1.1 Introduction

Thank you for choosing ZTE G650 / G651 / G420 / G120 GoTa Digital Trunking Phone. Based on CDMA2000-1x technology, the mobile phone provides normal functions as well as PTT (Push-to-Talk) function.

The Mobile phone provides the following functions:

Group Calls	Provide one-to-many voice group call service in CDMA network service area with PTT functions;
Private Calls	Provide one-to-one voice call service in CDMA network service area with PTT functions;
Normal Calls	Provide traditional voice communication service based on CDMA network;
SMS	Receive, send and edit short messages;
Book	Store up to 300 entries of contacts and 70 groups of PTT group numbers;
Data Communication	Provide data services based on CDMA2000 -1X technology;

1.2 Safety Instructions

If your mobile phone is lost or stolen, notify your network service provider immediately to prevent unauthorized use. Meanwhile you need to provide the service provider with your phone's ESN, which can be found on the back of the mobile phone after the battery is removed. Keep the ESN properly for future use.

To protect your mobile phone against abuse, take the following precautions:

- Set a PIN code (if your mobile phone supports R-UIM card) and modify it from time to time.
- Don't leave your phone on the seat or other visible places when you are away from your car. Carry the phone or lock it in the trunk.
- Set call restriction.

1.3 Safety Warnings and Precautions

Precautions for using the phone

- Do not use your mobile phone near TV set, radio or office automated equipments to avoid mutual interference.
- Power off your mobile phone as required when you are on airplane or in hospital. As mobile phones may affect the normal operation of electronic devices or medical apparatus, you are required to follow the mobile phone usage regulations in the above cases.
- Do not use your mobile phone in the place where there is weak signal or near the high-precision electronic devices. Radio wave interference may cause malfunction or other problems to electronic devices, especially medical devices such as audiphone and pacemaker, fire detector and auto-control equipments such as auto-door. For details on the influence that your mobile phone would probably have upon pacemaker or other medical devices, consult the manufacturer or the local distributor.

-
- Do not use your mobile phone in gas station. Power off your mobile phone near fuels or chemicals.
 - Occasionally, using phone in the vehicles of certain models might bring negative effect to the internal electronic devices. In this case, do not use your mobile phone to ensure safety.
 - Keep your mobile phone away from magnetic objects such as magcards because radio wave of your mobile phone may erase the information stored in floppy disks, deposit cards or credit cards.
 - Protect your mobile phone against dampness. Water or other kinds of liquid entered your mobile phone might cause overheating, creepage or failure.
 - Do not disassemble or reassemble your mobile phone because this might cause damage, creepage or circuit failure.
 - Do not use your mobile phone if your antenna is damaged. It may cause body injury.
 - Do not use your mobile phone while driving, and follow the local corresponding rules and regulations.
 - Keep the phone out of the reach of children. The phone may cause body injury if used as a toy.
 - Do not press keys with needles, pen points or other sharp objects to avoid damage or misoperation.
 - Keep tiny metal objects such as thumb pins away from the phone. The phone speaker is magnetic and thus magnetizes those metal objects, which may hurt people or damage the phone.

- Use the original accessories or those authorized by ZTE. Using any unauthenticated accessories may affect your mobile phone's performance, damage your phone or even cause danger to your body and violate related national regulations about telecom terminals.

Precautions for using the battery

- The battery life is limited, and becomes shorter and shorter if the battery is charged frequently. If the battery fails to be charged several times, it shows the battery is worn out and needs to be replaced.
- Do not throw the battery into household garbage but dispose it as required in specified place.
- Do not throw the battery into fire. It might cause fire or explosion.
- Do not press the battery with great force. It might cause battery leakage, overheating, explosion or fire.
- Do not disassemble or reassemble the battery. It might cause battery leakage, overheating, explosion or fire.
- Replace the battery that gets heated, changed in color or deformed during use, charging or storage.
- Prevent the battery against dampness, otherwise it might cause overheating, smoldering or erosion.
- Do not expose the battery in direct sunshine, around a car or near any place where there is high temperature, but place it in ventilated and cool places. Otherwise it might cause leakage or overheating. This might affect the battery's performance and shorten its life.
- Do not keep charging the battery continuously for more than 24 hours.

Precautions for using the charger

- Use the power voltage between 110VAC and 220VAC. Using the voltage beyond the range may cause leakage, fire or damage to the phone and charger.
- Do not short-circuit the charger, otherwise it might cause electric shock, smoldering or damage.
- Do not charge in the places where there is direct sunshine, dampness, dust or vibration, or near electric apparatus such as TV set, radio.
- Do not use the charger with damaged power cables. It might cause fire or electric shock.
- Do not place water containers near the charger to avoid water splashing. If water or any other kind of liquid splashes on the charger, immediately remove the charger from the power socket to avoid overheating, fire, leaking, electric shock or failure.
- Do not disassemble or reassemble the charger. It might cause body injury, electric shock, fire or damage.
- Do not touch any charger, power cable or power socket with wet hands to avoid electric shock.
- Do not place heavy objects onto power cables or refit power cable. It might cause electric shock or fire.
- Remove power plug from the socket before cleaning and maintenance.
- Clean the accumulated dusts from the power socket in time.
- Hold the charger rather than pull the power cable while removing the plug from the socket. Otherwise it might cause damage, electric shock or fire.

Cleaning and maintenance

- Clean the phone, battery and charger with a soft dry cloth.
- Do not clean the phone with the liquor such as alcohol, dilution agent or benzene.
- Clean the socket at intervals because a dusty socket might cause disconnection, power failure, or even charging failure.

1.4 Parts Definition

Key Definition

Name	Description
PTT Key	Used to make PTT calls, or as shortcut to view PTT calls. During the conversation, hold PTT key to speak, and release it to listen.
Side Key	Used to adjust volume, or as shortcut to set call attribute.
Left Soft Key	Correspond to the words at the bottom left corner of the screen. Used to view menu or confirm.
Right Soft Key	Correspond to the words at the bottom right corner of the screen. Used to return / exit, or as shortcut of book.
Navigation Key	Used to move up / down / left / right the highlight / contents / cursor.
Send Key	Used to dial or receive the numbers, or as shortcut to view call history.
End Key	Used to power on/off, or end a call.
0~9 Alphanumeric keypad	Used to input numbers or characters.
* Key	Used to input *, or as shortcut to switch between profiles.
# Key	Used to input #, or as shortcut to switch between input methods, or lock the keypad.

1.5 Battery

1.5.1 Install the Battery

1. Insert the battery into the slot of the phone, shown as below:

2. Push the back cover in the direction indicated by the arrow until you hear the sound of "KA".

1.5.2 Remove the Battery

1. Push the separation button on the back of the phone in the direction indicated by the arrow.

2. Pull the battery in the direction indicated by the arrow and take out the battery.

1.5.3 Charge the Battery

The new battery is not fully charged, so please fully charge it before use.

1. Insert the charger plug into the bottom of the phone (the side with arrow is upturned).

2. Connect the charger to 110V/220V power socket.

Note	Please press the button on the charger plug before pulling it out.
-------------	---

1.6 Insert and Remove R-UIM Card

Consult your network service provider whether your phone needs R-UIM card or not.

Note	Skip this section if your phone does not need R-UIM card.
-------------	--

If R-UIM card is required, then your network service provider will provide a valid R-UIM to your mobile phone. At this point, R-UIM card is the key to CDMA network. New R-UIM card is generally put into a piece of card, which should be taken out carefully before installation. Follow the steps below:

1. Power off your phone to remove the charger and battery.
2. Insert R-UIM card into the socket, show as below:

3. Please power off your phone to remove the charger and battery before taking out R-UIM card as shown in the figure below:

1.7 Power on / off

1.7.1 Power on

Press and hold  until you see power-on animation on the screen.

If your phone supports R-UIM card and no R-UIM card is inserted, then your phone will prompt with “No R-UIM card or card invalid!” At this point, you need to power off your phone to reinsert a valid R-UIM card, and then power on.

If your phone supports R-UIM card and the PIN code of R-UIM card is set, your mobile phone requires inputting PIN code when powered on. Enter correct PIN code, and press left soft key  to confirm.

If you set **Lock Phone** as **Power-on** in **Security** , the mobile phone will prompt with “Password Verify” when powered on. Enter correct password to unlock the phone.

Note

The initial password is “0000”. The PIN code of R-UIM card will be sent to you with R-UIM card together. If not, please consult your network service provider. Generally, the default PIN code is “1234”, and it’s recommended to change it as soon as possible.

1.7.2 Power off

Press and hold  until you see power-off animation on the screen. The screen becomes black after the phone is powered off.

1.8 Text Input

You could enter characters, numbers and symbols through standard alphanumeric keypad.

To enter numbers, directly input digits;

To enter characters, press  key to select the input method;

To enter symbols, press  key;

Make and Receive PTT Calls 2

Adopting the method of Push-to-Talk, PTT calls are different from normal calls. PTT calls could be classified into **Group Calls** and **Private Calls**.

PTT Private Calls provide one-to-one voice call service in CDMA network service area with PTT functions. Each PTT mobile phone has one unique PTT number, namely PTT private number. Dialing this number in PTT mode could make PTT private calls. You could save and view this number in **Personal Book**.

PTT Group Calls provide one-to-many voice group call service in CDMA network service area with PTT functions. Each group has a unique group number to differentiate with other groups. Dialing this number in PTT mode could make PTT group calls. You could view this number in **Group's Book**.

According to call priority levels, PTT calls could be classified into Emergency Calls, Pre-emptive Priority Calls and Ordinary Calls, among which Emergency Calls have the highest priority, and Pre-emptive Priority Calls have higher priority than Ordinary Calls. (Please refer to “Call Attribute” in section 5.2 for the setting methods)

2.1 Make Private Calls

You could make privates calls in any of the following three ways:

1. Direct dial;
2. Dial from book;
3. Dial from call history.

2.1.1 Direct Dial

1. Enter the desired PTT private number in idle mode;
2. Hold **PTT** key  to start dialing, and talk after hearing a beep sound;
3. Release **PTT** key  to release the floor. Listen to the other side to speak at this point.

2.1.2 Dial from Book

1. Press **Book** in idle mode to access the phone book, and select **Personal Book**;
2. Press **▲/▼** key to select your desired contact;
3. Hold PTT key  to start dialing, and talk after hearing a beep sound;
4. Release PTT key  to release the floor. Listen to the other side to speak at this point.

Note	If you can't make a call after holding PTT key  , then it means that there is no PTT private number for your current contacts.
-------------	--

2.1.3 Dial from Call History

1. Press PTT key  in idle mode to display PTT calls list; or press **Menu** and Select **Call History** to enter;

-
2. Press ▲/▼ key to select your desired private call record;
 3. Hold PTT key  to start dialing, and talk after hearing a beep sound;
 4. Release PTT key  to release the floor. Listen to the other side to speak at this point.

Note

If you select [PRESS] as the status of [Speed Dial No.] in [PTT Functions], press PTT key  in idle mode to directly dial PTT Speed Dial number, instead of displaying PTT calls list.

2.2 Make Group Calls

You could make group calls in any of the following three ways:

1. Direct dial;
2. Dial from book;
3. Dial from call history.

2.2.1 Direct Dial

1. Enter “#” firstly, and then the desired group numbers in idle mode;
2. Hold PTT key  and talk after hearing a beep sound;
3. Release PTT key  to release the floor. Listen to the other members to speak at this point.

2.2.2 Dial from Book

1. Press **Book** in idle mode, and select **Group's Book** ;
2. Press ▲/▼ key to select **User Book / System Book** , and then press **select** to enter; press ▲/▼ key to select the desired group;
3. Hold PTT key  and talk after hearing a beep sound;
4. Release PTT key  to release the floor. Listen to the other members to speak at this point.

2.2.3 Dial from Call History

1. Press PTT key  in idle mode to display PTT calls list;
2. Press ▲/▼ key to select your desired group call record;
3. Hold PTT key  to start dialing, and talk after hearing a beep sound;
4. Release PTT key  to release the floor. Listen to the other members to speak at this point.

Note	If you select [PRESS] as the status of [Speed Dial No.] in [PTT Functions], press PTT key  in idle mode to directly dial PTT Speed Dial number, instead of displaying PTT calls list.
-------------	---

2.3 Receive PTT Calls

When receiving PTT calls, users will firstly hear a short beep sound, and then listen to the other members to speak without any operation. After the other members finish speaking, hold **PTT** key  and speak after hearing beep sound. Release **PTT** key  to release the floor, and at this point listen to the other members to speak.

2.4 End PTT Calls

2.4.1 Exit from a Group Call

During the conversation, you could exit from a group call, while others continue the conversation.

Operation Method

Press **Option** and select **Exit Call** in PTT group call; or press  key to exit from PTT group call.

2.4.2 End a Group Call

During the conversation, all members in the group will exit from a group call after it is ended.

Operation Method

Press **Option** and select **End Call** during the conversation;

Note

Only the group caller or group head has the authority to end a group call.

2.4.3 End a Private Call

Press  key to end a private call; or press **Option** and select **End Call** to end it during the conversation.

2.5 PTT Emergency Calls

With the highest priority, emergency calls could be made through the emergency key. Select **PTT Functions** and then **Emergency** to set emergency call numbers (please refer to section 5.11 “Emergency” for details).

2.6 Functions during PTT Calls

2.6.1 Group Members Status Query

Offline Members Status Query

During PTT calls, you could inquire the status of those uncalled members (Offline Members) in the group.

Operation Method

1. Press **Option** and then **OfflMembStat** to view the list of offline members;
2. Press **▲/▼** key to turn pages;
3. Press **Back** to return to the call interface.

Group Members Status Query

During PTT calls, you could inquire the status of all members in the current group.

Operation Method

1. Press **Option** and then **GrMembStat** to view the number of both online and offline members;
2. Select **Detail** and then **Online Member / Offline Member** to view the detailed list of members;
3. Press **Next** to turn pages;
4. Press **Back** to return to the call interface.

Note	The icons in different colors in front of the member names in the list represent different statuses.
-------------	---

Icons	Descriptions
	Power off
	Away
	Call Forwarding
	No-disturbing
	Out of service area
	Call restricted

2.6.2 Group Members Management

During PTT calls, you could manage the members in the group.

Operation Method

Press **Option** and then **Dyna Mgmt** to perform corresponding operations (For details, please refer to section 5.10 “Dyna Mgmt”)

2.6.3 Upgrade Ordinary Calls to Emergency Calls

During PTT calls, press **Option** and then **Upgrade Call**.

2.6.4 Downgrade Emergency Calls to Ordinary Calls

During PTT calls, press **Option** and then **Downgrade Call**.

2.6.5 Switch the Sound

During PTT calls, you could receive the call either from the speaker or from the earpiece.

During PTT calls, press **Option** and select **To Speaker** or **To Earpiece**.

Make and Receive Normal Calls 3

Normal calls indicate CDMA traditional voice phone calls you normally dial.

3.1 Make Normal Calls

You could make group calls in any of the following three ways:

1. Direct dial;
2. Dial from book;
3. Dial from call history.

3.1.1 Direct Dial

Enter the desired phone number in idle mode and press  key to dial it.

3.1.2 Dial from Book

1. Press **Book** in idle mode, and select **Personal Book**;
2. Press  key to select your desired contact;
3. If there are multiple numbers for this contact, press  key to switch between different numbers;
4. Press  to dial the number covered by the highlighted bar.

Note	If the current number is PTT private number, pressing  key will not dial this number.
-------------	---

3.1.3 Dial from Call History

1. Press  key in idle mode to display Normal calls list;
2. Press ▲/▼ key to select your desired phone record;
3. Press  to dial the number covered by the highlighted bar.

3.2 Receive Normal Calls

Press  key to receive an incoming call, and press  to end it;

3.3 End Normal Calls

When you are making a call or already in a conversation, press  key to end it.

3.4 Functions during Normal Calls

3.4.1 Adjust the Volume

During calls, press Side key  to adjust the volume of the earpiece.

3.4.2 View the Book

During calls, press **Book** to enter the menu. You could inquire, edit, or delete phone numbers. For details, please refer to next chapter “Book”.

3.4.3 Set the Mute

During calls, press **Option** and select **Mute** or **Unmute** .

If you select **Mute** , the word “Mute” will appear on the screen, and the other side couldn't hear your voice.

If you select **Unmute** , you will exit from **Mute** , and the other side could hear your voice again.

3.4.4 Switch the Sound

During calls, you could receive the call either from the speaker or from the earpiece.

During calls, press **Option** and select **To Speaker** or **To Earpiece** .

4 Book

The book could be classified into: **Personal Book** , **Group's Book** .

1. Personal Book: manages the name and phone number of the contacts;
2. Group's Book: manages PTT group names and PTT group numbers.

4.1 Personal Book

The contacts in personal book could be saved either in phone or in R-UIM card.

There might be multiple phone numbers for each contact saved in phone, such as PTT private number, home number, office number, mobile phone number, other phone number. Among those phone numbers, "PTT private number" is PTT number of the contact.

There is only one phone number for each contact saved in R-UIM card.

For easy search, you could classify your contacts into several groups: **Family** , **Friends** , etc.

Note	The contacts can be saved only in phone if your phone doesn't support R-UIM card. Please skip the related contents.
-------------	--

Icons in Personal Book

Icons	Descriptions	Icons	Descriptions
	PTT Private Number		Home Number
	Office Number		Mobile Phone Number
	Other Phone Number		Remarks

4.1.1 Add

1. In idle mode, press **Book** to select **Personal Book** , and press **Option** to select **Add** ;
2. Select location **Phone** or **UIM** and press **Select** to edit; (If your phone doesn't support R-UIM card, please skip this step).

In phone

1. Press ▲/▼ key to scroll the highlight, and edit each highlighted item;

- Name: enter contact's name;

、、、、: enter the corresponding number.

 : enter the remarks.

- **Spd. Dial:** Press ◀/▶ key to select speed dial number (Home number, Office number, Mobile phone number or Other phone number).
- **Location:** Press ◀/▶ key to select storage location (Number for speed dialing). If you do not select, then the phone will automatically set the storage location.
- **Group:** Press ◀/▶ key to select the group (Family, VIP, Office, Friends, Schlmate, Other).

When inputting contents, press  key to switch between input methods, and press  key to input the symbols. Please refer to the previous section 1.8 "Text Input" for details on input methods.

2. Press **▲/▼** key to select the group you want to set ring tone for;
3. Press **Option** to select **Set Ringtone** ;
4. Press **▲/▼** key to select your desired group ringtone, and press **Select** to confirm.

Note	If the incoming call number is saved in [Personal Book], the incoming call ringtone will be the group ringtone here, rather than the ringtone you set in [Profiles].
-------------	---

4.1.7 Rename

1. In idle mode, press **Book** to select **Personal Book** , and then press **Option** to select **Srch by Group** ;
2. Press **▲/▼** key to select the group you want to edit;
3. Press **Option** to select **Rename** ;
4. Enter the new name and press **Ok** .

4.1.8 Move

Move the record from phone to R-UIM card

1. In idle mode, press **Book** to select **Personal Book** ;

-
2. Press ▲/▼ key to select your desired record;
 3. Press **Option** to select **Move**, and then select **To UIM**;
 4. Press **Yes** to confirm.

Note	When there are multiple numbers in the record, then each number will be saved as one single record in R-UIM card.
-------------	--

Move the record from R-UIM card to phone

1. In idle mode, press **Book** to select **Personal Book**;
2. Press ▲/▼ key to select your desired record;
3. Press **Option** to select **Move**, and then select **To Phone**;
4. Press ◀/▶ key to select the type of number, and then press **OK**.

Move All Entries to Phone

1. In idle mode, press **Book** to select **Personal Book**;
2. Press **Option** to select **Move**, and then select **All to Phone**;
3. Press ◀/▶ key to select the type of number, and then press **OK**.

Move All Entries to UIM

1. In idle mode, press **Book** to select **Personal Book**;
2. Press **Option** to select **Move**, and then select **All to UIM**;
3. Press ◀/▶ key to select the type of number, and then press **OK**.

Note

When there are multiple numbers in the record, then each number will be saved as one single record in R-UIM card.

4.1.9 Check Space

In idle mode, press **Book** to select **Personal Book** , and then press **Option** to select **Check Space** ;

4.1.10 Delete All

1. In idle mode, press **Book** to select **Personal Book** ;
2. Press **Option** to select **Delete All** , and select **Phone** or **UIM** ;
3. If you select **Phone** , press **Yes** to enter password, and press **OK** to delete all entries in phone;
4. If you select **UIM** , press **Yes** to enter password, and press **OK** to delete all entries in UIM card.

4.2 Group's Book

Besides normal call numbers, you could also save PTT group numbers into **Group's Book** for easy searching and calling. Group's book could be classified into **User Book** and **System Book** . User book could contain up to 50 entries, which could be viewed, edited, or deleted; System book could contain up to 20 entries, which are updated automatically by the system, and users are allowed to view the entries, but not to edit.

4.2.1 Enter Group's Book

In idle mode, press **Book** to select **Group's Book** and then select **User Book/System Book**.

4.2.2 Add

1. Enter **User Book**;
2. Press **Option** to select **Add** to edit, press **▲/▼** key to scroll the highlight between **Grp.Name** and **Grp. No.** :

- **Grp.Name:** enter the group name;
- **Grp. No.:** enter the group number;

You could refer to section 1.8 "Text Input" when entering the above contents.

3. Press **Save** to save the contents.

4.2.3 View

1. Enter **User Book** and press **▲/▼** key to select the PTT group you want to edit;
2. Press **Option** to select **View**;
3. Edit exactly the same as adding PTT group;
4. Press **Save** to save the contents.

4.2.4 Delete

1. Enter **User Book** and press **▲/▼** key to select the PTT group you want to delete;

2. Press **Option** to select **Delete** ;
3. Press **Yes** to confirm.

4.2.5 Delete All

1. Enter **User Book** ;
2. Press **Option** to select **Delete All** ;
3. Press **Yes** to confirm

4.2.6 View System Book

1. In idle mode, press **Book** to select **Group's Book** , and then select **System Book** ;

4.2.7 Check Space

1. Enter **User Book** or **System Book** ;
2. Press **Option** to select **Check Space** .

PTT Functions 5

Users could operate all PTT functions and perform corresponding settings in **PTT Functions** .

Enter **PTT Functions** : In idle mode, press **Menu** to enter, press ▲/▼/◀/▶ key to select  , and press **OK** to enter.

5.1 Speed Dial No.

PTT Speed Dial No. is the number, which you could dial directly by holding PTT key  in idle mode.

Setting Method

1. Select **PTT Functions** , press **OK** to enter, and then select **Speed Dial No.** to enter;
2. Press ▲/▼ key to scroll the highlight and edit the highlighted item;
 - **Status:** **PRESS / HOLD / OFF** ; press ◀/▶ to select;
 - **Type:** **Group / Private** ; press ◀/▶ to select;
 - **Dial number:** enter a number or press **Option** to select from **Book** ;
3. Press **OK** .

Note

If you select **[PRESS]** as the status of **[Speed Dial No.]** in **[PTT Functions]**, press PTT key  in idle mode to directly dial PTT Speed Dial number, instead of displaying PTT calls list.

5.2 Call Attribute

After Call Attribute is set, the PTT call made in the phone will be Ordinary PTT call or Pre-emptive Priority PTT call, and the corresponding icon will display in the status bar of the standby screen.

Setting Method

1. Press **PTT Functions** to select **Call Attribute**;
2. Press ◀/▶ key to select **Normal** or **Pre-empty**;
3. Press **Select** twice.

Note	Please refer to section 11.1.8 “Quickly Change Call Attribute in Idle Mode” for details on call attribute setting shortcut.
-------------	--

5.3 No-Disturbing

After “No-Disturbing” is activated, you will not receive any PTT call. You could perform the corresponding settings and query in the phone.

Setting Method

1. Press **PTT Functions** to select **Supplement Svc** , and then select **No-Disturbing**;
2. Enter the phone password and press ▲/▼ key to select **Setting** , **Cancel** or **Query**;
3. Press **Select** .

5.4 PTT Call Forwarding

After “PTT Call Fwd.” is activated, you could forward all incoming PTT calls to the number you set. You could perform the corresponding settings and query in the phone.

Note	The forwarding number you set must be a PTT call number.
-------------	---

1. Setting MethodPress **PTT Functions** to select **Supplement Svc** , and then select **PTT Call Fwd.** ;
2. Press **▲/▼** key to select **All Calls** , **Busy** , or **Off-Service** ;
3. Press **Select** to enter, and press **▲/▼** key to select **Setting** , **Cancel** or **Query** ; if you select **Setting** , then you need to enter a forward number;
4. Press **OK** after the number is entered.

5.5 Group Member Status Query

After “GrMembStatQry” is activated, you could query the status of group members during PTT group calls. (For detailed operation method, please refer to section 2.6.1 “Group Member Status Query”).

Setting Method

1. Press **PTT Functions** to select **Supplement Svc** , and then select **GrMembStatQry** ;
2. Select **On** to activate this function;

3. Select **Off** to deactivate this function;
4. Select **Query** to check if the function is activated or deactivated.

5.6 Missed PTT Call

After “Msd PTT Call” is activated, you could inquire about all missed PTT calls. A short message about all missed PTT calls will be sent to you.

Setting Method

1. Press **PTT Functions** to select **Supplement Svc**, and then select **Msd PTT Call**;
2. Press **Select** to enter, and press **▲/▼** key to select **Setting**, **Cancel** or **Query**;
3. Press **Select**.

5.7 Duty Number

After **On Duty** is selected and duty number is entered, you could receive the call if other users dial this number.

Setting Method

1. Press **PTT Functions** to select **Supplement Svc**, and then select **Duty Number**; press **▲/▼** key to select **On Duty**, **Off Duty** or **Duty Query**;
2. Select **On Duty**, enter the duty number and press **OK** to activate this function;

-
3. Select **Off Duty**, enter the duty number and press **OK** to deactivate this function;
 4. Select **Duty Query** to check if the function is activated or deactivated.

5.8 PTT Call Number Identity Restriction

After “PTT CNIR” is activated, other users could not see the number as you make a PTT call.

Setting Method

1. Press **PTT Functions** to select **Supplement Svc**, and then select **PTT CNIR**; press **▲/▼** key to select **On**, **Off** or **Query**;
2. Select **On** to activate this function;
3. Select **Off** to deactivate this function;
4. Select **Query** to check if the function is activated or deactivated.

5.9 Call Alert Busy

After “Call Alert Busy” is activated, there is a prompt on the interface if there is a second incoming call.

Setting Method

1. Press **PTT Functions** to select **Supplement Svc**, and then select **Call Alert Busy**; press **▲/▼** key to select **Setting**, **Cancel** or **Query**;
2. Select **Setting** to activate this function;

3. Select **Cancel** to deactivate this function;
4. Select **Query** to check if the function is activated or deactivated.

5.10 Dynamic Management

You could add / delete the group members, set priority of the group members, and set the talk time.

Note	Only group head has the authority to perform dynamic management for group members.
-------------	---

5.10.1 Add / Delete

Setting Method

1. Press **PTT Functions** to select **Dyna Mgmt** , and then select **Add** or **Delete** ;
2. Enter **Group No.** and **Member No.**, or press **Option** to select from **Book** ;
3. Press **Option** and select **OK** .

5.10.2 Set Priority

Setting Method

1. Press **PTT Functions** to select **Dyna Mgmt** , and then select **Set Priority** ;
2. Enter **Group No.** and **Member No.**, and press ◀/▶ key to select **Super** , **Senior** , **Common** , **Low** or **Lower** ;
3. Press **OK** .

5.10.3 Set Talk Time

Setting Method

1. Press **PTT Functions** to select **Dyna Mgmt**, and then select **Set Talk Time**;
2. Enter **Group No.** and **Member No.**, and press ◀/▶ key to select **Super**, **Senior**, **Common** or **Lower**; press ◀/▶ key to select your desired Talk Time;
3. Press **OK**.

5.11 Emergency

You could hold emergency key to make emergency call when setting emergency number.

Setting Method

Shortcuts

Set the function of quick entry in idle mode.

Setting Method

1. Enter **Setting** to select **Phone** , and then select **Shortcuts** ;
2. Select any key from Up/ Down/ Left / Right keys, and press **Select** to enter;
3. Select the corresponding function of the key;
4. Press **Select** .

Personal Info

Store your personal information.

Time Format

Select the displaying format of time.

DTMF Tone

Select **Normal** or **Extended** .

Elec. Save Mode

Select **On** , **After 2 sec.** , **After 5 sec.** or **Off** .

Note	<ol style="list-style-type: none">1. If elec. save mode is set “On”, the phone will automatically enter the mode during PTT calls or normal calls.2. After elec. save mode is set “On”, the screen is black and you could adjust the volume using Side key.3. You could hold  key to enter or exit Electricity Save Mode during calls no matter whether it has been set or not.
-------------	--

10.3 Call

The settings here are especially for normal calls, instead of PTT calls. The settings for PTT calls could be performed in **PTT Functions**.

Call Forwarding

This function enables you to forward incoming normal calls to another phone number. The phone provides **All Calls**, **Busy**, **No Answer**, **Cancel All**.

Note	Network support is required for this function.
-------------	---

Call Waiting

When this function is activated, you can switch to the second incoming call by pressing  when you are already in a call.

Note	Network support is required for this function.
-------------	---

Call Answer

Set the answer mode for incoming calls.

Dial Restrict

When this function is activated, you couldn't dial any number except for emergency number and free dial numbers.

Free Dial

You could set up to five free dial numbers. If **Dial Restrict** is activated, these numbers will not be restricted.

Set a free dial number:

1. Enter **Setting** to select **Call** , and then select **Free Dial** ;
2. Press **▲/▼** key to select, and enter the number;
3. Press **OK** to save.

Speed-Dial Restriction

This function enables you to turn on/off speed dial function.

10.4 Security

The phone password is needed to enter the security. Generally, the default password is: "0000".

Once you get a new phone, it's recommended to modify the password to guarantee the safety of information.

Lock Phone

Set the phone lock mode. After the phone is locked, you need to input password to unlock it.

Change Password

1. Enter old password;
2. Enter new password;
3. Enter new password again;
4. Press **OK**.

Note	If your phone needs R-UIM card, please read the following contents; otherwise please skip this section.
-------------	--

Require PIN

When it is set "On", the phone requires PIN code of R-UIM card as powering on. Enter correct PIN code to unlock the phone.

Lock UIM to Phone

When this function is activated, only the R-UIM card in the phone could be used. If you change R-UIM card, you need to input lock code to unlock.

Note	Lock code is set by yourself as the function is activated.
-------------	---

Chang PIN

1. Enter old PIN code;
2. Enter new PIN code;
3. Enter new PIN code again;
4. Press **OK**.

Note	The R-UIM card will be locked if you enter wrong PIN code three times. Then you need PUK code to unlock the R-UIM card. The PIN code and PUK code may be provided together with the R-UIM card. If not, contact your network service provider. The default PIN code is normally 1234. Please replace it with your own PIN code as soon as possible.
-------------	--

10.5 Default Reset

After you select **Default Reset**, all settings will return to the factory default settings.

11.1 Shortcut

11.1.1 Speed Dial

Speed Dial Normal Calls

Speed dial refers to quickly dial out the numbers in **Personal Book** in idle mode. To quickly dial out numbers, you need firstly enter **Settings** to select **Call** , then select **Speed-Dial Res** to enter, and finally select **Off** .

Operation Method

If you want to dial the number ranking 132, firstly input “13”, and then hold the alphanumeric key “2” until the number is dialed.

Speed Dial PTT Calls

In idle mode, hold PTT key to dial PTT Speed Dial Number. You could set PTT Speed Dial No. in **PTT Functions** .

11.1.2 Quick Entry Function

In idle mode, press ▲/▼/◀/▶ key to enter **Setting** , select **Phone** , and then select **Shortcuts** .

11.1.3 Quick Return to Idle Mode

Press  key (rather than hold) to return to the idle mode quickly.

11.1.4 Delete the Current Input

During the input status, press **Clear** to delete the current inputs one by one, and hold **Clear** to delete all the current inputs.

11.1.5 Quick Set Profiles

In a conference room or on other public occasions, you could conveniently set the phone in **Silence** mode or other modes.

In idle, hold  key to scroll the highlight among **General**, **Silence**, **Meeting**, and **Outdoors**, and release  key until the highlight is at your desired mode.

11.1.6 Quick Entry into Menu

In the main menu, there is a serial number in front of each option. Press the serial number's corresponding alphanumeric key to quickly enter the menu.

11.1.7 Quick Entry or Exit Electricity Save Mode during Calls

During calls, hold  key to enter or exit electricity save mode.

11.1.8 Quick Change Call Attribute in Idle Mode

In idle mode, hold Side key (upper or lower) to switch between **Normal** and **Pre-emptive**, and release until the desired call attribute is selected.

11.1.9 Quick Search by First Letter of the Names in Book

Press the corresponding alphanumeric key of first letter to search the relevant names in book.

11.2 Lock the Keypad

When you don't use your phone temporarily, you could lock your phone keypad

to avoid misoperations. In this case, you are only allowed to dial emergency numbers.

Lock the keypad

In idle mode, hold  Key.

Unlock the keypad

When the keypad is locked, firstly press **Unlock** and then  key to unlock the keypad.

11.3 Earphone

Please follow the steps below to use the earphone:

11.3.1 PTT Operations with Earphone

During PTT calls, you could use the earphone to take or release the floor. Hold PTT key on your earphone, start talking after hearing a beep sound, and release PTT key to let others speak after finishing talk.

11.3.2 Receive or End Normal Calls with Earphone

With PTT key on your earphone, you could receive or end a normal call. When there is an incoming call, you could receive it by holding PTT key on your earphone for about 0.5 second. When you are already in a call, you could use PTT key on the earphone to end the call.

11.4 Troubleshooting

Symptoms	Possible Causes	Solutions
Power-on Failure	Inadequate battery capacity	Charge the battery
	Poor battery contact	Re-install the battery
Auto Power-off	Seriously poor battery capacity	Recharge the battery
Inadequate Standby Time	Decreasing of battery performance	Replace the battery
	Poor network signal	Power off as network signal is poor
Network Connection Failure	Poor network signal	Move to other places
	Out of the service area	Confirm whether it is in the CDMA network service area
PTT Call Failure	Service unavailable	Contact the operators
	Network disconnected	Refer to "Network Connection Failure"
Call drop during a call	Poor network signal	Move to other places
No ring for a incoming call	The phone is set to Silence, or the ring volume is set to 0	Enter Profiles and change the mode; or check the ring volume
Prompt to input PUK	R-UIM card is locked due to successive inputting false PIN code for three times	Contact the operators

If the problems cannot be solved after the above handling, you may contact our customer service personnel, or feed back your information directly by sending emails to zte_mobile@zte.com.cn. We will reply to you as soon as possible.

FCC Statement

Changes or modifications to this unit not expressly approved by the party responsible for compliance will void the user's authority to operate the equipment. Any change to the equipment will void FCC grant.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Health and Safety Information – RF Exposure Information (SAR)

THIS MOBILE PHONE MEETS THE GOVERNMENT'S REQUIREMENTS FOR EXPOSURE TO RADIO WAVES.

This phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. Tests for SAR are conducted using standard

operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

Before a mobile phone is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. The highest SAR value for the mobile phone when tested for use at the ear is 1.39W/kg and when worn on the body is 0.343W/kg.

While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement.

The FCC has granted an Equipment Authorization for this mobile phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on the mobile phone is on file with the FCC and can be found under the Display Grant section of <http://www.gov/oet/fccid> after searching on FCC ID stock on the label on the phone.

Note: In the United States and Canada, the SAR limit recommended by international guidelines for mobile phones used by the public is 1.6 watts/kilogram (W/kg) averaged over one gram of tissue. The limit incorporates a substantial margin for safety to give additional protection for the public and to account for any variations in measurements.
