a Group

Use the following steps to assign a user account to a user group:

- 1. On the Set Up Users screen, select the user from the left pane.
- 2. In the Group Membership field, click **Configure**.
- 3. Select the check box next to the group you'd like the user to join and click **Save**.

#### **Quota Rules**

Assigning user quotas allows you to better control the disk space allocated to a user or a group. There are various rules dictating which quota takes precedent over another.

- User quota must be ≤ the group quota (e.g., if your group has a 20 GB quota and you try to set the user quota to 30 GB quota, you will be prompted to reduce your user quota to be equal to or less then the group quota).
- If the user quota is not set, the group quota is assigned to the user.
- When a user quota is set prior to the user joining a group and a group is assigned:
  - If the user quota > group quota, the individual user's quota is automatically reduced to the group quota amount.
  - If the user quota is  $\leq$  group quota, the individual user quota remains unchanged.

# Assigning Quotas to a User

A quota determines the amount of disk space allocated to the user on the WD My Cloud Mirror device.

Use the following steps to assign a quota to a user account:

- 1. On the Set Up Users screen, select the user from the left pane.
- 2. In the Quotas field, click **Configure**.

ጽ	Modify C	luota				
			GB			
			cet any ner	er auntas		
		ou do not wish to				
		ou do not wish to				
		u do not wish to				
		u do nat wish to				
		u do not wish to				

- 3. Enter the amount of space to assign to the user on the WD My Cloud Mirror device.
  - To assign unlimited space, leave the Quota Amount field(s) blank.
- 4. Click Save.

### Removing a User

Use the following steps to delete users from the WD My Cloud Mirror device.

Note: The Administrator account cannot be deleted.

- 1. On the Set Up Users screen, in the left pane, select the user you'd like to delete.
- 2. Click the **Remove User** icon **A**-.
- 3. In response to the confirmation message, click **OK**. The user account is removed from the device and no longer displays in the user account list.

# **About Groups**

A group allows easier management of multiple users. The permissions and privileges you assign to group accounts determine the actions that can be taken by that group.

#### **Viewing Groups**

- 1. On the navigation bar, click **Users** to display the Set up User screen.
- 2. Click the **Group** tab below Set Up Users.

3. To view group details, click a group name on the left pane. The group profile displays.

< 🔒	Users Share	s Cloud Access	Backups	Storage
Set Up Groups				
Users Groups	Group Profile			
	Share Access Ci Public			
A94- A94				

# Adding a Group

- 1. To add a group, click new on the lower left of the Set Up Groups screen.
- 2. Enter a Group Name.

anne		
donald		
norm		
lou		
leslie		

3. Click the check box next to the users you'd like to add to your new group and click **Next**.

ନ୍ୟନ୍ Add a Group	
Volume_1 Quota Amount	
Back Cancel	Save

4. Enter the Quota Amount, or leave the values blank for unlimited space, and click **Save**. Your new group account displays on the left pane of the Set Up Groups screen.

#### **Editing Group Settings**

- 1. On the Set Up Groups screen, select the group whose information you'd like to edit. The Group Profile and Share Access panel displays.
- 2. Modify the required and optional settings as desired. To update the group's access to shares, see "Assigning Share Access to Groups" on page 50

#### Assigning Share Access to Groups

Once a group account is created, you can assign access to the various shares on your WD My Cloud Mirror device using the following steps:

1. On the Set Up Groups screen, select the group for which you'd like to assign a share.

My Cloud Mirror						•&	<b>Д. ?</b> .	Α.
< the second sec	Users	Charles	Ciou	<b>Acces</b>		<b>Backups</b>	Storage	>
Set Up Groups								
Users Groups	Group Profi Group Name Quotas Group Member							
	Share Acce	55						
898 898.+								
	C share1		49 1		₩.			

**Note:** A share must first be made private on the Shares screen. All public shares are grayed out.

- 2. In the Share Access area, click one of the following icons to indicate the type of access to the share:
  - Read/Write Access: Select this option to provide the group account with read/ write access to the selected share. The group members can view and update the share.
  - Read Only Access: Select this option to provide the group account with read only access to the selected share. The group member can view the share but can't update it.
  - Deny Access: The group has no access to this share.

The group is updated with your share access selection.

## Assigning Quotas to a Group

Use the following steps to assign a quota to a Group. A quota determines the amount of space assigned to the user on the WD My Cloud Mirror device. (See "Quota Rules" on page 47 for information on quotas.)

- 1. On the Set Up Groups screen, select the group from the left pane.
- 2. In the Quotas field, click **Configure**.
- 3. Enter the amount of space you'd like to assign to the group on the WD My Cloud Mirror device. To assign unlimited space, leave the Quota Amount field(s) blank.
- 4. Click Save.

### Removing a Group

Use the following steps to delete a group from the WD My Cloud Mirror device.

- 1. On the Set Up Group screen, select the group you'd like to delete in the left pane.
- 2. Click the **Remove Group** icon \_\_\_\_\_\_.
- 3. In response to the confirmation message, click **OK**. The Group account is removed from the device and no longer displays in the Group account list.

# About Shares

A share is an area on the WD My Cloud Mirror device for storing files (similar to a folder or directory).

Note: In this manual, we use the terms share and folder interchangeably.

A share can be public so that all users can access the contents, or private to limit access to selected users. The **Shares** icon on the navigation bar displays a list of shares on the WD My Cloud Mirror device and enables the Administrator to manage shares and user access.

#### Viewing a List of Shares

Click the **Shares** icon on the navigation bar to display a list of shares on the WD My Cloud Mirror device. For each share name, the description, media serving, and public access status display.

Use the following steps to view a list of shares.

1. On the navigation bar, click **Shares** to display the About Shares page.

< 🛍 Home	<b>A</b> Users	Chares	Cloud Access	Backups	Storage
Set Up Shares					
© P2P	About Sha	ares			
C Public	A share is an device and co	area for storing file ontrol access to eac	s (like a folder). You car h share		
□ SallysShare		<u> </u>			
C SmartWare					
TimeMachineBackup			]/		
ũ- <b>Δ+</b>		<b>- C</b>			

2. Click a share to display its profile and share access information.

< Galaxie Home	<b>PR</b> Users	Shares	Cloud Access	Backups	Storage
Set Up Shares					
P2P  Public  Share1  SmartWare  TimeMachineBackup	Share Pr Share Name Share Desc Public Enable Rec Media Servi oplocks	P2P npbion CN ycle Bin	OFF (1) OFF (1)		
0- 0+	Share Ac FTP Access WebDAV A NFS Access User Acc		orr ①		

**Note:** You can only configure permissions if a share is private. Public shares always have read/write access and are grayed out.

### Creating a New Share

You can create a share and designate it as public or private. For example, if the share contains financial information, you might want to make the share private. Or, if there are photos you would like a friend to see, you can make the share pubGrouplic to that friend.

- 1. Click the **Shares** icon **(**) on the navigation bar to display the About Shares screen.
- 2. Click the Add a Share icon \_\_\_\_.

Add Shar		
	Volume_1	
	III OFF G	
Cancel		Next

3. Enter the following settings:

Volume	Select the volume from the drop-down menu.	
Share Name	Assign a name to the share. (Names must be case sensitive and contain 1-32 alphanumeric characters but no spaces.)	
Share Description (optional)	Enter a brief description of the share to remind yourself of what it contains. Note that share descriptions must begin with an alphanumeric value and can contain up to 256 characters.	
Enable Recycle Bin (optional)	The Recycle Bin contains any files deleted from the WD My Cloud Mirror device. If you'd like to use the Recycle Bin, click the toggle button ut to ON. (Default is OFF.)	
	<i>Note:</i> The Recycle Bin is only available for Windows SMB files.	

4. Click Next.

	III OFF	
WebDAV Access		

5. Complete the following settings:

Enable Media Serving (optional)	This option allows you to stream media stored in this share to other devices. If you'd like to Enable Media Serving, click the toggle button to ON. The default is OFF.			
	Note:	The media server must be enabled for the device before you can provide media serving for a share		
		See"Enabling DLNA" on page 98 for instructions on enabling media serving for the device.		
oplocks	This option allow	vs you to turn oplocks (Optimistic concurrency		
	control) off and on. To turn it off, click the toggle button 🛄 to OFF. The default is ON.			
	oplocks, also referred to as OCC, is a tool to improve data management and performance for systems with low data contention.			
FTP Access (optional)	This option allow	This option allows FTP access on this share. If you'd like to use FTP		
	Access, click the toggle button 🛄 to ON.			
	Note:	FTP access must be enabled before you can provide FTP access for a share. See "Network Service" on page 113 for instructions on how to enable FTP access.		
WebDAV Access (Optional)	This option allows WebDAV access on this share. If you'd like to use			
	WebDAV Access	s, click the toggle button 🛄 to ON.		
	Note:	WebDAV access must be enabled before you car provide WebDAV access for a share. See "Network Service" on page 113 for instructions on how to enable WebDAV access.		

### **Editing Share Settings**

- 1. On the Set Up Shares screen, select the share you'd like to edit. The Share Profile panel displays.
- 2. Modify the required and optional settings as desired.

### Making a Share Private

If you decide there is a reason to limit access to a public share, convert it to a private share:

1. On the Set Up Shares screen, select the share:

<b>^</b>	Share Profile		
C user2	Share Name	user2	
🗅 user3			
🗅 user4	Share Description		
🗅 user4share	Media Serving	OFF	
🗅 user5	Public Access	OFF	
🗅 user5share	Usage		
	User Access		
۵- ۵+	A user1		No Access
	A user3		No Access
	<b>A</b> ₂admin		No Access
	A jerry		No Access

- 2. Switch the Public Access button to OFF.
- 3. For each user listed in the **User Access** section, select the level of access by clicking the appropriate icon for the share (read/write 📧 , read only 🔳 , or no access 📧 ).

#### Deleting a Share

WARNING! Deleting a share erases all files and folders on the share.

- 1. Select the share in the list of shares on the About Shares page.
- 2. Click the **Delete Share** icon
- 3. In response to the confirmation message, click **OK**.

#### Accessing the Contents of a Share Locally

**Note:** For information on accessing the contents of a share remotely, see "Accessing Your Cloud Remotely" on page 22.

Several options are available for opening a WD My Cloud Mirror share. For a private share, the user must have:

- A user name and password assigned to the share name
- Read-only or full access to the share

**Note:** The table below refers to WD Quick View, an application that helps you perform important functions quickly. You can download WD Quick View and its help from the online Learning Center.

IF you want to open a share using	TH	EN
WD Quick View icon in the system tray (Windows)	1.	Left- or right-click the WD Quick View icon 🔊 to display the main menu.
	2.	Click the WD My Cloud device name and click <b>Open</b> . The shares display in Windows Explorer.
	З.	For a private share, if prompted for a user name and password, enter those associated with your user account.
	4.	For a private share, if the user's name and password are the same as for logging into the computer, a user name and password are not required. If they are not the same, visit <i>http://support.wd.com</i> and see Knowledge Base Answer ID 5681.
WD Quick View in the menu bar (Mac OS X)	1.	Click the <b>WD Quick View</b> icon in the menu bar and move the cursor over the name of your WD My Cloud device to display the submenu.
	2.	Select <b>Open</b> on the WD Quick View submenu. The shares display in a second submenu.
	3.	Select the desired share.
	4.	For a private share, if prompted for a user name and password, enter those associated with the user account (see "Adding a Single User" on page 42).
	5.	For a Public share, if prompted for a user name and password, select <b>Guest</b> .
Windows 8 or 8.1	1.	In the task bar, click the <b>File Explorer</b> icon <mark></mark> .
	2.	In the left panel, select <b>Network</b> and double-click <b>WDMyCloudMirror</b> .
	З.	Double-click a Public or private share on your device.
Windows Vista/Windows 7/	1.	Click 🚱 or Start > Computer.
Windows XP	2.	In the left panel, select Network
	3.	Click WDMyCloudMirror.
	4.	Double-click the Public or private shares on your device.
Mac OS X	1.	Open a Finder window and locate your WD My Cloud device under the Shared heading in the side bar.
		If presented with an authorization page, select <b>Guest</b> and click <b>Connect</b> .
	2.	Click the device to display the Public share and any private shares to which you have access.

# Viewing Device Status and Making Updates on the Home Page

The main body of the Home page shows the status of the device and its functions and provides shortcuts to the most necessary tasks.

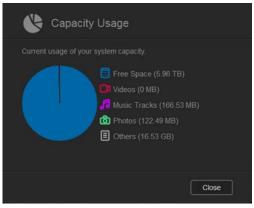

#### Capacity

The Capacity panel displays the amount of free storage left on your WD My Cloud Mirror device.

1. To see detailed information, click the arrow on the lower right to display the current usage of the drive's capacity:

2. To return to the Home page, click **Close**.

#### Device

The Device section identifies the overall health of the system, indicates the current version of your firmware, and informs you if firmware updates are available.

#### Diagnostics

The Diagnostics section displays a snapshot of the system's components and identifies the overall health of the WD My Cloud Mirror device.

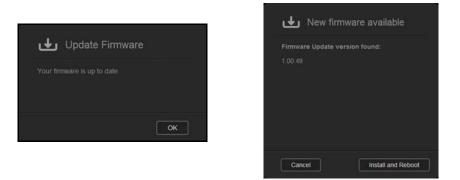

🛛 Device		
	<ul> <li>Diagnostics</li> <li>Healthy</li> </ul>	>
	<ul> <li>➡ Firmware</li> <li>✓ 1.02.01</li> </ul>	>

- 1. To see details about the status of system components, click the arrow on the right.
- 2. To return to the Home page, click **Close**.

#### Firmware

The Firmware section displays the current version of firmware loaded on your WD My Cloud Mirror device. A green check mark indicates that your firmware is up-to-date.

1. To view whether an updated version of the firmware is available, click the arrow to the right of Firmware to display firmware availability:

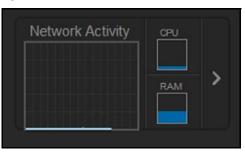

- 2. If an update is available, click Install and Reboot to update your device.
- 3. To return to the Home page, click **OK** or **Cancel**.

**Note:** If new firmware is available, see "Firmware Update" on page 130 for information on updating your WD My Cloud Mirror device.

#### **Network Activity**

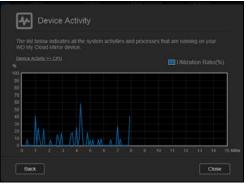

The Network Activity panel displays the system activities and processes that are running on your WD My Cloud Mirror device. At a glance, you can see the network, CPU, and RAM activity.

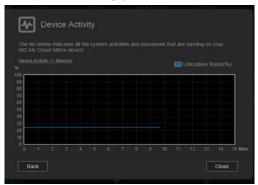

1. To view a list of all the system activities and processes that are running on your WD My Cloud Mirror device, click the arrow on the right of the panel to display the device activity panel.

e list below indicates all th D My Cloud Mittor device.	
🛱 сри	
Memory	
品 Network	
Process	

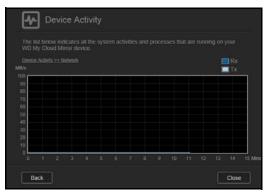

• **CPU**: Click the right arrow to view the CPU activity. Click **Back** to return to the Device Activity pane. Click **Close** to return to the Home page.

 Memory: Click the right arrow to view the Memory activity. Click Back to return to the Device Activity pane. Click Close to return to the Home page.

 Network: Click the right arrow to view the network activity. Click Back to return to the Device Activity pane. Click Close to return to the Home page.

Process: Click the right arrow to view the process information, including the list of active processes and the amount of CPU and Memory usage for each process.
 Click Back to return to the Device Activity pane. Click Close to return to the Home page.

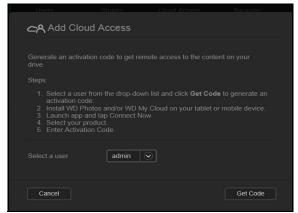

The list below indicates all the system WD My Cloud Mirror device.	

#### **Cloud Devices**

The Cloud Devices panel displays the number of cloud devices currently accessing the WD My Cloud Mirror device remotely. In this example, one cloud device is accessing it remotely.

1. To add cloud access for a user, click the plus sign (+) in the lower right of the panel to display:

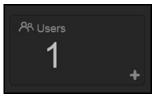

2. To generate an activation code, click **Get Code**.

WD MY CLOUD MIRROR PERSONAL CLOUD STORAGE USER MANUAL

3. Follow the page instructions to connect your tablet or mobile device to the WD My Cloud Mirror device.

#### Users

The Users panel displays the number of users currently set up to use the WD My Cloud Mirror device.

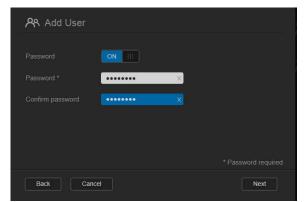

1. To add a user, click the plus (+) sign in the lower right of the panel:

ጽ Add User		
	6	
Cancel		Next

**Note:** When you enter the email address on the Add User screen, a new account is created for cloud access. The user receives an email with instructions on how to set up and activate a password for cloud access.

2. Enter the required information and click **Next** to display a user password screen.

3. To assign a password, click the toggle button **m**, enter a password and confirm your password. Click **Next** to display the user group screen.

ጽ Add User	
Join To Group	
Engineering	
Back Cancel	Next

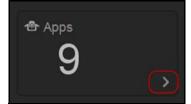

4. To assign a group to the new user, click the check box next to a group and click **Next** to display the Add User screen.

ጽ Add Us			
		GB 🕥	
Back	Cancel		Save

5. Enter the Quota Amount or leave the values blank for unlimited space and click **Save**. You've added a new user.

#### Apps

The Apps panel displays the apps currently installed on your WD My Cloud Mirror device.

1. To view the installed apps, click the arrow in the lower right of the panel to display:

4	lceCast		Details	
<b>X</b>			Details	
Survey and Survey	SqueezeCenter	Enabled	Details	
Ŵ	WordPress	Enabled	Details	
X	aMule		Details	

Note: To install an app, see "Managing Apps on WD My Cloud Mirror" on page 85.

2. To return to the Home page, click **Close**.

# **Managing Alerts**

Alerts display system messages containing pertinent information about the status of your WD My Cloud Mirror device. Three three types of alerts appear on the upper right of the dashboard.

Alert Icon	Type of Alert	Description
i	Informational	Informational alerts keep you updated on non-vital system information. Example: Reboot Required
	Warning	Warnings present a condition that might cause a problem in the future. Example: Network Disconnected.
(!)	Critical	This alert presents an error or problem that has occurred, usually a system failure. Example: Fan Not Working

#### **Viewing Alert Details**

1. On the dashboard, click the Alert icon in the upper right corner.

2. From the Alert list, click the arrow next to the alert you'd like to view, or click **View All** to review details for all of your alerts.

### **Obtaining Customer Support**

To open the Support page:

- 1. Click the **Help** icon **1** on any page to display the Help menu.
- 2. Click **Support** to display the following page:

If a problem occurs with the WD My Cloud Mirror device, WD Technical Support will need information about your device to troubleshoot and determine the best solution. There are two ways to get your device info and request support:

- Run a system report and send it to WD automatically,
- Create a system report manually and send it to WD.

#### **Requesting Automatic Support**

In the Request Automated Customer Support section:

- 1. Click the **Privacy Policy** link to review WD's privacy policy.
- 2. Click the Attach my device's diagnostic report and request support check box.
- 3. Click the **Request Support** button.

#### Creating and Saving a System Report

In the Create and Save System Report section:

- 1. Click Create and Save. This saves the file to your computer.
- 2. If desired, email the report to WD Technical Support.

#### **Obtaining Other Support**

The Support Resources section contains links to additional resources:

- To obtain the most recently updated user manual, click the **Product Documentation** link.
- To see answers to frequently asked questions and instructions, click the **FAQs** link.
- To discuss your WD My Cloud Mirror device with other users, click the **Forum** link.
- To see WD phone numbers and other contact information, click the **Contacts** link.

#### **Common Tasks**

The next few chapters step you through the procedures for configuring and using the WD My Cloud Mirror device. The following table provides shortcuts to instructions for some common tasks.

How do I	See
Set up the device on my network	page 10

# Backing Up and Retrieving Files

About Backups Managing a USB Device and USB Backups Remote Backups Internal Backups Cloud Backups

### **About Backups**

There are various ways to back up your data on the WD My Cloud Mirror device. These include:

- USB Backup—Allows you to back up WD My Cloud Mirror device data to and from your a USB device.
- Remote Backup—Allows you to back up WD My Cloud Mirror device data to and from another WD My Cloud Mirror or WD My Cloud EX4 device.
- Internal Backup—Allows you to back up data from one storage location to another on your WD My Cloud Mirror or WD My Cloud EX4 device.
- Cloud Backup—Allows you to backup WD My Cloud Mirror device data to an external cloud backup service.

### Managing a USB Device and USB Backups

When you attach a USB drive to the WD My Cloud Mirror device, you turn it into a network drive. Once connected, the USB drive has the following capabilities:

- When you connect an external USB drive such as a WD Passport, a memory stick, or a camera to the WD My Cloud Mirror device, you can access it with Windows Explorer or Mac Finder.
- The USB drive can serve as a target for backups.
- You now have the option of mapping the drive as a user share drive.
- If a WD external drive has been locked, when it is attached to the WD My Cloud Mirror device, it maintains that security. Using the Dashboard, you can unlock or re-lock it as desired.

#### Connecting A USB Drive

Connect a USB hard drive to the USB port on the rear of your WD My Cloud Mirror device for additional storage and backup capabilities. The USB drive appears as a share on the WD My Cloud Mirror dashboard. (See"About Shares" on page 51.)

The WD My Cloud Mirror device supports the following formats for externally attached USB drives:

- FAT/FAT32
- NTFS (read and write capability)
- HFS+J
- Linux Ext2, Ext3/Ext4
- XFS

# WARNING! Mounting or ejecting a USB drive while performing an NFS or AFP file transfer will interrupt the file transfer process.

#### Creating a USB Backup

Use the following steps to back up your data on your WD My Cloud Mirror to or from a USB device.

1. On the navigation bar, click **Backups** to display the Backups screen.

< 🟠	<b>A</b> Users	Charles	Cloud Access	Backups	Storage
Backups					
USB Backups		B Backups			
Remote Backups	Use your Wi	D My Cloud Mirror di		from a USB device.

#### Editing a USB Backup Job

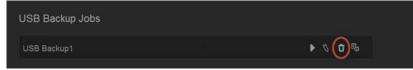

1. On the USB Backups screen, under USB Backup Jobs, select the job you'd like to modify and click the **Edit Job** icon.

2. In the USB Backup area, make the necessary changes to your job and click **Save**.

#### Deleting a USB Backup Job

1. On the USB Backups screen, under USB Backup Jobs, click the **Delete Job** icon next to the job you'd like to delete.

2. In response to the confirmation message, click **OK**. The selected USB Backup job is now deleted and removed from the USB Backup Jobs list.

## **Remote Backups**

Back up your WD My Cloud Mirror device to another WD My Cloud Mirror or a WD My Cloud EX4 device.

Before you proceed with a remote backup, ensure the following:

- You have a remote WD My Cloud Mirror or WD My Cloud EX4 device to back up this device to. Existing shares and data from this device will be copied to the target device in addition to previously existing data.
- The remote Server setting is turned ON in the remote WD My Cloud Mirror or WD My Cloud EX4 device.
- The backup password for the remote WD My Cloud Mirror or WD M Cloud EX4 device is enabled.
- You have enabled port forwarding to see the remote WD My Cloud Mirror or WD My Cloud EX4 device over the Internet.

For additional information on remote backups, see Knowledge Base Answer ID 10637.

#### Creating a Remote Backup

Use the following steps to back up your WD My Cloud Mirror to a remote device.

- 1. On the navigation bar, click **Backups** to display the Backups screen.
- 2. Click Remote Backup.

	<b>a</b> Home	<b>A</b> Users	Con Shares		Backups	Storage

Yes No	

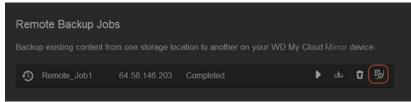

Job Name	Enter a Job Name for your backup.
Auto Update	Click the toggle button 🛄 to enable the Autoupdate feature.
Backup Now	Click <b>Yes</b> to begin your remote backup now. Click <b>No</b> to create a remote backup job for future backup.

9. Review the details of your Remote Backup job and click **Finish**.

#### Viewing the Details of a Remote Backup Job

1. On the Remote Backup screen, under Remote Backup Jobs, click the **Details** icon next to the job you'd like to view.

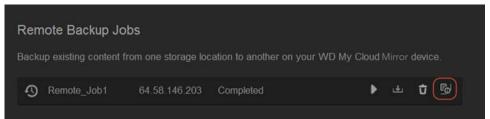

2. Review the Details screen and click **Close**.

#### Recovering a Remote Backup

Use the following steps to recover the data you saved on your remote server. This process recovers the data you saved on the remote server to your local server.

 On the Remote Backup screen, under Remote Backup Jobs, click the **Recover** button next to the job you'd like to view.

2. On the Recover screen, click OK. Your data recovery begins.

Are you sure you want to recover your da data from the remote server to your local	
Cancel	ОК

#### Deleting a Remote Backup

On the Remote Backup screen, under Remote Backup Jobs, click the **Delete** icon T next to the job you'd like to delete.

2. In response to the confirmation message, click **OK**. The selected Remote Backup job is now deleted and removed from the Remote Backup Jobs list.

#### **Internal Backups**

Internal backups allow you to make backups of the existing content from one storage location to another on your WD My Cloud Mirror device.

#### Creating an Internal Backup

Use the following steps to back up your WD My Cloud Mirror internally.

- 1. On the navigation bar, click **Backups** to display the Backups screen.
- 2. Click Internal Backups, if not already selected.

< fam	Users	Shares	Cloud Access	Backups	Storage	>
Backups						
USB Backups Remote Backup		Internal Backups existing content from or				
Internal Backup			_	=	Browse	
		ion Folder	OFF		Browse	
			6PM			
	 Intern	al Backup Queue				

3. Enter the following information to create a USB backup job:

Job Name	Enter a Job Name for your internal backup.		
Source Folder	Click <b>Browse</b> and select the folder you'd like to back up.		
Destination Folder	Click <b>Browse</b> and select the destination folder for your backup.		

Recurring Backup	If you'd like to use the Recurring Backup feature:
	<ol> <li>Click the toggle button to enable the Recurring Backup feature.</li> </ol>
	2. Select the frequency of the backup: Daily, Weekly, Monthly.
	3. Select a time (hour and minutes) from the drop-down menu.
	4. If you did not enable the Recurring backup field:
	<ul> <li>Click the Date field and select the date you'd like the backup to occur.</li> </ul>
	<ul> <li>Select a time of day (hour and minutes) from the drop-down menu.</li> </ul>
Incremental Backup	Click the check box if you'd like this job to be an incremental backup

5. Click **Create**. Your job displays in the Internal Backup Queue area and will begin backing up at the indicated time.

Internal Backup Queue			
Internal_backup	Þ	Û	Po

#### Initiating an Immediate Internal Backup

 On the Internal Backups screen, under Internal Backup Queue, select the job you'd like to modify and click the **Begin Now** button.

The internal backup begins.

#### Modifying an Internal Backup Job

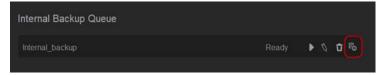

1. On the Internal Backups screen, under Internal Backup Queue, select the job you'd like to modify and click the **Edit** button.

Internal Backup Queue				
Internal_backup	Ready	Þ	Û	Po

2. In the Internal Backup area, make the necessary changes to your job and click **Save**.

#### Viewing Internal Backup Details

1. On the Internal Backups screen, under Internal Backup Queue, select the job you'd like to modify and click the **Details** icon.

2. Review the details of your Internal Backup job and click Close.

#### Deleting an Internal Backup Job

1. On the Internal Backups screen, under Internal Backup Queue, click the **Delete** button.

Internal Backup Queue			
Internal_backup	Þ	Û	Po.

2. In response to the confirmation message, click **OK**. The selected Internal Backup job is now deleted and removed from the Internal Backup Jobs list.

### **Cloud Backups**

A cloud backup allows you to create remote backups that are accessible over the Internet and through various mobile devices. WD My Cloud Mirror device uses the following cloud services to create remote backups:

- **ElephantDrive**: ElephantDrive is a cloud backup service that provides secure and automatic backups to your files remotely.
- Amazon S3: Amazon Simple Storage Service (S3) is an online file storage web service that can be used to store and retrieve any amount of data, at any time, from anywhere on the web.

#### Enabling ElephantDrive Cloud Backup

ElephantDrive is a cloud backup service that provides secure and automatic backups to your files remotely. Once enabled, ElephantDrive automatically syncs with your device. For additional information see *http://home.elephantdrive.com/welcome/wdc/*.

Use the following steps to enable a cloud backup using ElephantDrive.

- 1. On the navigation bar, click **Backups** to display the Backups screen.
- 2. Click Cloud Backups, if not already selected.

3. Click **ElephantDrive** at the top of the screen.

USB Backups	ElephantDrive
Remote Backups	Protect your WD My Cloud Mirror device.
Internal Backups	ElephantDrive offers a cloud storage solution, connecting and protecting your WD My Cloud Mirror device to the cloud. A notive client provides cloud backway and syncs onto the WD My Cloud Mirror device with the industry's leading security features. This solution features the three critical advantages of cloud storage -separate site protection: intelligent stynchronization, and simple secure staring.
Cloud Backups	Cours storage, separate site protection, intelligent synchronization, artis simple secure sharing. For more information about ElephantDrive, visit <u>http://www.elephantdrive.com/mot.assu/2dci/19836</u>
	ElephantDrive 🚺 Status
	Access Backups Login Register

- 4. In the ElephantDrive field, click the toggle button **u** to turn on your ElephantDrive cloud backup.
- 5. Click **Register**. The Register screen displays.

Password		

- 6. Enter the following information and click **Register**:
  - **Email address**: Enter the email address you'll use to receive information from ElephantDrive.
  - **Password**: Enter a password for your new account
  - Verify Password: Reenter your password.
- 7. You've now enabled your ElephantDrive cloud backup.

#### Backing Up with ElephantDrive

Once you've enabled ElephantDrive, use the following steps to create a cloud backup.

- 1. On the navigation bar, click **Backups** to display the Backups screen.
- 2. Click **Cloud Backups**, if not already selected.
- 3. Click **Elephant Drive** at the top right of the screen.

Managing Apps on WD My Cloud Mirror

About Apps Managing Apps

# About Apps

Apps is short for Applications. Apps are little self-contained programs used to enhance the existing functions of your device or service. The WD My Cloud Mirror device provides various apps that allow you to use your device more productively.

**Note:** WD recommends that you fully understand the nature of any app before you install it on your device.

Note: Obtain support for each app through the individual vendor.

WD My Cloud Mirror comes with various apps installed. There is also a list of available apps for you to choose from on the Add an App screen.

#### **Managing Apps**

The Apps screen displays a list of the currently installed apps. From this screen, you can use your installed apps, add new apps, or remove apps you no longer want to use.

#### **Viewing Apps**

1. On the navigation bar, click **Apps** to display the Apps screen:

		Access Backups			
Apps					
	HTTP Download	is.			
FTP Downloads		-		Test	
P2P Downloads				Browse	
Web File Viewer				0

		Date 01/10/2014			
D₽ - <b>D₽ +</b>		Time 10AM 🕥	48 💌		
	Create				
	HTTP Download	ts Oueue			

2. To select an app, click the name of the app in the left pane. The app displays in the right pane.

#### Adding an App

Use the following steps to add an app to your WD My Cloud Mirror device:

- 1. On the navigation bar, click **Apps** to display the Apps screen.
- 2. Click the **Add an App** icon in the lower left side of the screen. The first time you add an app, the Terms of Service screen displays. Read and accept the agreement.

<b></b> Term	s of Service			
IMPORTANT DOCUMENT THAT REQ INDIVIDUAL COURT OF I	OUD APP CENTEF - READ CAR CONTAINS A B UIRES THE RES . BASIS, LIMITS Y .AW, AND WAIVE ONS, CLASS ARB	EFULLY. - 4. For details about the app, click **Details**. Close the Details screen.
- 5. Place a check next to the app(s) you'd like to add to your device and click **Install**. The selected apps are added to your device.

#### Manually Adding an App

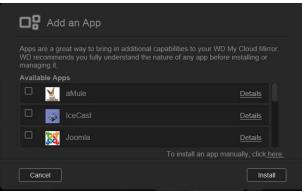

If you have an app you'd like to add that is not listed on the Add an App screen, use the following steps to manually add that app to your WD My Cloud Mirror device.

**Note:** WD recommends that you fully understand the nature of any app before you install it on your device.

1. On the navigation bar, click **Apps** to display the Apps screen.

K AR	Shares Cloud	Д Access	Bachups	Storage	Apps	>

- 2. Click the Add an App icon **mathematical** in the lower left side of the screen.
- 3. Scroll to the bottom of the Add an App screen and click the **To install manually, click here** link.

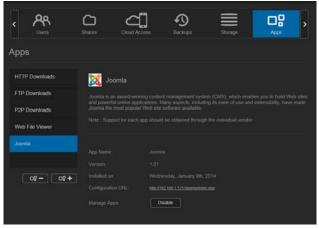

- 4. Navigate to the app you'd like to install on your device.
- 5. Select the app and click **Open**.
- 6. The selected app is added to your device.

#### Deleting an App

Use the following steps to delete an app from your WD My Cloud Mirror device.

1. On the navigation bar, click Apps to display the Apps screen.

- 2. From the Apps list in the left pane, select the app that you'd like to delete from the device.
- 3. Click the **Remove an App** icon **\_\_\_\_** in the lower left of the screen.
- 4. In response to the confirmation message, click **OK**. The app is removed from the device and no longer displays in the user account list.

#### Updating an App

Use the following steps to update an app that you've added to your WD My Cloud Mirror device.

- 1. On the navigation bar, click **Apps** to display the Apps screen.
- 2. If there is an update for one of the apps you've added to your device, an Updates available link displays at the top right of the screen.
- 3. Click the Updates Available link to display the Updates Available screen.

Squ	eezeCenter	Details

- 4. Select the app you'd like to update from the list and click **Update**.
  - If you'd like to view the details of the update, click **Details**.
  - Click **Back** to return to the Update screen.

# Managing Storage on WD My Cloud Mirror

About Storage RAID Storage Disk Status

### About Storage ≡

The Storage page allows you to configure the storage within your device and view the status and capacity of its disks. This chapter provides details on managing the storage on your WD My Cloud Mirror device.

C Users	<b>C</b> Shares	Cloud Access	Backups	Storage	Apps
Storage					
RAID	RAID Prof	file			
Disk Status					
	RAID Volu	ume			
		me_1 JBOD			
	Change R	me_2 JBOD			

### **RAID Storage**

RAID (Redundant Array of Independent Disks) allows you to store the same data in different places on multiple hard drives, providing necessary redundancy, greater performance, and data integrity. There are several different levels of RAID, each one providing a different method of sharing or distributing data among the drives. Your WD My Cloud Mirror device allows you to select from the following storage modes:

**Note:** The difference between a drive and a volume is that a volume can be a single drive or multiple drives.

RAID Mode	Description
JBOD	The use of one or more drives not in a RAID configuration but managed as separate logical volumes.
Spanning	Combination of drives in a linear fashion to create one large logical volume.
RAID 0	RAID 0 mode provides disk striping across all drives in the RAID drive group. RAID 0 does not provide data redundancy but does provide the best performance of any RAID level. RAID 0 breaks up data into smaller segments and stripes the data segments across each drive in the drive group.
RAID 1(default)	In RAID 1 mode, the RAID controller duplicates all data from one drive to a second drive in the drive group. RAID 1 provides complete data redundancy but cuts the required storage capacity in half.

#### Viewing the Current RAID Mode

Use the following steps to view the RAID mode currently used on your device.

- 1. On the navigation bar, click **Storage** to display the Storage screen.
- 2. Click **RAID**, if not already selected.
- 3. In the RAID Profile, the following information displays:
  - RAID Health
  - Auto-Rebuild status (whether or not Auto Rebuild is turned on)
  - RAID Volume shows how many volumes the RAID or JBOD is configured for.

<	<b>A</b> Users	Charles Shares		Backups	Storage	Apps >
Stor	age					
RAI		RAID P	rofile			
Disk	Status					
		RAID V	olume			
			olume_1 JBOD			
		Chang	e RAID Mode			

#### Changing the RAID Mode

Use the following steps to change the current RAID mode on your WD My Cloud Mirror device.

WARNING! Changes made to your RAID mode will delete all of your data and your user settings. See "Saving a Configuration File" on page 122 for information on saving your user settings.

- 1. On the navigation bar, click **Storage** to display the Storage screen.
- 2. Click **RAID**, if not already selected.

<b>D Profile</b> D Health Heal			
ID Volume			
Volume_1 JBOD			
Volume_2 JBOD			
	D Volume Volume_1 JBOD	D Volume Volume_1 JBOD 2.TB Volume_2 JBOD 2.TB	Volume_1 JBOD 2.TB Volume_2 JBOD 2.TB

- 3. Click **Change RAID Mode** at the bottom of the screen.
- 4. Review the Warning message and click **OK**.

5. Select the RAID mode you'd like to use for your WD My Cloud Mirror device.

RAID 1 Configuration
Two instantaneous copies of the data are recorded on separate hard drives so that, if one of them fails, the other(s) continue to read/write data until the faulty hard drive is
replaced.
Switch to RAID 1 (

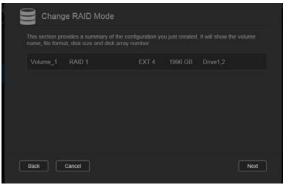

#### Options include:

JBOD	The use of one or more drives not in a RAID configuration but managed as separate logical volumes.
Spanning	Combination of drives in a linear fashion to create one large logical volume.
RAID 0	Data is striped across multiple hard drives, enabling accelerated reading and recording of data by combining the work of two or more drives to increase performance.
RAID 1 (default)	Two instantaneous copies of the data are recorded on separate hard drives so if one of them fails, other(s) continue to read/write data until the faulty hard drive is replaced.

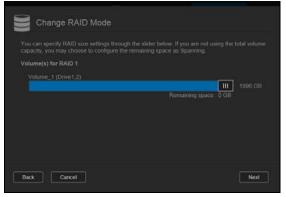

- 6. Select the **Switch to <RAID Mode>** check box and click **Next**.
- 7. Review the status of your hard drives and click **Next**.

Change RA	ID Mode	
Drive1		
Drive2		
Back Cancel		Next

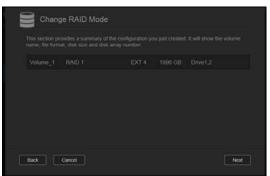

8. Review the status of your volumes and click Next.

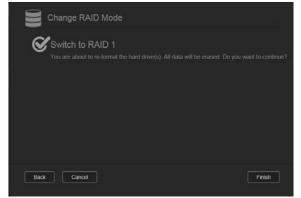

9. If the Volume slider displays, select the amount of space you'd like to dedicate to the selected RAID mode. The Volume slider displays for RAID1 (default).

- If you choose not to use the entire volume for your RAID selection, you can configure the remaining disk space as Spanning by selecting the Configure the remaining disk space as Spanning check box.
- 10. Click Next.

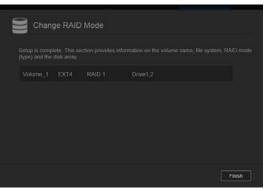

11. Review the summary of your selections and click Next.

- 12. Review the warning screen and click **Finish**.
- 13. The requested hard drive changes begin. Do not turn off your WD My Cloud Mirror device while these changes are in progress.

Change RAID Mode
Be patient while the WD My Cloud Mirror device partitions your drive. Do not hum off the NAS at this stage.

14. When the process is complete, click **Finish** again.

#### Auto-Rebuilding RAID

The Auto-Rebuilding option allows you to automatically rebuild the RAID for your WD My Cloud Mirror device in case of drive corruption. Use the following steps to enable the auto-rebuild option.

- 1. On the navigation bar, click **Storage** to display the Storage screen.
- 2. Click **RAID**, if not already selected.

3. Review the **Auto-Rebuild** field to determine whether your WD My Cloud Mirror device is currently set up for auto-rebuild.

	<b>Ш</b> Home	Users	CD Shares	Cloud Access	Backups	Storage

		RAID Profil	e			
Disk S	tatus					
Volum	e Virtualization			• •		
		RAID Volu				
		E Volum				
		Change RA	ID Mode			

If Auto-Rebuild is OFF (default), click the toggle button is to enable Auto-Rebuild.

#### **Disk Status**

The Disk Status screen identifies the health of the disk drives as well as the status and information on each drive used in your WD My Cloud Mirror device. The Disk Status screen consists of the following areas:

- Disks Profile: This area displays the general status of all of the disk drives on your device.
- **System Disks**: This area identifies the drives on your device, the status of each drive, and the amount of space on that drive.

My Cloud Mirro	or			A. ?. A.
< Contraction of the second se	Shares Cloud Ac	Backups	Storage	Apps
Storage				
RAID Disk Status	Disks Profile Disk Health		cara	
	System Disks			
	Drive1			S.M.A.R.T. Data
	Drive2			S.M.A.R.T. Data

Note: If a drive is not supported, the status is not compatible.

#### Viewing Hard Drive Information

Use the following steps to view status of the disks on your WD My Cloud Mirror device.

- 1. On the Storage page, click **Disk Status**, if not already selected.
- 2. Select **Drive <drive #>** next to the disk for which you'd like to view information.

< R Users	Charles Circ	ud Access Backu	ps Storage	Apps >
Storage				
RAID	Disks Profile			
Disk Status			Cattor	
	System Disks			
	Drive1			S.M.A.R.T. Data
	Drive2			S.M.A.R.T. Data

3. Review the hard drive information and click **Close**. The Hard Drive Information screen displays the following data:

Hard Driv	ve Information	
Vendor Model Serial Number	WDC WDC WD20EFRX-68AX9N0 WD-WMC301430184	
	2 TB 80 00A80	
		Close

Vendor	The vendor from whom the hard drive was obtained.
Model	The model number of the hard drive selected.
Serial Number	The serial number of the hard drive selected.
Capacity	The capacity of the hard drive selected.
Firmware Version	The current firmware version used on the drive selected.

# Playing/Streaming Videos, Photos, & Music

Media Servers Media Storage Enabling DLNA and iTunes Accessing Your Personal Cloud Using Media Players Accessing Your Personal Cloud Using iTunes

#### **Media Servers**

WD My Cloud Mirror is designed to serve as your home's media server. It enables you to stream photos, music, and videos to your DLNA-compatible devices and music to your iTunes-compatible devices.

Both DLNA-compatible and iTunes-compatible devices search for media stored in any Public share that has media serving enabled. By default, DLNA Media is disabled. Once you enable it on the Settings > Media Server page, the media serving for the Public share is also automatically enabled. For all other shares, the media serving remains off.

If you do not want DLNA to display specific media files, place them in a private share that is set to disable media sharing. (See "Making a Share Private" on page 54.)

#### Media Server Overview

The WD My Cloud Mirror device uses TwonkyMedia as its DLNA media server. It streams your music, photos and videos to compatible devices in your home. Playing media on a compatible device is easy.

The media server searches for all the media stored in the Public share on the WD My Cloud Mirror device connected to your home network. After enabling media serving for the device (see "Enabling DLNA and iTunes" on page 98), you can just transfer your multimedia content to the Public share on your WD My Cloud Mirror device, and you are ready to stream and view content on your home entertainment center, game consoles (for example, Xbox 360<sup>®</sup> or PlayStation<sup>®</sup> 3), WD TV Live<sup>®</sup> media player, or DLNA<sup>®</sup> 1.5 digital media adapters), and other PC computers on your home or office network. Visit *http://www.dlna.org* for further information on DLNA.

#### iTunes Overview

You or anyone connected to the WD My Cloud Mirror device can use iTunes to play stored music files. iTunes creates a virtual music library on the device and treats it as an iTunes repository, making it possible to stream music files from the WD My Cloud Mirror device to Windows or Mac computers running iTunes.

iTunes scans any shares that have the Media Serving setting enabled, including the Public share by default.

#### Media Types Supported

1	(A)	1
Audio files	Video files	Image Files
3GP	3GP	BMP
AAC	ASF	JPEG
AC3	AVI	PNG
AIF	DivX	TIF
ASF	DV	
FLAC	DVR-MS	
LPCM	FLV	
M4A	M1V	
M4B	M2TS	
MP1	M4P	
MP2	M4V	
MP3	MKV	
MP4	MOV	
MPA	MP1	
OGG	MP4	
WAV	MPE	
WMA	MPEG1	
	MPEG2	
	MPEG4	
	MPG	
	MTS	
	QT	
	QTI	
	QTIF	
	RM	
	SPTS	
	TS	
	VDR	
	VOB	
	WMV	
	Xvid	

**Note:** Some devices may not support playback of all these files. Please refer to your device's user manual to see which formats are supported.

#### Media Types Supported by iTunes

**Note:** iTunes 10.4 or later only supports music files. See Knowledge Base Answer ID 8412 for additional information on iTunes-supported versions.

The iTunes Media Server supports the following file extensions: FLAC, M4A, MP3, MP4A and WAV.

**Note:** Some devices may not support playback of all these files. Please refer to your device's user manual to see which formats are supported.

#### Media Storage

You can access and store media content on the WD My Cloud Mirror device by means of network shares. Shares, similar to folders or directories, are areas set up to organize media and access them from your network. Shares can be shared with everyone (public) or with selected users on your network (private).

The device comes pre-configured with the Public network share, which contains the following folders for media storage:

- Shared Music—Stores music files you want to share with other users.
- **Shared Pictures**—Stores image files you want to share with other users.
- Shared Videos-Stores video files you want to share with other users.
  - **Note:** You will notice that the Public share's Shared Music and Shared Pictures shares contain mirrored and uploaded subfolders. These folders are needed by Twonky 7.2. You can now upload all media types to the uploaded subfolder from a DLNA client with "upload" capability.

Go to the Twonky configuration site (NAS\_IP:9000) to aggregate content from all NAS devices with DLNA capability on your network to the mirrored folder. Uploading and mirroring are best left to expert users, as these features are not supported by WD customer support.

#### **Enabling DLNA and iTunes**

The Media page of the Settings Screen allows you to enable or disable the DLNA and iTunes media servers. Media server utilities for re-scanning the NAS or fully rebuilding the DLNA database are also on the Media page.

#### **Enabling DLNA**

1. On the Navigation bar, click **Settings** and in the left panel click **Media**.

DLNA Media Server		
Media Streaming	ON III O View Media Players >>	
Version		
Media	Music Tracks:0 Pictures:17 Videos:0	
Last Update	Wednesday, July 31st, 2013, 4:00:00 AM	
DLNA Database	Rescan Rebuild	

- 1. In the DLNA Media Server area, toggle **m** the Media Streaming toggle to ON.
  - **Note:** Media Streaming is OFF by default. The media server must be enabled before you can provide media serving for a share. (See "Creating a New Share" on page 53 for instructions on how to enable media serving on a share.)
- 2. Click **View Media Players** to display a list of the media players/receivers on your home network.

Note: If Media Streaming is OFF, this field does not display on your screen.

3. On the Media Streaming Options screen, select the media device you'd like to receive streaming music, video, or photos.

Options

Last Update	Wednesday, July 31st, 2013, 4:00:00 AM
DLNA Database	Rescan Rebuild 🛈

 To view DLNA media server information, on the Settings screen, click Media in the left panel.

#### **Rescanning/Rebuilding the DLNA Database**

The WD My Cloud Mirror device automatically rescans and rebuilds the DLNA database; however, if you suspect that your database is corrupted, use the following steps to either rescan or rebuild your DLNA database:

**Important:** Use caution when completing this procedure. Rebuilding the DLNA server database could take a considerable amount of time, depending on the number and size of the files involved.

- 1. On the Navigation bar, click **Settings** and then click **Media** in the left panel.
- 2. In the DLNA Database field, click one of the following.
  - Rescan: The WD My Cloud Mirror device searches for changes made to your media libraries. Try this option first.
  - **Rebuild**: The WD My Cloud Mirror device rebuilds the DLNA database from scratch.

#### Enabling iTunes

1. On the Navigation bar, click **Settings** and then click **Media** in the left panel.

iTunes	
Folder	Root (j)
Password	
MP3 Tag Codepage	ISO-8859-1 Constant Western European(ISO-885
Auto Refresh	None 💿 🛈
	Refresh
Save	

1. In the iTunes area iTunes field, click the toggle button it to enable iTunes (if not already enabled).

Note: iTunes is ON by default. To disable it, click the toggle button mu to OFF.

- 2. In the Folder field, select **Root**, if not previously selected. This field points iTunes to the root directory on your WD My Cloud Mirror device.
  - If your want to specify a directory on your device where iTunes can access your media:
    - a. Deselect the **Root** check box.
    - b. Click **Browse** and then navigate to the folder where iTunes can access your media.
    - c. Click **Save** at the bottom of the iTunes area.
- 3. In the Password field, enter a password to be used when accessing your WD My Cloud Mirror device on iTunes.

**Note:** Leave the Password field blank if you don't want to use a password to access your device media in iTunes.

- 4. If you'd like to change the default MP3 Tag Code page, select the page from the dropdown menu.
- 5. For Auto Refresh, select the frequency of the media refresh for iTunes from the dropdown menu.
- 6. Click Save to save your settings.

#### **Refreshing iTunes**

Use the following steps to refresh the iTunes directory. This allows iTunes to pick up any new media.

- 1. On the Navigation bar, click **Settings** and then click **Media** in the left panel.
- 2. In the iTunes database field, click **Refresh**.

#### Adding Media Content to the Folders

1. Open Windows Explorer or Mac Finder.

- 2. Copy your music files to the Shared Music folder.
- 3. Follow the same process to place your videos and pictures into their respective Pictures and Video folders.

**Note:** You can also access your media files using WD My Cloud Desktop app (see "WD My Cloud for Desktop App" on page 31).

#### **Accessing Your Personal Cloud Using Media Players**

Now that you have copied your files to one of the Shared folders, you can use a variety of media players to stream media. The following types are supported:

- WD TV Live Media Players
- Windows Media Player 11 (comes with Windows Vista)
- Windows Media Player 12 (comes with Windows 7 and Windows 8)
- Xbox 360
- PlayStation 3
- Other media players:
  - BluRay Players
  - Network Connected TVs
  - Digital Picture Frames
  - Network Music Player
- DLNA Devices

**Note:** For specific information on using and updating the media player, go to the appropriate support site.

#### WD Media Players

You can connect the various WD TV and WD Media Players to your home network for access to media content stored in a network drive such as the WD My Cloud Mirror device. For details on using a WD Media Player to access files on your device, see Knowledge Base Answer ID 2676 or refer to your WD Media Player User Guide.

#### Other Media Players

Following are general steps for setting up devices such as digital picture frames, Blu Ray players, network-connected TVs, and digital media adapters:

- 1. Make sure that your WD My Cloud Mirror device is connected to your home's local network and is powered on.
- 2. Follow the user instructions provided with your media player to proceed through any initial setup or installation of drivers.
- 3. Using the navigation feature on your player, scan and detect your WD My Cloud Mirror device on your network.
- 4. Depending on the player you have, you may need to access a Settings/Network Setup page in the user interface to establish connection so that your player can link to your WD My Cloud Mirror device. Please refer to your player's user guide for specific instructions.

#### **DLNA** Devices

See specific DLNA media device user manuals for instructions on connecting a DLNA device to your local area network so you can access content on the WD My Cloud Mirror device. Go to *http://www.dlna.org* for a list of DLNA-certified devices and for further information.

#### **Accessing Your Personal Cloud Using iTunes**

You or anyone connected to the WD My Cloud Mirror device can use iTunes to play stored music files. This service creates a virtual music library on the device and treats it as an iTunes repository, making it possible to stream music files from the WD My Cloud Mirror device to Windows or Mac computers running iTunes. For a list of supported media types, see "Media Types Supported" on page 97.

- **Note:** iTunes 10.4 or later only supports music files. See Knowledge Base Answer ID 8412 for additional information on iTunes supported versions.
- **Note:** iTunes scans any shares that have the Media Serving setting enabled, including the Public share by default.

You can drag and drop media files into the corresponding folders in the Public share (e.g., music files into the WDMyCloudMirror/Public/Shared Music default share).

#### Streaming Media in iTunes

iTunes is enabled by default in the dashboard. See "Enabling iTunes" on page 100 for more information on configuring iTunes.

- 1. Launch iTunes on your computer.
- 2. Click **WDMyCloudMirror** under the Shared section of the left pane. If you have copied music to the /Public/Shared Music folder or a video to/Public/Shared Videos, and it is in a format supported by iTunes, it is listed in the right pane.
- 3. Double-click a media file you'd like to play.

# 11 Configuring Settings

General Network Media Utilities Notifications Firmware Update

The Settings option on the navigation bar allows the Administrator to view and customize the WD My Cloud Mirror device's system, network, media, utilities, notifications, and firmware settings. This chapter explains how to configure the various settings for your WD My Cloud Mirror device.

## General

On the General page you can:

- View and modify the device name and description
- Select the language in which the web pages should display
- Set the date, time, and time zone for the device
- Enable cloud access for your device
- Set energy saving options
- Enable and configure Time Machine backups for your Mac
- Enable various services for your device

# WARNING! Renaming the WD My Cloud Mirror device forces all the network computers to remap their shared network resources. Change the device name only when necessary.

## Accessing the General Screen

On the Navigation bar, click **Settings**. The General page displays:

< Charles Clo	Access Back	pps Storage	Apps	<b>දිරිදි</b> Settings	
Settings					
General Network	Device Profile Device Name	WDMyCloudMirror	•		
Media Utilities		WDMyCloudMirror WUC243000095			
Notifications Firmware Update	Language & Clock	k English 🕥			
		(GMT-08.00) Pacific Time (GMT-08.00) Pacific T		0	
	Cloud Access Cloud Service Connection Status Dashboard Cloud Access	ON III Contection Connected i Port forwarding connection III OFF i			
	Energy Saver Drive Sleep LED Power Schedule Web Access Timeout	ON         III         I           ON         III         I           III         OFF         I           5 minutes         I         I			
	Mac Backups				
	Services Recycle Bin	Clear			

## **Device Profile**

Device Profile		
Device Name	WDMyCloudMirror	
Description	WDMyCloudMirror	
Serial Number	WUC243000095	

1. In the Device Profile section of the General page, view or modify the following settings:

Device Name	Enter a unique name for your device to identify it on the network. The device name can be up to 15 characters long and can not include special characters (e.g., @, #, \$ etc.).
Device Description	The default description is WDMyCloudMirror. If desired, enter a different description for your device. The device description can be up to 32 characters long and can not include special characters (e.g., @, #, \$ etc.).
Serial Number	Displays the WD-assigned number that identifies the specific unit. This field can not be updated.

2. If you made any changes, click **Save** (appears next to the updated field once a change is made).

**Note:** Throughout the WD My Cloud Mirror dashboard, the **Save** and **Cancel** buttons display only if you make changes.

## Language and Clock

In this section of the General screen, you can change the language that displays in the WD My Cloud Mirror device's interface and set the date and time. The date and time are synchronized to the NTP (Network Time Protocol) server by default. You have the option of setting the date and time manually or allowing the NTP to access the Internet and automatically set the time. If you are not connected to the Internet, you must enter the date and time manually.

Language & Clock	(
Language	English
Time Zone	(GMT-08:00) Pacific Time (US & Canada)
NTP Service	
Primary Server	time.windows.com <u>Configure&gt;&gt;</u>
Date & Time	Friday, February 07, 2014 4:31:43 PM
Time Format	12 😔

1. In the Language & Clock section, view or modify the following settings:

Language	From the drop-down list, select the language you'd like to display on your WD My Cloud Mirror Personal Cloud Storage web pages. The default language is English.		
Time Zone	From the drop-down list, select the time zone where your device is located.		
NTP Service	Enable or disable NTP service, which automatically synchronizes your device to update the time and date. A dialog box displays current NTP servers. You can add another NTP server if you choose.		
Primary Server	Change the primary server used for your NTP service.		
	<ul> <li>To change the primary server used for your NTP service, click Configure,</li> </ul>		
	• Click <b>Add User NTP</b> and enter the URL address of the new primary server.		
	Click Save.		
Date & Time Displays the device date and time. This inform synchronized to the NTP (network time protoc default.			
Time Format	From the drop-down list, select <b>12</b> (12-hour clock) or <b>24</b> (24-hour clock).		

2. Click **Save** for each change you make.

## **Cloud Access**

Use the following steps to turn cloud access on or off for all users (i.e., control whether computers and mobile devices can access the content on the WD My Cloud Mirror device).

**Note:** This action turns on cloud access for the entire device. To turn on access for an individual user, see "Configuring Cloud Access for a User" on page 22

1. Scroll down to the Cloud Access area of the General screen.

Cloud Access		
Cloud Service		
Connection Status	Connected (Relay connection established)	<b></b>
Dashboard Cloud Access	III OFF G	

- 2. In the Cloud Service field, ensure that the toggle button into set to ON (default). The Connection Status changes to Connected (Relay connection established).
- 3. Click **Configure** to change the type of connection you use for your cloud access.

Configures connection o					
Connectivity	Auto	Manual	Win XP	0	
Content Database	Attempts to e router.	establish a dire			

On the Cloud Access Connection Options screen, there are three access options:

- **Auto**: Auto uses uPnP to attempt to open ports on your router. If successful, a direct connection is established between your device and your apps.
- Manual: Establishes a connection through the two selected ports. If either port is unavailable, a relay connection is established. A manual router configuration is required for this option. See Knowledge Base Answer ID 8526 for information on how to set up your router for manual setup.
- Win XP: Establishes a connection through ports 80 and 443. If these ports are unavailable, a relay connection is established. This option is required if you're using Windows XP.

**Note:** By default, the WD My Cloud Mirror device automatically establishes a direct connection between your mobile devices and router.

- 4. Select a connection type:
  - Auto: Click Auto.
  - Manual: Click Manual and enter the External Port 1 (HTTP) and External Port 2 (HTTPS) numbers.
  - Win XP: Click Win XP.

- 5. Click Save.
- 6. In the Dashboard Cloud Access field, click the toggle button **m** to turn on remote access to the dashboard.

**Note:** Selecting this option allows you to perform administrator functions remotely.

7. Review the information on the screen and then enter and reenter a password for your administrator account. Click **Save.** 

Enabling access to this Dashboard v current network helps you manage th it also slightly increases risks for una My Cloud Mirror.	his device remotely. However,
Are you sure you want to enable this	

- If your administrator account already has a password associated with it, review the Dashboard Cloud Access screen and click Save.
  - **Note:** If you set your Cloud Setting to Manual, you will have to access your device remotely using the ports you selected during the manual cloud setup.

Example: If you set up your manual HTTP port as 5040, you'd use the following address to access your device: http://<Device IP Address>:5040.

## **Energy Saver**

The Energy Saver fields allow you to reduce the energy required to run your WD My Cloud Mirror device. Use the following information to configure the energy saving options on your WD My Cloud Mirror device.

Energy Saver	
Drive Sleep	<u>on</u> ()
LED	ON ()
Power Schedule	OFF
Web Access Timeout	5 minutes 💿 🛈

View or change the following settings:

Drive Sleep	<ul> <li>Enabling this function allows the hard drives to go into standby mode to save power after a designated period c inactivity. Drive Sleep is enabled to sleep after approximately 10 minutes by default.</li> <li>To enable/disable Drive Sleep, click the toggle button .</li> </ul>		
LED	Enabling this function allows the device LEDs to go into standby mode to save power. LED is enabled by default.		
Power Recovery	<ul> <li>To enable/disable LED, click the toggle button .</li> <li>Automatically restarts your device from a previously unexpected shutdown due to power failure. Power Recovery is enabled by default.</li> </ul>		
	<i>Note:</i> If you disable this feature, your device will not automatically power on after an unexpected shutdown.		
	<ul> <li>To enable/disable Power Recovery, click the toggle button</li> </ul>		
Power Schedule	The Power Schedule allows you to schedule shutdowns for your WD My Cloud Mirror device.		
	1. To enable Power Schedule, click the toggle button		
	2. Click <b>Configure</b> .		
	<ol> <li>Use the slider bar to configure the start and stop times for your device.</li> </ol>		
	4. Click 🙆 to shut down the device for 24-hours.		
	5. Click <b>Save</b> .		
	Note: You can use WD Quick View to wake up the system. For information and to download this app go to WD's online Learning Center.		
Web Access Timeout	Automatically logs you out of the system after a designated amount of time.		
	<ul> <li>From the Web Access Timeout drop-down menu, select an amount of time you'd like to use for your system timeout. The system updates automatically.</li> </ul>		

## Mac Backups

This section of the General screen enables or disables Time Machine backups of Mac computers.

**Important:** You must set a password for your Administrator account in order to restore your Time Machine backups.

#### To configure backup settings:

1. In the Mac Backups area, click the toggle button into enable Time Machine backups if not previously enabled.

Mac Backups		
Time Machine	ON III () Configure>>	

- 2. Click the **Configure** link to display the Time Machine Settings dialog.
- 3. From the **Select a Share** drop-down list, select a share you'd like to use to back up your Mac data.

🕚 Time Ma	chine		
Configure settings for	your Time Machine backups	for your Mac.	
Select a share	TimeMachineBackup	$\odot$	
Cancel			Save

4. Click Save.

**Important:** Once Time Machine begins to back up your files to a selected share, we recommend that you continue to back up to that share. Switching shares generates a new backup file which will not contain your previously saved information.

## Service

This section of the General screen enables or disables the Recycle service available on your WD My Cloud Mirror device.

Services	
Recycle Bin	Clear

## Network

The **Network** screen displays the device's MAC and IP addresses and allows you to set network options such as FTP access, remote servers, and workgroups.

< C	iloud Access Back	<b>D</b> kups	Storage	Apps	<b>ÇÇŞ</b> Settings

	IPv6 Network Mode	Auto	DHCP	Static Off	<b>i</b>	
	Link Speed	Auto	) ()			
		OFF(1500)	• • i			
	Max SMB Protocol	SMB 2	• i			
		OFF	<b>i</b>			
		ON	<b>i</b>			

## **Network Profile**

The Network Profile section of the Network screen displays network information for the WD My Cloud Mirror device.

Network Profile	
Mac Address	00:90:A9:62 EA:DE
IPv4 IP Address	192.168.1.6
IPv6 IP Address	

The Network Profile section displays the following information:

MAC Address	The Media Access Control (MAC) address for this device.
IPv4 IP Address	The IP version 4 address for this device.

## **Network Service**

The Network Services section of the Network screen allows you to enable or disable the services available on your WD My Cloud Mirror device.

Network Service	
IPv4 Network Mode	Static DHCP () Configure >>
Link Speed	Auto 💽 🛈
Jumbo Frame	OFF(1500) 🕥
Max SMB Protocol	SMB 2 💽 🛈
FTP Access	III OFF ()
AFP Service	
NFS Service	III OFF
WebDAV Service	III OFF
LLTD	III OFF ()
SSH	III OFF
Dynamic DNS	III OFF ()

1. Review or update the following:

IPv4 Network Mode	<ul> <li>By default, the network mode is set to DHCP, which means the WD My Cloud Mirror device automatically gets the IP address and other settings from your network.</li> <li>Select the method of assigning the device's unique IPv4 address:</li> <li>Static: Static IP lets you set an IP address manually. You will be prompted for IP Address, Subnet mask, Gateway IP address, and DNS Server. (If you don't know this information, please check your router settings.)</li> </ul>
	• <b>DHCP</b> : DHCP Client causes the WD My Cloud Mirror device to obtain an IP address and associated settings automatically from the local DHCP server.
	<i>Note:</i> When configuring Static or DHCP, record your Subnet mask, Gateway I address, and DNS Server in a safe location for future reference. This information will not be displayed once it is entered into the WD My Clou Mirror server.
Link Speed	Select the link speed for your network from the drop-down menu and click <b>Save</b> . Options Include:
	• Auto
	• 100
	• 1000
Jumbo Frame	Jumbo frames are large IP frames used to increase performance over supported networks. Select the Jumbo Frame for your network from the drop-down menu and click <b>Save</b> .
	<i>Note:</i> All devices on your network (e.g., router, computer) must support and b configured for this option in order to maximize performance.
Max SMB Protocol	Server Message Block, version 2. Select this option to support
	Windows File History in Windows 8.

	2. Click <b>Configure</b> .
	3. On the DDNS Settings screen, enter the following information:
	• Server Address: Select a server address from the drop-down menu.
	• Host Name: Enter a Host Name for the server.
	• User Name or Key: Enter a User Name or Key for the server.
	• Password or Key: Enter a password or key for the server.
	<ul> <li>Verify Password or Key: Re-enter the password or key for the server.</li> </ul>
	4. Click <b>Save</b> .

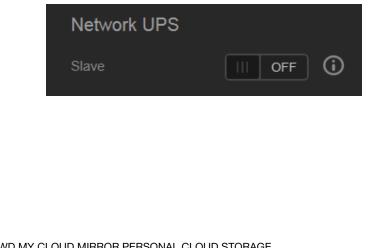

## Network UPS

An Uninterruptible Power Supply (UPS) is a device that works off of a battery and keeps devices that are connected to the UPS port running for at least a short time if the main power source goes out. When a WD My Cloud Mirror device is connected via USB to the network drive the drive will automatically shut down when the UPS is drained to a specified percentage.

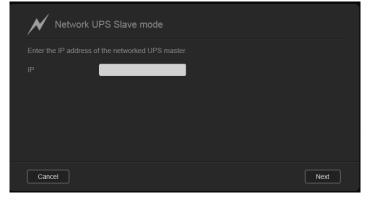

Communication with the WD My Cloud Mirror device is done using a master/slave protocol in which the master device controls the slave devices.

When the UPS is connected to the WD My Cloud Mirror device by the USB, the device automatically becomes a UPS Network Master. Other WD My Cloud devices that are connected to that UPS can be pointed to the IP address of the UPS Master. If the UPS is discharged to the specified percentage, all of the WD My Cloud Mirror slave drives will automatically shut down properly.

To set up network UPS:

1. Click the Slave toggle button me to ON. The Network UPS Slave mode screen displays.

2. Enter the IP address of the UPS master. An "in progress" screen displays and when the setting is updated, the Network screen displays with Network UPS Slave set to OFF.

## Network Workgroup (Windows)

The Network Workgroup section of the Network screen allows you to enable or disable the workgroup options available on your WD My Cloud Mirror device.

Network Workgrou	ıp			
Workgroup	workgroup	<b>i</b>		
Local Master Browser	III OFF (			

#### Workgroup

The Workgroup feature allows devices in the same workgroup to access one another. This option is only available for Windows operating systems. Each time you add a device to your network, assign it the same workgroup name to enable access.

- 1. In the Workgroup file, enter the name of the workgroup for your network.
- 2. Click Save.

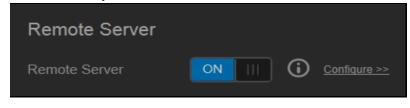

#### **Local Master Browser**

The Local Master Browser feature allows you to collect and record resource and/or service information across multiple locations.

To enable/disable the Local Master Browser, click the toggle button

## **Remote Server**

The Remote Server section of the Network screen allows you to enable your WD My Cloud Mirror device to act as a remote server, allowing you to back up shares from another WD My Cloud Mirror on the local LAN or WAN.

**Note:** To see your WD My Cloud Mirror device over the Internet, ensure that you've added port forwarding rules for both SSH and Remote Backup services ("Port Forwarding" on page 119).

To enable Remote Server:

- 1. Click the toggle button **m** to ON.
- 2. Click **Configure**. The Remote Server screen displays:

Remot	Server
Setup a backup pa	sword to enable remote backups for this device to a remote server
	ou have added port forwarding rules for both SSH and Remote Settings > Network > Port Forwarding in order to see your WD My over the internet.
Password	
Cancel	Save

- 3. In the Password field, enter a password to be used to access remote backups for this device to a remote server.
- 4. Click Save.

SSH	
Enabling your WD My Cloud Mirror enable SSH. Please note that modi device outside the normal operation warranty.	lying or attempting to modify this
Password *	
Confirm password	
Cancel	OK

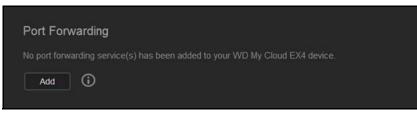

- 5. Review the SSH information and click the **I accept** check box.
- 6. Create a password for SSH login and then click **OK**.

## Port Forwarding

The Port Forwarding section of the Network screen allows you to manage your connections to particular services by assigning default or custom port numbers.

For additional information on Port Forwarding, see Knowledge Base Answer ID 10649.

#### **Adding Port Forwarding Services**

1. Click Add to add port forwarding service(s) to your WD My Cloud Mirror device. On the

Port Forwarding Se	ttings
Select the default service scan	Customize a port forwarding service
Cancel	Next

Port Forwarding Settings screen, click either **Select the default service scan** or the **Customize a port forwarding service** and click **Next**.

- If you selected Select the default service scan: Select the default service scan you'd like to use for port forwarding and click Save.
- If you selected Customize a port forwarding service, complete the following fields:

**Service**: Enter a service for your port forwarding.

**Protocol**: Select a protocol from the drop-down menu.

External Port: Enter an external port number for your port forwarding.

Internal Port: Enter the internal port number for your port forwarding

2. Click Finish.

#### **Modifying Port Forwarding Services**

- 1. Click **Details** next to the port forwarding service you'd like to modify.
- 2. Make all necessary changes and click **Finish**.

#### **Deleting Port Forwarding Services**

- 1. Click **Details** next to the port forwarding service you'd like to delete.
- 2. Click **Delete**. Your Port Forwarding service is deleted and removed from the Port Forwarding list.

## Media

On the Media screen, you can enter DLNA (Digital Living Network Alliance) media server and iTunes media player settings so that you can enjoy media in every room in your house.

< Constant	Cloud Access Ba	Chups Storage	Apps	ون Settings
Settings				
General	DLNA Media S	erver

		Refresh		

- On the Navigation bar, click the Settings icon and then click Media in the left panel.
   Note: DLNA and iTunes only work on your local network.
- 2. For instructions on entering media settings on this page and then displaying or streaming media, see "Playing/Streaming Videos, Photos, & Music" on page 96.

## Utilities

On the Utilities page, you can test the WD My Cloud Mirror device and get diagnostic information, restore the device to factory defaults, reboot or shut down the device, and import or export a configuration file.

< Constant	Cioud Access	Backups	Storage	Apps	<b>دې</b> Settings

	Device Ma		idown Reboot			

To access the Utilities screen, click the **Settings** icon and then click **Utilities** in the left pane.

## System Diagnostics

Run diagnostic tests if you are having problems with your device. There are three types of diagnostic tests:

- Quick Test: The quick test checks the hard drives for major performance problems. The result of a quick test is a pass or fail evaluation of the hard drive's condition. The quick test can take several minutes to complete.
- Full Test: The full test is a more comprehensive drive diagnostic. It methodically
  tests each and every sector of the hard drives. You will be informed of the condition
  of the hard drive once the test is performed. The full test may take hours to
  complete, depending on the size and data configuration of the hard drives.
- **System Test**: The system test reviews the health of your device hardware (hard drives, fan, system clock, and device temperature).

System Diagnosti	cs		
Disk Test	Quick Test	Full Test	) (i)
System Test	System Test	<b>(</b> )	

#### **Running a Diagnostic Test**

- 1. On the Utilities page, click **Quick Test**, **Full Test**, or **System Test**. A progress bar displays, indicating test progress and whether the device passed or failed the test.
- 2. Review the test results and click **Close**.
  - If the device fails the test, click and then click Support to get assistance.

## System Restore

The system restore allows the Administrator to perform a full factory restore on the WD My Cloud Mirror device. This option restores your device to factory default settings with no data loss.

**Important:** Before doing a factory restore or a system update, you may choose to save your device's current configuration. At a later time, you can import a previously saved configuration. Keep in mind that importing a configuration after restoring factory defaults does not restore shares or users. See "System Configuration," to create or restore a configuration file.

Note: To erase all of the data on your device, see "Format Disk" on page 123.

System Restore			
Restore to Default	System Restore	6	

- 1. In the System Restore area, click **System Restore**.
- 2. Review the confirmation message and click **OK**.

The device reboots. Don't unplug the device during this rebooting process. Once the reboot is complete, launch the dashboard.

## System Configuration

The system configuration area allows you to save a configuration file or import an existing configuration file. This is useful if you perform a system restore and want to maintain your current configurations.

System Configura	ation			
System Config	Save Config File	Import File	<b>(i)</b>	

#### Saving a Configuration File

Use the following steps to save a configuration file.

- 1. In the System Configuration area, click Save Config File.
- 2. The configuration file saves to your desktop.

#### Importing a Configuration File

Use the following steps to save a configuration file.

- 1. In the System Configuration area, click Import File.
- 2. Navigate to the location of your saved configuration file and select it. The configuration file is loaded. The device reboots. Don't unplug the device during this rebooting process. Once the reboot is complete, launch the dashboard.

## **Device Maintenance**

The Device Maintenance area allows you to shut down and reboot your WD My Cloud Mirror device. This area also displays the amount of time the device has been up and running.

#### Shutting down the Device

Use the following steps to safely shut down your WD My Cloud Mirror device.

- 1. In the Device Maintenance area, click **Shutdown**.
- 2. Review the confirmation message and then click **OK**. Your WD My Cloud Mirror safely shuts down.

#### **Rebooting the Device**

- 1. In the Device Maintenance area, click **Reboot**.
- 2. Review the confirmation message and then click **OK**. Your WD My Cloud Mirror safely reboots.

## Scan Disk

The Scan Disk area allows you to scan your device's hard disks for any errors.

Scan Disk				
	All Volume(s)	$\odot$	Scan Disk	1

#### Scanning Your Disk

Use the following steps to run a disk scan on your WD My Cloud Mirror device.

- 1. In the Scan Disk area, select the volume you'd like to scan from the drop-down menu.
- 2. Click Scan Disk.
- 3. Review the confirmation message and click **OK**. Your WD My Cloud Mirror is scanned for disk errors.

## Format Disk

The Format Disk area allows you to format your device's hard disks.

Volume All Volu	ime(s) 😔	Format Disk

### Formatting Your Disk

WARNING! The Format Disk option erases all of the user data and shares permanently, retaining default shares. Data recovery programs cannot be used to restore data; all user data and shares are permanently deleted.

Formatting your disk will take several hours to complete.

Use the following steps to format the disks on your WD My Cloud Mirror device.

- 1. In the Format Disk area, select the volume you'd like to format from the drop-down menu.
- 2. Click Format Disk.
- 3. Review the confirmation message, select the check box, and click **OK**. Your WD My Cloud Mirror is formatted.

## Creating an ISO Image

An ISO image is a file that is an exact copy of an existing file system. Use the following steps to create an ISO image.

- 1. On the Navigation bar, click **Settings** and then click **ISO Mount**.
- 2. Click Create ISO Image.

Create	SO Image	
	CDROM(650MB/74MIN)

## Modifying an ISO Share

Use the following steps to modify an ISO share.

- 1. On the ISO Mount screen, select N next to the ISO Share that you'd like to modify.
- 2. Make any necessary changes and click **Save**.

## Delete an ISO Share

Use the following steps to delete an ISO share.

- 1. On the ISO Mount screen, select 🗊 next to the ISO Share that you'd like to delete.
- 2. Review the confirmation message and click **OK**. The ISO Share is deleted and removed from the ISO Share List.

## Notifications

The WD My Cloud Mirror device provides notifications about various events, such as firmware updates, the success of firmware installations, and system shutdowns. Notifications display in the Alert area at the top of the screen and are also available by email, depending on how your device is configured (for additional information on Alerts, see "Managing Alerts" on page 67).

The Notification page allows you to set up email addresses for up to five users who will receive notifications, set up SMS alert messages for mobile devices, and set the level of alert for which you will be notified

s Chares	Cloud Access	Backups	Storage	Apps	<b>çççş</b> Settings

Firmware Update	Show notifica Critical Only	tions for the followir	ng messages Critical and Warni	ng	

## Notifications Email

The Notification Email area allows you to set up email alerts and SMS notifications for specified users.

Notifications Email				
Alert emails	ON III	<b>(</b> )	<u>Configure&gt;&gt;</u>	
	ON III	6		

#### **Enabling Email Alerts**

- 1. On the Navigation bar, click the **Settings** icon and click **Notifications** on the left pane.
- 2. To enable Alert emails, click the toggle button **m** to on.
- 3. Click **Configure**.
- 4. On the Alert Notification screen, use the slider bar to select the level of alerts you'd like to receive by email:
  - Critical Only: Send only critical alerts to the specified email address.
  - **Critical and Warning**: Send both critical and warning alerts to the specified email address.
  - All: Send all alerts (Informational, Critical, Warning) to the specified email address.
- 5. Click New Email.
- 6. Enter the email address where you'd like to receive alert emails and click **Save**.
- 7. Repeat steps 5 6 to enter up to 5 email addresses.
- 8. Click Send Test Email to validate the email addresses you entered.
- 9. Click **OK** and then check your email for a validation email.

#### **Enabling SMS Notifications**

**Note:** Check with your SMS service provider to obtain their requirements for sending SMS messages. Certain carriers may require you to send SMS/ text messages by email.

- 1. On the Navigation bar, click the **Settings** icon and click **Notifications** from the left pane.
- 2. To enable SMS, click the toggle button Im.
- 3. Click **Configure**.
- 4. On the SMS Settings screen, enter the name of your SMS provider.
- 5. Enter the SMS URL with the message content set to be "Hello world"
  - **Note:** This SMS URL is used only for setup. No SMS message will be sent after setup is completed. Obtain the URL format requirements from your SMS service provider. They should contain the following parameters: username, password, destination phone, and message content.
- 6. Click Next.
- 7. Select the corresponding category for each SMS parameter from the drop-down menu.
- 8. Click **Finish**. Your SMS notification is now set up.

## Notification Display

The Notification Display allows you to select the type of notifications that are sent to you.

Show notifications for the	following messages	
Critical Only	Critical and Warning	

- 1. On the Notification Display screen, using the slider bar, select the level of notifications you'd like to view:
  - **Critical Only**: Send only critical alerts.
  - Critical and Warning: Send both critical and warning alerts.
  - All: Send all alerts (Informational, Critical, Warning).

The system automatically updates with your selection.

## **Firmware Update**

The Firmware Update page allows you to set up the device to update the My Cloud Mirror firmware automatically or to manually check for an update file. The current version number and the date of last update of the firmware also display on this screen.

< C Shares	Cloud Access Ba	Charlen Sto	rage		දිදුදු Settings

	Manual Update					
		Update fro	om File	<b>(</b> )		

## Auto Update

Auto Update allows you to schedule your WD My Cloud Mirror device to conveniently check for available software updates and install them automatically. This is the easiest way of ensuring the WD My Cloud Mirror firmware is current.

- **Note:** After a firmware update installs, the WD My Cloud Mirror device reboots. Since a reboot affects users' ability to access the cloud, schedule the updates to occur at times when the likelihood of users accessing the cloud are minimal.
- **Note:** If you enable Auto Update, you are asked to manually reboot your system when the update is completed.

Auto Update						
Enable Auto Update	ON		Ð			
	SUN	$\overline{\mathbf{O}}$	12:00	$\overline{\mathbf{O}}$	PM	0

#### **Updating Firmware Automatically**

- 1. To enable Auto Update, click the toggle button me to ON.
- 2. In the Update Schedule field, from the drop-down lists, specify the frequency (e.g., daily) and the time at which the device should look for an update on the WD website.
- 3. Click Save.

Once saved, your device will check for firmware updates at the specified time and day. If an update is available, it will automatically install and prompt you for a reboot.

## Available Updates

You can check for available updates at any time in the Available Updates area. This area also displays the current version of the firmware and indicates when the last firmware update was made.

ites	
Check for Update	] ()

#### **Checking for Updates**

- 1. In the New Firmware field, click Check for Updates.
- 2. Review the Update Firmware screen and click **OK**.
  - If an update is available, click **Install and Reboot**.

Firmware Up	iate versior	n found:
Firmware Releas	e Notes	

## Manual Update

Follow this procedure to perform a manual update.

**Note:** Ensure that you've downloaded the firmware file you need to install on your device from the WD Tech Support Downloads page at *http://support.wd.com/product/download.asp*.

Manual Update				
Firmware Image	Update from File	<b>i</b>		

#### Manually Installing an Update

- 1. In the Manual Update section, click Update from File.
- 2. Navigate to the firmware update file and click **Open**.
- Review the confirmation message and click OK. The update installs on your device. When the update is complete, your WD My Cloud Mirror device reboots.

# 12

## Replacing a Drive

Identifying a Faulty Hard Drive Replacing a Drive Rebuilding the Drive Returning a WD Drive

The My Cloud Mirror device is a limited user-serviceable product that allows you to replace the hard drives in the enclosure. You can use WD hard drives or another brand's hard drive.

*Note:* For a complete list of compatible"Returning a WD Drive" on page 135drives, visit wd.com/mycloudmirror

**Important:** For best performance, WD recommends inserting WD Red<sup>™</sup> hard drive assemblies into the unit's enclosure. Visit *support.wdc.com* and search the knowledge base for Knowledge Base Answer ID 8 to get detailed instructions on obtaining a replacement drive for this product.

Following are instructions for replacing a faulty drive or, if your WD My Cloud Mirror model did not come with drives, for inserting drives.

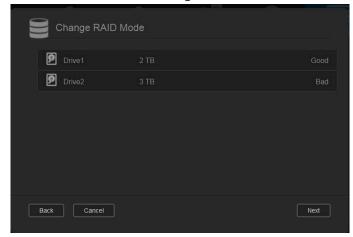

## Identifying a Faulty Hard Drive

If the LEDs on the unit are flashing or you have received an alert, a hard drive may be faulty. To determine which drive is faulty, do the following:

1. On the dashboard's navigation panel, click Storage and then Disk Status.

< ش <sub>Home</sub>	Users	CD Shares	Cloud Access	Backups	Storage
RAID Disk Status	Disks Profil Disk Health	<b>e</b> Healthy			
	System Dis			Bad	S.M.A.R.T. Data
	Drive2				S.M.A.R.T. Data

2. If one of the drives is Bad or has Failed, select it and view detailed information on the Hard Drive Information dialog box:

*Note:* The drive number corresponds to the 1 or 2 decal on the drive.

In the event a fault occurs, and you would like to service the device yourself, visit WD Technical Support at *support.wdc.com* and search for Knowledge Base Answer ID 8 to obtain detailed instructions on obtaining a replacement drive. When contacting Technical Support, have the following information ready: the WD My Cloud Mirror device's serial number, date of purchase, and the serial number of the internal hard drive(s) requiring replacement.

#### **Replacing a Drive**

When replacing an existing drive, you may use a drive made by another company. For a list of compatible drives, go to *wd.com/mycloudmirror*.

#### Removing a Drive

**Important:** Before getting started, power off the unit and disconnect all of its cables. Place the unit on a clean and stable surface.

If the WD My Cloud Mirror still contains the faulty (drive), you must first remove it before you can insert the new one.

- 1. Reveal the hard drives by pressing the indented button on the top of the device and pulling up the door.
- 2. Remove the bracket used for holding drives in.
- 3. Pull the plastic tab at the back of the drive and with your other hand, guide the drive up and out of the enclosure.

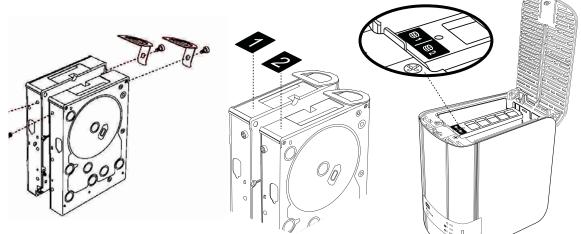

#### Inserting a Drive

# **Important:** To avoid electrostatic discharge (ESD) problems, ground yourself by touching metal before handling the device.

## Preparing a Drive

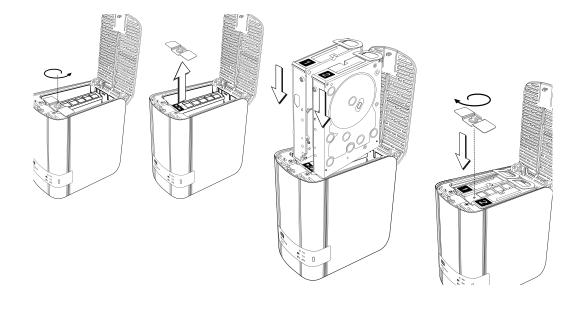

For WD replacement drives, reuse the screws and tabs attached to the faulty drive.

*Note:* A standard phillips-head screwdriver is all you need.

- 1. Using the parts from the faulty drive, attach a plastic tab to the top hole in the drive's side (on the right if the green board is facing you).
- 2. Attach a screw to the corresponding hole on the other side of the drive.
- 3. Attach label 1 or 2 to the top of the drive. Label 1 is on the left and label 2 is on the right, when looking down on the top of the unit. There are corresponding numbers on the cross brace label.

## Inserting One or Both Drives

- 1. Press the indent on the top of the unit to open the door and remove the bracket that holds the drives in.
- 2. When looking down on the top of the unit with the front panel towards you, If you are inserting two drives, arrange them so that the connectors at the bottom face in. (The green boards should face each other.) If inserting one drive, the green board faces the middle of the unit.
- 3. Gently slip a drive into the slot. Make sure the plastic tab is sticking up at the back of the unit. Repeat with the other drive, if applicable.
- 4. Screw the bracket over the tops of the drives. Close the door and firmly push down until it locks into place.
- 5. Reconnect the network and power cables to the device.

## Rebuilding the Drive

Depending on the RAID settings, the replacement drive may rebuild automatically, or you may need to rebuild it manually.

If any type of RAID and Auto-Rebuild have been set on the Storage Screen, the drive rebuilds automatically. If Auto-Rebuild has not been set, the rebuild results are as follows:

If RAID is	Then				
RAID 0	<ul><li>The data on the volume will no longer be accessible and must be recreated.</li><li>1. Rebuild the drive. See "RAID Storage" on page 89.</li><li>2. Reload data from a backup or the original source.</li></ul>				
RAID 1	<ul><li>Data is mirrored to the second drive in the volume and is still accessible.</li><li>Data is recoverable from the working good drive.</li><li>1. Rebuild the drive. See "RAID Storage" on page 89</li></ul>				
Spanning	<ul> <li>Data on the volume is no longer accessible. Data on the other drive may be recoverable but will no longer be accessible from the WD My Cloud Mirror device.</li> <li>1. Rebuild the drive. See "RAID Storage" on page 89.</li> <li>2. Reload data from a backup or the original source.</li> </ul>				
JBOD	<ul><li>Data on the volume is no longer accessible. Data on other volumes is still accessible.</li><li>1. Rebuild the drive. See "RAID Storage" on page 89</li><li>2. Reload data from a backup or the original source.</li></ul>				

For more information about rebuilding a replacement drive, search the WD Knowledge Base for Knowledge Base Answer ID 11107.

## **Returning a WD Drive**

**Important:** Do not disassemble the internal drive and attached assembly components. Return the entire internal drive assembly intact to WD.

Return the faulty drive following the instructions provided in WD Knowledge Base Answer ID 8.

## Regulatory and Warranty Information

**Regulatory Compliance** 

Warranty Information (All Regions Except Australia/New Zealand) Warranty Information (Australia/New Zealand only)

## **Regulatory Compliance**

## Federal Communications Commission (FCC) Class B Information

Operation of this device is subject to the following two conditions:

- 1. This device may not cause harmful interference.
- 2. This device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

## FCC Requirements, Part 15

This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the manufacturer's instruction manual, may cause interference with radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, you are encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the retailer or an experienced radio/television technician for help.

Any changes or modifications not expressly approved by WD could void the user's authority to operate the equipment.

## ICES/NMB-003 Compliance

Cet appareil DE la classe B est conform à la norm NMB-003 dew Canada.

This device complies with Canadian ICES-003 Class B.

## Safety Compliance

Approved for US and Canada. CAN/CSA-C22.2 No. 60950-1, UL 60950-1: Safety of Information Technology Equipment.

Approver pour els Etas-Units et el Canada. CAN/CSA-C22.2 No. 60950-1: Secret equipment DE technologie de l'information.

This product is intended to be supplied by a listed limited power source, double insulated, or direct plug-in power unit marked "Class 2."

## CE Compliance for Europe

Verified to comply with EN55022 for RF emission; EN-55024 for Generic Immunity, as applicable; and EN-60950 for Safety.

## GS Mark (Germany only)

Machine noise - regulation 3. GPSGV: Unless declared otherwise, the highest level of sound pressure from this product is 70db(A) or less, per EN ISO 7779. Maschinenlärminformations-Verordnung 3. GPSGV: Der höchste Schalldruckpegel beträgt 70 db(A) oder weniger gemäß EN ISO 7779, falls nicht anders gekennzeichnet oder spezifiziert.

## Warranty Information (All Regions Except Australia/New Zealand)

## **Obtaining Service**

WD values your business and always attempts to provide you the very best of service. If this Product requires maintenance, either contact the dealer from whom you originally purchased the Product or visit our product support. Web site at *http://support.wd.com* for information on how to obtain service or a Return Material Authorization (RMA). If it is determined that the Product may be defective, you will be given an RMA number and instructions for Product return. An unauthorized return (i.e., one for which an RMA number has not been issued) will be returned to you at your expense. Authorized returns must be shipped in an approved shipping container, prepaid and insured, to the address provided on your return paperwork. Your original box and packaging materials should be kept for storing or shipping your WD product. To conclusively establish the period of warranty, check the warranty expiration (serial number required) via *http://support.wd.com*. WD shall have no liability for lost data regardless of the cause, recovery of lost data, or data contained in any Product placed in its possession.

## Limited Warranty

WD warrants that the Product, in the course of its normal use, will for the term defined below, be free from defects in material and workmanship and will conform to WD's specification therefor. The term of your limited warranty depends on the country in which your Product was purchased. The term of your limited warranty is for 2 years in the North, South and Central America region, 2 years in the Europe, the Middle East and Africa region, and 2 years in the Asia Pacific region, unless otherwise required by law. The term of your limited warranty period

shall commence on the purchase date appearing on your purchase receipt. WD may at its discretion make extended warranties available for purchase. WD shall have no liability for any Product returned if WD determines that the Product was stolen from WD or that the asserted defect a) is not present, b) cannot reasonably be rectified because of damage occurring before WD receives the Product, or c) is attributable to misuse, improper installation, alteration (including removing or obliterating labels and opening or removing external enclosures, unless the product is on the list of limited user-serviceable products and the specific alteration is within the scope of the applicable instructions, as found at *http://support.wd.com*, accident or mishandling while in the possession of someone other then WD. Subject to the limitations specified above, your sole and exclusive warranty shall be, during the period of warranty specified above and at WD's option, the repair or replacement of the Product with an equivalent or better Product. The foregoing warranty of WD shall extend to repaired or replaced Products for the balance of the applicable period of the original warranty or ninety (90) days from the date of shipment of a repaired or replaced Product, whichever is longer.

The foregoing limited warranty is WD's sole warranty and is applicable only to products sold as new. The remedies provided herein are in lieu of a) any and all other remedies and warranties, whether expressed, implied or statutory, including but not limited to, any implied warranty of merchantability or fitness for a particular purpose, and b) any and all obligations and liabilities of WD for damages including, but not limited to accidental, consequential, or special damages, or any financial loss, lost profits or expenses, or lost data arising out of or in connection with the purchase, use, or performance of the Product, even if WD has been advised of the possibility of such damages. In the United States, some states do not allow exclusion or limitations of incidental or consequential damages, so the limitations above may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

## Warranty Information (Australia/New Zealand only)

## For consumers purchasing products in Australia and New Zealand, please refer to this warranty information.

Nothing in this warranty modifies or excludes your legal rights under the Australian Competition and Consumer Act or the New Zealand Consumer Guarantees Act. This warranty identifies WD's preferred approach to resolving warranty claims which is likely to be quick and simple for all parties.

No other warranties either express or implied by law, including but not limited to those contained in the Sale of Goods Act, are made with respect to the Product. If you purchased your Product in New Zealand for the purposes of a business, you acknowledge and agree that the New Zealand Consumer Guarantees Act does not apply.

In Australia, our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if goods fail to be of acceptable quality and the failure does not amount to a major failure. What constitutes a major failure is set out in the Australian Consumer Law.

## Warranty

WD warrants that the Product, in the course of its normal use, will for the term defined below, be free from defects in material and workmanship and will conform to WD's specifications. The term of your warranty is 2 years in Australia and New Zealand, unless otherwise required by law. The term of your warranty period shall commence on the purchase date appearing on your purchase receipt from an authorized distributor or authorized reseller. Proof of purchase shall be required to be eligible for this warranty and to establish the commencement date of this warranty. Warranty service will not be provided unless the Product is returned to an authorized distributor, authorized reseller or regional WD return center where the Product was first shipped by WD. WD may at its discretion make extended warranties available for purchase. WD shall have no liability for any Product returned if WD determines that the Product was (i) not purchased from an authorized distributor or authorized reseller, (ii) not used in accordance with WD specifications and instructions, (iii) not used for its intended function, or (iv) stolen from WD, or that the asserted defect a) is not present, b) cannot reasonably be rectified because of damage occurring before WD receives the Product, or c) is attributable to misuse, improper installation, alteration (including removing or obliterating labels and opening or removing external enclosures, including the mounting frame, unless the product is on the list of limited user-serviceable products and the specific alteration is within the scope of the applicable instructions, as found at http://support.wd.com, accident or mishandling while in the possession of someone other then WD.

PRODUCTS ARE COMPLEX AND FRAGILE ITEMS THAT MAY OCCASSIONALY FAIL DUE TO (A) EXTERNAL CAUSES, INCLUDING WITHOUT LIMITATION, MISHANDLING, EXPOSURE TO HEAT, COLD, AND HUMIDITY, AND POWER FAILURES, OR (B) INTERNAL FAULTS. SUCH FAILURES CAN RESULT IN THE LOSS, CORRUPTION, DELETION OR ALTERATION OF DATA. NOTE THAT YOU SHALL BE RESPONSIBLE FOR THE LOSS, CORRUPTION, DELETION OR ALTERATION OF DATA HOWSOEVER CAUSED, AND FOR BACKING UP AND PROTECTING DATA AGAINST LOSS, CORRUPTION, DELETION OR ALTERATION. YOU AGREE TO CONTINUALLY BACK UP ALL DATA ON THE PRODUCT, AND TO COMPLETE A BACKUP PRIOR TO SEEKING ANY GENERAL SERVICE AND TECHNICAL SUPPORT FROM WD.

In Australia, if the Product is not of a kind ordinarily acquired for personal, domestic or household use or consumption, provided it is fair and reasonable to do so, WD limits its liability to replacement of the Product or supply of equivalent or better Product.

This warranty shall extend to repaired or replaced Products for the balance of the applicable period of the original warranty or ninety (90) days from the date of shipment of a repaired or replaced Product, whichever is longer. This warranty is WD's sole manufacturer's warranty and is applicable only to Products sold as new.

## **Obtaining Service**

WD values your business and always attempts to provide you the very best of service. Should you encounter any problem, please give us an opportunity to address it before returning this Product. Most technical support questions can be answered through our knowledge base or email support service at *http://support.wd.com*. If the answer is not available or, if you prefer, please contact WD at the applicable telephone number shown in the front of this document.

If you wish to make a claim, you should initially contact the dealer from whom you originally purchased the Product. If you are unable to contact the dealer from whom you originally purchased the Product, please visit our product support Web site at *http://support.wd.com* for information on how to obtain service or a Return Material Authorization (RMA). If it is determined that the Product may be defective, you will be given an RMA number and instructions for Product return. An unauthorized return (i.e., one for which an RMA number has not been issued) will be returned to you at your expense. Authorized returns must be shipped in an approved shipping container, prepaid and insured, to the address provided with your RMA number. If following receipt of a qualifying claim under this warranty, WD or the dealer from whom you originally purchased the Product determines that your claim is valid, WD or such dealer shall, at its discretion, either repair or replace the Product with an equivalent or better Product or refund the cost of the Product to you. You are responsible for any expenses associated with a claim under this warranty. The benefits provided to you under this warranty are in addition to other rights and remedies available to you under the Australian Competition and Consumer Act or the New Zealand Consumer Guarantees Act.

Your original box and packaging materials should be kept for storing or shipping your WD product. To conclusively establish the period of warranty, check the warranty expiration (serial number required) via <a href="http://support.wd.com">http://support.wd.com</a>.

## Appendix A: WD My Cloud Mirror Quick User Guide

This guide is primarily for WD My Cloud Mirror users, rather than the administrator.

## Logging into WD My Cloud Mirror

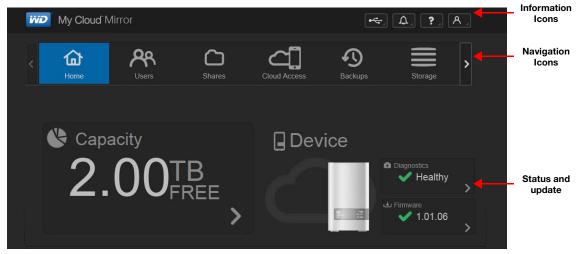

- 1. Enter the name of your WD My Cloud Mirror device (default name: wdmycloudmirror) in the browser's address field:
  - http://<device name> (Windows) (Example: http://wdmycloudmirror)
  - http://<device name>.local (Mac) (Example: http://wdmycloudmirror.local)
- 2. Click **Go**.

My Clou	ud Mirror
User	admin
Password	
	Remember Me
	Login

- 3. On the WD My Cloud Mirror Login page, enter your User name and Password (the default is no password).
- 4. Click **Login**. The WD My Cloud Mirror dashboard home page displays.

## The Dashboard Home Page

The WD My Cloud Mirror Home page has an information bar at the top right, a navigation icon bar across the page, an instant overview of the status of the device's main functions and links for updating settings.

#### **Navigation Icons**

lcon	Name	Actions
	Home	The dashboard displays an instant overview of the status of the device's main functions and links for updating settings.
ጽ	Users	Create, change, and delete users and grant them full or limited access to particular shares.
	Shares	Create, change, and delete shares (folders) and grant specific users full, limited, or no access to particular shares.
₫.	Cloud Access	Set up, change, and remove remote cloud access to particular shares. Monitor remote access status.
Ð	Backups	<ul> <li>Create backups to:</li> <li>A USB drive</li> <li>Another WD My Cloud Mirror or a WD My Cloud EX4 on your local network or on a remote network</li> <li>A Cloud backup site</li> </ul>
	Storage	Select the way your WD My Cloud Mirror device stores your data.

lcon	Name	Actions
08	Apps	Add or remove various apps that allow you to use your device more productively.
හි	Backups	<ul> <li>Create backups to:</li> <li>A USB drive.</li> <li>Another WD My Cloud Mirror or other WD My Cloud device on your local or a remote network.</li> <li>A Cloud backup site.</li> </ul>

#### Viewing the Home Page

The Home page is your gateway to the WD My Cloud Mirror device. From this page you can find:

- The capacity of the device
- Quick status and links to download information
- Links to desktop and mobile apps
- Built-in apps to make your device more productive

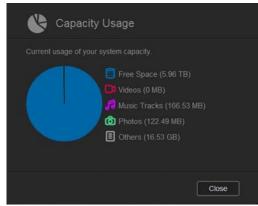

#### Capacity

The Capacity panel displays the amount of free storage left on your WD My Cloud Mirror device.

1. To see detailed information, click the arrow in the lower right to display the current usage of the drive's capacity:

2. To return to the Home page, click **Close**.

#### **Quick Status**

Note: Displays for users not the administrator.

The Quick Status area displays the total number of FTP, HTTP, and P2P downloads performed.

Quick Status	
Total FTP Downloads	0
Total HTTP Downloads	0
Total P2P Downloads	

#### **Cloud Access Links**

**Note:** Displays for users not the administrator.

The Cloud Access Links allow you to access the software necessary to gain access to the WD My Cloud Mirror device from your desktop and mobile apps.

#### **Downloads and Apps Information**

**Note:** Displays for users not the administrator.

The Downloads and Applications area displays information on the number of downloads and apps available on your device.

- 1. To access the page associated with each download or applications, click the plus sign ■ or arrow >.
- 2. In the left pane, click a download method.
- 3. To download files to your location, enter the information required for each download method.

## Apps □□

The Apps page provides access to the various apps available for your use on the WD My Cloud Mirror device. Available apps vary depending on what your administrator has implemented.

# Appendix B: Joomla!<sup>®</sup> Setup Guide

Joomla! is an award-winning content management system (CMS) that allows you to build Web sites and powerful online apps. For additional information on Joomla!, visit <a href="http://www.joomla.org/">http://www.joomla.org//</a>

Joomla! is one of the many apps available for use from your WD My Cloud Mirror device. Provided in this section are the steps you'll need to set up Joomla!.

## Requirements

- Database (e.g., MySQL, FireBird, MS SQL server, Oracle, PostgreSQL, SQLite)
- If you're using phpMyAdmin as your SQL database, ensure that you've added the phpMyAdmin app to you My WD Cloud Mirror.

## Setting Up Joomla!

- 1. Add the Joomla! app to your WD My Cloud Mirror device (see "Adding an App" on page 86 for information on adding an app to your device).
- 2. On the App screen, click **Joomla!** in the left pane.
- 3. In the Configuration URL field, click the configuration URL link. The Joomla! Installation page displays.

4. Select a language from the scrolling window. This is the language that will be used during Joomla! installation.

- 7. On the Database configuration screen, enter the following information and click **Proceed to Next Step**.
  - Database Type: Select MySQL if not already selected.
  - Database server hostname or DSN: Enter localhost.
  - **Database server post**: Leave this field blank.
  - **Database name**: Enter a name for your database to be used for phpBB.
  - **Database username**: Enter your MySQL account user name.
    - If you're using the phpMyAdmin app, enter **admin**.
  - **Database password**: Enter your MySQL password.
    - If you're using the phpMyAdmin app, enter **admin**.
  - Table Prefix: Enter a table prefix. The prefix must start with a letter and must only contain letters, numbers and underscores. Make sure that the prefix chosen is not used by other tables.

You can also use the randomly generated table prefix pre-loaded into this field.

## **Appendix D: Supported RAID Modes**

The chart below identifies those modes that are supported for RAID storage.

Supported RAID Modes	1 Disk	2 Disks
Spanning	No	Yes
RAID 0	No	Yes
RAID 1	No	Yes
JBOD	Yes	Yes

## **Appendix E: RAID Migrations**

The chart below identifies the RAID migration path allowed on your WD My Cloud Mirror device.

From	То
JBOD (1 disk)	RAID 1 (2 disks)

## **Appendix F: Safe Mode Firmware Update Procedures**

If you see the following screen, use the steps outlined below to recover your server from safe mode.

- **Note:** Before performing these steps, download WD My Cloud Mirror firmware from the WD support website (*http://support.wd.com*) and save it to a location to which you can browse from your computer. Make sure to unzip the firmware file.
- 1. Log on to your router's DHCP LAN/Device Client Table to obtain the IP address for your device.

WD 💮	Velcome to My Net I	N900 Central Router	Firmware Version 1.	07.16	You have 2 notification(s)

- 2. Type device IP address in a browser window. The Safe Mode UI appears.
- 3. Browse to the location where you saved the downloaded firmware.
- 4. Click **Apply** to load the firmware.
- 5. On the dialog box, click **OK**. The device reboots.
- 6. Once your reboot is completed, ensure that you clear your browser's cache. Check your browser's help to determine the best way to clear the cache.
- 7. Once your device has completed the reboot, we recommend that you do a system restore ("System Restore" on page 121).

## **Appendix G: Technical Specifications**

Ethernet	High performance (100/1000) Gigabit Ethernet connection		
Internal hard drives	2 WD Red 3.5-inch SATA hard drives		
Supported protocols	CIFS/SMB, NFS, FTP, AFP		
I/O ports Data transfer rate	Gigabit Ethernet (RJ-45) port USB 3.0 up to 5 Gb/s		
	*A USB 3.0 host and USB 3.0 certified cable are required to obtain USB 3.0 performance.
