G: Computer connect with headset

There is two kinds of situation for Bluetooth and computer connection.: a, The computer have built in bluetooth,can use bluetooth software to connect b, If the computer don't have bluetooth, need to insert USB dongle and install IVT bluetooth drive software. Below is the instruction for the last kind:

- 1.Installing the IVT bluetooth drive software
- 2.USB dongle insert into computer USB port (better to insert into the computer front USB port)
- 3.Headset into pairing status.
- 4.Start-up IVT Bluetooth drive software in the computer,click " Refresh Equipment" in "View Menu",start to search the bluetooth equipment.
- 5, After searching,then you can find the "B50" in equipment list,choose"B50" in the list,and click right mouse button,click"connection",then appeared two options: a,Bluetooth high quality audio service(use to listen music) b, Bluetooth headset service (use to voice chat), after select the service needed,the computer will required to input pairing code,please input the Pin-Code "0000" to pair. If select headset service, to accept connection by press multifunctional button after headset issue a beep with red&green light flashing together.If select audio service,no need to press button but connect automatically.
- 6.,After pairing successfully,the green light in headset will be flash, you can enjoy the computer's music or voice chatting then.

Remark: a.Base on different design for different computer or TVT edition, the connection and function will be different.

b.When using TVT software to connect Bluetooth,please select right Bluetooth service, forbid to connect audio and headset at the same time, Otherwise may cause problems such as silent call.

H. Low power alarm: As the battery voltage is lower than 3.3 V,the red light will flash twice rapidly every 30 seconds,and issue a beep,as the battery voltage is lower than 3.0V,the headset will shut-off automatically,please charge it as quickly as possible.

I: Off automatically: Headset will automatically shut-off after no pairing for 3 minutes.

J. Resetting: If the headset can not turn off, can be reset to normal condition by charging.

K: Audio input/output:

1. Under shut-down status,connect 3.5mm audio cable to 3.5mm jack on headset, it can be used as a normal wired headset.
2. During playing,using 3.5mm audio cable,output MP3 or FM audio signal to other audio system equipments,then enjoy listening more rock musics.

L. Important information

1.Can not start or shut-down automatically after start: The bluetooth headset is low power,please charge it as quickly as possible.

2.Can't find Bluetooth equipment or paring:

a. Please put headset and other paring equipments in 5 meters,no big barrier between the two pairing equipments.

b. Make sure the headset is in pairing status. Mobile/computer and other Bluetooth equipments are in searching status.

c.Delete all the history paired Bluetooth equipments in mobile or computer, restart the mobile/computer and pairing.

3, Pairing successfully,but no sound in the headset

a.Check mobile/computer,headset connection device connected correctly

b. Check whether mobile/computer,headset volume has adjusted to the minimum.

c.Restart the player software after connected.

d.Delete all the history paired Bluetooth equipments in mobile or computer, restart the mobile/computer and pairing.

4. Noises arise or intermittent:

a.Make sure the equipments within the effective distance,no big barrier between the two pairing equipments.Otherwise the signal will be weak,and cause noises arise or voice intermittent.

b.Low battery power in the mobile/computer,headset

c. Mobile/computer and Bluetooth is within a weak-signal area, its effect will be worse.

M. Attentions

1. In order to prolong the battery service life,please remember to turn it off after using.At first time to use the product,charge the headset battery for 3 hours at least. Please use the qualified charging equipment to charge.

2.If headset do not use for long time,please put it into packing box with shut-off status, to avoid damage.Need to charge it 1 time at least per 2 months.

5.When operating,please don't greatly forcibly.

6.Please do not tear down headset by un-professional person.

N.Features and specifications

- This product adopts bluetooth communication technology,realize wireless connection.
- Can enjoy stereo music playing and voice chatting wirelessly after pairing with mobile,computer and other Bluetooth equipments.
- Support iPhone,iPad bluetooth pairing connection.
- 3.7V rechargeable lithium battery, can be working 9 hours continuously after fully charge.
- The 3.5mm audio input/output interface, can be connected to other audio equipments.
- The shell adopts aluminum material and shiny technology,the headset sheath use skin-like artifical leather,comfortable and durable,to reveal noble quality.

Item:	Specification:
Bluetooth edition	V2.1+EDR
Frequency coverage	2.402GHZ~2.480GHZ ISM Band
Wireless transmitter standard	CLASS 2
Transmit Range	About 10m
Frequency Response	20HZ-20KHZ
S/N rate	80db
Speak power rate	2X10mW
Status Indication	LED indicator
Pairing products	Bluetooth computer, USB Bluetooth adapter, Bluetooth cell phones
Battery	Rechargeable lithium ion battery 3.7V 300mA
Charge Power	Computer USB interface、 output DC 5V/500mA charger
Charge Time	1-2 hours
Operate hours	About 9 hours
Standby time(together with mobile standby)	more than 75 hours (battery saturation)

FCC ID: ZAY-Z-B50

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
