Lock screen and login

Microsoft account, lock screen interface and "Start" screen and other personal settings can follow you to the other devices. Your favorite websites, browser history, and a fixed website also can follow your moves.

If you do not use Intel PPC for a few minutes, the screen is closed and locked. After locking the screen, press any key (or press and release the power button), then slide upward on the touch screen. Then type the password and log in the account.
Now we come to set up your e-mail and other accounts.

Getting Started
Now that you understand the basic knowledge, we will connect the networking and add accounts.

Connect Network
Network connection methods as following:
1. Open the "Settings" super button (slide from the right edge of the screen to the left and click "Settings").
2. Click the wireless network icon.
3. Click the network with which you want to connect, and then click "Connect."

Set up email

Now we start to set up your e-mail. You can add Outlook.com, Gmail, AOL, Yahoo! and Exchange e-mail account to the "Mail" application.
Note that the "Mail" application does not support the use of POP (Post Office Protocol) account.

Follow the below operations to add an e-mail account:
1. Click "Mail" on the "Start" screen.
2. Open the "Settings", and then click "Account"> "Add Account."
3. Select the type of account you want to add, and then follow the onscreen instructions.

Contacts: Add a contact
"Contacts" application is your general address book. You can check all the contacts in the address book; understand the updating of your best friends. You can also synchronize your concern social network contacts, for example, Facebook, LinkedIn and Twitter. Directly send mails, make phone calls or release information to contact others from the "contacts" application.
The following method is to add account contact:

1. Click on the "contact" on the "start" screen.
2. Open the "Settings", click the "account" > "add account".
3. Select the account type you want to add, and then follow the screen instructions.

Introduction of the Intel tablets
Now that you have added the account, we will have a further introduction.

Power supply: Boot, shutdown, standby and restart

The following is an overview of Intel PPC power status:

Status	Operation method
Boot/wake	Press and release the power button. If there is no response, Intel PPC may need to charge. Connect the power adapter, and then press the power button again.
Shutdown (turned off)	Open the "Settings", click the "power" ⏻ > "Shutdown". Intel PPC: you can also hold down the power button for 2 seconds, and then slide gently down on the screen.
Sleep	Close the keyboard, press and release the power button, or don't use the Intel PPC for a few minutes.
Restart	Open the "Settings" super button, click the "power" ⏻ > "restart".

Charging
Intel PPC has the built-in lithium battery, and allows you to carry with it. Battery life varies, depending on your Intel tablet usage and the power supply current plan.
Insert the power cord to a power outlet or patch panel. Then the power connector is connected to the charging interface.
Intel PPC light is on when power supply is connected.

Touch screen
Multi-touch screen with a 16:9 aspect ratio, which is very suitable for watching high-definition video and application of multitasking operating together.
Like using an intelligent mobile phone, you can interact with the PPC by touching the screen.

The screen keyboard

Intel PPC calculator has a screen touch keyboard to be displayed only when it is needed.

1. Click the screen to input the position of the text, then the screen keyboard will be displayed.

2. If on the desktop, click the desktop keyboard icon ⌨ in your task tray (bottom right) to open the screen keyboard.

If you want to manually open the screen keyboard (type the content location without a click), please do the following:

Open the "Settings" super button, click the "keyboard" > "touch keyboard and the handwriting panel".

If you want to close the screen keyboard on Intel PPC, do the following: click the area where the text cannot be input or click the keyboard button ⌨ , then close the keyboard

button. ⌨ .
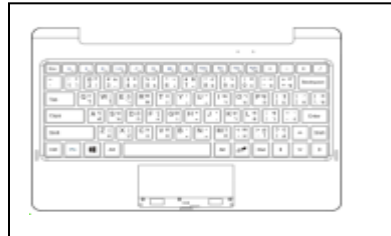

A physical keyboard

The keyboard can be inserted to the Intel PPC by a rotation shaft.

Put the two closing, and insert the PPC into the keyboard rotation shaft; after the connection, the keyboard stay in original position, move the press button on the left

Side of the axis to the right, and the PPC can be easily separated from the keyboard by pulling.

Close the keyboard

When you close the keyboard, the screen will close, and the Intel PPC will also enter the sleep state.

Touch pad

Keyboard includes a touchpad similar to the mouse. Same as a portable computer, you can move the pointer on the screen by dragging your fingers on the touch pad. If want to click, then click on touch pad (mouse the left key click) once.

The sound function

Intel PPC calculator has two stereo speakers and the earphone jack, which can be used to listen to music or watch movies. When you make a phone call or video recording, you can easily use the built-in microphone.

Using the application

Find and open the application

You can start the application on the "start" screen, just like using the Windows "start" button.

Intel tablet can run two applications:

Windows app store for example music, email, and weather.

Desktop applications for example note pad and office applications.

If you're looking for Intel tablet application or program, please operate as the following:

Application view: gently slide upward from the middle of the "start" screen (or click the "start" on the lower left corner of the screen). Application list will be displayed. Type the name or scroll to see all applications.

Use the search: open the "search" super button, and then type the application name, such as "email".

If you did not find the application or program you need, you should search within the Windows application store.

You can also start the desktop application from the desktop. You can create a shortcut for a desktop application, or the fix the common applications in the taskbar on desktop.

Switching between the opened applications

If you want the application to be displayed in full screen, you can quickly switch between the opened applications. Operation method is as follows:
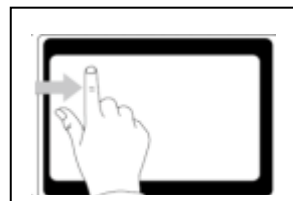

Switch to previous application

Touch: slightly slide from the left edge of the screen to the right light.

Mouse: move the mouse pointer to the left upper corner of the screen, and then click.

Keyboard: Press Alt + Tab
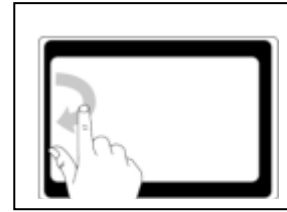

Switch to a specific application

Touch: Slightly slide from left edge of the screen to the right, and the finger stays on the screen at the same time, and then back to the left edge. Click the required application.

Mouse: moves the mouse pointer to the upper left corner, then move down vertically. You will see the most recently used applications. Click the required application.

Keyboard: press the Alt key. And repeat press the Tab key to switch applications. When you go to the required application, and then let it go.

Using the application at the same time (side by side)

You can use two applications side by side. So you can see two applications on the screen at once (such as email and calendar application).

Using two applications together and the method is as follows

1.   Open each application that you want to use.
2.   Open the list of recently used applications (from the left edge of the screen to the right light, keep your finger stays on the screen at the same time, then move backward to the left edge.)
3.   Don't stop dragging an application from the application list, until the dimension of the current application changed, and then loosen the application.
4.   If you want to adjust the size of the application, please drag the vertical bar between applications.

If you want to change one of the applications, then go to "start" or "application" view, and then click an application.

It will display over the first two applications. Click the right side of the left edge of the screen.

Close the application

You don't need to close the application of the Windows application store. When you switch to other applications, Windows will run in the background to keep the original application, and finally to shut it down when you aren't using.

You can also close the application of Windows app store through the following way:

Touch: slightly slide from the upper edge to the lower edge on the screen, and drag the application down outside of the screen.

Mouse: move the pointer to the top of the application, when the pointer becomes a hand shape, click and drag the application down outside of the screen.

The application command
If you want to find out how to operate the application, you can open the application command. The following is the operation method:

1. Open an application, and then any performs the following operations:
Touch: slightly slide from the lower edge of the screen up or down from the screen edge.
Mouse or touch pad: click the right key. You can also click twice in the touchpad at any position.
Keyboard: Press the + Z.
2. One option on the command line.

Application Settings and help
In the application Settings: open the "Settings" super button from the application. For example,
Open the "mail" application, then open the "Settings" super button-- you will see the "mail" application Settings.
Application help: open the "Settings" from the application super button, and find the "instructions".

Install the application
You can explore various powerful application and games in Windows application store.
You can browse the application by grouping or by category, such as "recommended" and "hot". If you already know the one you want to find, you can use the "search".

Your account
Before installing the application from the Windows app store, you need to use Microsoft account to log in.

Access to the application
When you want to install more applications or games, just turn to Windows app store.
Note: you need to connect to the Internet and use Microsoft account to log in, and then you can install the application.

Delete the application
If you do not use an application, it can be removed. The following is operation method:

1. Go to "start" screen, and then lightly slide upward from the middle of the screen.
2. Press down the application you are trying to remove for a few seconds.
3. Click "remove". If the application is a desktop application, please select the application from the list, and then click "discharge

Reinstall the application
You can reinstall your purchased application or game, do not need to pay again (as long as the Windows app store provides.)

Application update
Publishers sometimes will update its application to add new functions and repair some problems. Windows app store can automatically install the updating the application during the updating.

The installation program from the Internet, CD or network
You can also install the application or program from the CD/DVD, website or network.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.
-- Increase the separation between the equipment and receiver.
-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.
