Xerox® EX-i C60/C70 Print Server Powered by Fiery®

World-class color with workflow tools that put you in command.

Productivity starts with a fast RIP.

The EX-i C60/C70 Print Server Powered by Fiery® enables you to print large and/or complex Microsoft® Office® documents, PowerPoint® files and color-critical PDFs accurately and quickly. It improves throughput and productivity by printing one page while processing subsequent pages, and by storing processed pages in memory before printing.

Simplify and streamline your workflow.

Automate job submission of repetitive job types to achieve productive, error-free workflows with Fiery Hot Folders and Virtual Printers.

Take advantage of commonly used Fiery presets to save time when submitting jobs. With Fiery server technology, even novice users can produce complex jobs using the presets configured for the task.

Get the color right.

Produce precise, exact color from all applications, platforms and formats with Fiery ColorWise® color management technology. Accurately match corporate, logo, brand and custom colors with Fiery Spot-On™.

Turn up the impact with variable information.

Customize your output to a specific audience with varying text, photos and graphics with the Fiery FreeForm variable data printing capabilities.

Reduce costs.

Fiery servers help control costs in many different ways. IT administrators can create Fiery Virtual Printers with appropriate print options for different groups of users or limit certain features to certain group of users. This enables users to print correctly, eliminating waste, with a simple File>Print operation.

### Create professional printed materials quickly and easily.

Produce professional materials in just three simple clicks with Fiery VUE, a 3D "visual print application" that guides you through an interactive and intuitive workflow.

A secure production environment.

Concerned about security? So are we. Your administrators will appreciate the EX-i C60/C70 Print Server complete toolset covering all aspects of document and device security.

Print directly with Wi-Fi printing capability.

Direct Mobile printing for Apple® iOS® devices enables wireless printing simply and easily, at no extra cost. Users do not need any additional print drivers or software for printing. PrintMe® for Fiery allows all users to upload or email documents to the PrintMe Cloud Service and release them to print from the printer control panel.
