

Emerald

The height of sophistication...

What separates the common and the worthless mineral stone from the precious jewel stone is the purity of its colour and its freedom from flaws. The same rare standards apply to Wharfedale's Emerald range of hi-fi loudspeakers.

Precision engineering standards employed throughout our manufacturing process ensure that whichever Emerald model you pick, the clarity and

transparency of the music will be a joy to behold.

Designed as a classical British loudspeaker with elegant art-deco styling nuances, the Emerald series epitomises class in simple design.

Available in a choice of real-wood veneers, the

Emerald will fit seamlessly into the aesthetics of virtually any room to enhance the appearance as well as the acoustics of your living area.

Wharfedale

A Jewel in the crown...

The elegant Emerald series from Wharfedale is a reflection of times often forgotten, when craftsmanship and build quality were more important than absolute cost, when a worker took a real sense of pride in his or her achievements, and when the end justified the 'means'.

We scour the globe for the finest raw materials to ensure each component is class-leading. Our neodymium magnets have excellent strength to weight ratios for incredible accuracy and speed. Our internal wiring is exceptionally pure oxygen free copper, the real wood veneers are matched and paired, using consecutive cuts from the same log and each speaker in the range can be bi-wired to gold-plated binding posts.

Every single part is crafted in our own dedicated factory. Each voice coil is wound by hand, the mid-range drivers double wound and the bass drivers quadruple wound, we forge the chassis and build

the crossover, audiophile quality cable connects the components together which are in turn mounted in a cabinet built so well, it could have been hewn from a single log.

Throughout the manufacturing process, attention is paid to every detail, testing and retesting to ensure that each and every speaker maintains its composure even when pushed to the very limits of the specification.

The result is a speaker range with a real natural beauty – both in appearance and performance which will enhance any living area.

With a superb matching centre-channel and our excellent Powercube DX sub-woofer, you can now have a fully matching multi-channel system, so you can enjoy your films and multi-channel music with the same levels of style and musical ability as you associate with your two channel system.

Precision engineering of the very highest quality ensures that every Wharfedale speaker provides the crystal clear sound and detail needed to bring any music or soundtrack to life. Add to that a tonal neutrality and these speakers provide a real 'window' on the sound, adding nothing and taking nothing away.

Emerald Specifications

Model	EM-91	EM-93	EM-95
Drivers			
Bass	170mm	170mm	170mm
Tweeter	25mm Dome	25mm Dome	25mm Dome
Power Handling	100W	100W	100W
Nominal Imp.	8 ohms	8 ohms	8 ohms
Sensitivity (for 1W at 1m)	86dB	86dB	87dB
Frequency Resp.	50 Hz to 27 kHz	40 Hz to 27 kHz	35 Hz to 27 kHz
Size mm (H x W x D)	370 x 220 x 280	490 x 220 x 280	880 x 220 x 280

Model	EM-97	EM-99	EM-Centre
Drivers			
Bass	2 x 170mm	2 x 200mm	2 x 130mm
Tweeter	25mm Dome	25mm Dome	25mm Dome
Power Handling	125W	150W	125W
Nominal Imp.	6 ohms	6 ohms	8 ohms
Sensitivity (for 1W at 1m)	88dB	88dB	89dB
Frequency Resp.	30 Hz to 27 kHz	28 Hz to 27 kHz	70 Hz to 27 kHz
Size mm (H x W x D)	940 x 220 x 280	1000 x 255 x 320	175 x 495 x 200
