

IP1000/1050

Europe – EU Declaration of Conformity

This device complies with the essential requirements of the R&TTE Directive 1999/5/EC. The following test methods have been applied in order to prove presumption of conformity with the essential requirements of the R&TTE Directive 1999/5/EC:

This device is a 2.4 GHz wideband transmission system (transceiver), intended for use in all EU member states and EFTA countries, except in France and Italy where restrictive use applies.

In Italy the end-user should apply for a license at the national spectrum authorities in order to obtain authorization to use the device for setting up outdoor radio links and/or for supplying public access to telecommunications and/or network services.

This device may not be used for setting up outdoor radio links in France and in some areas the RF output power may be limited to 10 mW EIRP in the frequency range of 2454 – 2483.5 MHz. For detailed information the end-user should contact the national spectrum authority in France.

Clause	Description
EN 60950-1: 2001	Safety of Information Technology Equipment
EN 50392: 2004	Generic standard to demonstrate the compliance of electronic and electrical apparatus with the basic restrictions related to human exposure to electromagnetic fields (0 Hz - 300 GHz)
EN 300 328 V (2004-11)	Electromagnetic compatibility and Radio spectrum Matters (ERM); Wideband transmission systems; Data transmission equipment operating in the 2,4 GHz ISM band and using wide band modulation techniques; Harmonized EN covering essential requirements under article 3.2 of the R&TTE Directive
EN 301 489-17 V (2002-08) and EN 301 489-1 V1.5.1 (2004-11)	Electromagnetic compatibility and Radio spectrum Matters (ERM); ElectroMagnetic Compatibility (EMC) standard for radio equipment and services; Part 17: Specific conditions for 2,4 GHz wideband transmission systems and 5 GHz high performance RLAN equipment

Europe – EU Declaration of Conformity

Česky [Czech]	[Jméno výrobce] tímto prohlašuje, že tento [typ zařízení] je ve shodě se základními požadavky a dalšími příslušnými ustanoveními směrnice 1999/5/ES. Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Caution:

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

IEEE 802.11b or 802.11g operation of this product in the U.S.A. is firmware-limited to channels 1 through 11.

IMPORTANT NOTE

FCC Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Introduction

The **IP1000/1050** is an ultra-compact IP Camera equipped with a high sensitivity progressive scan CMOS sensor, achieving high image quality and superior low-light performance. **IP1050** also supports 802.11b/g/n wireless connection with WPS.

Key Features:

- Maximum Resolution 640x480 (VGA)
- DDNS Supported
- Simultaneous MPEG-4 and Motion JPEG video stream
- up to flexible 30 fps in all resolution
- Wireless(IEEE 802.11g/b/n with WPS) Networks Connection(IP1050)**
- Two-way Audio with Built-In Microphone
- Support Mac OS**
- Support iPhone**
- Support Live Video Viewing on Windows Live Messenger**
- Mobile Phone Streaming Live Video through 3GPP / ISMA / RTSP
- Mobile Phone Live Image through 2.5 WAP
- Multi-level Password Protection for Restricting Camera Access
- Built-In Multi-Window Motion Detection (3 detection areas)
- Video Buffer makes the Streaming Smoother
- Support UPnP**
- Free Bundled Web-based 9 Channel Surveillance Software (EZvuu)**

Safety Instruction

Before you use this product

This product has been designed with safety in mind. However, the electrical products can cause fires which may lead to serious body injury if not used properly. To avoid such accidents, be sure to heed the following.

Legal Caution

Video and audio surveillance can be forbidden by laws that vary from country to country. Check the laws in your local region before using this product for surveillance purposes.

Don't open the housing of the product

Don't try to open the housing or remove the covers which may expose yourself to dangerous voltage or other hazards.

Don't use the accessories not recommend by the manufacturer

Heed the safety precautions

Be sure to follow the general safety precautions and the "Operation Notice."

Operation Notice - Operating or storage location

Avoid operating or storing the camera in the following locations:

Extremely hot or cold places

(Operating temperature: 0 °C to + 50 °C [32 °F to 122 °F])

Exposed to direct sunlight for a long time, or close to heating equipment (e.g., near heaters)

Close to water (e.g., near a bathtub, kitchen sink, laundry tub)

Close to sources of strong magnetism

Close to sources of powerful electromagnetic radiation, such as radios or TV transmitters

Locations subject to strong vibration or shock

In case of a breakdown

In case of system breakdown, discontinue use and contact your authorized dealer.

In case of abnormal operation

If the unit emits smoke or an unusual smell,

If water or other foreign objects enter the cabinet, or

If you drop the unit or damage the cabinet:1 Disconnect the cable and the connecting cables. 2 Contact your authorized dealer or the store where you purchased the product.

Transportation

When transporting the camera, repack it as originally packed at the factory or in materials of equal quality.

Ventilation

To prevent heat buildup, do not block air circulation around the device.

Cleaning

Use a soft, dry cloth to clean the external surfaces of the device. Stubborn stains can be removed using a soft cloth dampened with a small quantity of detergent solution, then wipe dry.

Do not use volatile solvents such as alcohol, benzene or thinners as they may damage the surface.

Minimum System Requirement

Item	Requirements
CPU	Pentium 4 1600MHz (or equivalent AMD)
Graphic Card	64 MB RAM graphic cards(or equivalent on-board graphic cards)
RAM	512 MB
Operating System	Windows 98, Windows ME (Please see Note) Windows2000, 2003, XP, Vista, Windows 7, Mac OS X Leopard
Web Browser	Internet Explore 6 or later

Note

1. If you are using Windows 98 or Windows ME, please install IP Installer before using WEB UI to ensure the system runs normally.
2. If you can't view the record video file, please install Xvid codec while installing Intelligent IP Installer. (For Windows 98, ME or 2000 server, the codec might not work properly. You'll need to download Xvid codec 1.0 from the internet.
3. Please always update the latest Windows component. (Net Framework, Windows Media Player, Enhance ActiveX Security)

Brightness

45

Contrast

40

Saturation

70

Hue

50

Default

Brightness

The higher value the brightness is, the brighter the image is.

Contrast

The contrast is a measure of a display system, defined as the ratio of white to black that the system is capable of producing. The higher value the contrast is, the more delicate of color you can have.

Saturation

The saturation of a color is determined by a combination of light intensity and how much it is distributed across the spectrum of different wavelengths. The higher value the saturation is, the more colorful the image will be.

Hue

Hue is one of the three main attributes of perceived color, affected by different wavelength of color. With higher value of hue, color will be much more vivid.

Default

After the adjustment of all setting, you can still click Default to make the setting back to the original setting.

Information

The Information page provides the product factory information which includes **Product Name, Firmware Version and Web Version.**

Day/Time

Current date / time

Display the current date and time of this IP Camera.

PC clock

Display the date and time of the monitoring PC clock.

Date / Time format

Pull down box to select different time display formats.

Adjust

Keep current setting

Keep the current date and time of this IP Camera.

Synchronize with PC

Keep the date and time the same PC.

Manual setting

Adjust manually the date and time of this IP Camera.

Synchronize with NTP

Specify the NTP server name and the Refresh Interval to synchronize.

Time Zone

You can select the Time Zone.

Daylight Saving Time

There are two modes to choose for setting up daylight saving time.

By Date

Set the start and end time by select month, day, hour, and minute.

By Week Number

Set the start and end time by select month, week, hour, and minute.

Account

The device fault account and password setting is "admin / admin". That means everyone who knows IP address can access the device including all configuration. It is necessary to assign a password if the device is intended to be accessed by others.

User name

Set a user name between 4-16 characters.

Password

Set a password between 4-16 characters.

Re-type Password

Re-type the password to confirm.

Viewer Mode

Set the user mode among Admin, Operator, and Viewer. Different viewer mode has different limits of authority.

Admin mode

Has all authority of configuration.

Operator mode

View the Live View and Use Control Panel.

Viewer mode

View the Live View only.

Viewer Authentication

Allows any viewer direct access to Live View.

System Log

The System Log function allows users to review any changes and events happened. The system starts logging automatically after started.

Enable remote log

Enables user to send the log data to a specified log server.

Initialize

Reboot

Reboot this IP Camera and it takes two minutes to reboot this IP Camera.

Factory Default

Reset this IP Camera to the factory default setting.. Don't turn off this IP Camera until the device reboots.

Backup Setting

Backup the setting data of this IP Camera.

Restore Setting

Click "Browse" to restore setting and then restart automatically.

Firmware Update

Click "Browse" to upgrade firmware.

Upload Language Pack

Upgrade the device language pack.

Note

Use only upgrade files that are special for this IP Camera. Otherwise problems may occur. Don't turn off the IP Camera power or disconnect the network until the upgrading is completed.

Appendix

General

RTSP

Switch RTSP "On" or "Off." The default value is 554.

Image Rotate

You can mirror or flip the display screen.

Audio Codec

If this option is selected On, the microphone will start sound reception.

Night Mode

You can choose Auto / Off. **If you choose Auto option**, the camera will adjust automatically to perform well when the environment is dark.

Exposure Mode

You can choose the environment among 50 Hz, 60 Hz , and Outdoor.

White Balance

You can choose the white balance to Auto, Florescent, Incandescent and Black & White.

LED Indicator

Turn on/off the LED indicator.

Overlay

Text Overlay

You can see some information on the display screen which includes Date / Time and user-defined text. Also, you can change the background color.

Privacy Mask

You can cover a specific area of the video image.

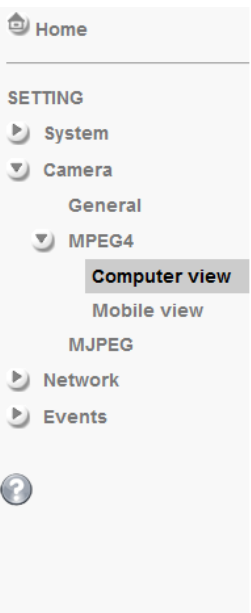

RTSP (Real Time Streaming Protocol) is a protocol for use in streaming media system which allows clients to remotely control a streaming video server. RTSP is supported by most of the media clients such as Real Player, QuickTime and VLC...etc.

MPEG4 – computer view

If **RTSP** is **ON**, the option of Viewer Authentication & Multicast Streaming will appear.

Computer view

- Viewer authentication On Off
- Multicast streaming On Off
 - Multicast address
 - Video port Auto 6000 (1024 ~ 65535)
 - Audio port Auto 7000 (1024 ~ 65535)
 - Time-To-Live (1 to 255)
- Image Size
- Frame rate fps
- Quality
 - Auto
 - Fixed quality
 - Fixed bitrate kbps

Viewer Authentication

If the viewer authentication is On, the users will be requested to key-in username and password when viewing through RTSP.

Multicast Streaming (If it's on)

Multicast Address

Specify the multicast server address.

Video / Audio Port

Specify the transmission port number of the video data.

Time to Live

Set the maximum TTL that multicast can pass through.

Image Size

Specify the image size when the network camera transmits

Frame Rate

Set the frame rate of the MPEG4 image.

Quality

Auto

The quality and bitrate will be adjusted automatically according to the frame rate.

Fixed Quality

You can select the value of quality.

Fixed Bitrate

Set the bitrate of MPEG4 image transmission for a line.

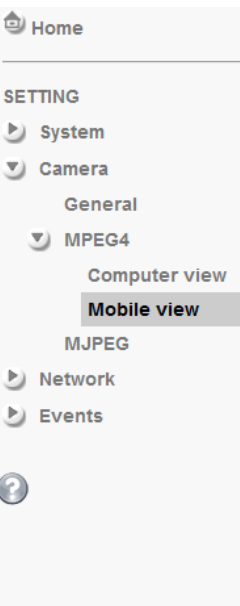

Concerning how to select the suitable image quality for Fixed Quality or Fixed Bitrate, please refer to APPENDIX / A. Frame-rate & Bitrate Table.

Camera

MPEG4 – mobile view

If **RTSP** is **ON**, the option of Viewer Authentication & Multicast Streaming will appear.

Mobile view

- Viewer authentication On Off
- Multicast streaming On Off
 - Multicast address
 - Video port Auto 10000 (1024 ~ 65535)
 - Audio port Auto 11000 (1024 ~ 65535)
 - Time-To-Live (1 to 255)
- Image Size
- Frame rate fps
- Quality
 - Auto
 - Fixed quality
 - Fixed bitrate kbps

Viewer Authentication

If the viewer authentication is On, the users will be requested to key-in username and password when viewing through RTSP.

Multicast Streaming (If it's on)

Multicast Address

Specify the multicast server address.

Video / Audio Port

Specify the transmission port number of the video data.

Time to Live

Set the maximum TTL that multicast can pass through.

Image Size

Specify the image size when the network camera transmits

Frame Rate

Set the frame rate of the MPEG4 image.

Quality

Auto

The quality and bitrate will be adjusted automatically according to the frame rate.

Fixed Quality

You can select the value of quality.

Fixed Bitrate

Set the bitrate of MPEG4 image transmission for a line.

Concerning how to select the suitable image quality for Fixed Quality or Fixed Bitrate, please refer to APPENDIX / A. Frame-rate & Bitrate Table.

MJPEG

If **RTSP** is **OFF**, the option of Image Size & Frame Rate & Quality will appear.

MAC address

Obtain an IP address automatically (DHCP)
 Use the following IP address

IP address
 Subnet mask
 Default gateway

Obtain DNS server address automatically
 Use the following DNS server address

Primary DNS server
 Secondary DNS server

HTTP port number 80 (1024 to 65535)

Obtain an IP address automatically (DHCP)

Select this while the IP address is assigned by the DHCP server.

Obtain DNS server address automatically

Select this to obtain the address of DNS server automatically.

Use the following IP address

Select this when the fixed IP address is set.

IP address

Enter the IP address of the device.

Subnet mask

Enter the subnet mask.

Default gateway

Enter the default gateway.

Use the following DNS server address

Select this when you set the fixed address as the IP address of DNS server.

Primary DNS server

Enter the IP address of the primary DNS server.

Secondary DNS server

Enter the IP address of the secondary DNS server, if necessary.

HTTP port number

Select **80** (recommend) or enter a port number between 1024 and 65535.

PPPoE

If your ISP provides Dynamic IP with authentication by username and password, type all PPPoE information in this part. When you use the PPPoE function, you need to turn on the DDNS or IP Notification function at same time.

PPPoE

PPPoE On Off

IP address

User ID

Password

Re-type password

Obtain DNS server address automatically

Use the following DNS server address

Primary DNS server

Secondary DNS server

Note

1. The IP Camera needs to be rebooted after it finishes changing the network completely.
2. The IP Camera with Intelligent IP Installer can't be founded after turning on the PPPoE and reboot.

IP Address

The IP address obtained at the PPPoE connecting with network.

User ID

Enter the user ID for authentication necessary for PPPoE connections.

Password

Enter the password for authentication necessary for PPPoE connections.

Re-type Password

Re-type the password to confirm.

Obtain DNS server address automatically

Select this to obtain the address of DNS server automatically.

Use the following DNS server address

Select this when you set the fixed address as the IP address of DNS server.

Primary DNS server

Enter the IP address of the primary DNS server.

Secondary DNS server

Enter the IP address of the secondary DNS server.
