

# Smart-ukulele Populele

Manual

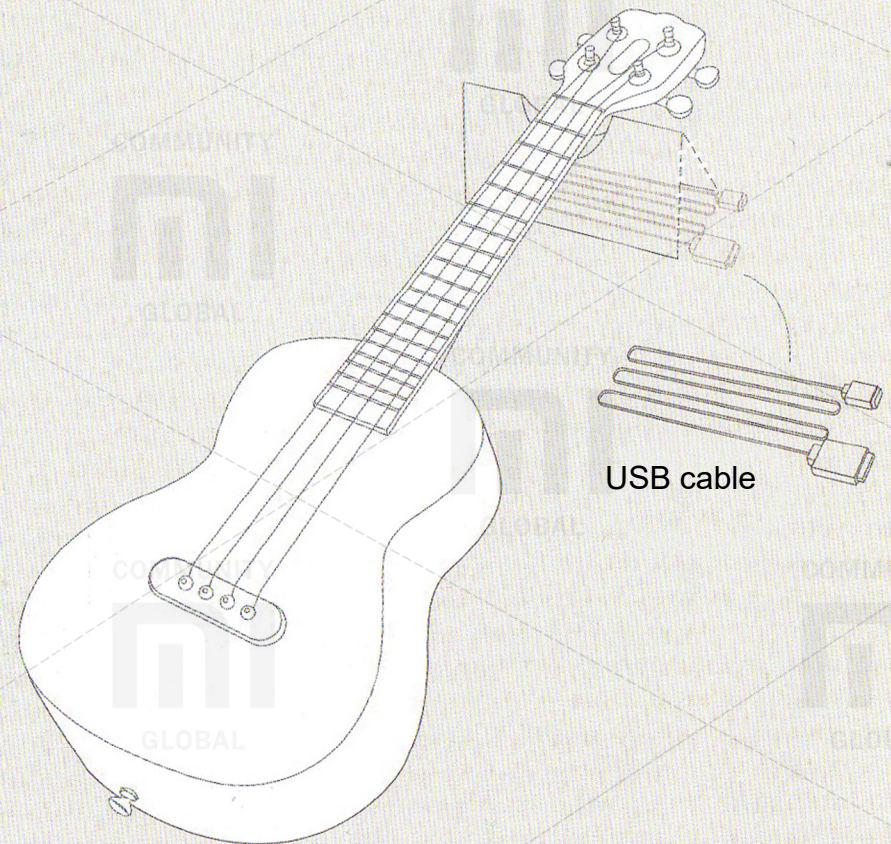

01

## Description of Populele

02

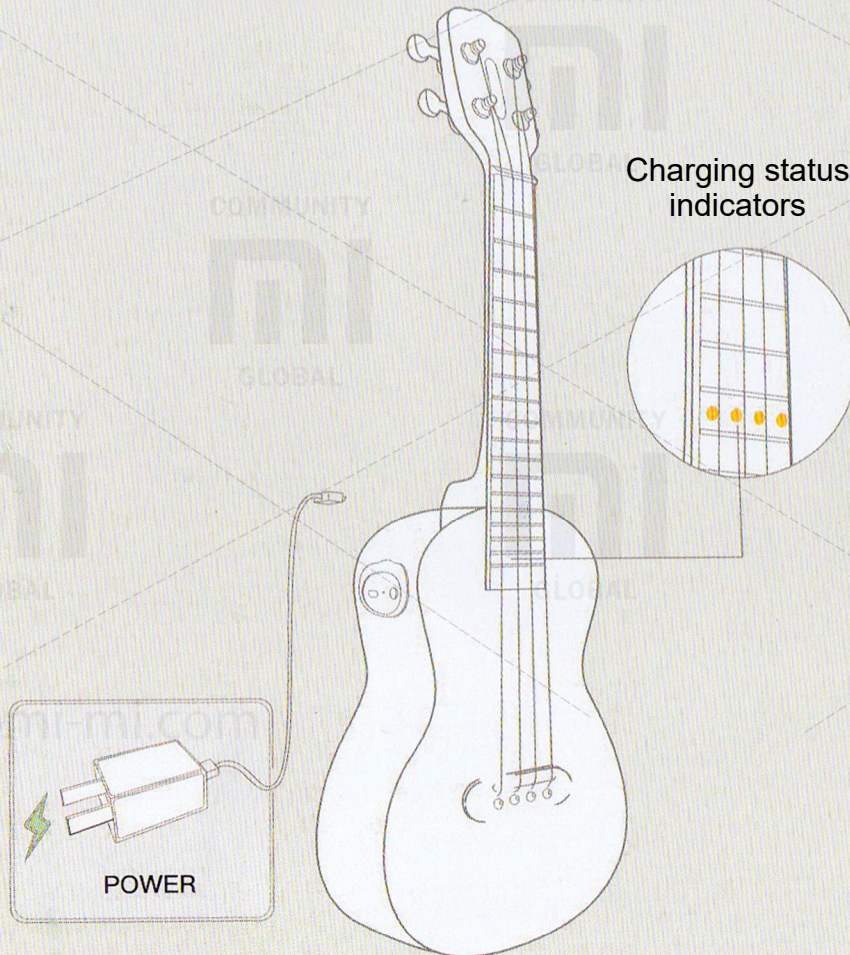

## Accessories Populele

A charging cable is not included  
The battery is charged by USB port

## How to charge Populele

1. Take the USB-cable plug into the Micro-USB Populele
2. During charging, the outermost LED indicator on the left to the right shows the battery charge level
3. Four indicators mean a full charge of the battery (it takes about 3 hours to fully charge)

## Frequently asked Questions

### 1. What is the difference between a smart guitar and a conventional guitar?

Populele can interact with a mobile application. You can learn how to sing to your own accompaniment.

### 2. What would you do if you can not connect the bluetooth?

1. Make sure the device is turned on. Hold the power button for 4-5 seconds. After the bright blue light comes on, open the application to connect the bluetooth.
2. Press the button on the case to check the level of the ukulele charge. If the low indicator flashes on the fretboard of the guitar, this means a low battery, you need to connect a power source.
3. The Bluetooth is connected using the «Populele» application, and not using the Bluetooth interface on the phone.

### 3. Inaccurate sound recognition on Ukulele, if not playing on ukulele, will the recognition be correct?

1. Adjust the strings on the instrument, then try playing on it.
2. The sound recording environment affects the quality and accuracy of recognition, it is not recommended to record sound in noisy conditions.

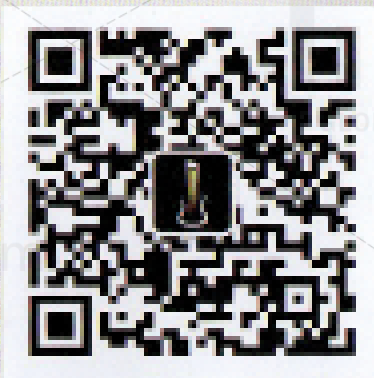

### 4. What if, while playing the guitar, the application does not recognize the sound?

1. IOS: open Settings, find Populele, click on the application to check whether the microphone is turn on
2. Android: Find the Sound Recorder application in the settings, activate the sound recording function.

## Populele application

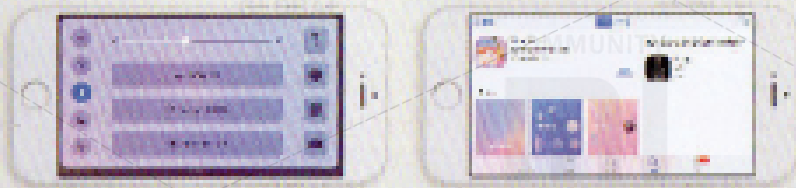

The user when buying a ukulele, receives a card of permanent Vip-client

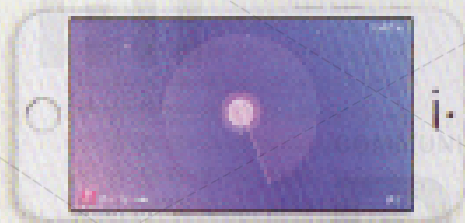

Scan the QR code, then select Download application  
on Android / iOS

## How to connect Populele to a mobile application:

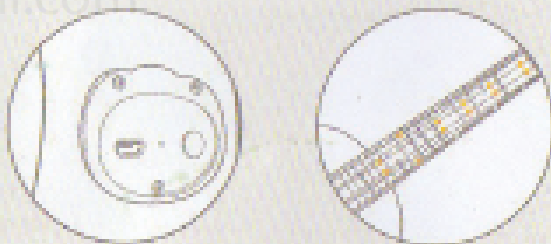

1. Before use, check if bluetooth is plug in on the mobile phone. Download the Populele application to your mobile phone.

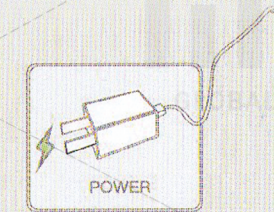

2. Open the application, then register. Enter the Bluetooth device interface, the application will automatically detect Populele.

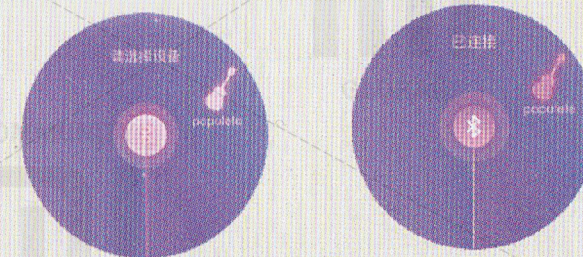

3. Press and hold the power button for 4-5 seconds. When the blue indicator starts flashing, it means that the Populele bluetooth is already successfully connected. (If the bluetooth is not connected within a minute, restart the device).

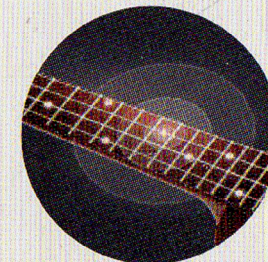

4. If the device does not turn on, the indicators blink constantly, this means Low battery, i.e. It is impossible to connect the bluetooth. Connect the power supply, then try to turn on the device again.

5. When the bluetooth interface detects Populele in the application, a «graphic image of the guitar» will appear. Click on the « graphic image of the guitar » interface to connect it. With the correct connection, the Bluetooth interface appears, as well as the «Connected» window (as shown in the figure).

6. After successful connection, the blue indicators stop blinking, the LED indicators should be constantly lit (as shown in the figure). Now you can start the application and continue playing the instrument.
