Contents

Before you get started

Thank you for choosing ZTE Corporation's digital mobile phone, which we'll simply call 'phone' from now on.

Based on Android™ platform, the phone adopts four-kernel processor with novel appearance and cool user interface, which bring you brandnew experiences.

To guarantee your phone is always in its best condition, please read this manual carefully before you get started.

And don't worry if the pictures we use to demonstrate your phone's functions look a little different from what you see on its screen. It's the functions they show that matter.

If there is any inconsistence caused by function update between user manual and your phone, please subject to your phone.

Screen Control

You can control your phone through a series of operations on the screen.

- Tap: tap once on an item on the screen to select it or open whatever you tap.

- Slide to scroll: slide your fingers on the screen to move through what's on the screen.

- Press & hold: press your finger down and leave it there for a few seconds to open a menu specific to what you're doing.

- Drag: drag an item on the screen to perform certain operations.

- Pinch or stretch: In some applications (e.g., Gallery, Browser), touch the screen with two or more fingers, and then pinch your fingers together on the screen or stretch them apart to zoom out or in.

- Rotate: In most screens, rotate your phone sideways to switch the screen from portrait mode to landscape mode.

Home screen

The home screen appears as the phone is in idle mode. On the home screen, you can check the status of the phone and access applications.

Extend home screen

The home screen can be extended to exceed the width of the screen to provide more space for newly added applications, shortcuts, widgets, etc.

Slide to scroll the home screen to move to the left or right side of the home screen.

Tap the small dot at the lower part of the screen to directly move to the corresponding screen. Press & hold the small dot area and drag to quickly start navigation.

Self-defined function bar

There are four icons at the bottom of the screen. You can replace these icons with the applications or shortcuts that you need access most frequently.

1. Press & hold an icon at the function bar and drag it to the area outside the function bar.

2. Press & hold another icon you want to replace with, and then drag it to an empty area in the function bar.

Add or move screen on home screen

Pinch your fingers together on the home screen to display as thumbnails, and tap a thumbnail to enter the corresponding screen.

Tap ⊕ to add a new screen and tap ⌂ to set the current screen as Main home screen. If you want to delete a screen, press & hold a thumbnail and drag it to the Remove icon at the top of the screen.

Show/hide notification panel

As a new notification icon appears in the notification panel, you can tap the panel and pull down to show it, and tap a notification to perform detailed operation.

Tap the time in the notification panel to go directly into "Data & time settings".

Drag the lower frame up to hide the notification panel.

Add items to home screen

Press & hold an empty area on the home

screen to open the menu "Add to Home screen".

Select Widgets, New folder etc.

Move icons on home screen

Press & hold the icon you want to move, drag it to your desired position on the screen and release it.

Press & hold the icon you want to move, and drag the icon to your desired screen.

Press & hold an icon with one finger and scroll the screen with another finger to adjust the position of the icon.

Delete icons on home screen

To remove an application or widget, press and hold an icon, your phone will go into edit mode, icons start to shake. In the upper left corner of

the application and widgets appear .

In edit mode, tap the icon you want to remove.

To exit this mode, press the Home key or Back

key.

Change wallpaper

Press & hold an empty area on the home screen to open the menu "Add to Home screen", tap "Wallpaper" and choose a wallpaper.

Change theme

Press & hold an empty area on the home screen to open the menu "Add to Home screen", tap "Themes" and choose a theme.

Access recently used applications

Press & hold the "Home key" to open the list of applications you've recently accessed.

Tap the thumbnail to enter the relevant application, press & hold the thumbnail to Remove from list or View app info; slide the thumbnail up to remove the application from the list, slide the thumbnail down to lock the interface and slide down again to unlock.

Tap the Round icon at the lower part of the screen to clear the list of applications you've recently accessed.

Use shortcuts panel

On the home screen or when using an application, tap the notification panel and pull down to show the shortcuts panel.

Slide left or right to scroll the shortcuts panel to display all shortcuts.

On the shortcuts panel, you can tap the icon to make corresponding settings, press and hold the icon to enter the corresponding settings interface.

Create a folder and add items into the folder

1. On the home screen, press & hold an icon and drag it to another icon on the screen to create a folder containing these two icons.

2. Press & hold other icons and drag them to the folder.

Lock and unlock the screen

Lock the screen

Press the "Power" key to lock the screen. The

phone shall automatically lock the screen after it's not used for a while.

Unlock the screen

1. Press the "Power" key to turn on the LCD.

2. Press & hold the icon at the lower part of the screen to unlock the screen. As the phone screen is locked, slide to the left side to directly open Camera and slide to the right side to directly open Music player.

Change screen lock method

1. On the home screen, press the "Menu" key > "System settings" > "Security" > "Screen lock".

2. Choose the screen lock method.

Calls

Make a call

Change the display method of date & time.

Accessibility

Accessibility is specially customized for people with disabilities. Changing settings can make the phone more accessible to people with disabilities.

About phone

You can check the phone's status, battery usage and legal information.

Multimedia

Camera

You can take photos with your phone. You can set the photo taken with your phone as wallpaper, or send to others via MMS, Email.

Tips:

Please respect others' rights and abide by local regulations and customs when taking photos.

Turn on camera

On the home screen, tap "Camera" to turn on the camera. There are three modes for the camera: Auto mode, Pro mode and Fun mode.

Auto mode: contains the basic camera functions. Simply tap the shutter button to capture what you want.

Pro mode: contains photometry, focus,

gradienter & graphic lines, which make your phone as good as a professional digital camera.

Fun mode: there are multiple camera special effects for you to select, which make your photography full of fun.

On the camera interface, tap Auto / Pro / Fun to switch between the three modes.

Auto mode

1. In Auto mode, aim your lens at an object and adjust accordingly.

- Flashlight / Flashlight / Flashlight : toggle among Flashlight ON/Flashlight OFF/Auto Flashlight.

- HDR: switch between HDR ON and HDR OFF

- Face focus : switch between Face focus ON and OFF

- Camera: switch between Front camera and Back camera.

- Press the side key or pinch/stretch your fingers on the screen to adjust the focus.

- Tap the position you want to focus on, and the focus frame shall move to this position.

2. Tap to take a photo and press & hold Snapshot to snapshot. The photos will be automatically saved.

3. Slide left to scroll the screen to view the photos, select a photo and tap "Edit" to edit it. Pinch your fingers together on the screen to view the list of photos, and slide your fingers up or down on one single photo to delete it.

Pro mode

1. In Pro mode, aim your lens at an object and adjust accordingly.

- 🔆 / 🔆 / 🔆 : toggle among Flashlight ON/Flashlight OFF/Auto Flashlight.

- 🔲 : switch between Gradienter ON and Gradienter OFF

- 🔲 : toggle among as Nine grid, Golden ratio or OFF.

- 🔲 : toggle among 15S delay ON / Delay OFF

- 🔲 : set AE lock and AE unlock.

- 🔲 : switch between Front camera and Back camera.

- Focus/ photometry separation: you can drag he focus frame and photometry frame respectively.

2. Tap 🔲 to take a photo. The photos will be automatically saved.

3. Slide left to scroll the screen to view the

photos, select a photo and tap "Edit" to edit it. Pinch your fingers together on the screen to view the list of photos, slide your fingers up or down on one single photo to delete it.

Fun mode

1. In Pro mode, aim your lens at an object and adjust accordingly.

- / / : toggle among Flashlight ON/Flashlight OFF/Auto Flashlight.

- : switch between Front camera and Back camera.

2. Tap to take a photo. The photos will be automatically saved.

3. Slide left to scroll the screen to view the photos, select a photo and tap "Edit" to edit it. Pinch your fingers together on the screen to view the list of photos, slide your fingers up or down on one single photo to delete it.

Special Effect

1. In Fun mode, there are multiple camera special effects for you to select on the screen. Tap one Special Effect button to preview the corresponding effect on the screen.

2. Tap to take photos.

Panorama

1. In Pro mode, tap 〉 and "Panorama".

2. Tap 📷, slowly move your phone horizontally or vertically, and then tap 📷 to end the photographing.

Time-lapse photography

1. Select the interval (1-60s);

2. Tap 📷 to take photos continuously.

Multiple exposure modes

1. There are four kinds of multiple exposure modes on the screen. Tap the icon in the upper middle part of the screen to select the exposure mode you want.

2. Tap 📷. Your phone shall take multiple photos and combine multiples photos into one.

Camcorder

You can record video clips with your phone.

Tips**:**

Please respect others' rights and abide by local regulations and customs when recording video

clips.

Turn on camcorder

On the home screen, tap "Camera" to enter the camera interface and tap 🎥 button.

Camcorder

1. Aim your lens at an object and adjust accordingly.

- ⚡/ ⚡: toggle among Flashlight ON/Flashlight OFF.

- 📷: switch between Front camera/Back camera.

2. Tap 🎥 to start recording and tap 🎥 to end recording. Tap 📷 to take a photo during the process of video recording.

3. After recording, slide left to scroll the screen to view the video clips. Pinch your fingers together on the screen to view the list of videos, and slide your fingers up or down on one single video to delete it.

Music

You can listen to the music saved in your phone through the music player.

Play music

Before playing music, please firstly copy music files into your phone.

On the home screen, tap "Music" to open the music player.

1. Tap Add To Favorite / All Songs / Artist /Album /Folder at the left side of the screen to find the music file you want to play. Slide your fingers on the screen to the right to return to the music interface.

2. Tap the music file to start playing.

3. During the process of playing music, you can perform the following operations with your fingers:

- Slide up/down: increase/reduce volume.

- Slide left/right: switch to previous/next song.

- Touch once: switch between Play and Pause.

- Zoom out: enter /exit the current playlist.

- If there're lyrics, double tap the lyrics area to display in full screen.

Create playlist

You can create some playlists to manage your

music files.

1. On the music interface, tap "New Playlist"

2. Input a Playlist name and tap "Done".

3. Tap ⊕ at the top of the screen, select one music file and then tap "Add".

Video player

You can watch the videos saved in your phone through the video player.

1. On the home screen, tap "Video" to open the list of videos.

2. Select one video and tap "Play".

During the process of playing videos, you can tap the screen to stop playing the video and tap the screen again to continue to play it.

- Tap 🖼 to enable Picture-in-Picture function. A small suspending image appears after you tap the button.

- Tap 📷 to capture the current screenshot.

- Tap 🔒/🔓 to switch between Lock screen rotation and Auto screen rotation.

- Tap ✕ to toggle among the display ratio 1:1,

Wide screen or Full screen

You can perform the following operations with your fingers:

- Slide your fingers on the screen to the left/right to fast forward/rewind. The time progress appears at the top of the screen.

- Zoom in/out the screen to adjust the display ratio of the screen.

- Slide up/down on the screen to adjust the volume.

- If you want to share the video with your friends, press the "Menu" key > "Share".

- If you want to close the video player after certain period of time, press the "Menu" key > "Timer", and then select time.

- If you want to perform video encryption, select a video file, tap "Menu" key > "Private", input your privacy space password and then tap "OK". If you want to view the encrypted videos, select "Security center" > "Privacy space" in idle screen to view them.

- If you want to enable Dolby Digital Plus, press the "Menu" > "Dolby Digital Plus" for profile selection.

Gallery

On the home screen, tap "Gallery" to view all photos and videos in your phone. You can use video player to play the videos.

View photos

1. Tap the album you want to open, and tap the photo you want to browse.

- Double-tap the photo to enlarge the photo and double-tap it again to restore.

- Pinch or stretch your fingers on the screen to zoom out or zoom in the photo.

2. If you want to edit your selected photo, select the photo and tap "Edit".

3. If you want to perform photo encryption, select a photo file, tap "Menu" key > "Private", input your privacy space password and then tap "OK". If you want to view the encrypted photos, select "Security center" > "Privacy space" in idle screen to view them.

Jigsaw

You can combine several photos into one photo.

1. Enter "Gallery" to select one album.

2. Press the "Menu" key > "Jigsaw".

3. Tap the photos you want to jigsaw, and tap "Begin Jigsaw".

4. You can select "Template jigsaw", "Free jigsaw" or "Photo Montage". Tap "Save" after that.

Make Gif

1. Enter "Gallery" to select one album.

2. Press the "Menu" key > "Make Gif".

3. Select the photos you want to make Gif, and tap "Make Gif".

TimeManager

On the home screen, tap "TimeManager" to set Alarm, check World Time, use Stopwatch and Countdown function.

Alarm

Add alarm

1. Select the "Alarm" page and tap "Add alarm".

2. Perform detailed settings of a new alarm based on your requirements. Tap "OK" to complete the alarm settings.

Turn on/off alarm

On the "Alarm" page, drag the scrollbar to the right/left side to turn on/off the alarm.

Delete alarm

On the "Alarm" page, press & hold the alarm you want to delete, and tap "Delete" on the pop-up window.

World Time

Add city

1. Select the "World Time" page.

2. Tap "Add City" and select cities based on your requirements. On the "World Time" page, display the time for different cities.

Delete City

On the "World Time" page, press & hold the city you want to delete, and tap "Delete" on the pop-up window.

DST On

On the "World Time" page, press & hold the city you want to turn on/off DST, and tap "DST On" or "DST Off" on the pop-up window.

Stopwatch

1. Select the "Stopwatch" page.

2. Tap "Start" to start the stopwatch, tap "Record" to record the current time, and tap "Stop" to stop counting the time.

3. Tap "Reset" to reset the stopwatch.

Countdown

1. Select the "Countdown" page.

2. Scroll to set the period of time for your countdown.

3. Tap "Start" to start the countdown.

4. As the countdown time is up, Tap "Back" to stop alert.

Tools

Flashlight

On the home screen, tap "Tools" > "Flashlight" to use your phone as a flashlight.

Turn on flashlight

On the Flashlight interface, tap the switch button to turn on the flashlight.

Turn off flashlight

On the Flashlight interface, tap the switch button to turn off the flashlight; or slide down to open the status bar and tap the "Close" button next to Flashlight.

Enter SOS mode

No matter whether you turn on the flashlight or not, tap the "SOS" button to enter SOS mode; at this moment the flashlight shall flash to send out a distress signal.

Sound Recorder

On the home screen, tap "Tools" > "Sound Recorder" to turn on the sound recorder.

Record audio files

1. Move the microphone on your phone close to your mouth, and tap ● to start recording.

2. Tap ● to pause, tap ● to continue and tap ● to stop recording.

3. Your phone shall automatically save your recordings. Tap the name of your recording to play it.

Set as ringtone

Press & hold a recording file to display a pop-up menu and tap "Set as ringtone".

Cut

Press & hold a recording file to display a pop-up menu, tap "Cut" and then drag the scrollbars at two ends. The contents between two scrollbars are reserved.

Calculator

On the home screen, tap "Tools" > "Calculator" to perform simple calculations.

Slide your fingers on the screen to the left/right to switch between Simple calculator and Advanced calculator.

Small Objects Finder

Your phone can work with a small objects finder to help you find small objects easily forgotten, such as keys.

Please read "Bluetooth Small Objects Finder User Manual" for details.

Smart Tag

Your phone can scan smart tags and assign multiple tasks to each single tag.

Add tag

1. On the home screen, tap "Accessories" >

"Smart Tag".

2. If NFC is disabled, tap "Settings" to enable NFC.

3. Tap "Add tag", and make the tag approach the back of your phone.

4. Detect tag

- If a new tag is detected, add a new tag according to the prompt.

- If an existing tag is detected, it prompts that the tag has been added.

Edit tag

On the "Smart Tag" interface, press & hold one tag to delete it or rename it.

Tap the tag you want to edit to display the list of all tasks under the tag.

- Tap ⊕ at the right-up corner of the screen to add a new task, and tap 🗑 to clear all tasks under the tag.

- Tap one task in the list to delete it.

Execute tasks

Make the tag approach the back side of your phone, and your phone shall execute tasks according to the setting order after detecting the tag.

FM Radio

You must insert the earphone (used as radio antenna) into your phone to listen to the radio.

1. Insert the earphone into your phone.

2. On the home screen, tap "Tools" > "FM Radio". Your phone will automatically search and save available channels.

3. Select your desired channel from the list of channels and tap "Back" to return to the radio interface.

4. You can control the radio through the buttons on the screen or the side key on your phone.

- Slide to scroll the channel to adjust the frequency.

- Tap 🌐 to open the channel list and tap

  🌐 to add current channel to favorites.

- Tap ▶ to turn on the radio and tap ❚❚ to turn off the radio.

- Tap ◀◀ to listen to the previous channel and tap ▶▶ to listen to the next one.

- Press the side key to adjust the volume.

- Press the Menu key > "Turn on speaker".

NotePad

1. On the home screen, tap "NotePad".

2. Tap ⊕ at the top of the screen.

3. Input the text and tap "Done".

Calendar

On the home screen, tap "Calendar".

View calendar

Tap the date at the top of the screen to select view calendar by Day, Week or Month, and tap "Agenda" to view all events. You can slide your fingers on the screen to change time.

Tips:

When viewing calendar by Day or Week, press & hold one existed event and drag it to other

time to quickly change the date of event.

Create new event

1. On the calendar interface, tap + at the top of the screen.

2. Input detailed information of the event and tap "Done".

Edit a event

On the calendar interface, tap the date at the top of the screen and tap "Agenda". Tap the

event you want to edit, and then tap 🖊 at the top of the screen to edit the event.

Display and SYNC calendar

1. On the calendar interface, press the "Menu" key > "Calendars to display".

2. Select "My Calendar", "Chinese Lunar Calendar", "Chinese Holidays" or "People Birthday".

3. Tap "Calendars to sync" to synchronize the calendars under other accounts.

Other

My File

Your phone and its connected devices (e.g., laptop PC) shall be composed of a cloud network. You can manage the files (including pictures, music, videos, documents, zips, APKs and folders) on the cloud network through My File.

Backup

On the home screen, tap "Backup" to perform the following operations:

- Create new backup: tap "New backup" button to select the backup items, tap "Perform Backup" to select a target device and start backup.

- Restore backup: restore previous backup information.

- Operation history: View the history of backup operations.

- Space Info: view the space of Local devices.

Schedule backup

1. Tap ⏰ at the right-up corner of the screen and tap "New Task".

2. Set "Backup Content", "Date & Time", "Cycle Time" and "Reminder" based on your requirements and tap "Save".

3. The backup record will be displayed on the "Schedule Backup" interface. Select the record to edit or delete it.

Share

After your phone connects to the devices that support DLNA (Digital Living Network Alliance) function through Wi-Fi, they shall be composed of a local network, where multimedia files (including music, videos, pictures, etc.) can be shared.

On the home screen, tap "Share" to display the local multimedia files.

Settings

Press the "Menu" key to select "Settings" to view the Device name and set the Device visible to other devices in the local network.

Share files

Share local files

On the browsing interface of local multimedia files, select the multimedia file you want to share and tap on the pop-up window to perform the following operations:

- Play: play the file on the object device.

- Send: send the file to the object device. You can send out the file by dragging the file to the object device in the left.

- Add to my share: add the file into My Share so that other devices in the local network can access the file.

If you want to share the file, you can also drag it to the object device directly.

Share files on other devices in the local network

Slide your fingers on the screen to the right to display all devices in the local network. Tap at the top of the screen to search nearby DLNA devices.

Tap the device icon to access its shared files.

- If you've selected a storage device (e.g. computer), you can share the multimedia files in the storage device with other devices in the local network.

- If you've selected a display device (e.g. TV), you can share the multimedia files in the local

device with the display device.

Screen Projection

This function can be implemented with the help of a third-party device (Wi-Fi sharing).

Connect your phone with a displaying device (HD TV or screen projector) through the Wi-Fi sharing device to realize screen projection.

1. Make sure you have started the Wi-Fi sharing device and inserted it into a TV set via HDMI. Manually adjust the TV signal source to this port.

2. On the home screen, tap "Screen Projection" and turn on Wi-Fi according to the prompt.

3. Return to the screen projection interface. Your phone shall automatically search nearby devices.

4. Select your Wi-Fi sharing device on the device searched in the system to connect.

- If the Wi-Fi sharing device has connected with other devices via Wi-Fi，please disconnect the Wi-Fi connection according to the prompt.

- Input the PIN according to the prompt on your phone, and this PIN shall be displayed on your display devices. (required when connecting for

the first time)

5. Start screen projection after your phone is successfully connected with Wi-Fi sharing device.

Send data through Android Beam

With the function of Android Beam, you can send data (web pages, contacts) to the devices enabling NFC.

1. On the home screen, press the "Menu key" > "System settings" > "More".

2. Tap the tick-box next to "NFC".

3. Open a web page from appropriate apps or select an item.

4. Unlock other devices connected to the back side of the device.

5. Tap the device's screen.

6. The data in the device will be sent and displayed on the screen of other devices.

OTG function

The phone supports OTG function. After connecting your phone with the external devices (U disk, mouse, keyboard, etc.) through the OTG cable, you can transmit data between your phone and external devices, and you can also view & manage the data in the external devices through the application "My File".

If you want to use the function, please go to nubia official website to purchase the OTG cable.

safety information

Using your phone safely

On the road

Using a phone while driving is illegal in many countries. Please follow local laws and drive safely at all times.

Near sensitive electronics

Don't use your phone near sensitive electronic equipment – particularly medical devices such

as pacemakers – as it could cause them to malfunction. It can also interfere with the operation of fire detectors and other automatic-control equipment.

For more information about how your phone affects pacemakers or other electronic equipment, please contact the manufacturer or your local distributor.

Your phone may cause interference when used near TVs, radios or automated office equipment.

✈ While flying

Your phone can cause interference with aircraft equipment. So it's essential you follow airline regulations. And if airline personnel ask you to switch off your phone, or disable its wireless functions, please do as they say.

⊕ In hospital

Your phone may interfere with the normal operation of medical equipment. Follow all hospital regulations and turn it off when you're asked to by posted warnings or medical staff.

💾 At a petrol station

Don't use your phone at petrol stations. In fact, it's always best to switch off whenever you're near fuels, chemicals or explosives.

Around water

Keep your phone away from water (or any other liquid). It's not a waterproof model.

Making repairs

Never take your phone apart. Please leave that to the professionals. Unauthorized repairs could break the terms of your warranty.

Broken antenna

Don't use your phone if the antenna is damaged, as it could cause injury.

Around children

Keep your phone out of children's reach. It should never be used as a toy and it might not be good for their health.

Original accessories

Only use the original accessories supplied with your phone or those approved by the manufacturer. Using unapproved accessories may affect performance, make the warranty void, break national regulations on the use of phones, or even cause injury.

Near explosives

Turn off your phone in or near areas where

explosive materials are used. Always obey local laws and turn off your phone when requested.

Emergency calls

To make an emergency call your phone must be turned on and in an area where there's network coverage. Dial the national emergency number and touch the Send icon. Explain exactly where you are and don't hang up until help has arrived.

Working

temperature

The working temperature for the phone is between 0℃ and 40℃. Please don't use the phone outside the range. Using the phone under too high or too low temperature might cause problems.

At very high volume, prolonged listening to a phone can damage your hearing.

Battery care and safety

Although the battery is rechargeable, it'll eventually start to lose its ability to recharge. If you find that the battery won't recharge, it's time to replace it.

Please don't throw old batteries into your

household rubbish. You'll find there are special bins for batteries at refuse collection points. And some high street electrical stores provide a battery recycling service too.

Never throw the battery into a fire – it's highly inflammable and could explode, hurting you or somebody else.

Never take the battery apart. This may result in leakage, overheating, explosion or fire.

If the battery becomes hot, changes colour or shape at any time (when in use, charging or even while in storage) please stop using it immediately and replace.

Keep the battery dry. Damp or wet conditions can cause it to overheat or corrode.

Don't charge the battery continuously for 24 hours. Overcharging is not good for it.

Note:

Please avoid contact with the materials inside a damaged or leaking battery. If they get on your skin, wash with lots of water and seek medical assistance if required.

Charger care and safety

Only plug into voltages between 110VAC and 240VAC. Using a voltage outside that range can damage the phone/charger – and cause the battery to leak or catch fire.

Never short-circuit the charger – this may

cause electrocution, overheating or damage.

Don't charge the phone in direct sunlight or in an area where it's damp, dusty, or on a vibrating surface. And charging your phone near – or on – a TV or radio could interfere with transmission.

Don't use the charger if the power cable is damaged. It may cause a fire or give someone an electric shock.

Keep water well away from the charger. If the charger does get splashed by water, or any other kind of liquid, immediately unplug it to avoid overheating, fire or electrocution.

Don't take the charger apart. It could cause injury, give you an electric shock or catch fire.

Never touch any charger, electric cable or socket with wet hands.

Don't place heavy objects on the electric cable.

If the cable is damaged, don't try to mend it yourself – it could cause a fire or electrocute you.

Always unplug the charger before you clean it.

When unplugging the charger, hold the plug itself, rather than pulling on the cable. A damaged cable can cause electrocution or fire.

Health and safety

SAR certification information

The model meets international guidelines for exposure to radio waves.

Your phone is a radio transmitter and receiver. It's designed not to exceed the limits for exposure to radio waves recommended by international guidelines. The guidelines were developed by ICNIRP, an independent technical standards body, and include margins designed to assure the protection of all persons, regardless of age and health.

These guidelines use a unit of measurement known as Specific Absorption Rate, (SAR). The SAR limit for mobile devices is 2.0 W/kg and the highest SAR value for this device when tested was[1]…

Position	900MHz (W/Kg)	1800MHz (W/Kg)
Head		
Body		

As SAR is measured when the phone is on its highest transmitting power, the actual SAR of this device while operating normally is typically below the levels shown above. This is because your phone automatically changes its power level to ensure it only uses the minimum level required to reach the network.

The World Health Organization has stated that present scientific information does not indicate the need for any special precautions for the use of mobile devices.

Important safety information

For your own health and safety, please follow the radio frequency (RF) radiation exposure guidelines and keep your phone no less than 1.5cm away from your body.

Failure to do this could mean that your RF exposure exceeds the guideline limits.

How to limit your radio frequency (RF) exposure

The World Health Organization (WHO) gives the following advice to people who want to limit their exposure to RF radiation…

Present scientific information does not indicate the need for any special precautions for the use of mobile phones. If individuals are concerned, they may choose to limit their own or their children's RF exposure by limiting the length of calls, or using 'hands-free' devices to keep mobile phones away from the head and body.

Further information on the subject can be obtained from the World Health Organization website at http://www.who.int/peh-emf WHO Fact sheet 193: June 2000.

CE0700

EC Declaration of Conformity

It is hereby declared that following designated product:

Product Type: WCDMA Digital Mobile Handset

Model No.: nubia NX402

complies with the essential protection requirements of Low Voltage Directive 2006/95/EC (previous 73/23/EEC), Electromagnetic Compatibility Directive 2004/108/EC (previous 89/336/EEC), Radio and Telecommunication Terminal Equipment Directive (EC Directive 1999/05/EC), Erp directive (2009/125/EC) and their amendments.

This declaration applies to all specimens manufactured identical to the samples submitted for testing/evaluation.

Assessment of compliance of the product with the requirements relating to Low Voltage Directive 2006/95/EC (previous 73/23/EEC), Electromagnetic Compatibility Directive 2004/108/EC (previous 89/336/EEC), Erp directive 2009/125/EC (previous 2005/32/EC), Radio and Telecommunication Terminal Equipment Directive 1999/05/EC and their amendments was performed by Phoenix Testlab (Notified Body No. 0700), based on the following standards:

Safety	EN60950-1:2006+A11:2009
EMC	EN 301 489-1 V1.8.1; EN 301 489-7 V1.3.1
	EN 301 489-17 V2.1.1
Radio	EN 301 511 V9.0.2; EN 300 328 V1.7.1
Health	EN 50360:2001; EN 50332-1:2000

Care and maintenance

Your phone is a delicate device. The following advice will help you to keep it looking good and performing well…

Use a soft dry cloth to clean your phone, battery

and charger. Don't use liquids such as alcohol, dilution agents or benzene.

From time-to-time, clean the socket where the charger cable connects to the phone. Dust tends to gather there. This will ensure a really good connection.

Don't use needles, pen points or other sharp objects on the keypad or screen.

Don't use your phone with wet hands – it could injure you and damage the phone.

Don't use your phone in dusty or dirty environment.

Keep your phone away from extremes of heat – like radiators or ovens. It may explode if it gets too hot.

If your phone gets wet and the colour of the label on it changes, the warranty will be void, even if the warranty period hasn't expired.

If there's anything wrong with the phone, battery, charger, or any accessory, please send them to your nearest service centre for inspection.

Disposal of your old phone

1.When the wheelie bin symbol is attached to a product, it means the product is covered by the European Directive 2002/96/CE.

2.All electrical and electronic products should be disposed of separately from normal household waste via designated collection points provided by government or local authorities.

3.The correct disposal of electrical and electronic products will help protect the environment and human health.

FCC Statement

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired

operation.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications or changes to this equipment. Such modifications or changes could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is

connected.

- Consult the dealer or an experienced radio/TV technician for help.

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types NX402 (FCC ID:SRQ-NX402) has also been tested against this SAR limit.The highest SAR value reported under this standard during product certification for use when properly worn on the body is 1.165 W/kg and for head is 0.529 W/kg. Simultaneous RF exposure is 1.367W/Kg. This device was tested for typical body - worn operations with the back of the handset kept 10mm from the body.

To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 10mm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.
