

**Features:**

This device can set up the digital plays, car or home audio systems wireless link quickly and easily.

It only needs to connect the FM transmitter to your MP3 player, portable DVD, PDA, MD, CD, MP4,

cassette player, PC, laptop or any other audio players. High fidelity stereo effect: this device can modulate the audio frequency signal to FM signal (88.1~107.9MHz). With the stereo tune you can

enjoy listening high quality music anywhere. LCD display for easier control. Full frequency range design

can effectively avoid interruption.

**Operation instruction:**

1 □ Press the power button “ON/OFF” for a few seconds □ the LCD display shows □ “ON 88.1MHZ”,

“88.1MHZ” is the transmission frequency. On the state of just power off, click the power button “ON/OFF”,

the device will auto check transmission circuit. The device will default the transmission frequency setting before power off.

2 □ Plug the FM Transmitter into the audio device's output port, Adjust the volume and frequency of the FM radio

(avoid the transmission points of the broadcasting stations) .Press the power button of the FM Transmitter,

tune the transmission frequency, according to the reception frequency of the FM radio

(If the FM signal is interrupted, please set the frequency of the FM Transmitter and the FM tuner to the other frequency)

3 □ click the “SCA □ N” or “SCA □ N” button □ to adjust 0.1MHz frequency up or down. Press the SCA □ N” or “SCA □ N” button

for a few seconds, the device will adjust frequency automatically.

4 □ built-in rechargeable lithium battery, when LCD display shows “ ”, Please charge up the device.

5 □ Charge operating: Plug the charger (accessories) into cigarette lighter in your car, connect with the device. (Remark: charge time < 180 minutes).

**Specification:**

Operating range:	>10m
Operating current:	45mA
Transmission range:	88.1 MHz -107.9MHz (interval 0.1MHz)

Frequency response:	20-15000Hz
Stereo Separation:	40dB
Transmission Frequency Deviation:	<0.1MHz
Frequency stability range:	±10PPM
Signal-to-Noise ratio:	≥68dB

**Caution:**

Changes or modifications to this unit not expressly approved by the party responsible for compliance will void the user's authority to operate the equipment. Any change to the equipment will void FCC grant.

**NOTE:**

This equipment has been tested and found to comply with the limits for a digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
