III. Operations

3.1 How to pair

NOTE: The left and right headsets are paired already in factory. Users only need to pair either of the headset to mobile phone device and power on the other headset. Then the two headsets will both connect the mobile automatically. The selected headset for pairing will be the master headset while slave-headset for the other one.

1. Please take your mobile phone close to the device. Suggested distance is less than 1 meter.
2. Push On/Off button of either headset for 3 seconds, then you will see blue and red LED glitter alternatively. Now it is ready for pairing.

3. Turn on the Bluetooth application of your mobile phone and click to search Bluetooth devices near your mobile. Once searched "X11" device name, please select it to pair. After completely paired, blue LED will glitter slowly. Now the master headset is connected!
4. Press On/Off button of the other headset for 1 second to power it on. Now both headsets are connected and you can use your true wireless headset for music and phone call!

3.2 Cancel the connection of the two headsets and use them as two separate headsets

1. When standby mode, press Multi Function Buttons of these two for 5 seconds, you will see blue LEDs show fast for 3 seconds. Meanwhile voice prompt "right and left earbuds disconnected" can be heard from headsets. Now they are two separated headsets. Repeat same operations (see 3.1) of pairing for respective connections to different mobile phones and you can use them separately.
2. To get the two separated headsets to one pair: When standby mode, press Multi Function Buttons of these two for 3 seconds, you will see blue LEDs show fast for re-connection. Once reconnected, blue LED will shine 3 seconds and voice prompt "right and left earbuds connected" can be heard from headsets.

3.3 Multi-point pairing

Way 1:

Step 1: Pair the unit with the first mobile phone at first and turn off the Bluetooth of the mobile and power off the master headset.

Step 2: Press On/Off button of the master headset for 3 seconds to turn it to pairing mode again. Then pair the unit with your second mobile phone.

Step 3: After paired with the second mobile phone, turn on the Bluetooth of the first mobile phone and you will find the X11 device name from the pairing record list of the first mobile phone. Select the name again from the first mobile phone and re-connect it. Now the unit connects the two mobile phones in the time.

Way 2:

Step 1: Pair the unit with the first mobile phone at first and turn off the Bluetooth of the mobile and power off the master headset.

Step 2: Press On/Off button of the master headset for 3 seconds to turn it to pairing mode again. Then pair the unit with your second mobile phone.

Step 3: After paired with the second mobile phone, power off the unit. Then turn on the Bluetooth of the first mobile phone and power on the unit again so that it will automatically connect to the two mobile phones paired before.

3.4 Operations

Power on	Press Power On/Off button of the two headsets for 1 second	Blue LED glitters twice and with voice indication "power on"
Power off	Press Power On/Off button of the two headsets for 5 seconds when standby	Red LED glitters twice and with voice indication "power off"
Pairing	Press On/Off button of either headset for 3 seconds. After connected, it is the master headset	Blue and Red LED glitters alternatively and with voice indication "pairing"
Play	Click Multi Function button of the master headset	
Pause	Click again Multi Function button of the master headset	
Re-dial the last phone number made before	Double click Multi Function button of the master headset(without music playing mode)	
Answer phone call	Click Multi Function button of the master button when incoming call	
Reject phone calls	Double-click Multi Function button of the master headset when incoming call	

3.5 Cradle charging

1. The cradle can supply up to three times charging to the two headsets once fully charged.
2. The LED in cradle will show red if only 8% capacity left.
3. After putting headsets into the cradle, please press 2 seconds on the charging button at side of the cradle for charging. LED of cradle will glitter blue and turn to red. Once fully charged, the LED of cradle will show blue.
