← Zink Connection

1. Connect to the network named
"HUB_SAP"

If the network does not appear at first, please
wait a few moments.

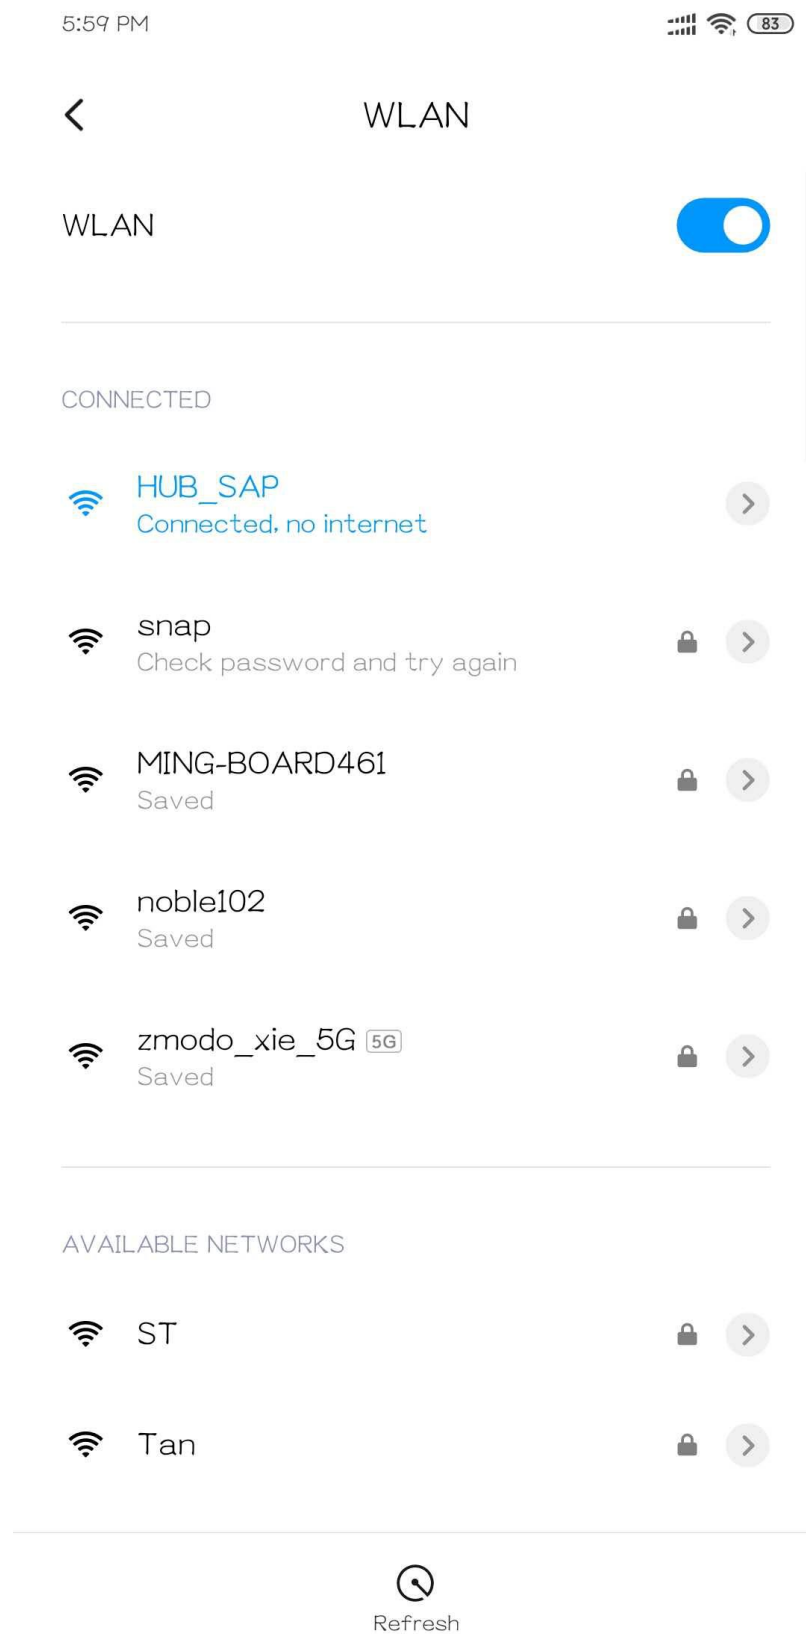

2. Return to the Hubbell app after you have
connected to the network.

Tap here to begin setup

4. Select the network named "HUB_SAP" and connect to it.

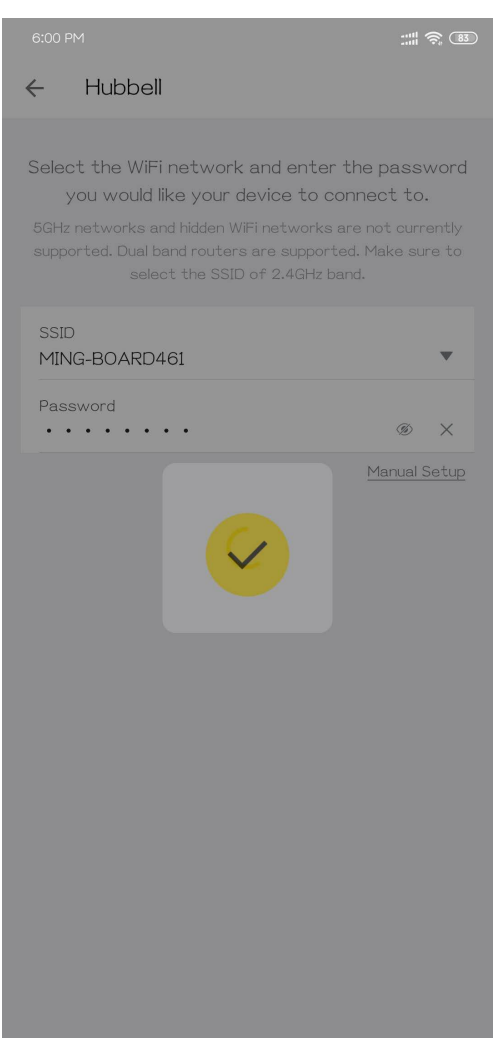

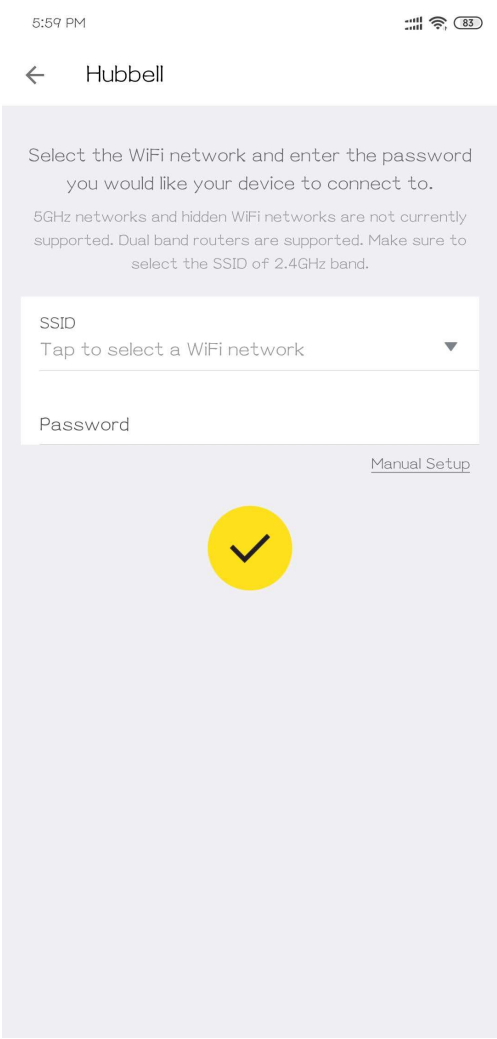

Note: If you see a "No Internet Connection" error message, please ignore it and connect anyway.

5.Return to the HUB app page and select or enter the SSID and password of the WiFi network that you want your camera to connect to.

Note: The WiFi name and password are case sensitive.

Tap  to proceed.

6. If you see this screen, the app will connect your camera to your WiFi network. This may take a few minutes.

Note: If you are connecting multiple devices, you will need to wait for the app to find and connect all devices.

Waiting for connection, this may take
a few moments...

7.Name your camera and set a password for it. Tap ✓ to proceed.

Note: The password provides an additional layer of security for your devices. You will not need to use this password when accessing your devices from the HUB app. It is not required, but it is highly recommended.

FCC STATEMENT

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions:

- 1) this device may not cause harmful interference, and
- 2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void your authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The distance between user and products should be no less than 20cm
