

小米手机·包装标准图纸

料号: XXXXXXXXXXXX 版本: A

物料描述（名称）：C3E 入门指南 国际版

图纸发布日期：2019年05月16日

材料：

金东太空梭 105g 无光铜

基本结构工艺：

正背哑油

模切线

压线

基本印刷工艺：

专色

 Pantone Cool Gray 8C

其他特殊注意事项:

供应商料号，请供应商根据规定自行补充

并印刷

字体: Arial 3pt

	During SAR testing, this device was set to transmit at its highest certified power level in all tested frequency bands, and placed in positions that simulate RF exposure in usage against the head with no separation, and near the body with the separation of 5 mm. SAR compliance for body operation is based on a separation distance of 5 mm between the unit and the human body. Carry this device at least 5 mm away from your body to ensure RF exposure level compliant or lower to the reported level. To support body operation, choose the belt clips or holsters, which do not contain metallic components, to maintain a separation of 5 mm between this device and your body. RF exposure compliance with any body accessory, which contains metal, was not tested and certified, and use such body-worn accessory should be avoided. Legal Information This device may be operated in all member states of the EU. Observe national and local regulations where the device is used. This device may be restricted for use, depending on local network. Receiver Category 2 Ensure the power adapter used meets the requirements of Clause 2.5 in IEC60950-1/EN60950-1 and has been tested and approved according to national or local standards. Frequency Bands and Power This mobile phone offers the following frequency bands in EU areas only and maximum radio-frequency power: GSM 900: 35 dBm GSM 1800: 32 dBm UMTS band 1/8: 25 dBm LTE band 1/3/7/8/28/38/40: 25.7 dBm Bluetooth: 20 dBm Wi-Fi 2.4 GHz band: 20 dBm	FCC Regulations This mobile phone complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This mobile phone has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: -Reorient or relocate the receiving antenna. -Increase the separation between the equipment and receiver. -Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. -Consult the dealer or an experienced radio/TV technician for help. RF Exposure Information (SAR) This device meets the government's requirements for exposure to radio waves. This device is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy. The exposure standard for wireless devices employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/Kg. For body-worn operation, this device has been tested and meets the FCC RF exposure guidelines for use with an accessory that contains no metal and positions the device a minimum of 1.0 cm from the body. Use of other accessories may not ensure compliance with FCC RF exposure guidelines. If you do not use a body-worn accessory and are not holding the device at the ear, position the handset a minimum of 1.0 cm from your body when the device is switched on. FCC Note Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.	E-label This device has an electronic label for certification information. To access it, please select Settings» About Phone »Certification or select Settings, then type "Certification" into the search bar. Certification Information (Highest SAR) SAR 10g limit: 2.0W/Kg. SAR Value: Head: 0.557 W/Kg. Body: 1.156 W/Kg (5mm distance). SAR 1g limit: 1.6W/Kg. SAR Value: Head: 1.16 W/Kg. Body-worn: 1.13 W/Kg (10mm distance). Hotspot: 1.12 W/Kg (10mm distance). Model: M1903C3EH I903 indicates the product will be launched after March, 2019 Disclaimer This User Guide is published by Xiaomi or its local affiliated company.
