b. When the call coming from QQ, if you don' t want to answer the phone,you can press the refuse key on QQ directly.

Note:

a.when using a headset with the internet in the long-distance call, the Bluetooth adapter driver software is different ,the use of methods of operation are also different.

b.when using a headset with the internet in the long-distance call ,if it's a silent call, please set call tool (QQ, SKYPE, MSN) of the audio settings for audio input and output in the Bluetooth status.

c. because the different bluetooth driver software, maybe some adaptor can't support the automatic transfer with stereo mode and calls model.

d. to come true the wireless transfer of the bluetooth and the adaptor, must install the relevant driver software on computer.

F、 Common problems

1. Automatic power off when power on, or during playing the red light flash quickly, the headset have a sound with "bi/bi" that means the bluetooth headset is low power, please charge it as quickly.
2. The bluetooth headset need to be charged at least 40 minutes for start-up, suggest to charge enough power consumingly before using.
3. No indication during charge
If the battery was used out of power completely or didn't use for long time, when you use at the first time, may be no indication light, but need to wait for a few minutes, then red light will be flash for charge indication.
4. No sound on the headset:
 - Make sure the headset had been paired successfully with the mobile.
 - Make sure the headset had been started up.
 - Make sure the distance between the headset and mobile don't exceed 5 meters.
 - Make sure your mobile is in the strong enough signal range.
 - Some of mobiles only support one of bluetooth headsets, if more than one bluetooth headset pairing with the mobile, the connection may be interrupted.
5. After charging has been finished, why does not my headset work with my mobile?
 - Your mobile's Bluetooth has to be activated first and paired with your eyewear.
6. Can my bluetooth headset work with mobile of any model?
 - No. It can only work with mobile which has bluetooth.
7. What is the effective distance for headset and Bluetooth mobile ?
 - Their maximum effective distance is 10 meters, but that may vary depending on specific environment or mobile specifications. Some mobile's effective distance may be less than 10 meters or only around 5 meters.
8. When my mobile is searching the headphone, why do several bluetooth equipments appear?
 - Within the effective distance, most Bluetooth mobiles will search several Bluetooth equipments (like PDA, Notebook...) after their Bluetooth has been activated. When your mobile found them, "Z-W99" (or Unknown Equipment) will appear on your mobile.
9. Why can not my mobile find Bluetooth equipment?
 - If your headset has not been paired with other equipment, your mobile can not find any Bluetooth equipment. Before using your mobile to search any equipment, make sure equipment is paired. (Refer to user manual for detailed instructions)
10. Should pairing between headset and mobile be repeated every time when using them ?
 - No. So long as pairing has been successfully set, headset and mobile will keep paired even if any one or two of them are shut down.

11. Why do noises arise?

Bluetooth equipments' performance is affected by any one of the following factors:

- Whether mobile is within a strong-signal area or not. If the mobile is within a weak-signal area, its effect will be worse.
- Whether mobile is within the effective distance or not.
- The communication effect of QQ & SKYPE depend on the network.

12. What should I do if my headset can not receive well ?

—Adjust the volume button or press “Volume+” on your mobile to increase the volume and test if mobile is within a strong-signal area.

13.. Why can not my headset work suddenly?

—No power. When battery is low, red indicator will flash, “di,di...” can be heard on the headset.

14.. Why not out of commission of incoming telegram displays?

—It will not display the incoming telegram when you dial numbers, or your mobile cannot support incoming telegram displays.

15.. Why different answer fashion with different mobile?

—Different mobile maker use different bluetooth software. For example, for T610, only need to press S4 gently to answer the call, however, for P800 and P900, you should press S1 for 3 seconds then can answer the phone. That cause by P800 and P900 are intelligent mobile, so a little different definition for using keys. Commonly, the way of answer phones are “press the key gently” or “press the key for 3 second” .

G. Headset maintain

—If use non-original accessories, it may cause capability comes down, body hurted, short circuit or abate the maintain.

—If disassembly your bluetooth headset, it may cause the headset shatter or abate the maintain.

—Don' t place the headset on more dust range.

—Use the clean, soft and dry fabric to clean your headset.

—Pls don' t folding the line, in case of any deformation, influence of comfort.

—When you don' t want to use the headset, please put it into the packing.

—Don' t let children play headset, they may hurt themselves or break the headset.

—Don' t put headset on more hot or more cold environment, otherwise the headset may not be used for a while.

Travel charger:

·The charger only designed for using in indoor, don' t use it in outdoor.

·The charger can be only used within the indication voltage range.

·When pull out the charger from the socket, don' t pull it strongly, otherwise it may attain the charger.

Interrelated information for battery:

New battery: At first time to use the product, charge the headset battery for 4 hours at least.

Maintain battery:

- Please take down or replacing the battery on some salted maintain center.
- If use it carefully,the life for it will be long.
- Temperature for charge is 10°C to 45°C.
- Base on room temperature using,can get the largest capability.
- Using at outdoor temperature,will cause reduce the capability.
- If headset do not use for long time,need to charge it 1 time at least per 2 monthes.

H. features and specifications

wireless enjoy stereo music playing

wireless dial, talk phone calls

Wireless enjoy stereo music from the computer

use the Internet to achieve long-range wireless two-way communication;

wireless enjoy stereo music, set aside to answer the call automatically converted, high-fidelity, CD quality sound effects.

remote control music playback status (remote control music playback, pause, up and down selections, volume control).

High sensitivity, omni-directional microphone design, voice clarity, no echo.

Specification:

Product Name	Wireless Bluetooth Stereo Headset
Product Type	Z-W99
Edition	Bluetooth V2.1+EDR
Frequency coverage	2.402GHZ~2.480GHZ ISM Band
Sensitivity	-80dbm
Wireless Transmitter Standard	CLASS 2
Channel	79channels of 1Mhz BW
Contact Terms	Point-to-Point
Transmit Range	<=10M
Frequency Response	20HZ-20KHZ
S/N rate	80db>
Speak power rate	2X10mW
Status Indication	Red LED call status, charging instructions Blue LED stereo Status
Pairing products	HFP,HSP, AD2P, ACVRP Bluetooth protocol of the computer, USB Bluetooth adapter, Bluetooth cell phones(can support with iphone 3G&3GS,but cant support play previous/next key-press)
Battery	Lion. 3.7V 150mA
Charge Time	1-2H
Charge Power	USB 5V output:DC 5V 300mA
Operate hours	more than 5 hours (battery saturation)
Standby Time	More than 250 hours (battery saturation)
Size	10.6*12*4.2cm
Weight	33g

FCC WARNING
