VII. Introduction of bluetooth headset pairing with computer

There are two kinds of situation for Bluetooth connects with computer:

a. The computer is built in bluetooth, can use bluetooth software to connect
b. The computer does not have bluetooth, needs to insert USB bluetooth dongle and installs IVT bluetooth drive software. Below is the operate instruction for connecting by USB bluetooth dongle

1. Install the IVT bluetooth drive software

2. Insert the USB dongle into computer USB port (better to insert into the USB port at the front of computer)

3. Switch on the headset into pairing status.

4. Start-up IVT Bluetooth drive software in the computer, click " Refresh Equipment" in "View Menu", begin to search the bluetooth equipment.

5. After searching, then you can find the "B30" in equipment list, choose "B30" in the list, click right mouse button, click "connection", then appeared two options: a, Bluetooth high quality audio service (used for enjoy music) b, Bluetooth headset service (used for internet call), after selecting the service needed, the computer will required to input pairing code, please input the Pin-Code "0000" to pair. If select headset service, to accept connection by press multifunctional button when the headset issue a beep with red&blue light flashing together. If select audio service, no need to press button but connect automatically.

6. After pairing successfully, the blue light in headset will be flash, you can enjoy the computer's music or voice chatting

Remark: a. Different kinds of computer or IVT edition, the way for connecting with the bluetooth headset and function will be different.

b. When using IVT software to connect Bluetooth, please select right Bluetooth

service. Choose the audio service and headset service at the same time is not allowed, otherwise may cause problems such as the other side can't hear you during your internet chatting.

VIII. Low power alarm: When the battery voltage is lower than 3.3 V, the red light will flash two times rapidly every 30 seconds, at the same time the headset will show warning tone. When the battery voltage is lower than 3.0V, the headset will power off automatically, please charge it in time.

IX. Automatically power off: Headset will automatically shut-off if no pairing for 3 minutes.

X. Reset: If the headset can not turn off, it can be reset to normal status by charging.

XI. Audio input/output:

1. Under shut-down status, connect 3.5mm audio cable with 3.5mm jack on headset, it can be used as a normal wired headset.

2. Under working status, connect 3.5mm audio cable with the headset, it can output the audio signal to other audio amplifier equipments, then enjoy more shocking music.

6.Please do not tear down headset by un-professional person.

XIV. Features and specifications

- This product adopts bluetooth communication technology, realize wireless connection.
- Can wireless enjoy stereo music and voice chatting after pairing with mobile, computer or other bluetooth equipments.
- Support iPhone, iPad bluetooth pairing connection.
- 3.7V rechargeable lithium battery, can be continuously working 9 hours after fully charge.
- The 3.5mm audio input/output interface, can be connected to other audio equipments.
- Adjustable ears hang design, the headphone earmuffs use copy human skin leather, comfortable and durable. All of these design show its high quality.

Item:	Specification:
Bluetooth edition	V2.1+EDR
Frequency coverage	2.402GHZ~2.480GHZ ISM Band
Wireless transmitter standard	CLASS 2
Transmit Range	About 10m
Frequency Response	20HZ-20KHZ
S/N rate	80db
Speak power rate	2X15mW
Status Indication	LED indicator
Pairing products	Bluetooth computer, USB Bluetooth adapter, Bluetooth cell phones
Battery	Rechargeable lithium ion battery 3.7V 300mA
Charge Power	Computer USB interface、 output DC 5V/500mA charger
Charge Time	1-2 hours
Operate hours	About 9 hours
Standby time(paired with mobile standby)	more than 75 hours (battery saturation)

FCC ID: ZAY-Z-B30

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
