without prior notice.

**FCC WARNING**

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**FCC STATEMENT**

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- 1) this device may not cause harmful interference and
- 2) this device must accept any interference received, including interference that may cause undesired operation.

The following are the suggested text on SAR information

Specific Absorption Rate (SAR) information

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. This model (FCC ID: YROG28I) has also been tested against this SAR limited. The highest SAR value reported under this standard during product certification for use at the ear is 0.719 W/kg. There are no body worn configurations (e.g. belt-clips, holsters or similar accessories), then body SAR is not required.

**Shielded cables must be used with this unit to ensure compliance with the Class B FCC limits, and the shielded cables is marketed with the mobile phone, don't use others.**

Please note: This product may function **abnormally** if subjected to electrostatic or electromagnetic interference. Under such circumstances it may be necessary to restart the handset.

## 1.Safety Information

Please read the precautions carefully before using to ensure the correct use of the phone against the dangers of body hurt, electronic shock, fire burning or phone damage. Please carefulness read following guidelines and abidance. Not following them may be dangerous or illegal.

### **Serious Safety Precautions**

#### **Combustible and Explosive Area**

- ◆ Do not switch the phone on in the place where is combustible and explosive. For avoiding the explosion and fire, please don't install/Pop/charge the battery or use the phone in the dangerous places which include but not limited to:

Chemical plant, area where contain the chemical substances or particulate (such as grain, dust, metal power, etc).

Gas station, oil storage.

Fuel Storage (such as the cabin-body under the

deck).

The area where is marked with the explosion of danger.

The place where is the " Dual Wireless Electronic Equipment " forbids.

The auto energy switches off as recommended usually, etc.

**Precautions against the use of phone**

- ◆ For preventing from thunder hurt or other, please don't use the phone when it is charging in thunder storm day.
- ◆ Do not dispose of batteries in high temperature (results the continuous quality heat), otherwise, there maybe afire or explosion.

**For avoiding firing or burning, Please don't Chage too long and make the charging phone far away from human body and other object flammable**

- ◆ Please shut off the phone in the place of mobile phone forbids!

- ◆ Please don't fiercely impact, shake or throw the phone, battery and charger for fear of troubles or burning of the phone.

**Precautions against the battery/charger**

- ◆ Don't disassemble or refit the phone and the accessories, or else, it may lead to the fire, explosion, only the authorized institution is permitted.
- ◆ Don't disassemble or refit the batteries, or else, it may lead to the liquid leakage, overheat, burst and burning of the batteries.
- ◆ Don't use any scathing charger, battery or fittings, the usage of the accessories and fittings produced by other factories will offend the guarantee articles, and only the

authorized special designed charger, battery and fittings permitted, or else, we are from any compensation responsibility of the explosion or other dangers.

- ◆ Don't throw the batteries to fire, or else, it shall lead to the burning and burst of batteries. Forbids the battery and charger short circuit, or else, there may be the error, smoke and fire.
- ◆ Don't connect the battery pole with the conductor such as metals, key, and jewel, etc. or else, it shall lead to the body hurt of battery over heat (such as burning).
- ◆ Don't use the charge when the power line is damaged (exposure, or rupture) or the connector is loosen, or else, it shall lead to firing, charger short circuit and electric shock.
- ◆ Don't press the battery forcibly when it can't be installed properly, or else, it shall lead to the liquid leakage, overheat, burst and burning of the battery. Don't pop the battery when the phone works.

- ◆ Don't place the heavy goods on the charger power supply line, and don't damage, refit, or pull the wire, or else, it shall lead to the electric shock and fire.
- ◆ If such phenomena as abnormal warning-up, color changing and distortion in the process of use, charging or storage, please stop using and replace it with new battery, or else, it shall lead to the liquid leakage, overheat, burst and burning of the battery.
- ◆ If the charger comes into contact with water or any other liquid, cut off the power supply immediately to prevent short circuit, firing, electric shock and failures of the charger.
- ◆ Don't charge the battery in fire and over heat environment; Don't use or store the battery near the place of heat (such as fire or heater); Forbid using the battery when it is liquid leakage, smoking or giving off strange smell, place it far away from the open fire, to avoid the firing and burst. For safety guarantee, the

battery should be disposed in the authorized department.

**Safety information and precautions**

**Electronic Equipments/Medical Treatment Place**

- ◆ Please shut off the phone near the electronic equipments which are high precise required, or else, there may be the error or intervention, such as the fire alarm, automatism door and other self control equipments, etc,
- ◆ Please shut off the phone in hospital or other places where the use of phones is prohibited. Or else, the normal operation of electronic equipment and medical instruments shall be affected, such as the heart pacemaker, hearing aid and other medical electronic equipments, etc.
- ◆ The pacemaker manufacture suggests that distance between mobile phone and the pacemaker should be 15cm at least, or else, there may be the potential

interference. And the phone shouldn't be taken away in the chest package, and for reducing the potential interference, please answer the phone with the ear which is different from the one for pacemaker.

- ◆ Don't bring the phone into the operating room, intensive care unit (ICU) or coronary heart disease care unit (CCU).
- ◆ For preventing from the influence on heart disease, please care the settings of the ring, volume and vibration.

**Traffic Safety**

- ◆ Please strictly keep to the laws and regulations on use of phones of the places where you drive your car. If you use the phone while driving, please observe the following regulations: concentrate on driving and pay attention to the road status; please talk in the manner of hand free if available(may be additional payment); in case of uncomfortable driving condition, please dial or

answer after stop the car.

- ◆ Don't put your phone on the sir bag or the area where the air bag shall reach after expanding, to avoid the grievous injury to the owner due to the strong outside force on the phone caused by the expanding of the air bag.
- ◆ Using the phone on the airplane is forbidden strictly, please switch off your phone before on plane. You'd better pop the battery from phone for error connection for starting.

**Phone Storage**

- ◆ For preventing the phone from degaussing, please keep the phone away from the magnetism materials, such as disk, credit card, etc.
- ◆ If the phone comes into contract with water or any other liquid, cut off the power supply and move the battery immediately, and then contact the supplier as soon as possible.

- ◆ Please leave the sharp metal goods such as pin, etc away from the phone headphones, the magnetism will grip the goods and there may be the damage when using the phone.
- ◆ Please don't carry the phone in the rear pocket of trousers or skirt, or else, it may be damaged when sitting down. As it is recommended, the phone should be put in the package, and don't hang before the chest.

**Precaution against Phone for Children**

- ◆ Please put the phone, batteries and charger in the place where it is difficult for children to reach, to avoid that the children use the phone, batteries and charger with the supervisor.
- ◆ Avoid that the children swallow the battery, because the electrolyte may result poisoning.
- ◆ Care the children from touching the small phone fittings, or else, the swallowing of the parts may result to choke, gullet blocking.

### **Usage Environment**

- ◆ Unless it is necessary that the inner antenna (on Button of the phone) shouldn't be touched when the phone is switched on, or else, the communication effect may be influenced.
- ◆ For avoiding influence on the body health, please don't switch on/off the phone near the ear. When your phone is under the status of hand-free, please leave the phone away from ear and prevent the large voice from ear damage.
- ◆ For according with the regulations of radio-frequency leakage, please keep the antenna away from your body at least of 1 inch(2.5cm)
- ◆ If there are some un-comforts (such as failing sickness, giddy) after long time usage of phone game, please consult the doctor for help.

### **Clean and Maintenance**

- ◆ Before cleaning and maintenance, please switch off the

phone. If the connector is connected, please draw the charger from power socket and disconnect it from the phone, or else, there may be the electric shock, battery or charger short circuit.

- ◆ Please don't use the chemical materials (such as alcohol, benzene, etc), chemical lotion, and abrasive cleaners to clean the mobile phone or charger, or else, there may be the damage or fire. Wet and static proof soft cloth can be used to clean the dirt.
- ◆ Please don't scratch or alter the phone cell, or else, the falling off dope may be sensitive to body. If there are the allergic reactions, please stop to use the phone immediately and consult the doctor for help.
- ◆ If the phone and its fittings can't work normally, please contact the nearby authorized agency and there will be help from service center.
- ◆ Please clean the dust on the power supply socket, and keep dry from firing.

**Environment Protection**

- ◆ Please stand to the local regulations of packaging material, consumption battery and disposal methods on old mobile phone, and support the callback action with all hearts, and don't throw the abandon handset and battery in garbage bin.
- ◆ Please delivery the old or unused lithium battery to our designated place or our company, don't throw garbage bin.

**Emergency Call**

- ◆ Please make sure your phone is switched on, and covered by the network under the emergency, but not all network can be connected, so the phone can't be considered as the only communication mode.

**Battery/Charger Usage**

- ◆ Please don't put the container of water and other liquids beside the charger and buttery, or else, there may be

the battery electric leakage and other troubles of the phone.

- ◆ Please don't charge the battery under the circumstance where is excessive dust, damp, over or low temperature (the permitted charging temperature is from 0°C to 40°C), and the power line couldn't be close to the heater.
- ◆ Avoid influencing on the phone performance, please don't charge the phone when there is none battery.
- ◆ The battery level is not full after the delivery, when you bring the phone and battery from the case, as of the environment difference, the phone may not be switched on, it is suggest that charging the battery before the phone usage. The charger plug should be inserted properly, or else, there may be fire or explosion. After the charging, the power supply should be switched off and draw the plug, when the phone is charging, please don't move the battery randomly.
- ◆ Splashing the liquid into eye may lead to the danger of

blindness. If so, please flush the eye with clean water, no kneading of the eye, and see a doctor immediately.

- ◆ If the battery is not to be used for a long period, please pick up the battery for storage under the room temperature.
- ◆ Don't touch the charger, wire and outlet with wet hand, or else, it shall lead to an electric shock.
- ◆ Don't use the phone in the place where is excessive dust, damp, dirty or near the magnetic field, for preventing the phone from circuit error. Make sure the phone is dry, and don't make the phone, battery and charger contacting the water and vapor or operating the phone with wet hand, or else, there may be short circuit, or personal electric shock from corrosive.

**Safety Usage**

- ◆ This phone has camera\ video record\sound record functions, please use these function under the law. Make bold to take photo/ record video/record sound

maybe violate the law. It maybe aggrieve another's copyright by using those functions out of the way.

- ◆ Our company is not responsible for the losses of abnormal phone due to the virus file from the network. Virus. Our company won't bear the burden of that.
- ◆ The loading files of damage picture, ring, etc are forbidden, and our company is not responsible for the losses resulting from malice loading.
- ◆ Please don't make phone for a long time which may bring the battery heat, the inner circuit and telephone receiver may be heat as well, the rapid growth temperature may result danger.
- ◆ Please don't use the phone when it is charging, the rapid growth heat of calling and charging phone may bring danger.

**Warm Tips**

**Descriptions:** The user manual carries the direction for use under the on the English operation mode.

**Warning:** Our Company is not liable for the losses for nonobservance of above suggestion.

**Notice:** Value added service of the cell phone shall be provided by corresponding facilitator, and need the support of network. Please make sure you have activity the GPRS. Please refer to relevant help information or descriptions of facilitators for details. Due to SIM1 and SIM2 involved to the third sides, related GPRS function only can use in SIM1.

## **2. Mobile phone exterior**

This is a type of multi-media phone, which have two SIM card to support two standby. Phone with 23 front press-keys, color screen display, built-in vibration motor, and one charging/earphone and data transmission jack respectively.

**The icons in the user manual are used for descriptions of functions so they are for reference only and there is**

slight difference between the icons in the user manual and that in the actual conditions, so it is subjected to the actual cell phone. Some of the menus mentioned in the user manual, because that the conditions cannot be met, may be hidden automatically by the cell phone.

#### 4. Preparatory work before use

##### What is SIM?

This phone can support two SIM cards and two stand-by, there are two slot to place the two SIM cards (SIM1 & SIM2) . When you register your mobile number., you will get the SIM cards (Subscriber Identity Module). And you put the SIM cards into the slots then you'll got the functions includ communication data, mobile number, PIN code (for identity verification), phonebook, message,as well as other additional system service. **Note: please take care usage of**

**the SIM card, friction or bend may damage it. If it is lost, please contact the network operator, The SIM cards is pretty small , do not allow children to touch it to avoid swallowing it by mistake !**

**Insert your SIM cards**

Switch off the mobile before inserting the SIM card. The SIM card is at the back of the mobile. Please follow the steps as bellow:

- 1、 Turn to the back, press the cover button then slide the back cover along the phone body, unclip the battery from the slot and remove it.
- 2、 Place the SIM card with the chip facing downwards and slide it into its housing by aligning the SIM card's nick and the slot's one, push the SIM card as deep as possible.

**Note: This mobile has two slots for Sim1 and Sim2, the phone reads the SIM1 under factory setting (you can**

**exchange SIM1 and SIM2 by “settings/Dual SIM settings” ), or enter “menu/settings/Dual SIM settings” to exchange or choose the Dual SIM settings” without SIM card, it’s no need to execute switch on/off.**

3、Insert and engage the battery into the fixing slot, press the battery downwards, and then slide the back cover upwards along the phone body until it is locked.

#### **PIN1 Code**

The PIN1 Code is the Personal Identification Number for entering a SIM card. ‘Input PIN’ is requested each time the phone is switched on if this PIN1 code is activated.

You can get this code with the SIM card by your network operator. It usually has 4 digits. When you inputting the PIN1 code, ‘\*’ will display on the main screen instead of the digits.

#### **PIN2 Code**

The PIN2 Code is the Personal Identification Number for certain network features (Cost information, etc.) requested during their use when this code is activated.

**<Warning>: If you enter 3 incorrect PIN1 Codes, the SIM card will be locked. You have to contact your network vendor for decoding. Unauthorized decoding may cause the SIM card to be invalid forever.**

### **Charging your battery**

■ The battery of this mobile is the rechargeable lithium battery.

**Note:** New batteries are partially charged, we recommend you to charge the battery before using your phone. It will take 4 hours to fully charge. The battery has no memory effect, so discharge it before charging is not necessary, and charging a battery that is not empty does not affect the lifetime of the

battery also. We suggest that you charge the battery when its power is low to avoid the drained status.

■ It is normal for batteries with slightly heat during charging. Your mobile will activate automatic protection when the temperature is rising in order to control the temperature.

■ When battery power is low, the alarm rings and a low battery message displays. If battery power is completely drained, the mobile turns off automatically.

■ Turn off your phone before removing the battery, otherwise the data stored in the mobile will be lost and the lifetime of the mobile will be affected.

Battery Type	Standby Time	Communication Time
Lithium Battery	200-400Minutes	240-400 Minutes

**Note: The battery life depends on the operation modes,**

**network, calling and Bluetooth status.**

**Battery Charging Steps**

■ Plug the charger into the electrical outlet, and then plug the charger connector into the socket at the right side of the mobile. The side with the direction signal is upward, the charge direction is correct.

■ When your phone is on during the charging, 'charger connected!' displays if the charger is connected successfully. Then the battery power level indicator in the external display shows how much of the charging modify is complete dynamically.

■ When the mobile is off during the charging, an animation displays the charging modify.

■ When the battery is fully charged, the charging modify will stop automatically with a full battery icon displayed. After charging is finished, please disconnect the

charger as soon as possible.

**Note:**

1. When battery power is drained, we suggest you charge it in time.

If the battery has not been charged for 2 days, the mobile will change into slow charging mode without anything displays temporarily when you charge it again. The charging indicator may take about 15 minutes before appearing in the external display.

2. Do not alter the components and accessories of battery or open it by yourself to ensure the safe usage of the battery.

3. We suggest that you should use your telephone with the batteries compatible with your model to avoid any damage to your mobile.

4. Mains powered chargers will operate within the

temperature range: 0°C to 40°C, do not charge your phone under higher or lower ambient temperature.

**Warning: Only use your telephone with qualified batteries, chargers and accessories compatible with your model authorized by our company. Do pull out the plug but not the cable when you cut off the power of any component. Please consult your vendor about the purchase of relative components.**

## **5. The brief introduction of the mobile**

### **The Communication Control Keys**

The Call Key is used to make a call (when the numbers have been input or in the phone book) and pick up a call. In the stand-by status, press this key to accesses call memory (including answered, dialed and missed call records.)

The End Key is used to end a call (in dialing or calling status)

or exit current menu and return to the stand-by status. Press and hold this key for 2 seconds to switch on or switch off your telephone.

### **Number Keys**

Press the Number Keys from 0 to 9, Symbol\* and # Keys to dial and input password, English words, symbols and Chinese characters (Using stroke or spelling Input mode), etc.

Press and hold the 'ctrl' for more than 2 seconds to activate 'Meeting Mode'; keep the key

pressed for more than another 2 seconds to restore the previous mode.

### **Navigation Keys and Soft Keys**

In the stand-by screen, you can press the Up/Down/Left/Right Key to enter the different menus (You

can also redefine the function of the navigation keys by 'Menu//Setting/Phone Setting/Appointed Function Keys'). Press the Left Soft Key (or OK Key) to access the main menu. Press the Right Soft Key to enter the Calendar. send1 is the SIM card and phone records of a dial-up SIM1; SIM2 by Send2 enter the dial-up phone records and SIM2. The menu operation, left and right softkey functions of the two in the bottom of the screen and his party showed that they function and cell phones is closely related to the current status.

### **Keypad Lock**

You can activate the keypad lock function to avoid pressing the key accidentally. In the stand-by status, press the OK key and then press the "\*" key within 2 seconds to lock the keypad. And you also can unlock the keypad by slip the icons as the preset orbit. Under the keypad lock status, can receive or refuse the coming call no need to unlock the

keypad.

**Main screen icons (No notification about further change for icons)**

#### **【International Calls】**

Press and hold the '0' key until '+' appears, then input the country code, region number and phone number.

**【Emergent calls】**

Dial 112 to make an emergency call for help. This works even without a SIM card.

**【IMEI】**

International Mobile Equipment Identity. You can see a bar-code label with IMEI number at the back of the mobile if switching off the mobile and removing the battery. The number is also stored in the mobile, when inputting '\*#06#', it displays on the screen if the phone is in the stand-by status. The IMEI, unique globally without any duplication, must be printed on the every phone all over the world, no mater which brand the mobile belongs to.

## **6. Basic Operation of the mobile**

### **Switching on your mobile phone**

Press and hold on the End Key to switch on (or switch off) the mobile. If the password protection of the SIM card and telephone is not activated, the mobile will search for a network automatically. The name of the network will be displayed on the screen when the mobile is registered on the network, then you can make or answer calls.

Your phone will keep on searching a network if an available network couldn't be found temporarily.

If 'Insert the SIM card' is displayed after switching on your phone, please press and hold the End Key to switch off and check your SIM card is inserted correctly or not.

If the password or PIN code of the mobile is requested when switching on, please input the correct password. \* will be displayed instead of the digits, and then confirm with the left

soft key. The registered network name and signal intensity will be displayed after unlocking.

If you do not know your PIN code, please contact your network operator.

The default password is '0000.'

### **Switching off your mobile phone**

Press and hold on the End Key to switch off the mobile. The telephone is power off after the power-off animation displayed. Do not switch off the mobile by removing the battery directly, which would result in the lost of the un-stored information in SIM cards.

### **Using USB data cable**

This mobile supports USB function. Connecting your mobile phone to computer by the USB data cable, you can not only copy and move files between the mobile and computer, but also view photos, videos, and recording files, etc which are saved in the mobile through computer. **The method of using a USB data cable is:** Insert one end of the USB data cable into the USB socket of a PC (Personal Computer); connect the other end to the 'Charge/Data Transfer Socket' at the bottom of the mobile.

#### **Installing a T-Flash card**

The mobile supports a T-flash card (maybe needs to be purchased additionally). The T-flash card is a multimedia storage card used to extend the memory of your mobile. The card is small, so please be careful when you installing or removing it to avoid damaging it. in the upper left side of the phone will be T-flash card is inserted into T-flash release slot.

Note: T-flash cards that compatible list as follows:  
Kingston 128MB、256MB、512MB、1G card; And  
SanDisk 128MB、512MB、1G、2G card; Lexar 1G card;  
Especially, please bring your handset when you purchase  
the T-FLASH card, and please make sure the T-flash  
card is compatible with your handset

#### **Making a call**

You can delete the last incorrect digit by pressing the right  
soft key and long pressing will delete all the digits you input.  
When the call is connected, call timer displays. If the  
sending call is not answered, the possible reasons are as  
follows:

- ◆ “Busy” indicates that the called number is busy or no  
free line can be used. If the automatic redial function is  
activated, the person you called will be called back  
automatically.
- ◆ “Rejected” indicates that the call is not allowed for

reasons such as that Call Barring function is activated.

The caller's name is displayed if the incoming number has been stored.

Press the End Key or the right soft key to hang up the call.

### **Receiving a call**

When you have an incoming call, your telephone will prompt with ring, vibration, vibration and ring, vibration then ring or a portrait/an incoming call video.

- ◆ Press the Call Key to talk
- ◆ Press the End key to reject

The caller's number is displayed if the Calling Line Identification Presentation is activated. The caller's name is displayed if the incoming number has been stored.

To hang up a call is basically the same as the method mentioned above.

### **Speed Dial**

The mobile offers 8 shortcut keys (2-9) that can be customized to assign corresponding speed dial numbers. You can make a speed dial call by pressing and holding the number keys (2-9) in the stand-by status.

**Note:** You should press and hold the key (2-9) for more than 2 seconds for speed dial. If the shortcut key pressed is not defined in 'phone book/speed dial,' you cannot make the speed dial.

### **Use the earphone**

When insert the earphone, you can receiving and dialing the call. Please operate it as followed form.

Execute	The button of earphone
---------	------------------------

---

Receiving the call	Press the button one time
End the call	Press the button when end the calling

#### **Recent Call numbers**

The mobile can store recent call numbers. In the stand-by status, you can access call memory by pressing the Call key or touching the call number by touch pen . Press the Up and Down Navigation keys to select the number and make a call directly by pressing the Call Key.

#### **During the call**

During a call, you can access the “option” menu to choose the different functions (as followed). Press the left software to use “hand-free” function; Touch the small icon in the middle of the bottom line to access the keypad to input the numbers. Such as the service which need to operate according the

voice prompt (Such as China mobile Customer Care Hotline 10086、 China Unicom Customer Care Hotline 10010 and so on ) **Notes : If the Customer Care Hotline exchange in future, please subject to the note of operators**

- ◆ Hold single line: Keep the current call
- ◆ End single call: End the current call
- ◆ New call: Input the number to make another call.
- ◆ Phonebook: Please refer to the chapter about Phonebook for details.
- ◆ Messaging: Please refer to the chapter about Message for details
- ◆ Sound recorder: Record during a call.
- ◆ Mute: Hear voice from the other end, but he/she cannot hear yours.

- ◆ DTMF: Set whether an extension number could be called.

### **Missed calls**

A prompt sound or an icon would display on the main screen if you have missed calls in Sim1 and Sim2. You can view the missed calls by pressing the left soft key.

### **Cell Broadcast CB**

**The main screen displays the warning words or a list**  
**When customers receive the cell broadcast, the user**  
**should touch directly or press the left soft key to access**  
**the “ list ” to read the cell broadcast.**

### **Connecting to the voice mailbox**

You can transfer incoming calls to a voice mailbox by this mobile, and then you will receive a Note about this voice message (The voice **mailbox** number should be set in

advance and be supported by the network.)

## 7. MENU

### **Messaging**

The Messaging function is a network service. Sending and receiving Text/MMS can only be used if the service is proposed by your network operator.

You can send ordinary Text messages, enhanced Text messages (Text messages containing pictures, ring tones and animation as attachments, EMS for short), and multimedia messages (Multimedia messages containing pictures, sound and text, MMS for short). The SMS (or MMS) is sent to the Text messages (or Multimedia messages) center in the network firstly, and then to the target user. If the receiver's mobile is power off or cannot receive messages, the network will store the message temporarily and the store

duration is determined by the user configuration and the service provider. If the receiver's mobile doesn't support the Multimedia messages, the MMS center will create temporary mailbox to store the message on a specialized server for the receiver and send a Text message to inform him to read the Multimedia message online. The message and temporary mail box will be deleted over 48 hours without reading.

The message will be directly stored in the SIM card if the capacity is not full. A blinking icon at the head row of the main screen will be displayed if the capacity is full.  
Messages unread

A blinking icon will display on the main screen, indicating the residuary capacity for Multimedia messages is low. A dialog window will popup if the residuary capacity is low when a Multimedia message is coming or edited

If the Text message or Multimedia message has been sent to the receiver, a beep will sound. (If the tone for Text

messages or Multimedia messages and message report are activated).

**【Text message】**

**[Write message.]:** Edited the content

you have options of Sim1 and Sim2 to send.

You have options of Sim1 and Sim2, and also can Finish:

**Appendix 1 Troubleshooting**

Facts	Possible reasons
My mobile does not switch on	1、 Check the battery charge level? 2、 Check whether the battery has been installed correctly
My mobile does not charge properly	1、 Check whether the charger is connected to the mobile correctly 2、 Make sure your battery is still

	<p>useful. The capacity of a battery may decline after being used for several years.</p> <p>3、 Make sure your battery is not over discharged The battery charger may take several minutes before charging.</p>
<p>My mobile does not connect to a network</p>	<p>1、 The network coverage is so weak or there is wireless interference. Check whether the signal level indicator displays vertical lines on the main screen.</p> <p>2、 Check whether your SIM card has been installed correctly Make sure it is not out of touch or damaged. Contact the network operator to change the SIM card if damaged.</p>

<p>Unable to make outgoing calls</p>	<ol style="list-style-type: none"> <li>1、 Make sure whether your mobile is connected to a network? Check whether the trademark of network vendor displays on the main screen?</li> <li>2、 Make sure that you have not barred outgoing calls?</li> <li>3、 Make sure you do not owe charge?</li> <li>4、 Make sure that you have not set fixed dial function?</li> <li>5、 Check whether you have chosen user line 2 or hiding number while your network provider does not support these services</li> </ol>
<p>Unable to receive</p>	<ol style="list-style-type: none"> <li>1、 Make sure your mobile is connected to a network?</li> </ol>

incoming calls	<p>2、 Make sure you do not owe charge?</p> <p>3、 Make sure you have not forwarded incoming calls?</p> <p>4、 Make sure that you have not barred certain calls</p> <p>5、 Make sure that you have not set certain calls into the blacklist by the calls guarder</p>
Unable to set function	The function is not supported by your network operator or needs to be registered. Please contact your network operator.
The incoming call portrait does	Check whether the portrait is set into GIF format or its size is not larger than

not display animation.	128*92 , otherwise the animation cannot be displayed.
PIN is locked	Input PUK1 code provided with the SIM card by the network provider to unlock, or contact the network vendor.
PIN2 is locked	Input PUK2 code provided with the SIM card by the network provider to unlock, or contact the network vendor.
The call costs counter is invalid	No transfer pulse, please contact your network operator.
SIM card error	<ol style="list-style-type: none"> <li>1、 Make sure the SIM card is not dirty, clean the SIM card</li> <li>2、 Make sure the SIM card correctly insert. Re-install the SIM card</li> <li>3、 Make sure the SIM card is not</li> </ol>

	damaged. Replace it if damaged.
The photo is too dark.	<ol style="list-style-type: none"> <li>1、 Luminance setting is low</li> <li>2、 The environment is dark.</li> </ol>
The photo is too vague	<ol style="list-style-type: none"> <li>1、 The object is moving</li> <li>2、 Slight shake at the moment of pressing the Camera key.</li> </ol>
Distortion of photos	Maybe too close to the object
Can only see part of the stand-by picture	Make sure the picture is in the right format or not too big.
Unable to play music	<ol style="list-style-type: none"> <li>1、 Check whether the song is deleted or renamed while the original name still</li> </ol>

	<p>remains in the folder. You should update the play list.</p> <p>2、 Check whether the downloaded music is in the folder “Mobile/My Music”? The player could only play the music in this folder.</p>
Slow operation	<p>Make sure you haven't set the stand-by wallpaper (or screen saver) with too large GIF picture. The GIF decoding needs large memory which may result in the slow operation. Please try to decrease the size of GIF pictures or lower the frames. We recommend you to use a JPG picture as the wallpaper (or screen saver).</p>

**Appendix 2 Troubleshooting of the Bluetooth**

Facts	Possible reason
<b>Bluetooth earphone Can not power on</b>	<b>The power of earphone may be exhausted, please charge it.</b>
<b>No indication when charging</b>	<b>The bluetooth earphone maybe switch to self –protect mode automatically when first time to charging or unused for long time . It will recover to the normal mode after 30-90m.</b>
<b>BT earphone can not paired with handset</b>	<b>1.Check whether the led on earphone is winking in blue color and red color alternately, and whether the frequency is proper. 2. Check whether the handset BT function has been turned on and the BT icon has been shown on the</b>

	screen.
Unconnected	<p>1.when this happened during a phone call, first make sure the signal strength is above two blocks, and check the BT earphone's power.</p> <p>2.BT earphone should be full charged when be used in first time.</p> <p>3.BT earphone charge time: 3~9 hr at first time ,and the red led will be off after fully charged.</p> <p>NOTE: The bluetooth earphone maybe switch to self -protect mode automatically when be charged in first time or unused for long time .It will take 30 minutes to active the cell, then the red charge led will be turned on .</p>

**Appendix 3 Abbreviations and explanation**

GSM	Global System for Mobile Communications
GPRS	General Packet Radio Service
SMS	Short Message Service
SMS-CB	Short Message Service-cell broadcast
WAP	Wireless Application Protocol
FDN	Fixed Dial Numbers
SIM	Subscriber Identity Module
PC	Personal Computer
PIN	Personal Identification Number 1, provided with SIM card, is the password to activate SIM card.
PIN2	Personal Identification Number 2, provided by the network provider for certain SIM card features (FDN,etc.)

- PUK** Personal Unblocking Key, provided with the SIM card. It is used to unlock the SIM card if you have entered 3 incorrect PIN code or to modify your PIN code.
- PUK2** Personal Unblocking Key 2, provided with the SIM card, is used to modify or unlock the PIN 2 code.
- IMEI** International Mobile Equipment Identity, consisted of 15 numbers, is unique for each mobile
- MCC** Mobile Country Code, for example: China (Mainland) is 460
- MNC** Mobile Network Code, for example:  
China Mobile is 00 and China Unicom is 01.
- Call waiting** Calling waiting is a network service, which allows you to answer the incoming call when you are already on line without hanging up the current call. It is different from Conference

calls because you can only talk to one correspondent but hold on another call.

**Call forwarding** It is a network service, which allows you to forward calls to a special number. The following 5 configurations are possible: Unconditional, Conditional if unreachable, Conditional if no reply, Conditional if busy, and Forwarding all the digital calls.

**Roaming** It means that the mobile is used in a network doesn't belong to. There are two kinds of roaming: international roaming and domestic roaming. The roaming in this manual means the international roaming.

**STK** STK is a new service of GSM. Its full name is SIM toolkit. You can receive flexible information as the Stoke, Traffic, Weather forecast, and so

on by the STK. The function of the STK depends on the network operator and needs the support from SIM card and network.

Explanation for Limited Quantity Substance or Element of XXX Mobile Communication

Part name	Poisonous and harmful substance or element					
	Plumbum (Pb)	Hydrargyrum (Hg)	Cadmium (Cd)	Hexavalent chrome (Cr(VI))	Polybrominated diphenyl (PBB)	Polybrominated Diphenyl ethers (PBDE)
Enclosure	O	O	O	O	O	O
Mainboard	X	O	O	O	O	O
Galvanization	O	O	O	X	O	O

on decoratio part						
Assemblie device	X	O	O	O	O	O
Installatio nut	X	O	O	O	O	O
Charger	X	O	O	O	O	O
Cell	X	O	O	O	O	O
Earphone	X	O	O	O	O	O
Data line	X	O	O	O	O	O
Packing material	X	O	O	O	O	O
