Features and capabilities

About this manual

- This manual is printed prior to production. Design and specifications are subject to change in part as a result of improvements, etc. In case of differences between the manual and product, the product has priority.
- "4HDMI1" (example) indicates the name of the parts on the remote control. Refer to the "Part names and functions" (<u>**p. 5</u>) for the information about each position of the parts.
- **½1** indicates that the reference is in the footnote. Refer to the corresponding numbers on the bottom of the page.
- indicates the page describing the related information.
- Click on the " at the bottom of the page to display the corresponding page in "Part names and functions."

Front panel

Rear panel

Front panel display

Remote control

Supplied accessories

Check that you received all of the following parts.

- · Remote control
- Batteries (AAA, R03, UM-4) x 2
- AM loop antenna
- Indoor FM antenna
- · VIDEO AUX input cover

■ Attaching the VIDEO AUX input cover (included)

To protect against dust, attach the supplied VIDEO AUX input cover to the VIDEO AUX jacks when you do not use the jacks. To remove the cover, push the left section of it.

■ Installing batteries in the remote control

When inserting batteries in the remote control, remove the battery compartment cover from the reverse side of the remote control, and insert two AAA batteries into the battery compartment so that they match with the polarity markings (+ and -).

Replace the batteries with new ones if the following symptoms become evident:

- The remote control can only be operated within a narrow range.
- **2TRANSMIT** does not light up, or only lights dimly.

NOTE

If there are remote control codes for external components registered to the remote control, removing the batteries for more than two minutes, or leaving exhausted batteries in the remote control, the remote control codes may be cleared. If this should occur, replace the batteries with new ones, and set the remote control codes.

Part names and functions

Front panel

① **(Power)**Switches this unit between on and standby modes.

② INFO Changes the information shown on the front panel display (FFP. 7).

MEMORY Registers FM/AM stations as preset stations (seep. 32). 21.

PRESET < / >
Selects an FM/AM preset station (p. 32). 121

5 FM Sets the FM/AM tuner band to FM (p. 30). 121

6 AM Sets the FM/AM tuner band to AM (\$\sip\$p. 30). \$\sqrt{1}\$1

 \bigcirc TUNING $\langle\langle 1 \rangle\rangle$

Changes FM/AM tuner frequencies (p. 30). 11

Front panel display Displays information on this unit (page 7).

PHONES jack

For plugging headphones in. Sound effects applied during playback can also be heard through the headphones.

INPUT
Selects an input source from which to playback. Press either the left or right key repeatedly to cycle through the input sources in order.

① SCENE

Switches the input source and the sound field program with a single button (№ p. 26). Press this key when this unit is in standby mode to switch on the unit.

12 TONE CONTROL

Adjusts high-frequency/low-frequency output of speakers/headphones (p. 25).

① PROGRAM <1/>
✓/ >

Switches between the sound field effect (sound field program) you are using and the surround sound decoder (20). Press either the left or right key repeatedly to cycle through the input sources in order.

14 STRAIGHT

Changes a sound field program to straight decoding mode (27).

15 VIDEO AUX jacks

For connecting video cameras, game consoles, and portable music players to this unit temporarily.

Attach the supplied VIDEO AUX input cover when not using this jack.

16 VOLUME

Adjusts the volume level.

Part names and functions

Rear panel

① DOCK jack

For connecting an optional Yamaha iPod universal dock (such as YDS-12) or Bluetooth wireless audio receiver (YBA-10) (p. 33, p. 35).

(2) HDMI OUT jack

For connecting an HDMI - compatible TV to output audio/video signals to ($\[\] \]$ 14).

3 HDMI1-4 jacks

For connecting external components equipped with HDMI-compatible outputs to receive audio/video signals from (FSP p. 16).

4 ANTENNA jacks

For connecting AM and FM antennas (p. 21).

5 COMPONENT VIDEO jacks

For connecting TV that are compatible with component video signals, using three cables to output video signal (p. 14).

6 AV1-5 jacks

For connecting to external devices equipped with audio/video outputs so that this unit can receive audio/video signals (ESP, 17, p. 18).

(7) AV OUT jacks

For outputting audio/video signals received when analog inputs (AV3-5 or AUDIO1-2) are selected (\$\sigma\$ 0).

8 AUDIO1-2 jacks

For connecting to external components equipped with analog audio outputs to input sound into this unit (p. 19).

MONITOR OUT jack

For connecting a TV capable of receiving video input, and outputting video signals to it (**p. 15).

Machine Audio Out jacks

For outputting audio signals received when analog inputs such as the AV5 or AUDIO1-2 jacks are selected (Exp. 20).

1) SUBWOOFER jack

For connecting a subwoofer with a built-in amplifier (p. 12).

(12) SPEAKER terminals

For connecting the front, center, and surround speakers (ESP. 12).

13 Power cord

For connecting this unit to an AC wall outlet.

Part names and functions

Front panel display

(1) HDMI indicator

Lights up during normal HDMI communication when any of the HDMI 1-4 inputs are selected.

2 CINEMA DSP indicator

Lights up when a sound field effect that uses CINEMA DSP technology is selected.

3 Tuner indicator

Lights up when receiving an FM/AM broadcast.

4 iPod CHARGE indicator

Lights up when an iPod/iPhone is connected through an optional Yamaha iPod universal dock (such as YDS-12), and the iPod Standby Charge function is active () 34).

5 SLEEP indicator

Lights up when the sleep timer is activated (p. 8).

6 MUTE indicator

Flashes when audio is muted.

7) VOLUME indicator

Displays the current volume level.

8 Cursor indicators

Light up if corresponding cursors on the remote control are available for operations.

Multi information display

Displays a range of information on menu items and settings.

10 Speaker indicators

Indicate speaker terminals from which signals are output.

■ Changing the front panel display

The front panel can display sound field programs and surround decoder names as well as the active input source.

Press **6INFO** repeatedly to cycle through input source \rightarrow sound field program \rightarrow surround decoder in order. 21

^{1:} While selecting a tuner input, the FM/AM frequency is displayed instead of the input source.

Part names and functions

Remote control

Remote control signal transmitter

Transmits infrared signals.

2 TRANSMIT

Lights up when a signal is output from the remote control.

3 SOURCE ⊕ (SOURCE Power)

Switches an external component on and off.

4 Input selector

Select an input source on this unit from which to playback.

wireless audio receiver connected to the DOCK

jack.

TUNER FM/AM tuner

5 Tuner keys

Operates the FM/AM tuner. These keys are used when using the tuner input.

FM Sets the FM/AM tuner band to FM.
AM Sets the FM/AM tuner band to AM.

MEMORY Presets radio stations.

PRESET ^ / → Selects a preset station.

TUNING \$ / * Changes tuning frequencies.

6 INFO

Cycles the information displayed on the front panel display (the name of the currently selected input source, the sound field program, the surround decoder, the FM/AM tuner frequency, etc.)(1887). 7).

7 Sound selection keys

Switch between the sound field effect (sound field program) you are using and the surround decoder (\$\sigma_p\$, 26).

8 SCENE

Switches the input source and the sound field program with a single button (50). Press this key when this unit is in standby mode to switch on the unit.

9 SETUP

Displays a detailed Setup menu for this unit (pr. 40).

10 Cursor $\triangle / \nabla / \triangleleft / \triangleright$, ENTER, RETURN

Cursor $\triangle / \nabla / \triangleleft / \triangleright$ Select menu items and change settings when

settings menus, etc are displayed.

ENTER Confirms a selected item.

RETURN Returns to the previous screen when setting menus are displayed, or ends the menu display.

11 External component operation keys

Operate recording, playback, and menu displays etc. for external components. 11

12 Numeric keys

Enter numbers.

13 TV control keys

Operate a monitor such as a TV.

14 CODE SET

Sets remote control codes for external component operations (<u>pp. 50</u>, p. 54).

15 RECEIVER () (RECEIVER Power)

Switches this unit between on and standby modes.

16 SLEEP

Sets this unit to place itself in standby mode automatically after a specified period of time has elapsed (sleep timer). Press this key repeatedly to set the time for the sleep timer function. The front panel display indicator lights up when the sleep timer is activated.

17 OPTION

Displays the Option menu for each input source (p. 37).

18 VOLUME +/-

Adjusts the volume level (p. 25).

19 MUTE

Turns the mute function of the sound output on and off (ESP. 25).

1: You can use separate **1 External component operation keys** for each input source to operate registered components. Remote control codes must be registered for each input in advance if you wish to operate external components (☞p. 50).

CONNECTIONS

Connecting speakers

This unit uses acoustic field effects and sound decoders to bring you the impact of a real movie theater or concert hall. These effects will be brought to you with ideal speaker positioning and connections in your listening environment.

Speaker channels and functions

■ Front left and right speakers

The front speakers are used for the front channel sounds (stereo sound) and effect sounds.

Front speaker layout:

Place these speakers at an equal distance from the ideal listening position in the front of the room. When using a projector screen, the appropriate top positions of the speakers are about 1/4 of the screen from the bottom.

Center speaker

The center speaker is for the center channel sounds (dialog, vocals, etc.).

Center speaker layout:

Place it halfway between the left and right speakers. When using a TV, place the speaker just above or just under the center of the TV with the front surfaces of the TV and the speaker aligned.

When using a screen, place it just under the center of the screen.

■ Surround left and right speakers

The surround speakers are for effect and vocal sounds with the 5.1-channel speakers providing reararea sounds.

Surround speaker layout:

Place the speakers at the rear of the room on the left and right sides facing the listening position. They should be placed between 60 degrees and 80 degrees from the listening position and with the speaker tops at a height of 1.5 - 1.8 m from the floor.

Subwoofer

The subwoofer speaker is used for bass sounds and low-frequency effect (LFE) sounds included in Dolby Digital and DTS. Use a subwoofer that is equipped with an internal amplifier.

Subwoofer speaker layout:

Place it exterior to the front left and right speakers facing slightly inward to reduce echoes from the wall.

Speaker layout

5.1-channel speaker layout (5 speakers + subwoofer)

- Connect at least two speakers (front left and right).
- If you cannot connect all five speakers, give priority to the surround speakers.
- The surround speakers should be placed between 60 degrees and 80 degrees from the listening position.

■ CRT monitors

We recommend that you use magnetically shielded speakers to avoid video distortion, especially for the front and center speakers near the screen.

If your screen still gets interference from magnetically shielded speakers, move the speakers farther away from your TV.

Connecting speakers

Changing speaker impedance

This unit is configured for 8Ω speakers when it is dispatched from the factory. When connecting to 6Ω speakers, carry out the following procedure to switch to 6Ω .

Set this unit to the standby mode.

Press & while pressing and holding STRAIGHT on the front panel.

Release the keys when "ADVANCED SETUP" is displayed on the front panel display.

After approximately 3 seconds, the top menu items are displayed.

1

Check that "SP IMP." is displayed on the front panel.

Press STRAIGHT repeatedly to select a "6 Ω MIN."

Switch this unit to the standby mode, and then switch it on again.

The power turns on, when the settings you made has been configured.

1: See the section on "Extended functionality that can be configured as needed (Advanced Setup menu)" for details on the Advanced Setup menu (p. 53).

Connect your speakers to their respective terminals on the rear panel.

CAUTION

- Remove the AC power cord of this unit from the power outlet before connecting the speakers.
- Generally speaker cables consist of two parallel insulated cables. One of these cables is a different color, or has a line running along it, to indicate different polarity. Insert the different colored (or lined) cable into the "+" (positive, red) terminal on this unit and the speakers, and the other cable into the "-" (minus, black) terminal.
- Be careful that the core of the speaker cable does not touch anything or come into contact with the metal areas of this unit. This may damage this unit or the speakers. If the speaker cables short circuit, "CHECK SP WIRES!" will appear on the front panel display when this unit is switched on.

CONNECTIONS

Connecting speakers

■ Connecting front speakers

- Remove approximately 10mm of insulation from the ends of the speaker cables, and twist the bare wires of the cables together firmly so that they will not cause short circuits.
- Loosen the speaker terminals.
- Insert the bare wire of the speaker cable into the gap on the side of the terminal.
- Tighten the terminal.

Connecting the banana plug (Except U.K., Europe, Asia and Korea models)

Tighten the knob, and then insert the banana plug into the end of the terminal.

■ Connecting center speakers / surround speakers

- Press the tab on the speaker terminal down.
- Insert the speaker cable end into the terminal.
- Lift the tab to fix the speaker cable in place.

■ Connecting the subwoofer

- Connect the subwoofer input jack to the SUBWOOFER jack on this unit with an audio pin cable.
- Set the subwoofer volume as follows.
 Volume: Set to approximately half volume (or slightly less than half).

Crossover frequency (if available): Set to maximum.

Subwoofer examples

Cable plugs and jacks

The main unit is equipped with the following input/output jacks. Use jacks and cables appropriate for components that you are going to connect.

Audio/Video jacks

HDMI jacks

Digital video and digital sound are transmitted through a single jack. Only use an HDMI cable.

- Use a 19-pin HDMI cable with the HDMI logo.
- We recommend using a cable less than 5.0 m long to prevent signal quality degradation.

Analog video jacks

COMPONENT VIDEO jacks

The signal is separated into three components: luminance (Y), chrominance blue (PB), and chrominance red (PR).

Use component video pin cables with three plugs.

VIDEO jack

This jack transmits conventional analog video signals.

Use video pin cables.

Audio jacks

OPTICAL jacks

These jacks transmit optical digital audio signals. Use fiber-optic cables for optical digital audio signals.

Digital audio fiber-optic cable

COAXIAL jacks

These jacks transmit coaxial digital audio signals. Use pin cables for digital audio signals.

Digital audio pin cable

AUDIO jacks

These jacks transmit conventional analog audio signals.

Use stereo pin cables, connecting the red plug to the red R jack, and the white plug to the white L jack.

Stereo audio pin cable

PORTABLE jack

This jack transmits conventional analog audio signals.

Use a stereo mini-plug cable when connecting.

Stereo mini-plug cable

Connecting a TV monitor

This unit is equipped with the following three types of output jack for connection to a TV. HDMI OUT, COMPONENT VIDEO or VIDEO. Select the proper connection according to the input signal format supported by your TV.

This unit will receive HDMI, component, or video signals in the same format as transmitted by the output devices.

For example, these three output devices must be connected to the monitor by matching input/output jacks and cables, and then you must change the TV's input mode to the proper setting.

■ Connecting an HDMI video monitor

Connect the HDMI cable to the HDMI OUT jack.

- Use a 19-pin HDMI cable with the HDMI logo.
- We recommend using a cable less than 5.0 m long to prevent signal quality degradation.

■ Connecting a component video monitor

Connect the component video cable to the COMPONENT VIDEO (MONITOR OUT) jacks.

■ Connecting a video monitor

Connect the video pin cable to the VIDEO (MONITOR OUT) jack.

■ Listening to TV audio

To transmit sound from the TV to this unit, connect its AV1-5 or AUDIO1-2 jacks to the TV's AUDIO OUT jacks.

If the TV supports optical digital audio output, we recommend that you connect the TV audio output to the receiver's AV4 jack. Connecting to AV4 allows you to switch the input source to AV4 with just a single key operation using the SCENE function (©P. 26).

You can control your TV using the receiver's remote control by entering the TV's remote control code (**p. 50).

4 Input selector

- **10** Cursor *∇* / *⊲* / *⊳*
- 10 ENTER
- 17 OPTION

Connecting BD/DVD players and other devices

This unit has the following input jacks. Connect them to the appropriate output jacks on the external components.

Input jack	Video input	Audio input
HDMI1	HDMI	HDMI
HDMI2	HDMI	HDMI
HDMI3	HDMI	HDMI
HDMI4	HDMI	HDMI
AV1	Component video	Optical
AV2	Component video	Coaxial digital
AV3	Video	Coaxial digital
AV4	Video	Optical
AV5	Video	Analog (Stereo)
AUDIO1	_	Analog (Stereo)
AUDIO2	_	Analog (Stereo)
VIDEO AUX	Video	Analog (Stereo)

■ Connecting BD/DVD players and other devices with HDMI

Connect the device with an HDMI cable to one of the HDMI1-4 jacks. Select the HDMI input (HDMI1-4) that the external device is connected to for playback.

■ Receiving audio from other input sources

This unit can use the AV1-5 or AUDIO1-2 input jacks to receive audio signals from other audio input sources.

For example, if an external device cannot produce audio signals from an HDMI jack, use the following method to change the audio input.

- Use the 4Input selector to select the desired HDMI input source.
- Press [™]OPTION to display the Option menu. [™]1
- Press 10 Cursor ∨ until "Audio In" is displayed, and then press 10 ENTER.
- Press <a>□Cursor <a>ID to select the audio input source.

Once you have completed the setup, press **MOPTION** to close the Option menu.

■ Connecting BD/DVD players and other devices with component cables

Connect the device with a component video cable to one of the AV1-2 input jacks.

Using optical digital audio output sources

Select the AV1 input that the external device is connected to for playback.

Using coaxial digital audio output sources

Select the AV2 input that the external device is connected to for playback.

■ Component connections to analog audio output devices

You can use the video input from the AV1-2 jacks in combination with the audio input from other AV inputs or AUDIO1-2.

When connecting these devices, select the AV3-5 or the AUDIO1-2 jacks as the audio input for AV1 or AV2. See "Receiving audio from other input sources" (pap. 16) for detailed setup guidance. Select the AV input source (AV1-2) that is connected by component video cable to the external device for playback.

■ Connecting BD/DVD players and other devices with video cables

Connect the external device with a video pin cable to one of the AV3-5 input jacks.

Using optical digital audio output sources

Select the AV4 input that the external device is connected to for playback.

Using coaxial digital audio output sources

Select the AV3 input that the external device is connected to for playback.

Using analog stereo audio output sources

Select the AV5 input that the external device is connected to for playback.

■ Connecting CD players and other audio devices

Using analog stereo output sources

Select the audio input (AUDIO1-2) that the external device is connected to for playback.

Using optical digital output sources

Select the AV input (AV1 or AV4) that the external device is connected to for playback.

Using coaxial digital output sources

Select the AV input (AV2 or AV3) that the external device is connected to for playback.

We recommend connecting audio devices with an coaxial digital output to the AV3 coaxial digital jack on this unit. This connection allows you to switch to the AV input 3 just by pressing the "CD" SCENE key (©P. 26).

Connecting video cameras and portable audio players

Use the VIDEO AUX jacks on the front panel to temporarily connect video cameras, game consoles, or portable audio devices to the receiver.

Select the V-AUX input to use these connected devices.

- Be sure to turn down the volume when connecting this unit and the other devices.
- When external components are connected to both the PORTABLE jack and the AUDIO jacks, the sound output from the PORTABLE jack is transmitted.

Transmitting input A/V to external devices

This receiver can transmit selected incoming analog audio/video signals to external devices through the AV OUT and AUDIO OUT jacks. You can record these input audio and video signals to VCRs or similar devices, or send them to other TVs or external devices.

Using the AV OUT jacks

Connect this jacks to the external device's video input jack and analog audio input jacks.

Using the AUDIO OUT jacks

Connect this jack to the external device's analog audio input jacks.

HDMI audio/video signals, component video signals, and digital audio signals cannot be transmitted from these jacks.

Connecting the FM/AM antennas

An indoor FM antenna and an AM loop antenna are included with this receiver. Connect these antennas properly to their respective jacks.

■ Improving FM reception

We recommend using an outdoor antenna. For more information, consult the nearest authorized dealer.

■ Improving AM reception

Connect this unit to an outdoor antenna with a 5-10 m vinyl-coated wire. Make sure the AM loop antenna is still connected.

Connecting the GND jack can reduce noise. Connect the jack to a store-bought ground bar or copper plate with a vinyl-covered wire and bury this new attachment in moist ground.

The GND jack is not to be connected to the ground socket of an electrical outlet.

Setting up speaker parameters

When you have finished connecting your speakers, configure this unit so that they output sound normally. Carry out the following steps to configure this unit.

STEP 1: Display the setting menu

Display the Setup menu from which you can configure all settings for this unit, and then display the menu for speaker settings.

STEP 2: Set the speaker status and size

Set the size and connection status of speakers and subwoofers, and whether to designate a specific speaker (or subwoofer) for low-frequency sound.

STEP 3: Set the distance from the listening point

Set the distance between the speakers and the listening point so that the sound from each speaker reaches the listening point at the appropriate timing.

STEP 4: Playback a test tone

Playback a test tone to allow you to configure sound volumes while listening to the actual effect your settings are having.

STEP 5: Adjust the volume

Adjust the volume for each speaker and configure them so that the sound is balanced.

STEP 1: Display the setting menu

Switch this unit on.

Press SETUP on the remote control.

The Setup menu that allows you to configure all parameters on this unit appears. 11

Check that "Speaker Setup" appears and press 10 ENTER.

This completes step 1.

STEP 2: Set the speaker status and size

The settings in step 2 are not necessary with the following speaker configuration:

- Front speaker: woofer diameter is 16 cm or larger
- Center/surround speakers: woofer diameter is 16 cm or smaller
- Subwoofer: connected

4 Check that "Config" appears and press INENTER.

^{1:} See the section "Setting various functions (Setup menu)" for details on the Setup menu (1979), 4(1).

CONNECTIONS

Setting up speaker parameters

Use <u>10</u>Cursor △ / ▽ to select the speaker (subwoofer) you want to configure, and then use <u>10</u>Cursor < / / ▷ to select speaker status and size.

Information	Description	Setting
Subwoofer	Sets the subwoofer status.	Yes/None
Front	Selects the size (sound reproduction capacity) of the front speakers.	
Center	Selects the size of the center speakers. Choose "None" if you do not have a center speaker connected.	None/Small/ Large
Sur. LR	Selects the size of the surround speakers. Choose "None" if you do not have surround speakers connected.	None/Small/ Large
Crossover	Audio with a frequency below this limit will be output from the subwoofer or the front speakers.	40Hz to 200Hz
SWFR Phase	Switches the phase of the subwoofer.	Normal/ Reverse
Extra Bass	Selects whether to play front channel low-frequency components through either of the front speakers or the subwoofer (Off), or through both the subwoofer and front speakers (On).	On/Off

10 Cursor △ / ▽ / ⊲ / ▷

10 ENTER

10 RETURN

- Whether or not you set "Crossover," "SWFR Phase," and "Extra Bass" is optional. Check how the effects sound and then configure them to your liking.
- Use the following as a guide when setting speaker sizes.

When speaker size is set to "Small," low-frequency components of the speakers you configured are produced from the subwoofer (or from the front speakers if there is no subwoofer).

When you have completed the settings for one speaker, repeat the same procedure for all speakers to complete settings.

6

Press <a>IIII RETURN when setting is complete.

Return to the previous menu.

This completes step 2.

STEP 3: Set the distance from the listening point

Press **①Cursor** ∇ to display "Distance" and press **①ENTER**.

Press
| Cursor △ / ▽ to select the speaker that you want to configure, and press | Cursor △ / ▷ to change the distance.

If necessary, you can change the setting units under "Unit."

Information	Description	Setting
Unit	Switches between setting units (feet / meters).	feet (ft) / meters (m)
Front L	Front speaker L	1.0 ft to 80.0 ft (0.30 m to 24.0 m)
Front R	Front speaker R	1.0 ft to 80.0 ft (0.30 m to 24.0 m)
Center	Center speaker	1.0 ft to 80.0 ft (0.30 m to 24.0 m)
Sur. L	Surround speaker L	1.0 ft to 80.0 ft (0.30 m to 24.0 m)
Sur. R	Surround speaker R	1.0 ft to 80.0 ft (0.30 m to 24.0 m)
SWFR	Subwoofer	1.0 ft to 80.0 ft (0.30 m to 24.0 m)

When you have completed the settings for one speaker, repeat the same procedure for all speakers to complete settings.

Press **MRETURN** when setting is complete.
Return to the previous menu.

This completes step 3.

CONNECTIONS

STEP 4: Playback a test tone

follows.

Use ©Cursor
√ b to select "On."
A test tone plays back as soon as you select "On."
The test tone plays back in a clockwise fashion, as

12 Check that the test tone is playing back and press **MRETURN**.

Return to the previous menu.

This completes step 4.

9 SETUP

10 ENTER

10 RETURN

10 Cursor △ / ▽ / ⊲ / ⊳

Press <u>10 Cursor</u> △ repeatedly to display "Level" and press <u>10 ENTER</u>.

STEP 5: Adjust the volume

Use ©Cursor △ / ▽ to switch the speaker that is outputting the test tone, looking for speakers with a different volume level to the others.

The front panel display shows the speaker that is outputting the test tone. \checkmark 1

Information	Speakers	
FL	Front speaker L	
FR	Front speaker R	
С	Center speaker	
SL	Surround speaker L	
SR	Surround speaker R	
SWFR	Subwoofer	

15 If you find a speaker with a different volume level to the others, use ™Cursor
✓ / ▷ to adjust the volume. Use Front speaker L or R as a default when adjusting volumes.

To raise the volume: Press $\boxed{10}$ Cursor \triangleright .

To lower the volume: Press $\boxed{10}$ Cursor \triangleleft .

Repeat steps 14 and 15 to adjust the volume balance for all speakers to your preference.

17 Press **MRETURN** when setting is complete.

Return to the previous menu.

This completes step 5.

Repeat procedures 10-12 (step 4) to stop playback of the test tone.

Once you have completed all settings, press <u>9SETUP</u> to close the Setup menu.

PLAYBACK

Basic playback procedure

- Turn on external components (TV, DVD player, etc.) connected to this unit.
- Turn on this unit and select the input source using 4 Input selector.

The name of the selected input source is displayed for a few seconds. \checkmark 1

Play the external component that you have selected as the source input, or select a radio station on the tuner.

Refer to the instruction manuals provided with the external component for details on playback.

For details on the following operations, refer to the corresponding pages:

- "FM/AM tuning" (\$\sip\$. 30)
- "Playing back tunes from your iPodTM/iPhoneTM"
 (**p. 33)
- "Playing back tunes from BluetoothTM components"
 (EST p. 35)

Press **18VOLUME** +/- to adjust the volume.

To mute the output.

4 Input selector

18 VOLUME +/19 MUTE

Press **19 MUTE** to mute the audio output.

Press 19 MUTE again to unmute.

Adjusting high/low-frequency sound (Tone control)

You can adjust the balance of the high-frequency range (Treble) and low-frequency range (Bass) of sounds output from the front left and right speakers to obtain desired tone.

The tone control of the speakers or headphones can be set separately. Set the headphone tone control with the headphones connected.

Press TONE CONTROL on the front panel repeatedly to select "Treble" or "Bass."

TONE CONTROL

The current setting is displayed on the front panel display.

Press PROGRAM <1/▷ to adjust the output level in those frequency ranges.

Adjustable range	-10.0 dB to +10.0 dB
Adjustment increments	2.0 dB

The display returns to the previous display soon after you release the key.

If you set the balance extremely off, sounds may not match those from other channels well.

1: You can change the input source name displayed on the front panel display as necessary (187p. 46).

Changing input settings with a single key (SCENE function)

This unit has a SCENE function that allows you to turn the power on and change input sources and sound field programs with one key.

Four scenes are available for different uses, such as playing movies or music. The following input sources and sound field programs are provided as the initial factory settings.

SCENE	Input	Sound field program
BD/DVD	HDMI1	Straight
TV	AV4	Straight
CD	AV3	Straight
RADIO	TUNER	5ch Enhancer

Registering input sources/sound field program

- Use 4 Input selector to select the input source you want to register.
- 2 Use the **7**Sound selection keys to select the sound field program you want to register.

Press the SCENE key until "SET Complete" appears on the front panel display.

Release the key when "SET Complete" is displayed.

When changing "SCENE," you can also use switch between the external components that the remote control operates (© p. 50).

Enjoying sound field programs

This unit is also equipped with a Yamaha digital sound field processing (DSP) chip. You can enjoy multi-channel playback for almost any sound source using various sound field programs stored on the chip, and a range of sound decoders.

Selecting sound field programs and sound decoders

This unit offers sound field settings (sound field programs) in many different categories suitable for movies, music and other uses. Choose a sound field program that sounds best with the source you are playing back, rather than relying on the name or explanation of the program.

- Sound field programs are stored for each input source.
 When you change the input source, the sound field program previously selected for that input source is applied again.
- If the sampling frequency of an input source is higher than 96 kHz, this unit does not apply any sound field programs.

Selects sound field program:

7 Sound selection keys

7 STRAIGHT

7 STEREO

Enjoying unprocessed playback (Straight decoding mode)

Use straight decoding mode when you want to playback sound without sound field processing. You can playback as follows in straight decoding mode.

2-channel sources such as CD

Stereo sound plays through the front left and right speakers.

Multi-channel playback sources such as BD/ DVD

Plays back audio from a playback source without applying sound field effects, using an appropriate decoder to split the signal into multiple channels.

Press **STRAIGHT** to activate the straight decoding mode.

Press **STRAIGHT** again to exit straight decoding mode.

■ Enjoying stereo playback

Select "2ch Stereo" from the surround field programs when you want to playback 2-channel stereo sound (from the front speakers only), regardless of the playback source.

Selecting "2ch Stereo" will playback as follows for the playback of CD and BD/DVD sources.

2-channel sources such as CD

Stereo sound plays back through the front speakers.

Multi-channel sources such as BD/DVD

Playback channels other than the front channels in the playback source are mixed with the front channels and played back through the front speakers.

Press **7STEREO** repeatedly to select "2ch Stereo."

To deactivate stereo playback, press any of the 7Sound selection keys to select a sound field program other than "2ch Stereo."

Enjoying sound field programs without surround sound speakers

This unit allows you to use virtual surround speakers to enjoy sound field surround effects, even without any surround speakers (Virtual CINEMA DSP mode). You can even enjoy surround sound presence with just a minimal configuration of the front speakers only. This unit will switch to Virtual CINEMA DSP mode automatically when surround speakers are unavailable. 1

Enjoying sound field programs with headphones

Even when headphones are connected, you can enjoy the reproduction sound field presence with ease (SILENT CINEMA mode). 22

- - When headphones are connected to this unit.
 - · When a "2ch Stereo" sound field program is selected.
 - · When straight decoding mode is selected.

- 2: However, SILENT CINEMA mode is not available in the following conditions:
 - When a "2ch Stereo" sound field program is selected.
 - · When straight decoding mode is selected.

Sound field programs

in the table indicates the sound field program for CINEMA DSP.

■ Category: MOVIE

Sound field programs optimized for viewing video sources such as movies, TV programs, and games.

Standard CINEMA DSP	This program creates a sound field emphasizing the surround feeling without disturbing the original acoustic positioning of multi-channel audio such as Dolby Digital and DTS. It has been designed with the concept of an ideal movie theater, in which the audience is surrounded by beautiful reverberations from the left, right and rear.
Spectacle CINEMA DSP	This program represents the spectacular feeling of large-scale movie productions. It reproduces a broad theater sound field that matches cinemascope and wider-screen movies with an excellent dynamic range providing everything from very small sound effects to large, impressive sounds.
Sci-Fi CINEMA DSP	This program clearly reproduces the finely elaborated sound design of the latest science fiction and special effects-featuring movies. You can enjoy a variety of cinematographically created virtual spaces reproduced with clear separation between dialog, sound effects and background music.
Adventure CINEMA DSP	This program is ideal for precisely reproducing the sound design of action and adventure movies. The sound field restrains reverberations but puts emphasis on reproducing a powerful space expanded widely to the left and right. The reproduced depth is also restrained relatively to ensure the separation between audio channels and the clarity of the sound.
Drama CINEMA DSP	This sound field features stable reverberations that match a wide range of movie genres from serious dramas to musicals and comedies. The reverberations are modest but offer an optimum 3D feeling, reproducing effects tones and background music softly but cubically around clear words and center positioning in a way that does not fatigue the listener even after long hours of viewing.
Mono Movie	This program is provided for reproducing monaural video sources such as a classic movie in an atmosphere of a good old movie theater. The program produces the optimum expansion and reverberation to the original audio to create a comfortable space with a certain sound depth.
Sports CINEMA DSP	This program allows the listeners to enjoy stereo sport broadcasts and studio variety programs with enriched live feeling. In sports broadcasts, the voices of the commentator and sportscaster are positioned clearly at the center while the atmosphere of the stadium expands in an optimal space to offer the listeners a feeling of presence in the stadium.

Action Game	This sound field is suitable for action games such as car racing and FPS games. It uses reflection data that limits the effects range per channel in order to offer a powerful playing environment that makes the listener feel as if they are right there by enhancing various effects tones while maintaining a clear sense of directions.
Roleplaying Game	This sound field is suitable for role-playing and adventure games. It combines the sound field effects for movies and the sound field designs for "Action Game" to represent the depth and 3D feeling of the field during play, while offering movie-like surround effects in the movie scenes in the game.

■ Category: MUSIC

This sound field is suitable when listening to music sources such as CDs.

Hall in Munich	This sound field simulates a concert hall with approximately 2500 seats in Munich, using stylish wood for the interior finishing as normal standards for European concert halls. Fine, beautiful reverberations spread richly, creating a calming atmosphere. The listener's virtual seat is at the center left of the arena.
Hall in Vienna	This is an approximately 1700-seat, middle-sized concert hall with a shoebox shape that is traditional in Vienna. Pillars and ornate carvings create extremely complex reflections from all around the audience, producing a very full, rich sound.
Chamber CINEMA DEP	This program creates a relatively wide space with a high ceiling like an audience hall in a palace. It offers pleasant reverberations that are suitable for courtly music and chamber music.
Cellar Club	This program simulates a live house with a low ceiling and homey atmosphere. A realistic, live sound field features powerful sound as if the listener is in a row in front of a small stage.
The Roxy Theatre	This is the sound field of a rock music live house in Los Angeles, with approximately 460 seats. The listener's virtual seat is at the center left of the hall.
The Bottom Line	This is the sound field at stage front in The Bottom Line, a famous New York jazz club once. The floor can seat 300 people to the left and right in a sound field offering real and vibrant sound.
Music Video	This sound field offers an image of a concert hall for live performance of pop, rock and jazz music. The listener can indulge oneself in a hot live space thanks to the presence sound field that emphasizes the vividness of vocals and solo play and the beat of rhythm instruments, and to the surround sound field that reproduces the space of a big live hall.

■ Category: STEREO

Suitable for listening to stereo sources.

2ch Stereo	Use this program to mix down multi-channel sources to 2 channels. When multi-channel signals are input, they are down mixed to 2 channels and output from the front left and right speakers.
5ch Stereo	Use this program to output sound from all speakers. When you play back multi-channel sources, this unit down-mixes the source to 2 channels, and then outputs the sound from all speakers. This program creates a larger sound field and is ideal for background music at parties, etc.

■ Category: ENHNCR (Compressed music enhancer)

Suitable for listening to compressed audio, such as MP3.

	Use this program to restore the original depth and dynamics of 2-channel or multi-channel to compression audio.
5ch Enhancer	Use this program to play back compression artifacts in 5-channel stereo.

■ Category: SUR.DEC (Surround decode mode)

Select this program to playback sources with selected decoders. You can playback 2-channel sources as 5.1-channel sound.

□□ Pro Logic	A Dolby Pro Logic decoder. Suitable for any source.	
□□ PLII Movie	A Dolby Pro Logic II decoder. Suitable for viewing any movie.	
□□ PLII Music	A Dolby Pro Logic II decoder. Suitable for listening to music.	
□□ PLII Game	A Dolby Pro Logic II decoder. Suitable for playing games.	

5 FM 5 AM

5 TUNING ⟨ / ⟨ 12 Numeric keys

FM/AM tuning

When using the FM/AM tuner, adjust the direction of the FM/AM antenna connected to this unit to get the best reception.

The FM/AM tuner of this unit provides the following two modes for tuning.

Normal tuning

You can tune in to a desired FM/AM station by searching or specifying its frequency.

Preset tuning (p. 31)

You can preset the frequencies of FM/AM stations by registering them to specific numbers, and later just select those numbers to tune in.

Selecting a frequency for reception (Normal tuning)

Press 4TUNER to switch to the tuner input.

Press 5FM or 5AM to select a band to receive.

Use $5TUNING \wedge / \vee$ to set a frequency to receive.

5TUNING 众

Increases the frequency. Press and hold this key for longer than a second to search automatically for a station on a higher frequency than the current one. 🗳 1

5TUNING ∀

Decreases the frequency. Press and hold this key for longer than a second to search automatically for a station on a lower frequency than the current one. **1**

Lights up when receiving a broadcast from a station

Lights up when receiving a stereo broadcast

■ Entering a frequency number

In normal tuning mode, use the 12 Numeric keys on the remote control to enter a frequency. Leave the decimal point out when entering a number. 22 For example, enter as follows to select a station on 98.5 MHz.

^{■ 1:} When searching for a station, release the key once the search has

- 4 TUNER
- 5 PRESET ^/~
- 10 Cursor △ / ▽ / ⊲ / ▷
- 10 ENTER
- 10 RETURN
- 17 OPTION

■ When signal reception is poor

When you are receiving an FM broadcast and cannot obtain a stable stereo broadcast, you can force this unit to receive in a monaural mode.

- Press 4TUNER to switch to the tuner input.
- Press **Press Press Press**
- **1** Use **10 Cursor** △ / ▽ to select "FM Mode."

When setting is completed, press TOPTION to close the Option menu.

To return this unit to its original settings, use the same procedure to return the settings to "Stereo."

Registering and recalling a frequency (Preset tuning)

You can register up to 40 FM/AM stations as preset stations. There are two methods of presetting stations, "Auto Preset" and "Manual Preset." Use one of these methods to register stations.

■ Presetting FM stations automatically (Auto Preset)

The tuner detects FM stations with strong signals and registers up to 40 automatically.

AM stations cannot be automatically registered. Use manual station preset (p. 32).

- Press 4TUNER to switch to the tuner input.
- Press **TOPTION** to display the Option menu. **1**
- 3 Use [™]Cursor △ / ▽ to select "Auto Preset."

Press IDENTER, then press SPRESET ∧ / ∨ or IDCursor △ / ▽ to choose the preset number from which to start the Auto Preset function.

Auto Preset will begin approximately 5 seconds after you select a preset number.

If you do not select a preset number, Auto Preset will begin approximately 5 seconds after "READY" is displayed.

Selecting a preset number

To cancel registration, press **10 RETURN**.

During Auto Preset

When Auto Preset is complete

The Option menu closes automatically when presetting is complete. $\[\]^2$

- 1: See the section on "Configuring the settings specific for each input source (Option menu)" for details on the Option menu (**p. 37).
- 2: The preset with the lowest preset number will be selected automatically immediately after presetting.

9 0 +10 ENT

4 TUNER 5 MEMORY 5 PRESET ^/~

10 Cursor △ / ▽ 10 ENTER 10 RETURN 12 Numeric keys 17 OPTION

Use one of the following methods to register the station you are currently receiving.

■ Registering to a preset number to which no station is registered

Press 5 MEMORY for 2 seconds or longer.

The station will be registered automatically to the lowest open preset number (or the next number after the one registered most recently).

■ Designating a preset number for registration

Press 5 MEMORY once, to display "Manual Preset" on the front panel display. After a small wait, the preset number that the station has been registered to will appear.

Press $\boxed{5}$ PRESET \wedge / \vee to select the preset to register the station to, and then press **5MEMORY** to register.

To cancel registration, press 10 RETURN or do not operate the remote control for about 30 seconds.

■ Recalling a preset station

You can call preset stations registered by automatic station preset or manual station preset. **1**

To select a registered station, press **5PRESET** ^ / ∨ to select the preset number of the station. 2

Clearing preset stations

Press 4 TUNER to switch to the tuner input.

Press **17 OPTION** to display the Option menu. 🕸 3

Use 10 Cursor △ / ▽ to display "Clear Preset" and press 10 ENTER.

The number of the preset to be cleared

Press **10 RETURN** to cancel the operation.

Use 10 Cursor \triangle / ∇ to select the preset number you want to clear, and press 10 ENTER to clear it.

Repeat this operation to clear the registration of multiple numbers.

Press **Press Press Press Press Press Press Press**

- 1: Preset numbers to which no stations are registered will be skipped. "No Presets" or "No Presets in Memory" is displayed when there are no stations are registered.
- 2: To select a station by selecting a preset number, use the 12 Numeric keys to enter the preset number of the station you wish listen to. When an invalid number is entered, "Wrong Num." appears on the front panel display. Check that you have entered the correct number.
- 3: See the section on "Configuring the settings specific for each input source (Option menu)" for details on the Option menu (**₽** p. 37).

Playing back tunes from your iPod™/iPhone™

Once you have connected a Yamaha iPod universal dock (such as the YDS-12, sold separately) to this unit, you can enjoy playback of your iPod/iPhone using the remote control supplied with this unit. When playing back from an iPod/iPhone, you can also use the compressed music enhancer sound field programs (property 29) to give compressed audio formats such as MP3 a sharper, more dynamic sound.

- iPod touch, iPod (Click and Wheel including iPod classic), iPod nano, iPod mini, iPhone, iPhone 3G, and iPhone 3GS are supported (As of March 2010).
- When connecting an iPhone, please use a YDS-12.
- · Some features may not be compatible depending on the model or the software version of your iPod.
- Some functions may not be available for some Yamaha iPod universal dock models. This explanation focuses on the YDS-12.

Connecting the Yamaha iPod universal dock

Use the dedicated cable to connect the dock to the DOCK jack on the rear panel of this unit. Refer to the operating instructions of the iPod universal dock for information on how to connect your iPod/iPhone.

CAUTION

To prevent accidents, place this unit in standby mode before connecting an iPod universal dock.

Switch the power on and place your iPod/iPhone in the dock. The unit is now ready for playback.

Controlling an iPod/iPhone

After setting your iPod/iPhone in your dock, just press **4DOCK** to switch to DOCK input and you can operate your iPod/iPhone.

You can use the remote control of this unit to carry out basic operations (playback, stop, skip etc) on your iPod/iPhone. You can check song information on the iPod/iPhone screen.

4DOCK	Switches to the DOCK (iPod) input.
10 Cursor △ / ▽	Move the cursor up and down to different fields.
10 Cursor ⊲ / ⊳	Returns to the previous menu or enter the menu you have selected.
10ENTER	Enters the selected menu.
11 🗸	Searches backwards while held down.
	Searches forwards while held down.
	Skips to the beginning of the currently playing song. Pressing repeatedly skips one song backwards with each press.
	Skips to the beginning of the next song.
11 🗆	Stops playback.
11 00	Switches between playback and pause.
11 >	Switches between playback and pause.

■ To charge the iPod/iPhone when this unit is in standby mode

If you connect an iPod/iPhone to the iPod universal dock the iPod/iPhone will always charge when this unit is turned on.

This unit can charge an iPod/iPhone even when in standby mode (iPod Standby Charge function). Check the iPod CHARGE indicator (iPod CHARGE) on the front panel display of this unit to check whether this unit is charging an iPod/iPhone while in standby mode. While charging an iPod/iPhone, the iPod charge indicator lights. The indicator goes out when charging is finished.

If necessary, you can also deactivate the iPod Standby Charge function.

- Press 4 DOCK to switch to the DOCK input.
- Press **Press Press Press Press Press Press Press**
- Use
 <!-- Use
 <!--

- Use
 Use Cursor
 / ▷ to switch the setting to "Off."
- When setting is completed, press Proprior to close the Option menu.

To re-activate the Standby Charge function carry out this procedure again and change the "Standby Charge" setting back to "Auto."

Playing back tunes from Bluetooth™ components

You can connect a Yamaha Bluetooth wireless audio receiver (such as the YBA-10, sold separately) to this unit and enjoy wireless playback from Bluetooth-compatible portable music players. **§1**

NOTE

When playing back from a Bluetooth component for the first time, you must first pair the devices (register the Bluetooth components). When establishing a wireless connection you must carry out pairing on both this unit and on the Bluetooth component.

Connecting a Yamaha Bluetooth wireless audio receiver

Use the dedicated cable to connect the dock to the DOCK jack on the rear panel of this unit.

The Bluetooth wireless audio receiver connection will be complete when this unit is turned on.

CAUTION

To prevent accidents, place this unit in standby mode before connecting a Bluetooth wireless audio receiver.

Pairing Bluetooth™ components

Be sure to carry out pairing when connecting a Bluetooth component for the first time, or when settings have been deleted.

Refer to the operating instructions of your Bluetooth component as necessary when carrying out pairing.

The Yamaha Bluetooth wireless audio receiver can be paired with up to eight Bluetooth components. When the ninth device is paired, the pairing settings for the device which has not been used for the longest period of time will be deleted.

- Press 4DOCK to switch to the DOCK input.
- Turn on the Bluetooth component you want to pair with and set it to pairing mode.
- Press **17 OPTION** to display the Option menu and use **10 Cursor** △ / ▽ to select "Pairing."

Press **MENTER** to start pairing.

- To cancel pairing, press 10 RETURN.
- You can also press and hold **5MEMORY** on the front panel to begin pairing.
- Make sure the Bluetooth component recognizes the Bluetooth wireless audio receiver.

When the device is recognized it will appear in the Bluetooth component list, for example as "YBA-10 YAMAHA."

Select the Bluetooth wireless audio receiver from the Bluetooth component list, and enter a pass key "0000" into the Bluetooth component.

When pairing occurs correctly

1: This unit supports A2DP (Advanced Audio Distribution Profile) of the Bluetooth profile.

Playing back tunes from Bluetooth™ components

4 роск

 $\boxed{10}$ Cursor \triangle / ∇

10 ENTER

17 OPTION

Using Bluetooth™ components

When pairing is complete, carry out the following procedure to achieve a wireless connection between this unit and the Bluetooth component. When the wireless connection is complete, you playback from Bluetooth components.

Depending on Bluetooth components, a wireless connection is established automatically or by operating the Bluetooth components. In that case, it is not necessary to carry out the following procedure.

Press 4 DOCK to switch to the DOCK input.

Press **Press Press Press Press Press Press Press**

Use <a>□Cursor △ / ▽ to select "Connect" and press <a>□ENTER. <a>□ 1

When wireless connection is complete

"Not found" is displayed when there is an error connecting. Check that the following conditions have been satisfied, and try to establish a wireless connection again.

- Both this unit and the Bluetooth component are paired.
- The Bluetooth component is switched on.
- The Bluetooth component is within 32 feet (10 meters) of the Bluetooth wireless audio receiver.

Operate the Bluetooth component for playback.

To disconnect a wireless connection, repeat the same steps, and in step 3, select "Disconnect."

Configuring the settings specific for each input source (Option menu)

This receiver has a unique option menu specific for each type of input source, such as volume trim for compatible input sources, audio/video data display for signals from external devices, and other frequently used menu items.

Option menu display and setup

- Use the Input selector on the remote control to select the Option menu you wish to display.
- Press TOPTION.

 The Option menu appears for the desired input source.

Option menu

OPTION

**VOLUME Trim

Base

Select the desired control/setup item using 10 Cursor △ / ▽ and press 10 ENTER.

The displayed Option menu items differ depending on the input source.

For details, read the following Option menu items section.

Select the desired menu item (or enable a function) using \square Cursor $\triangle / \nabla / \triangleleft / \triangleright$ and \square ENTER.

4 Input selector

10 ENTER 10 RETURN

17 OPTION

10 Cursor △ / ▽ / ⊲ / ⊳

Parameters of the selected item are displayed. The parameters you can set differ depending on the menu items.

- You can also use **TORETURN** to return to the previous screen or close the Option menu.
- Certain selected menu items may automatically close the Option menu when their functions are enabled.

To close the Option menu, press **TOPTION**.

For a few seconds after closing the Option menu, the remote control keys may not function. If this occurs, reselect the input source.

Option menu items

The following menu items are provided for each input source.

HDMI1-4	Volume Trim	Audio In	Signal Info	
AV1-2	Volume Trim	Audio In	Signal Info	
AV3-4	Volume Trim	Signal Info		
AV5	Volume Trim			
AUDIO1-2	Volume Trim			
V-AUX	Volume Trim			
TUNER	Volume Trim	FM Mode	Auto Preset	Clear Preset
iPod (DOCK)	Volume Trim	Standby Charge		
Bluetooth (DOCK)	Volume Trim	Connect/ Disconnect	Pairing	

Adjusting volume between input sources

Volume Trim

Input source: All

Reduces any change in volume when switching between input sources by correcting volume differences in each input source. You can adjust this parameter for each input source.

Adjustable range	-6.0 dB to 0.0 dB to +6.0 dB
Default setting	0.0 dB
Adjustment increments	0.5 dB steps

■ Combining HDMI/AV1-2 input source video and audio

Audio In

Input source: HDMI1-4, AV1-2

Combines video from HDMI or AV input sources with analog/ digital audio inputs in situations such as:

- an external device is connected with an HDMI cable but cannot transmit audio through HDMI
- an external device with component video output and analog audio output (such as certain game consoles) are connected to the system

Inputs that change the audio source

Assignable audio input jacks

To change assignments, select an input source (HDMI1-4 or AV1-2) as the video input first, and then select audio input jacks in this menu.

Set as follows according on the desired combination of audio input jacks.

Audio inputs	Settings method
Optical digital audio input	Select AV1 or AV4. Connect the external component audio cable to the optical jack for the selected input.
Coaxial digital audio input	Select AV2 or AV3. Connect the external component audio cable to the coaxial jack for the selected input.
Analog audio input	Select one of AV5, AUDIO1, or AUDIO2. Connect the external component audio cable to the audio jack for the selected input.

- For details of settings, refer to "Receiving audio from other input sources" (1879. 16) and "Component connections to analog audio output devices" (1879. 17).
- To return audio inputs to their previous settings, display this item again, and select the original input jack.

Displaying information on audio/video signals

Si9nal Info

Input source: HDMI1-4, AV1-4

Displays information on digital audio and video signals on the front panel display. You can display the signal information by pressing $\boxed{0}$ ENTER on the menu item and using $\boxed{0}$ Cursor \triangle / ∇ .

Audio information

FORMAT	Format of audio signals.
СНЯМ	The number of input signal channels (front/surround/LFE). For example, if input signal channels are 3 front channels, 2 surrounds and LFE, "3/2/0.1" is displayed.
SAMPL	The sampling frequency of analog-to-digital conversion.
1 RATE	The bit rate of input signal per second.

Video information

v In	Format and resolution of video input signal.	
V DUT	Format and resolution of video output signal.	
V · M5G (appears only when an error has occurred)	Error messages about HDMI signals and components. Error message HDCP Error HDCP authentication failed. Device Over The number of connected HDMI components is over the limit.	

- "No Signal" is displayed when no signals are being received, and "---" is displayed if this unit cannot recognize the incoming signal.
- The bit rate may vary during playback.

■ Changing FM mode (Stereo/Monaural)

FM Mode

Input source: TUNER

Sets this unit to automatically match FM broadcast frequencies in stereo, or to convert the frequency to monaural (ESP. 31).

Automatically presetting FM radio stations

Auto Preset

Input source: TUNER

Automatically detects radio stations in the FM frequency and registers them as preset stations (Feep. 31).

■ Clearing preset FM stations

Clear Preset

Input source: TUNER

Clears the preset stations (p. 32).

■ Charging an iPod[™]/iPhone[™] in standby mode

Standby Charge

 $\textbf{Input source:} \quad iPod\ (DOCK)$

Charges an iPod/iPhone stationed in the iPod universal dock while the receiver is in standby mode (FSF p. 34).

■ Bluetooth[™] wireless connections

Connect

Disconnect

Input source: Bluetooth (DOCK)

Enables/disables the Bluetooth wireless connection (p. 36). Select "Connect" to establish the wireless connection. Select "Disconnect" to disable the wireless connection.

■ Pairing the Bluetooth[™] wireless audio receiver and your Bluetooth component

Pairin9

Input source: Bluetooth (DOCK)

Pairs your Bluetooth wireless device and this receiver (p. 35).

 $\boxed{10} \, \textbf{Cursor} \, \triangle \, \textit{/} \, \triangledown \, \textit{/} \, \triangleleft \textit{/} \, \triangleright$

10 ENTER

10 RETURN

Setting various functions (Setup menu)

You can configure various function settings of this unit using the Setup menu.

Setup menu display and settings

Press 9SETUP on the remote control.

2 Use the $@Cursor \triangle / \nabla$ to select the desired menu and press @ENTER.

Setup menu categories

Speaker Setup	Manages settings for speakers.
Sound Setup	Manages settings for audio output.
Func. Setup	Manages settings to make receiver operation easier, such as input source labeling and auto-standby functions.
DSP Parameter	Sets parameters for sound field programs.
Memory Guard	Protects settings against accidental alteration.

Ex: Sound Setup menu

Use Mcursor / ∨ to navigate the submenus to find the desired setting and press Mcurson in the desired setting a

When multiple items appear, use **©Cursor** △ / ▽ to select the desired item.

Press \bigcirc Cursor \triangleleft / \triangleright to change the setting. You can change other items by repeating step 4 and 5.

You can also use **IDRETURN** to return to the previous screen.

Press **9SETUP** to exit the Setup menu.

For a few seconds after closing the Setup menu, the remote control keys may not function. If this occurs, reselect the input source.

Setup menu items

Setup menu

Manages settings for speakers

Speaker Setup submenu

Confi9	Manually manages speaker configuration, such as speaker size (sound production capacity), and bass audio processing.
Level	Manually adjusts the volume of each speaker.
Distance	Manually adjusts the output of each speaker based on distance to the listening point.
Equalizer	Selects an equalizer to adjust speaker output characteristics.
Test Tone	Generates test tones.

■ Manual speaker setup

Config

Adjusts the output characteristics of the speakers based on manually set parameters.

In the Config submenu, you can select the speaker size characteristic (Large or Small). Select the size (sound reproduction capacity) that matches your speakers.

When speaker size is set to "Small," low-frequency components of the speakers that you configured are produced from the subwoofer (or from the front speakers if there is no subwoofer).

Subwoofer Confirms the subwoofer.

Yes (Default)	Select this when you have a subwoofer connected. During playback, the subwoofer will produce audio from the LFE (low-frequency effect) channel and bass audio from other channels. 1
None	Select this when you do not have a subwoofer connected. The front speakers will produce audio from the LFE (low-frequency effect) channel and bass frequency audio from other channels.

Front

Selects the size (sound reproduction capacity) of the front speakers. $\m 2$

Small (Default)	Select this for small speakers. The subwoofer will produce front channel low-frequency components. 3
Lar9e	Select this for large speakers. The front speakers will produce all of the front channel frequency components.

Center

Selects the size of the center speakers.

None	Select this when there is no center speaker. The front speakers will produce center channel audio.
Small (Default)	Select this when a small center speaker is connected.
Lar9e	Select this when a large center speaker is connected.

Sur. LR Selects the size of the surround speakers.

None	Select this when no surround speakers are connected. The front speakers will produce surround channel audio signals.
Small (Default)	Select this when the surround speakers are small.
Lar9e	Select this when the surround speakers are large.

 ^{■ 1:} Enabling the "Extra Bass" setting allows both the subwoofer and the front speakers to produce bass audio.

^{☼ 2:} When "Subwoofer" is set to "None," you can only choose "Large." If the front speaker setting is "Small" and you change "Subwoofer" to "None," it will automatically change to "Large."

 ^{■ 3:} Enabling the "Crossover" setting allows you to set the frequency components
 of audio signals transmitted from the front speakers to the subwoofer.

Crossover

Sets the lower limit of low-frequency component output from speakers set to "Small."

Audio with a frequency below that limit will be produced from the subwoofer or the front speakers. **§1**

40Hz	110Hz
60Hz	120Hz
80Hz (Default)	160Hz
90Hz	200Hz
100Hz	

SWFR Phase

Sets the phase of the subwoofer if the bass audio is lacking or unclear.

NRM (Default)	Does not change the subwoofer phase.
REV	Reverses the subwoofer phase.

Extra Bass

Allows the front channel low-frequency components to be produced exclusively by the subwoofer, or by both the subwoofer and the front speakers.

0n	The subwoofer and the front speakers produce the front channel low-frequency components.
Off (Default)	Depending on the size of the front speakers, either the front speakers or the subwoofer produce the front channel low-frequency components.

When the "Subwoofer" is set to "None," the "Extra Bass" setting is disabled.

■ Controlling the volume of each speaker

Level

Separately adjusts the volume of each speaker. Use $\boxed{10\text{Cursor}} \triangle / \nabla$ to select the desired speaker and adjust the volume with $\boxed{10\text{Cursor}} \triangleleft / \triangleright$.

FL	Front speaker L
FR	Front speaker R
С	Center speaker
SL	Surround speaker L
SR	Surround speaker R
SWFR	Subwoofer

Adjustable range	-10.0 dB to +10.0 dB
Default setting	0 dB (FL / FR / SWFR) -1.0 dB (C / SL / SR)
Adjustment increments	0.5 dB

■ Manually setting speaker distance

Distance

Adjusts the timing at which the speakers produce audio so that sounds from the speakers reach the listening position at the same time.

Selecting adjustment units

Use $\boxed{0}$ Cursor \triangle / ∇ to display "Unit," and then use $\boxed{0}$ Cursor \triangleleft / \triangleright to choose the units of length (feet or meters).

Setting distances for each speaker

Use $\boxed{0}$ Cursor \triangle / ∇ to display the speaker you want to configure, and then use $\boxed{0}$ Cursor $\triangleleft / \triangleright$ to set the distance from the speaker to your listening position.

Unit	Selects the distance unit (feet or meters).
Front L	Front speaker L
Front R	Front speaker R
Center	Center speaker
Sur. L	Surround speaker L
Sur. R	Surround speaker R
SWFR	Subwoofer

Adjustable range	1.0 ft to 80.0 ft (0.30 m to 24.0 m)
Default setting	10.0 ft (3.00 m) (Front L/Front R/SWFR) 8.5 ft (2.60 m) (Center) 8.0 ft (2.40 m) (Sur. L/Sur. R)
Adjustment increments	0.5 ft (0.10 m)

 ^{1:} If your subwoofer has a volume control or a crossover frequency control, set the crossover frequency to maximum and the volume to half (or slightly less).

Adjusting sound quality with the equalizer

Equalizer

Adjusts sound quality and tune with a graphic equalizer.

EQ Select

Turns the graphic equalizer on or off. By selecting GEQ and pressing 10 ENTER, you can adjust the characteristics of the graphic equalizer.

GEQ (Default)	Uses the graphic equalizer to adjust sound quality.
0ff	Does not activate the equalizer.

■ Adjusting the graphic equalizer

- When "EQ Select" is displayed, use ©Cursor
 to select "GEQ" and press ©ENTER.

Frequency range	63 Hz/160 Hz/400 Hz/1 kHz/2.5 kHz/6.3 kHz/ 16 kHz
Adjustable range	-6.0 dB to 0 dB to +6.0 dB
Default setting	0 dB
Adjustment increments	0.5 dB

the selected frequency

You can use $\square Cursor \triangle / \nabla$ to select another frequency or return to step 2. Repeat steps 2-3 to adjust the tone to your liking.

When you have finished making adjustments, press **9SETUP** to close the Setup menu.

■ Generating test tones

Test Tone

Turns the test tone generator on or off.

Off (Default)	Does not generate test tones.
0n	Generates test tones. While "On" is selected, test tones are produced constantly.

You can use the test tone in a variety of circumstances. For example, you can adjust the volume balance settings for each speaker, or whenever you adjust the settings on the internal graphic equalizer, you can listen to the actual effect while operating this unit. Turn the test tone off when you have finished making adjustments.

Setting the audio output function of this unit

Sound Setup submenu

Lipsync	Adjusts the delay between video and audio output.
Adaptive DRC	Auto-adjusting the sound level to make even low volumes more audible.
D.Ran9e	Selects the dynamic range adjustment method for digital audio playback.
Max Volume	Sets the maximum volume for this receiver.
Init.Volume	Sets the initial volume for when this receiver is turned on.
HDMI Audio Out	Selects audio signals received through the HDMI input jack.

■ Synchronizing audio/video output

Lipsync

Adjusts the delay between audio and video output (Lipsync function).

HDMI Auto

When connecting to a TV via HDMI, automatically adjusts output timing if the TV supports an automatic lipsync function.

Off (Default)	Select this when the connected TV does not support the automatic lipsync function or you do not wish to use the automatic lipsync function. Set the correction time in "Manual."
0n	Select this when the TV supports the automatic lipsync function. Fine-adjust the correction time in "Auto."

Auto

Fine-adjust the audio output timing by entering the correction time provided when "HDMI Auto" is set to "On."

Adjustable range	0 ms to 240 ms
Adjustment increments	1 ms

Manual

Manually adjusts the correction time. Select this when the TV does not support the automatic lipsync function or "HDMI Auto" is set to "Off."

Adjustable range	0 ms to 240 ms
Adjustment increments	1 ms
Default setting	0 ms

Auto-adjusting the sound level to make even low volumes more audible

Adaptive DRC

Adjusts the dynamic range in conjunction with the volume level (from minimum to maximum). When you play audio at night or at low volumes, it is a good idea to set parameter to "Auto." 1

Auto	Adjusts the dynamic range automatically.
Off (Default)	Does not adjust the dynamic range automatically.

When the auto function is enabled, it adjusts the dynamic range as follows.

^{1:} The Adaptive DRC setting is also effective when you use headphones.

Auto-adjusting Dolby Digital and DTS dynamic range

D.Range

Selects the dynamic range adjustment method for audio bitstream (Dolby Digital and DTS) playback.

Max (Default)	Produces audio without adjusting the dynamic range.
STD	Sets the standard dynamic range suitable for home use.
Min	Sets the dynamic range at the lowest level for playback. This is useful for low-volume audio.

■ Setting the maximum volume

Max Volume

Sets a maximum volume level so that the audio is not played too loudly. The default setting of +16.5 dB produces the highest volume.

Adjustable range	-30.0 dB to +15.0 dB / +16.5 dB (Maximum volume)
Default setting	+16.5 dB
Adjustment increments	5.0 dB

■ Setting the startup volume

Init.Volume

Sets the initial volume for when this receiver is turned on. When this parameter is set to "Off," the volume is set at the level when the receiver last entered standby mode. ***1**

Adjustable range	Off, Mute, -80 dB to +16.5 dB
Default setting	Off
Adjustment increments	0.5 dB

Changing the output destination of HDMI input audio signals

HDMI Audio Out

Choose whether to playback audio from an external component such as a BD/DVD player connected via HDMI through this unit or through a TV.

Amp (Default)	Outputs audio through this unit only. When this setting is selected, the external component outputs an audio format compatible with this unit.
V	Outputs audio through a TV only. When this setting is selected, the external component outputs an audio format compatible with the TV. 22
Amp+TV	Outputs audio from the TV and this unit. When this setting is selected, the external component outputs an audio format compatible with this unit and TV.

²: When "TV" is selected, the speakers of this unit do not output sound.

10 ENTER

10 RETURN

Making the receiver easier to use

Func. Setup submenu

Input Rename	Changes the input source names.
AutoPowerDown	Goes into standby mode.
Dimmer	Sets the Brightness of the front panel display.

■ Changing input source names

Input Rename

Changes the input source names to be shown on the front panel display.

You can change an input source name by choosing from a list of templates, or make one of your own.

■ Selecting a template

Select "Input Rename" from the Setup menu and press MENTER.

2 Select the input source that you want to rename using $\boxed{0}$ Cursor \triangle / ∇ .

Blu-ray	Satellite
DVD	VCR
SetTopBox	Tape
Game	MD
TV	PC
DVR	iPod
CD	HD DVD
CD-R	(blank)

Confirm the new display name by pressing **©RETURN**. Press **9SETUP** to exit the Setup menu.

To cancel a name change, select the original name and then press **10 RETURN** to exit renaming.

■ Entering an original name

Select "Input Rename" from the Setup menu and press **10 ENTER**.

Select the input source that you want to rename using Mcursor △ / ▽.

Press **IDENTER**.

Use ¹⁰Cursor △ / ▽ to select the characters you wish to change, and use ¹⁰Cursor ⊲ / ▷ to enter those characters.

The following characters are available for input source.

- A to Z, a to z
- 0 to 9
- Symbols (#, *, -, +, etc.)
- Space
- Repeat step 4 until you have entered the new input source name.
- Confirm the new display name by pressing MENTER. Press SETUP to exit the Setup menu.

To cancel a name change, press **10 RETURN**.

■ Goes enter standby mode automatically when you leave it without operating

AutoPowerDown

If you do not operate this unit or use the remote control for an extended period of time, it will automatically go into standby mode (Auto Power Down function). This function's default setting is "Off." When you wish to activate this function, set the amount of time to pass before this unit will enter standby.

Off (Default)	Auto Power Down function is disabled.
4hours	Goes into standby mode, when you have not operated this unit for four hours.
8hours	Goes into standby mode, when you have not operated this unit for eight hours.
12hours	Goes into standby mode, when you have not operated this unit for twelve hours.

This unit starts a countdown of 30 seconds before entering the standby mode. Pressing any key of the remote control during the countdown cancels entering the standby mode and reset the timer.

Setting the brightness of the front panel display

Dimmer

Sets the brightness of the front panel display. Lowering the setting dims the display.

Adjustable range	-4 to 0
Default setting	0

Setting sound field program parameters

You can set the parameters for the sound field programs (1887). 48).

Prohibiting setting changes

Prohibits setting changes to prevent careless changes being made to the settings on Setup menu.

Off (Default)	Settings are not protected.
0n	Prohibits changes to the settings on Setup menu until it is returned to "Off." While set to "On," the unit displays "Memory Guard!" when an attempt is made to change the settings.

10 Cursor \triangle / \triangledown / \triangleleft / \triangleright

10 ENTER

Setting sound field program parameters

Although the sound field programs would satisfy you as they are with the default parameters, you can arrange the effect by setting the sound field elements (parameters). To adjust the sound effects suitable for acoustical conditions of audio/video sources or rooms, perform the following operations.

Setting sound field parameters

Press

SETUP to display the Setup menu.

Use <u>□Cursor △ / ▽ to select "DSP</u> Parameter" and press <u>□ENTER</u>.

Use **©Cursor**
✓ / > to choose the sound field program you want to edit.

Press [™]Cursor △ / ▽ to select the parameter that you want to change, and press [™]Cursor ⊲ / ▷ to change the parameter.

When there are multiple parameters in the sound field program you are configuring, repeat step 4 as necessary to change other parameters.

Once you have completed editing, press

SETUP to close the Setup menu.

To initialize the sound field parameters
To set the parameters of the sound field program back
to default, press ¹⁰Cursor ∇ repeatedly during
editing to select "Initialize" and press ¹⁰Cursor ▷.
When "Press Again >" is displayed, press ¹⁰Cursor
▷ again to initialize.

To cancel operations, press **□Cursor** < when "Press Again" appears and return to the original display.

■ CINEMA DSP parameters

DSP Level

Change the effect level (level of the sound field effect to be added). You can adjust the level of the sound field effect while checking the sound effect.

Adjustable range	-6 dB to 0 dB to +3 dB
Default setting	0 dB

Adjust "DSP Level" as follows:

- The effect sound is too soft.
- There are no differences between effects of the sound field programs.
 - → Increase the effect level.
- The sound is dull.
- The sound field effect is added too much.
 - → Reduce the effect level.

SEIUP

Parameters usable in certain sound field programs

2ch Stereo only

Direct

Automatically bypasses the DSP circuit and tone control circuit depending on the condition of tone control etc., when an analog sound source is played back. You can enjoy a higher quality sound.

Auto (Default)	Outputs sound by bypassing the DSP circuit and tone control circuit when both tone controls of "Bass" and "Treble" are set to 0dB.
Off	Does not bypass the DSP circuit and tone control circuit.

5ch Stereo only

CT Level

Adjusts the center channel volume. *1

Adjustable range	0 to 100%
Default setting	100%

SL Level

Adjusts the volume of the surround L channel. **1**

Adjustable range	0 to 100%
Default setting	100%

SR Level

Adjusts the volume of the surround R channel. **11**

Adjustable range	0 to 100%
Default setting	100%

Straight Enhancer/5ch Enhancer only

EFCT LVL

Adjusts the effect level of the compressed music enhancer mode.

High (Default)	Standard effect.
	Sets when the high-frequency signals of the source are emphasized excessively.

Parameters usable in surround decoder

□ PLII Music only

Panorama

Adjusts the soundscape of the front sound field. Sends front left/ right channels sounds to the surround speakers as well as the front speakers for a wraparound effect.

Off (Default)	Disables the effect.
0n	Enables the effect.

CT Width

Spreads the center channel sound to the front left and right speakers to suit your needs or preferences. Set this parameter to 0 for outputting the center sound from the center speaker only, or to 7 for outputting it from the front left/right speaker only.

Adjustable range	0 to 7
Default setting	3

Dimension

Adjusts the difference in level between the front sound field and the surround sound field. You can adjust the difference in level created by the software being played back to obtain the preferred sound balance.

The surround sound gets stronger as you make the value more negative, and the front sound gets stronger as you make the value more positive.

Adjustable range	-3 to STD to +3
Default setting	STD (Standard)

^{1:} Not displayed when speakers are set to be inactive.

Controlling other components with the remote control

You can operate an external component such as TV and DVD player with the remote control of this unit by setting the code for external component (remote control code). The remote control code can be set for each input source. Individual setting allows you to switch external components seamlessly depending on the selected input source.

Selecting input source connected to DVD player

Selecting input source connected to CD player

If you are unable to operate this unit after operating an external component, press **9SETUP** or **17OPTION** and then try operating the remote control again.

Keys connecting external components

The remote control keys for controlling external components are available only when the external components have corresponding control keys.

3SOURCE ₼

Switches an external component on and off.

10 Cursor, 10 ENTER, 10 RETURN

Operates the menus of external components.

11 DISPLAY

Switches an external component display.

IIIExternal component operation keys

Functions as a recording or playback key of an external component, or a menu display key.

12 Numeric keys

Functions as numeric keys of an external component.

13TV control keys *1

13INPUT	Switches video inputs of TV	
13MUTE	Mutes TV volume temporarily.	
13TV VOL +/-	Controls the volume of TV	
13TV CH +/-	Switches TV channels.

Registering remote control codes for external component operations

The following section describes how to register remote control code using an example of the registration of the remote control codes of a Yamaha BD player connected to HDMI2 jack.

- Perform each of the following steps within 1 minute.
 Settings will be automatically stopped if more than 1 minute passes since the last operation. To reset, repeat from step 2.
- Remote control code of an external component cannot be set from the name or model number of a unit. Use "Remote Control Code Search" in the CD-ROM to search the available remote control codes from the category or manufacturer of external components.
- If multiple remote control codes exist, first set the first code in the list, if it does not work then try the other codes.

Use "Remote Control Code Search" in the CD-ROM to search the available remote control codes from the category or manufacturer of external components.

"2064" can be used for a Yamaha BD player.

Press **4CODE SET** on the remote control using a pointed object such as the tip of a ballpoint pen.

Press 4HDMI2 on the remote control to switch the input source to HDMI2. 11

Perform the following steps to register the selected input source here to the remote control code.

Enter a remote control code "2064" using

Numeric keys. ©2

Once the remote control code is registered successfully the remote control will blink twice.

> Registration successful: blinks twice Registration failed: blinks 6 times

- If the registration fails, repeat the step 2.
- In case of an external component with multiple remote control codes, the other remote control codes may be supported. Repeat from step 2 with the other remote control codes.

To switch between BD player linked to scene selections, press SCENE and at the same time press 4HDMI2 and hold it for approximately 3 seconds.

Then you can operate the external components by switching the input source to HDMI2, or selecting HDMI2 in the registered scene.

Same steps for operating other external components, press **SCENE** and at the same time press the input source key selected in step 3 and hold it for approximately 3 seconds.

- 8 SCENE
- 12 Numeric keys
- 13 TV control keys
- **13** 也
- 14 CODE SET

^{2:} When you want to register a remote control code to the 13TV control keys, enter the TV remote control code in step 4.

Resetting all remote control codes

Resetting all remote control codes for external components to the initial factory settings.

Perform each of the following steps within 1 minute. Settings will be automatically stopped if more than 1 minute passes since the last operation. To reset, repeat from step 2.

Press **4CODE SET** on the remote control using a pointed object such as the tip of a ballpoint pen.

Press 9SETUP on the remote control.

Enter "9981" using Numeric keys.

Once the remote control code is registered successfully the remote control will blink twice.

Registration successful: blinks twice Registration failed: blinks 6 times

If setup fails, repeat from step 1.

12 Numeric keys

14 CODE SET

Extended functionality that can be configured as needed (Advanced Setup menu)

The Advanced Setup menu can be used for unit initialization and other useful extended functions. The Advanced Setup menu can be operated as follows.

Displaying/Setting the Advanced Setup menu

Set this unit to the standby mode.

 $\begin{tabular}{ll} \bf 2 & Press \oplus while pressing and holding STRAIGHT on the front panel. \end{tabular}$

Release the keys when "ADVANCED SETUP" is displayed on the front panel display.

After approximately 3 seconds, the top menu items are displayed.

Use PROGRAM to select the item to be set from the following items.

In the Advanced Setup menu, you can set the following settings.

SP IMP.	Sets the impedance of speakers.
REMOTE ID	Changes the remote control ID of a receiver.
INIT	Initializes various settings for this unit.

Press STRAIGHT a few times to select the value you wish to change.

Switch this unit to the standby mode, and then

witch it on again.

The settings become effective and the unit is powered on. If initialization is selected, it will be performed when the unit is powered on again.

Setting the impedance of speakers

Changes the unit settings depending on the impedance of the speakers connected. **§1**

6ΩMIN	Select the impedance when 6Ω speakers are connected.
8ΩMIN (Default)	Select the impedance when speakers above 8Ω are connected.

 ^{1:} For detailed procedures of speaker impedance settings, refer to "Changing speaker impedance" (☞ p. 10).

12 Numeric keys

14 CODE SET

Avoiding crossing remote control signals when using multiple Yamaha receivers

REMOTE ID -ID1

The remote control of the unit can only receive signals from a receiver which has an identical ID (remote control ID). When using multiple Yamaha AV receivers, you can set each remote control with a unique remote control ID for its corresponding receiver.

On the contrary, if you are setting the same remote control ID for all receivers, you can use one remote control to operate 2 receivers.

ID1 (Default)	Receives the remote control signals set in ID1.
ID2	Receives the remote control signals set in ID2.

ID1 is set for both remote control and receiver by default. To avoid crossing remote control, change the remote control ID for both remote control and receiver.

■ To change the remote control ID

Perform each of the following steps within 1 minute. Settings will be automatically stopped if more than 1 minute passes since the last operation. To reset, repeat from step 1.

- Press **MCODE SET** on the remote control using a pointed object such as the tip of a ballpoint pen.
- Press **9SETUP** on the remote control.
- Enter the desired remote control ID code.

To switch to ID1:

Enter "5019" using 12 Numeric keys.

To switch to ID2:

Enter "5020" using 12 Numeric keys.

Once the remote control code is registered successfully the remote control will blink twice.

Registration successful: blinks twice Registration failed: blinks 6 times

- If setup fails, repeat from step 1.
- Returns to ID1 after the remote control code is initialized (p. 52).

Initializing various settings for this unit

INIT- CANCEL

Initializes various settings stored in this unit and sets it back to default.

Select the items to be initialized from the following.

DSP PARAM	Initializes all parameters for the sound field programs.
ALL	Resets this unit to default factory settings.
CANCEL (Default)	Does not initialize.

APPENDIX

Troubleshooting

Refer to the table below when this unit does not function properly.

If the problem you are experiencing is not listed below, or if the instructions below do not help, turn off this unit, disconnect the power cable, and contact the nearest authorized Yamaha dealer or service center.

General

Problem	Cause	Remedy	See page
The power will not turn on.	The protection circuitry operated three times consecutively.	As a safety precaution, when the protection circuitry operates three times consecutively, the capability to turn on the power is disabled. Please contact your nearest Yamaha dealer or service center to request repair.	_
The unit enters standby mode soon	The power cable is not completely inserted.	Connect the power cable properly to an AC wall outlet.	_
after the power is turned on.	The speaker impedance settings are incorrect.	Set the speaker impedance to match your speakers.	<u>10</u>
	(When this unit is turned back on and "CHECK SP WIRES!" is displayed.) The protection circuitry has been activated because this unit was turned on while a speaker cable was shorted.	Make sure that all speaker cables between this unit and speakers are connected properly.	12
This unit cannot be turned off or does not work properly.	The internal microcomputer is hung-up due to an external electric shock (such as lightning or excessive static electricity) or by a drop in power supply voltage.	Disconnect the power cable from the AC wall outlet, wait about 30 seconds and then plug it in again.	_
	The batteries in the remote control may have lost their charge.	Replace all batteries.	4
The unit enters standby mode.	The protection circuitry has been activated because of a short circuit, etc.	Check that the speaker impedance settings are correct.	10

	The sleep timer has turned off the unit.	Turn on the unit, and play the source again.	_

Problem	Cause	Remedy	See page
No sound.	Incorrect input or output cable connections.	Connect the cables properly. If the problem persists, the cables may be defective.	<u>16</u>
	If a DVI-HDMI cable is used to connect the unit with an external component, then it is necessary to use an audio input jack for a different input to output audio.	Display the HDMI Input Option menu for the connected cable, select "Audio In," and select the jack to use for audio input.	38
	Speaker connections are not secure.	Secure the connections.	12
	The HDMI components connected to the unit do not support the HDCP copy protection standards.	Connect HDMI components that support the HDCP copy protection standards.	38
	The audio input into the device is set to playback through the TV.	In the Setup menu, set the HDMI Audio Out ("Sound Setup" → "HDMI Audio Out") to other than "TV."	<u>45</u>
	No appropriate input source has been selected.	Select an appropriate input source with Input selector (on the remote control).	<u>25</u>
	The volume is turned down or muted.	Turn up the volume.	_
	Signals that this unit cannot reproduce are being input from a source component, such as a CD-ROM.	Use an input source that has signals that can be reproduced on this unit.	_
No picture.	A video jack (ex. Video input → HDMI output) type different to the input video is being used to try to display content on the TV.	Use video jacks of the same type (ex. Video input → Video output) to connect to the TV.	14
	An appropriate video input is not selected on the TV.	Select an appropriate video input on the TV.	_

Problem	Cause	Remedy	See page
No sound is output from a specific speaker.	The speaker is malfunctioning. Check the Speaker indicators on the front panel display. If the corresponding indicator lights up, connect another speaker and check if sound is output.	If sound is not output, the unit may be malfunctioning.	7
	The playback component or speakers are not connected properly.	Connect the cables properly. If the problem persists, the cables may be defective.	<u>12</u> , <u>16</u>
	Output from that speaker is disabled.	Check the Speaker indicators on the front panel display. If the corresponding indicator is turned off, try the following. 1) Change to a different input source. 2) With the selected sound field program, sound is not output from that speaker. Select another sound field program. 3) "None" may have been selected for that speaker on this unit. Display "Speaker Setup" in the Setup menu, and set respective parameters to enable output from that speaker ("Speaker Setup" → "Config").	<u>7, 41</u>
	The volume of that speaker is set to the minimum in "Speaker Setup" in the Setup menu.	Display "Speaker Setup" in the Setup menu and adjust the volume ("Speaker Setup" → "Level").	<u>42</u>
	(If hardly any sound comes from one channel) Speaker output balance is not set correctly.	Balance the volume of each speaker from "Level" in the Setup menu ("Speaker Setup" → "Level").	<u>42</u>
	Sound may not be output from certain channels, depending on the input source or sound field program.	Try another sound field program.	<u>26</u>
Only the center speaker outputs substantial sound.	When a monaural source sound field program is applied, for some surround decoders, sound from all channels is output from the center speaker.	Try another sound field program.	<u>26</u>

Problem	Cause	Remedy	See page
No sound is heard from the surround speakers.	This unit is in straight decoding mode and a monaural source is being played back.	Press 7STRAIGHT (on the remote control) to exit straight decoding mode.	<u>27</u>
	Sound may not be output from certain channels depending on input sources or sound field programs.	Try another sound field program.	<u>26</u>
No sound is heard from the subwoofer.	A subwoofer is not connected, or it is disabled.	Check that a subwoofer is connected correctly, and from the Setup menu "Subwoofer" ("Speaker Setup" → "Config" → "Subwoofer"), set the subwoofer to "On."	<u>41</u>
	The subwoofer is turned off.	Turn the subwoofer power on. If the subwoofer includes an Auto Power Off function, then lower the Auto Power Off sensitivity settings.	_
	The source does not contain LFE (<u>For B. 61</u>) or low frequency signals.		
The right combination of audio / video jacks to connect cannot be found.	Combine input connected to the external component video output with another input audio jack.	Select a desired input source (HDMI1-4 or AV1-2) as a video input and select a audio input source from "Audio In" in the Option menu.	38
The audio input sources cannot be played in the desired	The connected component is not set to output the desired digital audio signals.	Set the playback component properly referring to its instruction manual.	_
digital audio signal format.	This unit does not support playback of HD Audio (TrueHD, Dolby Digital plus, DTS Master Audio, etc.) or DTS 96/24, etc.	Signals, such as HD Audio and DTS 96/24, can be played by standard decoders (Dolby Digital, DTS Digital Surround, etc.).	_
There is noise interference from digital or radio frequency equipment.	This unit is too close to other digital or radio frequency equipment.	Move this unit further away from such equipment.	_

Problem	Cause	Remedy	See page
Noise/hum noise is heard.	Incorrect cable connection. Connect the audio cables properly.	If the problem persists, the cables may be defective.	_
	A DTS-CD is being played back.	If a DTS bitstream signal is not properly input to this unit, only noise is output. Connect the playback component to this unit by digital connection and play back the DTS-CD. If the condition is not resolved, the problem may result from the playback component. Consult the manufacturer of the playback component.	
The volume cannot be increased, or the sound is distorted.	The component connected to the output jacks of this unit is not turned on.	When the component connected to the output jacks of this unit is not turned on, the sound may be distorted, or the volume may decreased due to the nature of AV receivers. Turn on all components connected to this unit.	_
	"Max Volume" is set to a low value.	Set it to a higher value.	<u>45</u>

HDMI™

Problem	Cause	Remedy	See page
The front panel	An error with the HDMI	Try re-inserting the HDMI cable.	_
display HDMI indicator is flashing.	connection has occurred.	Confirm that HDMI video that is not supported by the unit is not being input (HDMI Input → Option menu → "Signal Info").	<u>38</u>
No picture or sound.	The number of components is over the limit.	Disconnect some of the HDMI components.	_
	The connected HDMI component does not support high-bandwidth digital copyright protection (HDCP).	Connect an HDMI component that supports HDCP.	_

Check if the Bluetooth component is in pairing mode. During connecting: - check if the Bluetooth component is turned on. - check if the Bluetooth component is within 32 feet (10 m) of the Yamaha Bluetooth wireless audio receiver.	_

Glossary

Audio information

Audio and video synchronization (lip sync)

Lip sync, an abbreviation for lip synchronization, is a technical term that involves both a problem, and the capability of maintaining audio and video signals synchronized during post-production and transmission. Whereas the audio and video latency requires complex end-user adjustment, HDMI version 1.3 incorporates an automatic audio and video syncing capability that allows devices to perform this synchronization automatically and accurately without user interaction.

Dolby Digital

Dolby Digital is a digital surround sound system that gives you completely independent multi-channel audio. With 3 front channels (front L/R and center), and 2 surround stereo channels, Dolby Digital provides 5 full-range audio channels. With an additional channel especially for bass effects, referred to as LFE (Low-Frequency Effect), the system has a total of 5.1-channels (LFE is counted as 0.1 channel). By using 2-channel stereo for the surround speakers, more accurate moving sound effects and surround sound environments are possible than with Dolby Surround. The wide dynamic range from maximum to minimum volumes that are reproduced by the 5 full-range channels, and the precise sound orientation generated using digital sound processing provides listeners with unprecedented excitement and realism. With this unit, any sound environment from monaural up to a 5.1-channel configuration can be freely selected for your enjoyment.

Dolby Pro Logic II

Dolby Pro Logic II is an improved technique used to decode vast numbers of existing Dolby Surround sources. This new technology enables a discrete 5-channel playback with 2 front left and right channels, 1 center channel, and 2 surround left and right channels, instead of only 1 surround channel for conventional Pro Logic technology. There are three modes available: "Music mode" for music sources, "Movie mode" for movie sources, and "Game mode" for game sources.

Dolby Surround

Dolby Surround uses a 4-channel analog recording system to reproduce realistic and dynamic sound effects: 2 front left and right channels (stereo), a center channel for dialog (monaural), and a surround channel for special sound effects (monaural). The surround channel reproduces sound within a narrow frequency range. Dolby Surround is widely used with nearly all video tapes and laser discs, as well as in many TV and cable broadcasts. The Dolby Pro Logic decoder built into this unit employs a digital signal processing system that automatically stabilizes the volume on each channel to enhance moving sound effects and directionality.

DTS Digital Surround

DTS Digital Surround was developed to replace the analog soundtracks of movies with a 5.1-channel digital sound track, and is now rapidly gaining popularity in movie theaters around the world. DTS, Inc. has developed a home theater system so that you can enjoy the depth of sound and natural spatial representation of DTS Digital Surround in your home. This system produces practically distortion-free 5.1-channel sound (technically, left, right and center channels, 2 surround channels, plus an LFE 0.1 channel as a subwoofer, for a total of 5.1-channels).

DSD

Direct Stream Digital (DSD) technology stores audio signals on digital storage media, such as Super Audio CDs. Using DSD, signals are stored as single bit values at a high-frequency sampling rate of 2.8224 MHz, while noise shaping and oversampling are used to reduce distortion, a common occurrence with very high quantization of audio signals. Due to the high sampling rate, better audio quality can be achieved than that offered by the PCM format used for normal audio CDs. The frequency is equal to or higher than 100 kHz, with a dynamic range of 120 dB. This unit can transmit or receive DSD signals via the HDMI jack.

LFE 0.1 channel

This channel reproduces low-frequency bass signals, and has a frequency range from 20 Hz to 120 Hz. This channel is counted as 0.1, because it only enforces a low-frequency range compared to the full-range reproduced by the other 5 channels in Dolby Digital or DTS 5.1-channel systems.

PCM (Linear PCM)

Linear PCM is a signal format under which an analog audio signal is digitized, recorded and transmitted without using any compression. This is used as a method of recording CDs and DVD audio. The PCM system uses a technique for sampling the size of the analog signal per very small unit of time. Standing for "Pulse Code Modulation," the analog signal is encoded as pulses and then modulated for recording.

Sampling frequency and number of quantized bits

When digitizing an analog audio signal, the number of times the signal is sampled per second is called the sampling frequency, while the degree of accuracy when converting the sound level into a numeric value is called the number of quantized bits. The range of rates that can be played back is determined based on the sampling rate, whereas the dynamic range representing the sound level difference is determined by the number of quantized bits. In principle, the higher the sampling frequency, the wider the range of frequencies that can be played back, and the higher the number of quantized bits, the more accurately the sound level can be reproduced.

Sound field program information

CINEMA DSP

Since the Dolby Surround and DTS systems were originally designed for use in movie theaters, their effect is best felt in a theater having many speakers designed for acoustic effects. Since home conditions, such as room size, wall material, number of speakers, and so on, can differ so widely, it is inevitable that there are differences in the sound that is heard. Based on a wealth of actually measured data, Yamaha CINEMA DSP uses Yamaha's original DSP technology to combine Dolby Pro Logic, Dolby Digital, and DTS systems to provide the audiovisual experience of a movie theater in the listening room of your own home.

Compressed music enhancer

The Compressed music enhancer feature of this unit enhances your listening experience by regenerating the missing harmonics in compression artifacts. As a result, it compensates for flattened complexity due to the loss of high-frequency fidelity as well as lack of bass due to the loss of low-frequency bass, providing improved performance for the overall sound system.

Glossarv

SILENT CINEMA

Yamaha has developed a natural, realistic sound effect DSP algorithm for headphones. Parameters for headphones have been set for each sound field program, so that accurate representations of all the sound field programs can be enjoyed on headphones.

Virtual CINEMA DSP

Yamaha has developed a Virtual CINEMA DSP algorithm that allows you to enjoy DSP surround effects even without any surround speakers, by using virtual surround speakers. It is even possible to enjoy Virtual CINEMA DSP using a minimal two-speaker system that does not include a center speaker.

Video information

Component video signal

With the component video signal system, the video signal is separated into the Y signal for luminance and the PB and PR signals for chrominance. Color can be reproduced more faithfully with this system because each of these signals is independent. The component signal is also called the "color difference signal" because the luminance signal is subtracted from the color signal. A monitor with component input jacks is required in order to output component signals.

Composite video signal

With the composite video signal system, the video signal comprises the three basic elements of a video picture: color, brightness and synchronization data. A composite video jack on a video component transmits these three elements combined.

Deep Color

Deep Color refers to the use of various color depths in displays, up from the 24-bit depths in previous versions of the HDMI specification. This extra bit depth allows HDTVs and other displays increase from millions of colors to billions of colors and eliminate on-screen color banding for smooth tonal transitions and subtle gradations between colors. The increased contrast ratio can represent many times more shades of gray between black and white. Additionally, Deep Color increases the number of available colors within the boundaries defined by the RGB or YCbCr color space.

HDMI

HDMI (High-Definition Multimedia Interface) is the first industry supported, uncompressed, all-digital audio/video interface. Providing an interface between any sources (such as set-top boxes or AV receivers) and audio/video monitors (such as digital TV), HDMI supports standard, enhanced or high-definition video as well as multichannel digital audio using a single cable. HDMI transmits all ATSC HDTV standards and supports 8-channel digital audio, with bandwidth to spare to accommodate future enhancements and requirements.

When used in combination with HDCP (High-bandwidth Digital Content Protection), HDMI provides a secure audio/video interface that meets the security requirements of content providers and system operators. For further information on HDMI, visit the HDMI website at "http://www.hdmi.org/."

"x.v.Color"

A color space standard supported by HDMI version 1.3. It is a more extensive color space than sRGB, and allows the expression of colors that were not hitherto possible. While remaining compatible with the color gamut of sRGB standards, "x.v.Color" expands the color space, and can thus produce more vivid, natural images. It is particularly effective for still pictures and computer graphics.

Information on HDMI™

■ HDMI signal compatibility

Audio signals

Audio signal types	Audio signal formats	Compatible media
2ch Linear PCM	2ch, 32-192 kHz, 16/20/24 bit	CD, DVD-Video, DVD-Audio, etc.
Multi-ch Linear PCM	8ch, 32-192 kHz, 16/20/24 bit	DVD-Audio, Blu-ray Disc, HD DVD, etc.
DSD	2/5.1ch, 2.8224 MHz, 1 bit	SACD, etc.
Bitstream	Dolby Digital, DTS	DVD-Video, etc.

- If the input source component can decode the bitstream audio signals of audio commentaries, you can play back the audio sources with the audio commentaries mixed down by using the digital audio input (optical or coaxial) connections.
- Refer to the supplied instruction manuals of the input source component, and set the component appropriately.

NOTES

- When CPPM copy-protected DVD-Audio is played back, video and audio signals may not be output, depending on the type of the DVD player.
- This unit is not compatible with HDCP-incompatible HDMI or DVI components.
- Refer to the supplied instruction manuals for details.
 To decode audio bitstream signals on this unit, set the input source component appropriately so that the component outputs the bitstream audio signals directly (does not decode the bitstream signals on the component).
- This unit is not compatible with the audio commentary features (for example, the special audio contents
 downloaded via Internet) of Blu-ray Disc or HD DVD. This unit does not play back the audio
 commentaries of the Blu-ray Disc or HD DVD content.

Video signals

This unit is compatible with the video signals of the following resolutions:

- 480i/60 Hz - 720p/60 Hz, 50 Hz - 576i/50 Hz - 1080i/60 Hz, 50 Hz

- 480p/60 Hz - 1080p/60 Hz, 50 Hz, 24 Hz

- 576p/50 Hz

IMPORTANT SAFETY INSTRUCTIONS

CAUTION

RISK OF ELECTRIC SHOCK DO NOT OPEN

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

Explanation of Graphical Symbols

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert you to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert you to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

- 1 Read these instructions.
- 2 Keep these instructions.
- 3 Heed all warnings.
- 4 Follow all instructions.
- 5 Do not use this apparatus near water.
- 6 Clean only with dry cloth.

- 7 Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
- 8 Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
- 9 Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
- 10 Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
- 11 Only use attachments/accessories specified by the manufacturer.
- 12 Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.

- 13 Unplug this apparatus during lightning storms or when unused for long periods of time.
- 14 Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

FCC INFORMATION (for US customers)

1 IMPORTANT NOTICE: DO NOT MODIFY THIS UNIT!

This product, when installed as indicated in the instructions contained in this manual, meets FCC requirements. Modifications not expressly approved by Yamaha may void your authority, granted by the FCC, to use the product.

- 2 IMPORTANT: When connecting this product to accessories and/or another product use only high quality shielded cables. Cable/s supplied with this product MUST be used. Follow all installation instructions. Failure to follow instructions could void your FCC authorization to use this product in the USA.
- 3 NOTE: This product has been tested and found to comply with the requirements listed in FCC Regulations, Part 15 for Class "B" digital devices. Compliance with these requirements provides a reasonable level of assurance that your use of this product in a residential environment will not result in harmful interference with other electronic devices.

This equipment generates/uses radio frequencies and, if not installed and used according to the instructions found in the users manual, may cause interference harmful to the operation of other electronic devices.

Compliance with FCC regulations does not guarantee that interference will not occur in all installations. If this product is found to be the source of interference, which can be determined by turning the unit "OFF" and "ON", please try to eliminate the problem by using one of the following measures:

Relocate either this product or the device that is being affected by the interference.

Utilize power outlets that are on different branch (circuit breaker or fuse) circuits or install AC line filter/s.

In the case of radio or TV interference, relocate/reorient the antenna. If the antenna lead-in is 300 ohm ribbon lead, change the lead-in to coaxial type cable.

If these corrective measures do not produce satisfactory results, please contact the local retailer authorized to distribute this type of product. If you can not locate the appropriate retailer, please contact Yamaha Electronics Corp., U.S.A. 6660 Orangethorpe Ave, Buena Park, CA 90620.

The above statements apply ONLY to those products distributed by Yamaha Corporation of America or its subsidiaries.

♂ (Power key)

Turns on the power of this unit or sets it to the standby mode.

CAUTION: READ THIS BEFORE OPERATING YOUR UNIT.

- 1 To assure the finest performance, please read this manual carefully. Keep it in a safe place for future reference.
- Install this sound system in a well ventilated, cool, dry, clean place - away from direct sunlight, heat sources, vibration, dust, moisture, and/or cold. For proper ventilation, allow the following minimum clearances.
 - Top: 30 cm, Rear: 10 cm, Sides: 10 cm
- 3 Locate this unit away from other electrical appliances, motors, or transformers to avoid humming sounds.
- 4 Do not expose this unit to sudden temperature changes from cold to hot, and do not locate this unit in an environment with high humidity (i.e. a room with a humidifier) to prevent condensation inside this unit, which may cause an electrical shock, fire, damage to this unit, and/or personal injury.
- Avoid installing this unit where foreign object may fall onto this unit and/or this unit may be exposed to liquid dripping or splashing. On the top of this unit, do not place:
 - Other components, as they may cause damage and/or discoloration on the surface of this unit.
 - Burning objects (i.e. candles), as they may cause fire, damage to this unit, and/or personal injury.
 - Containers with liquid in them, as they may fall and liquid may cause electrical shock to the user and/or damage to this unit.
- 6 Do not cover this unit with a newspaper, tablecloth, curtain, etc. in order not to obstruct heat radiation. If the temperature inside this unit rises, it may cause fire, damage to this unit, and/or personal injury.
- 7 Do not plug in this unit to a wall outlet until all connections are complete.
- 8 Do not operate this unit upside-down. It may overheat, possibly causing damage.
- 9 Do not use force on switches, knobs and/or cords.
- 10 When disconnecting the power cable from the wall outlet, grasp the plug; do not pull the cable.
- 11 Do not clean this unit with chemical solvents; this might damage the finish. Use a clean, dry cloth.
- 12 Only voltage specified on this unit must be used. Using this unit with a higher voltage than specified is dangerous and may cause fire, damage to this unit, and/or personal injury. Yamaha will not be held responsible for any damage resulting from use of this unit with a voltage other than specified.
- 13 To prevent damage by lightning, keep the power cable and outdoor antennas disconnected from a wall outlet or this unit during a lightning storm.
- 14 Do not attempt to modify or fix this unit. Contact qualified Yamaha service personnel when any service is needed. The cabinet should never be opened for any reasons.
- 15 When not planning to use this unit for long periods of time (i.e. vacation), disconnect the AC power plug from the wall outlet.
- 16 Be sure to read the "Troubleshooting" section on common operating errors before concluding that this unit is faulty.
- 17 Before moving this unit, press & to set it to standby mode and disconnect the AC power plug from the wall outlet.

- 18 VOLTAGE SELECTOR (Asia and General models only)
 The VOLTAGE SELECTOR on the rear panel of this unit must
 be set for your local main voltage BEFORE plugging into the AC
 wall outlet. Voltages are:
 AC 110-120/220-240V, 50/60Hz (General model)
 -AC 110-120/220-240V, 50/60Hz (General model)AC 220-240V, 50/60Hz (Asia model)
- 19 Condensation will form when the surrounding temperature changes suddenly. Disconnect the power cable from the outlet, then leave this unit alone.
- When using this unit for a long time, this unit may become warm. Turn the power off, then leave this unit alone for cooling.
- 21 Install this unit near the AC outlet and where the AC power plug can be reached easily.
- 22 The batteries shall not be exposed to excessive heat such as sunshine, fire or the like. When you dispose of batteries, follow your regional regulations.
- 23 Excessive sound pressure from earphones and headphones can cause hearing loss.
- 24 When replacing the batteries, be sure to use batteries of the same type. Danger of explosion may happen if batteries are incorrectly replaced.

This unit is not disconnected from the AC power source as long as it is connected to the wall outlet, even if this unit itself is turned off by Φ . This state is called the standby mode. In this state, this unit is designed to consume a very small quantity of power.

WARNING

TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS UNIT TO RAIN OR MOISTURE.

■ Notes on remote controls and batteries

- Do not spill water or other liquids on the remote control.
- Do not drop the remote control.
- Do not leave or store the remote control in the following conditions:
 - places of high humidity, such as near a bath
 - places of high temperatures, such as near a heater or stove
 - places of extremely low temperatures
 - dusty places
- Insert the battery according to the polarity markings (+ and -).
- Change all batteries if you notice the following conditions:
 - the operation range of the remote control narrows
 - the transmit indicator does not flash or is dim
- If the batteries run out, immediately remove them from the remote control to prevent an explosion or acid leak.
- If you find leaking batteries, discard the batteries immediately, taking care not to touch the leaked material. If the leaked material comes into contact with your skin or gets into your eyes or mouth, rinse it away immediately and consult a doctor. Clean the battery compartment thoroughly before installing new batteries.
- Do not use old batteries together with new ones. This may shorten the life of the new batteries or cause old batteries to leak.
- Do not use different types of batteries (such as alkaline and manganese batteries) together. Specification of batteries may be different even though they look the same.
- Before inserting new batteries, wipe the compartment clean.
- If the remote control is without batteries for more than 2 minutes, or if exhausted batteries remain in the remote control, the contents of the memory may be cleared. In such a case, install new batteries and set the remote control code.
- Dispose of batteries according to your regional regulations.

FOR CANADIAN CUSTOMERS

To prevent electric shock, match wide blade of plug to wide slot and fully insert.

This Class B digital apparatus complies with Canadian ICES-003.

POUR LES CONSOMMATEURS CANADIENS

Pour éviter les chocs électriques, introduire la lame la plus large de la fiche dans la borne correspondante de la prise et pousser jusqu'au fond. Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

IMPORTANT

Please record the serial number of this unit in the space below

MODEL:

Serial No.:

The serial number is located on the rear of the unit. Retain this Owner's Manual in a safe place for future reference.

■ For U.K. customers

If the socket outlets in the home are not suitable for the plug supplied with this appliance, it should be cut off and an appropriate 3 pin plug fitted. For details, refer to the instructions described below.

Note

The plug severed from the mains lead must be destroyed, as a plug with bared flexible cord is hazardous if engaged in a live socket outlet.

■ Special Instructions for U.K. Model

IMPORTANT

THE WIRES IN MAINS LEAD ARE COLOURED IN ACCORDANCE WITH THE FOLLOWING CODE:

Blue: NEUTRAL Brown: LIVE

As the colours of the wires in the mains lead of this apparatus may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

The wire which is coloured BLUE must be connected to the terminal which is marked with the letter N or coloured BLACK. The wire which is coloured BROWN must be connected to the terminal which is marked with the letter L or coloured RED.

Making sure that neither core is connected to the earth terminal of the three pin plug.

We Want You Listening For A Lifetime

Yamaha and the Electronic Industries Association's Consumer Electronics Group want you to get the most out of your equipment by playing it at a safe level. One that lets the sound come through loud and clear without annoying blaring or distortion – and, most importantly, without affecting your sensitive hearing. Since hearing damage from loud sounds is often undetectable until it is too late, Yamaha and the Electronic Industries Association's Consumer Electronics Group recommend you to avoid prolonged exposure from excessive volume levels.

Limited Guarantee for European Economic Area (EEA) and Switzerland

Thank you for having chosen a Yamaha product. In the unlikely event that your Yamaha product needs guarantee service, please contact the dealer from whom it was purchased. If you experience any difficulty, please contact Yamaha representative office in your country. You can find full details on our website (http://www.yamaha-hifi.com/ or http://www.yamaha-uk.com/ for U.K. resident).

The product is guaranteed to be free from defects in workmanship or materials for a period of two years from the date of the original purchase. Yamaha undertakes, subject to the conditions listed below, to have the faulty product or any part(s) repaired, or replaced at Yamaha's discretion, without any charge for parts or labour. Yamaha reserves the right to replace a product with that of a similar kind and/or value and condition, where a model has been discontinued or is considered uneconomic to repair.

Conditions

- 1 The original invoice or sales receipt (showing date of purchase, product code and dealer's name) MUST accompany the defective product, along with a statement detailing the fault. In the absence of this clear proof of purchase, Yamaha reserves the right to refuse to provide free of charge service and the product may be returned at the customer's expense.
- The product MUST have been purchased from an AUTHORISED Yamaha dealer within the European Economic Area (EEA) or Switzerland.
- 3 The product must not have been the subject of any modifications or alterations, unless authorised in writing by Yamaha.
- 4 The following are excluded from this guarantee:
 - a. Periodic maintenance and repair or replacement of parts due to normal wear and tear.
 - b. Damage resulting from:
 - (1) Repairs performed by the customer himself or by an unauthorised third party.
 - (2) Inadequate packaging or mishandling, when the product is in transit from the customer. Please note that it is the customer's responsibility to ensure the product is adequately packaged when returning the product for repair.
 - (3) Misuse, including but not limited to (a) failure to use the product for its normal purpose or in accordance with Yamaha's instructions on the proper use, maintenance and storage, and (b) installation or use of the product in a manner inconsistent with the technical or safety standards in force in the country where it is used.
 - (4) Accidents, lightning, water, fire, improper ventilation, battery leakage or any cause beyond Yamaha's control.
 - (5) Defects of the system into which this product is incorporated and/or incompatibility with third party products.
 - (6) Use of a product imported into the EEA and/or Switzerland, not by Yamaha, where that product does not conform to the technical or safety standards of the country of use and/or to the standard specification of a product sold by Yamaha in the EEA and/or Switzerland.
- 5 Where the guarantee differs between the country of purchase and the country of use of the product, the guarantee of the country of use shall apply.
- 4 Yamaha may not be held responsible for any losses or damages, whether direct, consequential or otherwise, save for the repair or replacement of the product.
- 7 Please backup any custom settings or data, as Yamaha may not be held responsible for any alteration or loss to such settings or data.
- 8 This guarantee does not affect the consumer's statutory rights under applicable national laws in force or the consumer's rights against the dealer arising from their sales/purchase contract.

Information for Users on Collection and Disposal of Old Equipment and Used Batteries

These symbols on the products, packaging, and/or accompanying documents mean that used electrical and electronic products and batteries should not be mixed with general household waste.

For proper treatment, recovery and recycling of old products and used batteries, please take them to applicable collection points, in accordance with your national legislation and the Directives 2002/96/EC and 2006/66/EC.

By disposing of these products and batteries correctly, you will help to save valuable resources and prevent any potential negative effects on human health and the environment which could otherwise arise from inappropriate waste handling.

For more information about collection and recycling of old products and batteries, please contact your local municipality, your waste disposal service or the point of sale where you purchased the items.

[Information on Disposal in other Countries outside the European Union]

These symbols are only valid in the European Union. If you wish to discard these items, please contact your local authorities or dealer and ask for the correct method of disposal.

Note for the battery symbol (bottom two symbol examples):

This symbol might be used in combination with a chemical symbol. In this case it complies with the requirement set by the Directive for the chemical involved.
