GOODSPEEDING FOR THE FIRST TIME

1. CREATE YOUR ACCOUNT

Open the browser of your internet device and go to goodspeed.io using your available internet connection.

Sign up to your Goodspeed service with your name and e-mail address.

2. ACTIVATE YOUR GOODSPEED DEVICE

Sign in to your account and click to the activate device tab.

Follow the instructions on the page to complete the activation process.

You'll see a confirmation "ACTIVATED" on the device display once the activation code has been accepted. Your Goodspeed Wi-Fi is now ready for daily use.

MANAGE YOUR SERVICE

Your account
Access your Goodspeed account at goodspeed.io with the details you entered when creating your account.

In your Goodspeed account you can:
• Purchase additional destinations
• View monthly statements
• View and change your personal details
• Change your service plan

SIM cards
Goodspeed uses SIM cards to connect to the internet. You can order destinations from your Goodspeed account. Each destination SIM card is tied to your device and won't work in any other device.

To add SIMs:
• Power down your Goodspeed
• Slide the front cover to remove it.
• Gently push the SIM card to an available slot, or pull the card to remove it.
• When done, slide the front cover back on.
• Restart the Goodspeed device.

You can also add personal SIM cards to be used with Goodspeed. To add your personal SIM, sign in to your account and follow the instructions on the Devices tab.

Do not remove Control SIM card in slot 1.

SLIDE TO OPEN

GOODSPEED IN DAILY USE

Press and hold the power button for 3 sec to power up your Goodspeed device.

Wait until "CONNECTED" appears on your Goodspeed device's display. This takes typically about a minute. In a new country it may take a bit longer.

Connect your internet device to the Goodspeed Wi-Fi network using the network name and password visible on your Goodspeed device display.

⚠ To save battery, your Goodspeed device will enter **Wi-Fi sleep mode after 10 minutes** of inactivity. Push any button to restore the connection.

Toggle the menu button until the display shows the password and network name.

USEFUL HINTS

Advanced settings
You can access your advanced settings while connected to the Goodspeed Wi-Fi network. Just open your browser and enter http://192.168.0.1 in your browser navigation bar.

In the settings you can for example:
• Change your network name (SSID) and password
• Change your security settings
• Adjust Wi-Fi range
• Adjust Wi-Fi sleep mode settings

Software update
Your Goodspeed device will update its software automatically. Do not power down your device while the automatic update sign is visible on the display. The device will reboot automatically to install the update.

Support
Should you need any additional support with Goodspeed, please refer to the help & support section at goodspeed.io or contact support@uros.com.

Limited Warranty
Warranty is limited and is not valid:
• for cosmetic defects
• if user has not followed instruction of device use or has used the device for other than intended normal purpose
• if other than Uros authorized repair has disassembled the device
• for damage caused by liquid
• for damage caused by any other conditions and accidents Uros has no control over
• if damage caused when using 3rd party accessories
• If you have a need to return your device to be serviced, please first contact support@uros.com to receive guidance on how to proceed.

For optimum signal reception, coverage range and data throughput, place the Goodspeed device (MF900) on a flat surface and ensure that it is not in close proximity to any objects.

The CE and FCC markings can be viewed by opening the front cover. See instructions for removing the front cover on the left.

QUICK GUIDE

⊙ POWER BUTTON   MENU BUTTON

1. Press and hold the power button for 3 sec to power up your Goodspeed.

2. First time connecting? Activate the device in your account at goodspeed.io. If you've already done it, jump to the next step.

3. Wait until "CONNECTED" appears on the display.

4. Connect your device to your Goodspeed device using the Wi-Fi name and password. Toggle the menu button to change the display.

GOODSPEED

Stay connected where ever you go, so
GOODSPEED
my friend.

USERGUIDE

Federal Communications Commission (FCC) Notice

FCC ID: SRQ-MF900

The device complies with the RF specifications when the device is used at a distance of 1 cm from your body. Ensure that the device accessories such as a device case and a device holster are not composed of metal components. Keep your device 1 cm away from your body to meet the requirement earlier mentioned.

This device meets guidelines for exposure to radio waves. Your device is a low-power radio transmitter and receiver. As recommended by international guidelines, the device is designed not to exceed the limits for exposure to radio waves.
These guidelines were developed by the independent scientific organization International Commission on Non-Ionizing Radiation Protection (ICNIRP) and include safety measures designed to ensure safety for all users, regardless of age and health.
The Specific Absorption Rate (SAR) is the unit of measurement for the amount of radio frequency energy absorbed by the body when using a device. The SAR value is determined at the highest certified power level in laboratory conditions, but the actual SAR level of the device when being operated can be well below the value. This is because the device is designed to use the minimum power required to reach the network. The SAR limit adopted by USA and Canada is 1.6 watts/kilogram (W/kg) averaged over one gram of tissue. The highest SAR value reported to the FCC and IC for this device type when properly worn on the body is 1.228 W/kg.

MF900 Safety and Regulatory Leaflet

The CE and FCC markings can be viewed by opening the front cover of the device. See the user guide for the instructions on how to do this.

Electronic devices, including computers and wireless modems, generate RF energy incidental to their intended function and are therefore subject to FCC rules and regulations.

This equipment has been tested to, and found to be within the acceptable limits for a Class B digital device, pursuant to part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a normal environment.

This device complies with Part 15 of the Federal Communications Commission (FCC) Rules.

Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation. No changes shall be made to the equipment without the manufacturer's permission as this may void the user's authority to operate the equipment.

Please follow the instructions included in the user guide for product use.

MF900 North America edition is limited using channel 1-11. This limited operation can be only set by software and was done before the product down from the product line. All the products for North America marketing were embedded this limited before shipping. Customers have no way to choose the channel 12 & 13.
